

HO DIESEL LOCOMOTIVES

Atlas has an outstanding line of HO Locomotives. The success of these "State Of The Art" Locos is apparent by the sometimes difficult search model railroaders have in finding a desired road name a few weeks after the models arrive at local hobby stores. Please don't get discouraged! Atlas is committed to producing the finest locomotives to the highest standards that model railroaders can ask. Listed below are the latest models and roadnames for these popular Loco's.

The "Hottest" Locomotives on the right track are at your Model Railroad Hobby Store starting early 1990. The Locomotive Roadnames listed below were produced in very limited numbers—Place your order today.

#40 9" straight, brass rail #840 Nickel Silver
#45 18" radius curved, brass rail #845 Nickel Silver

36" SUPER FLEX TRACK™

Can be curved to any radius. Ideal for those realistic spiral easement curves. Easily cut to any needed length with the #400 Snap-Saw. (See page 25)

#104 Brass rail
#105 Brass rail - 5 pack
#168 Nickel-silver rail
#178 Nickel-silver rail - 5 pack

RERAILER #44 BRASS RAIL #844 N/S RAIL

Sweep of the hand places rolling stock on rails. Automatically rerails derailed equipment in hard to reach hidden areas.

#49 BRASS RAIL #849 N/S RAIL

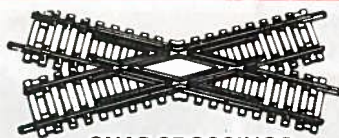

DEAD-END UNCOUPLER

For use with horn-hook style couplers provided by most manufacturers of ready-to-run rolling stock. One-way ramp uncouples cars entering siding. Equipment remains coupled when leaving siding. Not for use on "through" lines.

HO SNAP-TRACK®

You're on the right track... with Atlas

America's most popular line of ready-to-lay sectional track. Atlas' large variety of realistic and precisely made sections can have you running trains in short order. Code 100 rail on molded wood-grained ties.

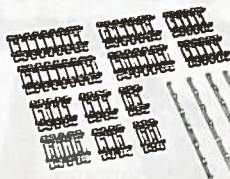

SNAP CROSSINGS

Each leg 6" long. See page 5 for Custom-Line Crossings available in many other angles of intersection.

#39 30° brass rail
#839 30° nickel-silver

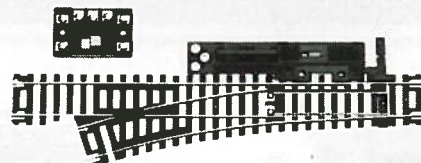

#41 90° brass rail

SNAP-TRACK ASSORTMENT

Easy way to fill short gaps in trackwork. Two each of 6 short pieces ¾", 1", 1¼", 1½", 2" and 2½".

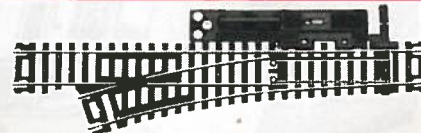

#47 BRASS RAIL
#847 N/S RAIL

SNAP-SWITCHES—REMOTE CONTROL

Packed with ½-18" radius section making curved leg equal to regular 18" radius section. Adding passing tracks and sidings is a cinch as Atlas Snap-Switches will fit wherever you have 9" straight or 18" radius curved sections. Remote control Snap-Switches include switch machine, control box, hook-up wire and identification numbers.

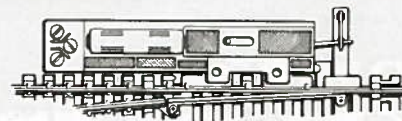

#50 Lefthand, brass rail #51 Righthand, brass rail
#850 Lefthand, nickel-silver #851 Righthand, nickel-silver

SNAP-SWITCHES—MANUAL

Manual Snap-Switches are easily convertible to remote control with #52LH and #53RH Switch Machines.

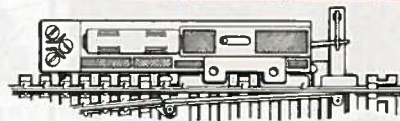

#60 Lefthand, brass rail #61 Righthand, brass rail
#860 Lefthand, nickel-silver #861 Righthand, nickel-silver

SWITCH MACHINES—REMOTE CONTROL

Snap-on switch machines will convert any Atlas manual switches to remote control in no time at all.

#52 Lefthand #53 Righthand

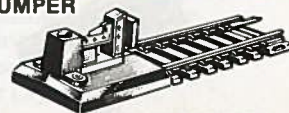

SWITCH MACHINES—MANUAL

For manual operation of switches located near control panel or other easily reached locations not requiring remote control operation.

#62 Lefthand #63 Righthand

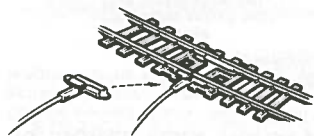

REALISTIC WAY TO KEEP YOUR EQUIPMENT FROM ROLLING OFF THE ENDS OF SIDINGS. OVERALL LENGTH 3 3/8".

#43 BRASS RAIL

#843 N/S RAIL

TERMINAL JOINERS

#42 Brass
#842 Nickel Silver

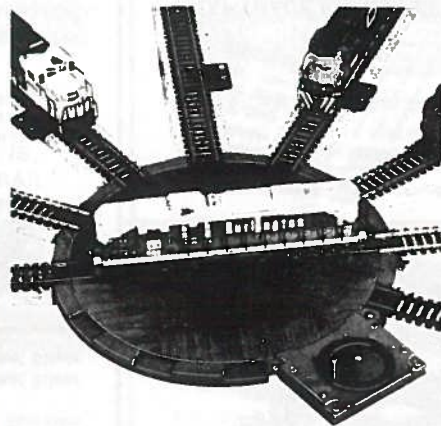

Easiest way to make power feeder connections to trackwork just about anywhere on layout. No soldering required.

HO SNAP-TRACK®

#100 ROADBED

Bevel edged, rubber-plastic roadbed in 3' lengths. Adds much to realism and reduces trackboard rumble. Curvable to any track radius.

#302 TURNTABLE—MANUAL

Fully assembled 9" diameter turntable indexes precisely to 11 positions 30° apart. Absolutely no "hunting" required. Surface mount; no cutting necessary. Manual crank operation; can be very quickly motorized for remote control operation with the #301 Turntable Drive Unit shown at right.

#301
TURNTABLE DRIVE UNIT

Quickly attaches with just two screws to convert the Atlas #302 Turntable to remote control, motorized operation.

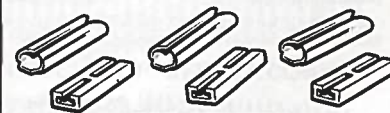

HO RAIL—SOLID "T" SHAPE

Code 100 rail for do-it-yourself track and turnout builders. Three-foot lengths in 99-foot bundles.

#101 Brass, 99' bundle
#102 Nickel-Silver, 99' bundle
#802 9" long N/S Rail
(Replacement for turntables, bridges, etc.)

HO

Custom-Line

CROSSINGS

SEVEN PRECISELY ENGINEERED angles of intersection provide an easy solution to just about any crossing requirement. For scissors crossovers, use either the 25° crossing with #4

Custom-Line Mark 2 Turnouts or the 19° crossing with #6 turnouts. The 12 1/2° and 19° crossings are especially suited for junctions between double-track mainlines. A wide variety of single and

double-track wyes, along with numerous other useful arrangements, appear in the *Track Planner* section at the back of Atlas' *Custom-Line Layouts* book.

 #234 Righthand #264 Righthand

THE MARK 2 Custom-Line Turnout replaces our well known and popular Custom-Line and Custom-Line Supreme Turnouts while retaining and combining the very best features of both older lines.

- **METAL FROGS** put an end to frog point wear on busy layouts. Best of all, when hooked up with the new Atlas #200 SNAP RELAY, described on page 25, the frog will be powered thus eliminating the old stall-causing dead spot common to all plastic frog turnouts.

- **SWITCH MACHINES** snap on or off in a matter of seconds allowing modeler to opt for concealed under-the-table mounting or a manual ground throw. Mark 2 Turnouts will accept older Atlas screw-mounted switch machines.

- **DIMENSIONALLY THE SAME** as earlier Custom-Line and Custom-Line Supremes, the new Mark 2's can be intermixed with the older turnouts without problem.

NEW

#65 UNDER-TABLE SWITCH MACHINE

Designed for use with all ATLAS HO SNAP SWITCHES and MARK 2 TURNOUTS. (May be used with ATLAS N SCALE SWITCHES).

#83 WARREN TRUSS KIT

Assembles in minutes into authentic through truss. Floor system contains built-in track. Measures 9" x 2" x 2 1/2".

#84 DECK TRUSS KIT

Fun-to-build kit quickly assembles into realistic deck truss. A string of several of these handsome bridges makes a genuinely impressive railroad scene. Floor system contains built-in track. Measures 9" long x 1 3/4" wide x 2 1/4" high.

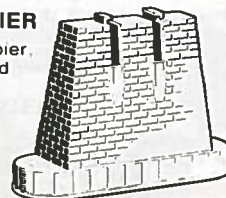

#85 PLATE GIRDER

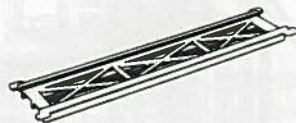

Striking replica of scale 65' through plate girder bridge with steel plate floor system. Assembled, ready to install including track. Measures 9" long.

#81 3" BRIDGE PIER

Cut stone masonry pier, 3" high, supports and securely aligns all Atlas bridges and track by means of rugged snap-lugs.

HO BRIDGES & PIERS *

#82 PIER GIRDER

Adds realism and strength to end supported track on piers spaced 9" apart. Ideal where intermediate support piers must be omitted to permit passage of track.

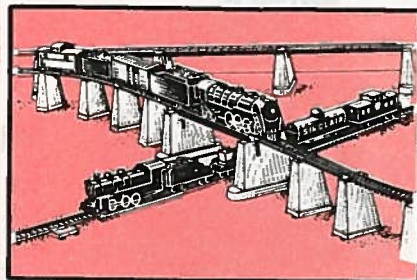

#86 PONY TRUSS

This finely detailed, simple to construct bridge kit is suitable for any ATLAS layout. Its 9" length substitutes exactly for a 9" section of SNAP-TRACK.

#87 CURVED CHORD

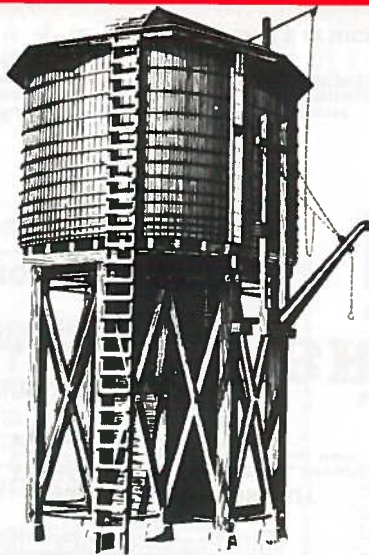

A full 18" long, this bridge meets the need for a big bridge without overpowering a layout. Both #86 and #87 are easily adaptable to ATLAS Bridge piers.

#80 OVER 'N UNDER PIER SET

Forty-six stone masonry piers and a #82 Pier Girder. Piers are graduated in height from 1/2" to 3" by 1/4" increments with 1/8" snap-in shims provided for intermediate piers. Approximate grades up and down in figure-8 arrangement using 18" radius curves is 2.6%.

* ALSO AVAILABLE IN NICKEL SILVER, SEE PAGE 28

#703 WATER TOWER

The all-time best selling HO water tank and for good reason. Absolutely authentic down to the smallest detail including the padlock on the roof trapdoor.

#750 LUMBER YARD & OFFICE BUILDING

You will want to locate this nifty piece of modeling craftsmanship along your most prominent industrial siding. Devotion to authenticity bordering on fanaticism is evident in detailing which includes a radial-arm power saw and hand tools usually to be found around a lumber yard's saw table.

HO TRACKSIDE STRUCTURES

#701 ELEVATED GATE TOWER

Provides just the right railroad atmosphere at your grade crossings with its typical clutter of detail even down to such items as coal scuttle and lamps.

#760 ROADSIDE RESTAURANT

You'll enjoy a long evening's fun assembling this little beauty whose 'gnat's eyebrow' detailing includes even such mundane items as the refuse cans around back.

#707 STATION PLATFORM (set of 2)

A perfect companion piece to the #706 Passenger Station. Use it to lengthen the station platform or to provide an across-the-tracks shelter opposite your station.

Featured on these two pages is the Atlas premier line of trackside structure kits. Made in the U.S. to strict American prototype and super-detailed to satisfy the fussiest modeler with absolutely no concessions to manufacturing convenience or economy. All parts precision molded in appropriate colors. Kits include easy-to-follow instructions, decals and printed window glazing where required. Fun and really satisfying to assemble; try one and you'll be back for the rest.

#706 PASSENGER STATION

An exquisite model with a host of realism-heightening details such as a baggage wagon loaded with express and luggage, freight scale and dolly and even a phone booth complete with tiny phone inside.

#702 TRACKSIDE SHANTY

Typical of the countless unpretentious little shanties to be found in any number of railroad scenes. All the finishing touches including the checkers-playing crew seated on their salvaged orange crate chairs.

#705 TELEPHONE SHANTY & POLE

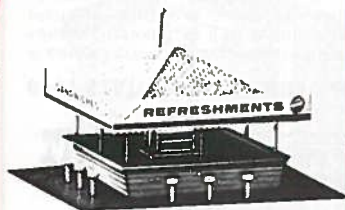

Provides just the right touch beside that lonely branch or siding turnout along the main.

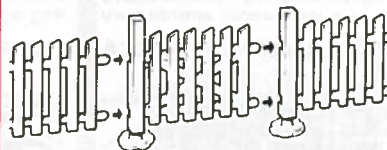

#704 SIGNAL TOWER

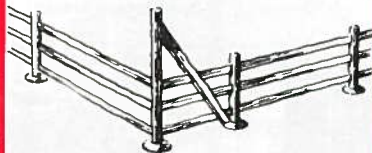

A pleasant evening's fun provide a model of contest-quality detailing which includes such niceties as partially open window sashes with window shades, some in disreputable condition, drawn to various heights.

#8 BASIC GUIDE TO MODEL RAILROADING

HOW-TO-DO-IT BOOKS BY ATLAS

From simple oval with sidings to elaborate room-size walkins, if your HO layout is to be built with sectional track, you can't find a better way to start than with an Atlas book. Illustrated with hundreds of photos and drawings, these authoritative manuals will help you steer clear of discouraging errors. In addition to layout plans with full wiring information you'll find chapters on benchwork and scenicking. Best of all, every necessary track item called for is always available from Atlas.

#9 BLUEPRINTS FOR HO SNAP-TRACK LAYOUTS REVISED

Best choice for HO beginners. Twelve excellent layouts all buildable on easily available standard plywood panel sizes.

#11 HO CUSTOM LINE LAYOUTS 2nd Edition

Second edition of all-time best seller since 1957. Complete instructions for ten all different layouts plus seven pages of track planning templates with which a beginner can design a layout of any complexity and be sure it will work.

#12 WIRING YOUR LAYOUT 3rd Edition

Easy to follow text and drawings show how to wire just about any track arrangement using the various popular Atlas control components shown on page 20. Turnouts, sidings, wyes, reverse loops, turntables and all manner of other model railroad electrical questions are fully covered.

#13 SIX HO RAILROADS 2nd Edition

Six great fully tested model railroads. Completely illustrated step-by-step instructions cover every stage of construction including benchwork, tracklaying, wiring and scenery.

#14 KING SIZE HO RAILROADS PLAN BOOK

Measures 34" across when opened. Large photos and 2" to the foot (1/4th full size) plans give you a real feel for six superb entirely different model railroads. From benchwork through scenery every step of the way is covered in detail.

#2501 STRAIGHT (5") SNAP-TRACK

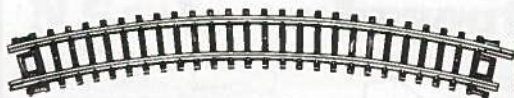

#2509 SNAP-TRACK ASSORTMENT

Contains two 2½", four 1¼" and four ¾" sections
Easiest way to fill short gaps in sectional track lay-
outs

#2532 RERAILER TRACK SECTION

Sweep of the hand places rolling stock on track
Automatically rerails derailed equipment in hard to
reach hidden areas

CURVED SNAP-TRACK

- #2510 9¾" Radius Full Section
- #2511 Half Section 9¾" Radius
- #2520 11" Radius Full Section
- #2521 Half Section 11" Radius
- #2526 19" Switch Rad (24 Sections/circle)

#2500 SUPER - FLEX TRACK™

Curvable to any radius. Ideal for spiral easement
curves. Easily cut to any needed length with a #400
Snap-Saw (See page 26)

USA SERIES

SWITCHES - MANUAL & REMOTE

- #2580, 2580-1 Lefthand Standard Remote Control
- #2581, 2581-1 Righthand Standard Remote Control
- #2582, 2582-1 Lefthand Standard Manual Control
- #2583, 2583-1 Righthand Standard Manual Control
- #2584 No. 6 Lefthand Remote Control
- #2585 No. 6 Righthand Remote Control

The -1 series denotes new ATLAS manufactured USA
switches.

Remote control switches include the #56 Switch Control Box
shown below.

Manual Switches #2582 and #2583 can be converted to remote
control with Switch Machines #2590 (lefthand) and #2591
(righthand). #2582-1 and #2583-1 can be converted to remote
control with Switch Machines #2590-1 and #2591-1, shown
below.

SWITCH MACHINES—REMOTE CONTROL

- #2590 Lefthand
- #2590-1 Lefthand
- #2591 Righthand
- #2591-1 Righthand

NOTE: All twin-coil switch machines must be con-
trolled by a normally-off, momentary contact switch.
Using any control device of other than momentary
contact type will cause burn-out failure of the ma-
chines solenoid coils. Switch machines are not war-
ranted against burn-outs thus caused. The #56
Switch Control Box is recommended.

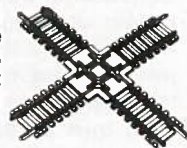

#56 SWITCH CONTROL BOX

Single pole, double
throw momentary ac-
tion for control of
Atlas (or other twin-
coil) switch machines.
Button position indi-
cates switch setting. Can be coupled to-
gether in any number without wiring. Switch
identification labels included.

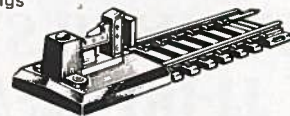

CROSSINGS - 15°, 20°, 30°, 45°, 60°, 90°

Joining the popular ATLAS
90° crossing is a complete
line of crossings that allows
the modeler the widest
possible choices of track
crossing arrangements.

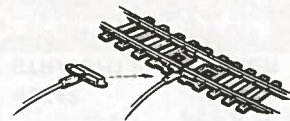

- 2564 - 15°
- 2565 - 20°
- 2566 - 30°
- 2567 - 45°
- 2568 - 60°
- 2569 - 90°

Realistic way to keep your
equipment from rolling
off the ends of sidings
Overall length 2¾"

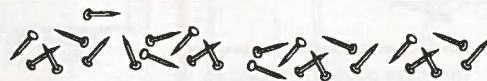

#2536 SNAP-TRACK BUMPER

#2539

TERMINAL
JOINERS

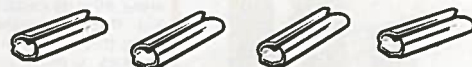

Easiest way to make power connections to track-
work just about anywhere on layout. No soldering
required.

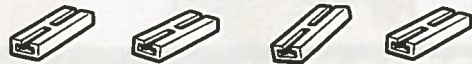

#2540 TRACK NAILS (ALSO FOR HO)

Just the right size for fastening down sectional track.
Approximately 400 nails per package

HO STARTER SET

NEW PACKAGE

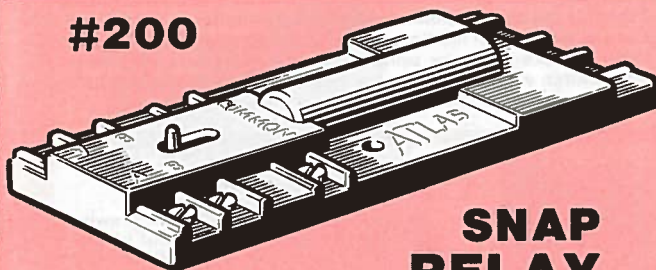

#88 NICKEL SILVER STARTER SET

Starting a model railroad layout? For a rewarding experience, try the new Atlas HO Starter Set! It's a "snap" to assemble because the Starter Set is made up of "Snap-Track", a proven model track system developed and manufactured exclusively by Atlas. Ideal in size, the Starter Set contains enough track for a 40" x 56" layout with 2 sidings.

SAME PRODUCT, NEW PACKAGE

ELECTRICAL

#200

SNAP RELAY

a double-pole, double-throw relay with actuating mechanism driven by momentary-power, twin coil solenoid.

WHAT IT WILL DO

With just a few simple connections this little (1-5/16" x 3-9/16") device, which can be mounted anywhere, will perform all sorts of tricks for you:

- **POWER THE FROGS** on Atlas' new Mark2 Turnouts. No more hesitation or stalling on dead turnout frogs.
- **TRACKSIDE SIGNAL LAMPS** to show turnout point position in yards.
- **CONTROL PANEL LAMPS** to show settings of remotely located turnouts.
- **SELECTIVE SIDING CONTROL.** Sidings are powered only when points are aligned for siding. Siding remains "dead" when points are set for the mainline.
- **CONTROL X-SECTIONS** automatically. This very useful track arrangements is thoroughly discussed in the 3rd Edition of the Atlas "Wiring" book.

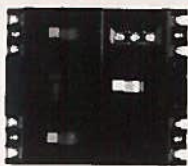

ELECTRICAL CONTROLS

Probably the most popular control panel switches in model railroading. Consist basically of multiple sets of the most often needed switch types internally pre-wired by printed circuitry. Eliminate all behind-panel, inter-switch wiring; you just run connections to the tracks. All are flush mounting; no need to drill large holes in panel.

#215 SELECTOR

Four single-pole, double-throw switches provide two-cab operation for four blocks. May be ganged together in any number for control of additional blocks without inter-switch wiring. Can be used as area selectors for four-cab operation. Couples with #220 Controller below.

#220 CONTROLLER

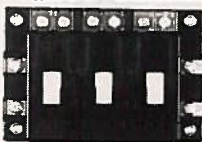

Simplest way to wire and control tricky reversing loops, wyes and turntables. Has reversing switches for two mainline cabs plus a switch, selectable by either cab, for directional control on reversing loops, etc. Couples with #215 Selectors above.

#210 TWIN

Two DPDT switches in parallel. Useful for reversing section and turntable control on single-cab layouts plus many other applications.

#205 CONNECTOR

Three SPST on-off switches in parallel. Use to control power to sidings, accessories, etc. Can be ganged (coupled) together in any number.

#56 SWITCH CONTROL BOX

Single pole, double throw momentary action for control of Atlas (or other twin-coil) switch machines. Button position indicates switch setting. Can be coupled together in any number without wiring. Switch identification labels included.

#400 SNAP-SAW

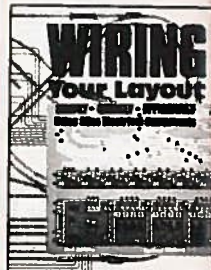

A long lasting, all-purpose saw for model builders. Extra-fine teeth make razor smooth cuts in wood, plastics, brass, nickel-silver, etc. Ideal for making short track-filler sections.

C199 FORMULA XX MOTOR LUBE

Ideal for model railroad equipment. Won't dry out or gum. Safe for plastics. Use on motor shaft bearings, axles, etc.

#12 WIRING YOUR LAYOUT

Easy to follow text and drawings show how to wire just about any track arrangement using the various popular Atlas control components shown on this page. Turnouts, sidings, wyes, reverse loops, turntables and all manner of other model railroad electrical questions are fully covered.

FEATURES:

- All metal die cast chassis.
- Powerful 5 pole flat can motor
- Superb fidelity to prototypical detail
- A heavyweight with excellent tractive effort and pulling power
- Dual flywheels that provide a remarkably smooth running mechanism
- Simply designed coupler pocket for easy installation of Kadee® couplers
- Undecorated chassis is painted black.

FEATURES

- Fine prototypical detail
- Strong, smooth 5 pole motor
- Dual brass flywheels
- Lighted and printed number boards
- 8 wheel drive
- Geared for low speed and pulling power
- Heavy metal cast main frame
- Weight - .88 lbs. (heavier than most S-2 brass models)
