Atlas Model Railroad Company is celebrating its 50th Anniversary as a manufacturer of model railroad track, trains and accessories. Atlas has a proud tradition as a family-owned business with a reputation for quality and excellence.

Atlas Tool & Die Company began as a general tool and machine shop, founded by Stephan Schaffan, Sr., in the 1920's. Schaffan, a master Czechoslovakian toolmaker who immigrated to the United States in the early part of the 20th century, worked out of his Newark, NJ garage to create dies and machinery for a few customers. In the 1930's his son, Stephan Schaffan, Jr. ("Steve"), entered the business, which eventually moved to Florence Avenue in Hillside, NJ.

After several years, Steve was asked to develop a fixture to solder model railroad turnouts together. Steve subsequently invented the first practical rail joiner, and soon realized that he could actually make a living selling track and related products. In 1949, Atlas Tool Co. was officially incorporated and "Atlas", the model railroad manufacturer, was born.

Steve went on to be a worldwide leader and an innovator in the hobby. He created such masterpieces as world renowned Super-Flex® Track, Snap-Switches®, Custom-Line® Turnouts and more. Steve's efforts in Europe, Asia and the United States brought model railroading to a new level, and hobbyists have him to thank for the reliability and durability they enjoy in Atlas track, even to this day.

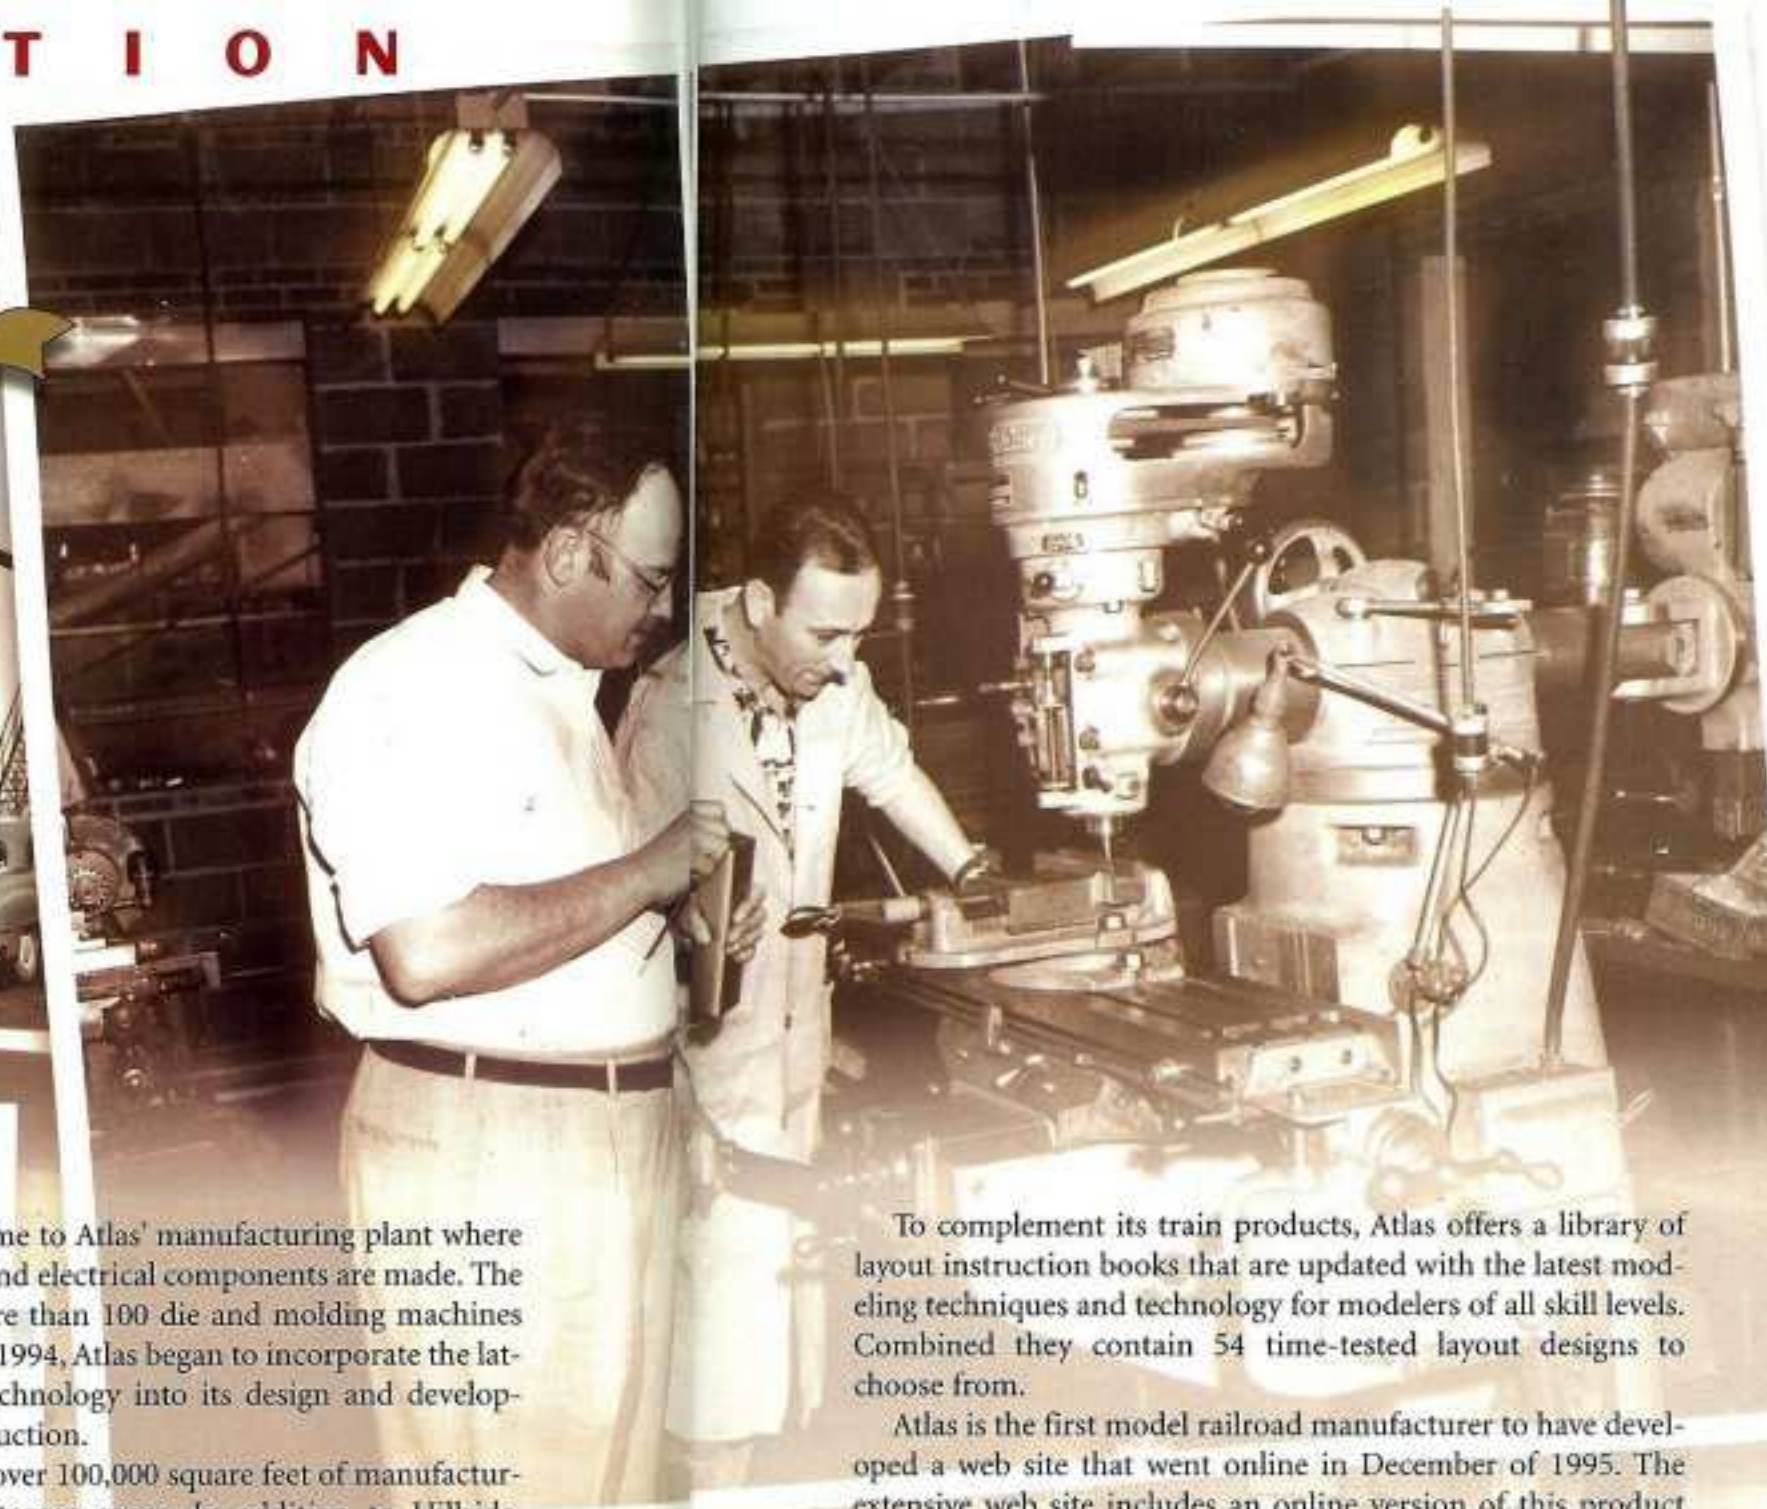

In 1985, Steve was honored posthumously for his landmark inventions by the Model Railroad Industry Association and was inducted into the Model Railroad Industry Hall of Fame in Baltimore, Maryland.

Hillside, NJ is home to Atlas' manufacturing plant where all track, structures and electrical components are made. The factory contains more than 100 die and molding machines that are run daily. In 1994, Atlas began to incorporate the latest in CAD/CAM technology into its design and development phases of production.

Overall Atlas has over 100,000 square feet of manufacturing, shipping and storage space. In addition to Hillside, excess manufacturing capacity is produced in Europe and Asia. The goal in each place is the same: to produce top quality, affordable items that meet and exceed the highest standards of the model railroading industry.

Over time Atlas has expanded their product line to include much more than just track. There are now Atlas products available for almost every aspect of HO and N scale model railroading. In N scale, Atlas has spent over 20 years developing a collection of over 30 freight car types in more than 160 roadnames, to create over 450 cars, each with fine detailing and quality painting and printing. 1994 saw Atlas expand its HO line to include freight cars. The line now includes ten different freight car types, all of which come ready-to-run. Atlas will continue to expand both their HO and N scale line of freight cars in the future.

Atlas HO and N scale locomotives are noted for their prototypical, fine details, printing, reliability, excellent throttle response, and smooth operation at slow speeds. To power layouts on which these locomotives run, Atlas produces a variety of electrical components accompanied by clear, concise instructions designed to make wiring easy for both inexperienced and accomplished modelers.

To complement its train products, Atlas offers a library of layout instruction books that are updated with the latest modeling techniques and technology for modelers of all skill levels. Combined they contain 54 time-tested layout designs to choose from.

Atlas is the first model railroad manufacturer to have developed a web site that went online in December of 1995. The extensive web site includes an online version of this product catalog, the ever-popular Fantastic Layout Booklet, Right Track Software updates, an interactive discussion board, searchable Atlas retailer database and much more. Overall, the site has proved instrumental in keeping customers, retailers and distributors updated the latest news and information from Atlas. In addition, it has provided an easy and cost-effective way of reaching international Atlas customers.

Although the manufacturing plant, warehouse and some administrative offices remain at 378 Florence Avenue in Hillside, NJ, Atlas relocated its corporate headquarters to 603 Sweetland Avenue, Hillside, in May of 1998. Steve Schaffan's only child, Diane, is president and her husband, Tom Haedrich, is CEO and oversees day-to-day operations.

By keeping up the high standards set by Steve Schaffan 50 years ago, Atlas will remain a leader in innovation and technology in the model railroading industry for years to come. Although many things have changed since our incorporation in 1949, we follow the tradition and values of our founders. As we have for the last 50 years, we will continue to produce quality, precision products for the model railroad enthusiast.

HO SCALE

vs.

N SCALE

vs.

O SCALE

The most popular question asked by new model railroaders is "What's the difference between the scales available?" Here's some information to help you learn more about model railroad "scales."

PROPORTION AND SIZE

It's easy to define the various scales in terms of a ratio. N is 1:160 the size of real trains, HO is 1:87, and O scale is 1:48. This means, for example, that HO is 1/87th as long as its prototype, 1/87th as tall, and in every dimension its proportions are 1:87. In terms of actual size, HO scale locomotives and freight cars, depending on the type (whether it's a switcher engine or a more modern GE locomotive, for example) could range anywhere from 5" to 9" long and about 2" high. The track is 1 1/8" wide. N scale is just about half the size of HO, with locomotives and cars measuring about 3" to 4" long and 1" high, and the track 5/8" wide. O scale is the biggest of the three, with locomotives being anywhere from one to two feet long, and about 5"-6" high; the track is about 2-1/4" wide. If you are familiar with classic Lionel trains, then you know what size O is.

PRODUCT AVAILABILITY

Since HO is the most popular scale (by definition of the most modelers engaging in it), it's the scale that enjoys the greatest variety of available products. N scale is second to HO, and has picked up speed in the race for popularity over the past ten years. The variety of products available in N scale

therefore follows close behind HO. O gauge, on the other hand, services a more limited market and is offered by a select few companies, limiting the variety of products available. However, Atlas O, LLC has added significantly to the amount and type of products available for O modelers everywhere. To order an Atlas O catalog, please call (908) 687-9590.

PRICING

Contrary to what might seem logical, there is no ratio between price and size when it comes to scale models. HO

and N scale tend to be in the same price range when it comes to locomotives; however HO freight cars are about twice as expensive as N scale. In contrast, O products are significantly more expensive than both HO and N due not only because of its size, but because of the smaller market, type of detail and auxiliary features (like sound) that are the cornerstone of O railroading.

OPERATING ABILITY

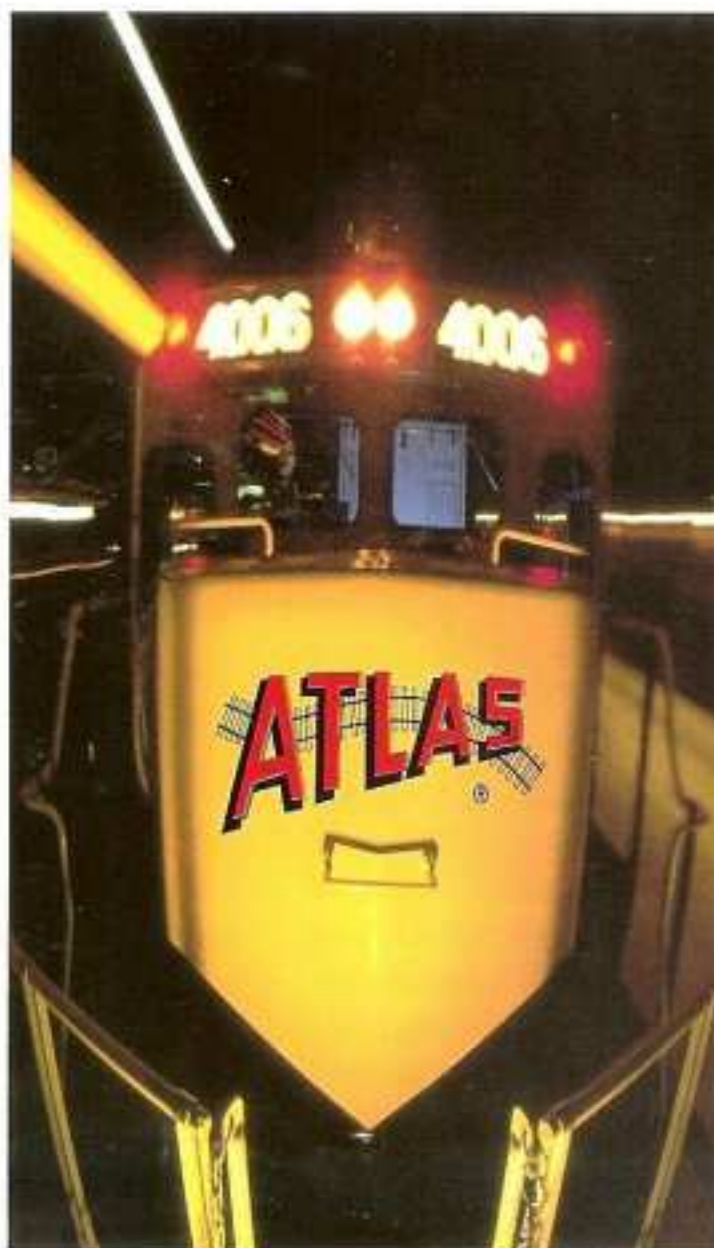

Because of its minute size, N scale tends to be considered the "operating scale," enabling you to fit a complex layout with lots of operating capability into a small space. HO takes up a lot more space, but some consider it to be a more reasonable size to handle. HO tends to offer just as much operation ability as N, it just requires a larger area to do it in. O scale layouts tend to be less complex, but no less fun, since they generally incorporate sound operating accessories and other such functions which make operation exciting and very life-like.

So, if you're looking for HO and N scale, please see the following pages for a variety of fine-quality, prototypical products designed, developed and manufactured by Atlas Model Railroad Company, Inc.

LAYOUT PLANNING SOFTWARE FOR MODELERS

#370 ATLAS RIGHT TRACK® SOFTWARE

\$34.95* (For PC's only)

NEW VERSION 4.0!

The Right Track Software has become a popular layout design tool for modelers of all skill levels. Version 4.0 of RTS has been enhanced to include features our customers asked for. As always, the program allows you to use Atlas track, switches, buildings and electrical components (and buildings from other manufacturers) to design the layout you've always wanted. You can draw in your benchwork, place and connect track, add elevations, helices, parallel tracks, transition curves, roadbed, and much more! You can print your layout in any size, and even print a list of materials used so you can take it to your local hobby store for reference. It's easy to use and fun to use too! Includes an online manual and free technical assistance by phone, fax and email.

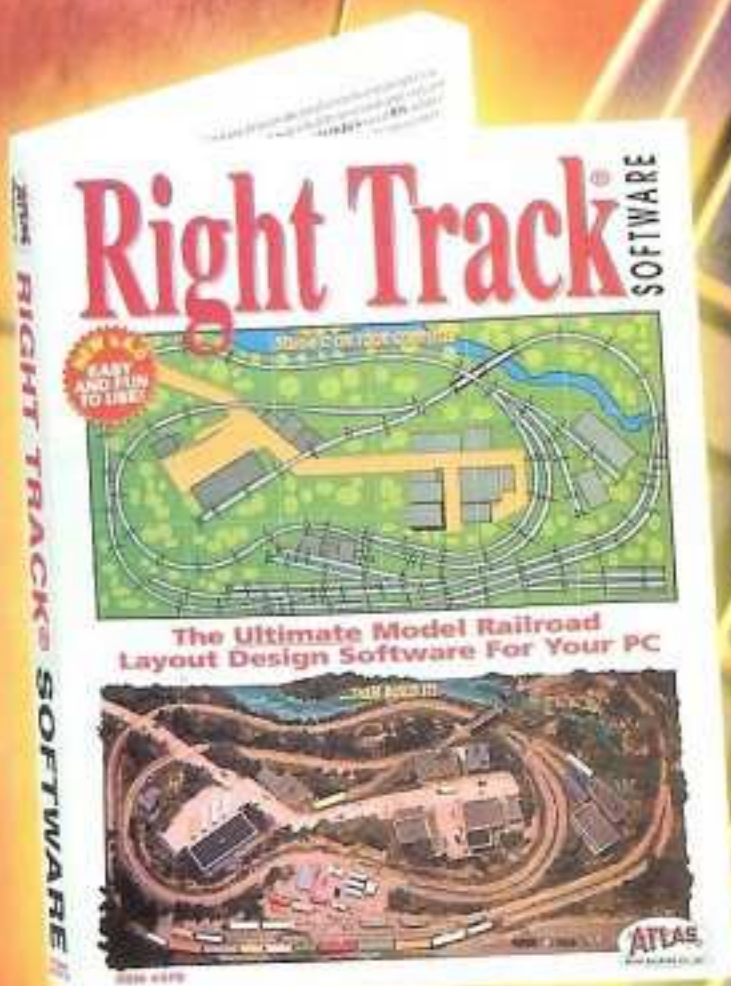

New features include:

- NEW ATLAS O[®] TRACK & STRUCTURE LIBRARIES!
- Location of parallel tracks can now be defined
- Elements can be fixed to benchwork
- Visible track ties
- Ability to create crossovers and ladders
- Flex track gradients can now be calculated
- Ability to search and replace elements
- Several undo steps (adjustable)
- Color can be added to elements according to layer number or height
- Zoom function made easier
- "Stock List" allows you to enter items you already have, and program will then calculate items you still need
- Autosave function

AND MUCH MORE!!!

System Requirements: PC with 386SX or better, Windows '95 or '98, floppy drive, 5MB hard drive disk space, 4MB RAM (8MB recommended), mouse and VGA monitor.

*Upgrade for previous 3.x versions must be ordered from Atlas (\$9.95 - includes shipping).

THE ATLAS LIBRARY

#371 THE ENTIRE ATLAS LIBRARY NOW ON ONE CD-ROM!

\$19.95 (For PC's only)

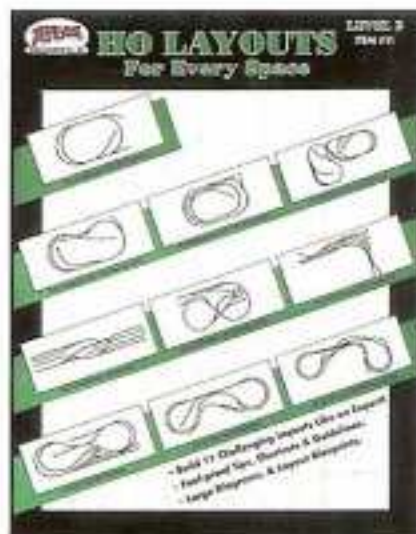

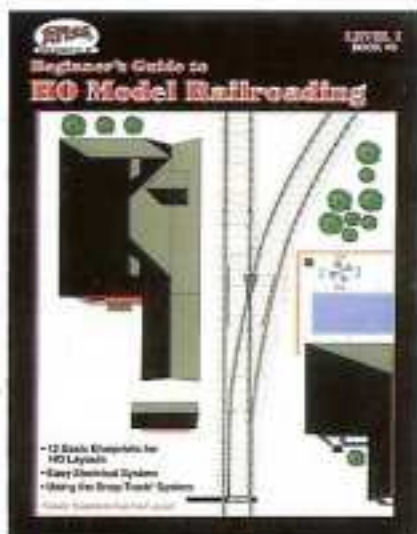

Now, all on one interactive CD, you can view every Atlas HO and N scale layout instruction book, The Complete Wiring Book, Parts Catalog, and the 1998 Atlas Catalog. That's over 8 books in all! If you purchased all the books separately they would cost \$39.65, making this product a great value.

The CD-ROM version of each book includes all the text, blueprints, figures, diagrams and materials lists. "Jump hooks" allow you to quickly look up additional information about a topic you come across in the text (provided it is available within one of the other books). So when you're reading about reverse-loop wiring in the text of one of the actual layout plans you will be able to click and be transported to the Wiring Book for additional detailed information on that topic. Understanding and planning your layout will be easier than ever before with this new CD-ROM product. Based on Logos Library Software, a popular concept in CD-ROM books.

HO LAYOUT INSTRUCTION BOOKS

To help you get started building a layout that suits you, Atlas offers layout instruction books for beginner, intermediate & advanced model railroaders. Each layout book is aimed at a specific skill level and contains a variety of interesting railroad plans along with step-by-step instructions on building a layout table, laying down roadbed and track, wiring and scenery techniques for each layout.

#9 BEGINNER'S GUIDE TO HO MODEL RAILROADING

\$3.95
 Beginner (Level 1)
 44 pages
 Layouts HO-1 - HO-12

#11 HO LAYOUTS FOR EVERY SPACE

\$4.95
 Intermediate (Level 2)
 52 pages
 Layouts HO-13 - HO-23

#13 SEVEN STEP-BY-STEP HO RAILROADS

\$4.95
 All Skill Levels (Levels 1-3)
 52 pages
 Layouts HO-24 - HO-30

#14 HO KING-SIZE PLAN BOOK

\$6.95
 Advanced (Level 3) 68 pages
 Layouts HO-24 - HO-30
 Four track plans in the #14 book fold out to become 11" x 17". This format makes them easy to see and follow.

From the Collection of "HOseeker"

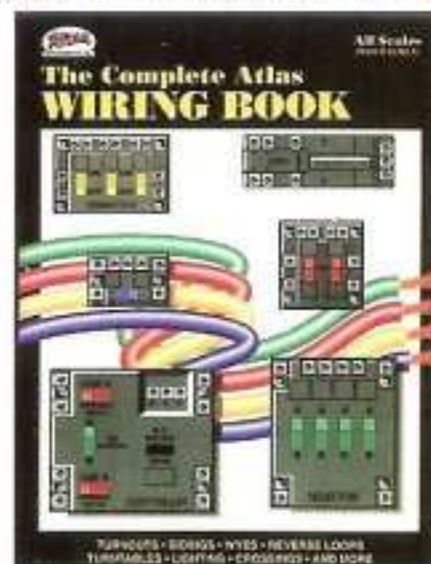

REFERENCE BOOKS FOR ALL SCALES

#3 PARTS CATALOG

\$5.00

Contains exploded diagrams of Atlas locomotives with part numbers labeled for easy identification. Complete list of available parts and prices for all locomotives, freight cars, and miscellaneous products. Some assembly, repair and maintenance information included. Easy parts order form and ordering instructions provided. If you own or plan to buy an Atlas locomotive, this manual is a MUST.

#12 THE COMPLETE ATLAS WIRING BOOK

\$4.95

All Skill Levels 56 pages

Atlas' Electrical Wiring System is made easy through step-by-step instructions on how to install and use our quality components on any layout. Starts beginners with the basics of wiring, and takes advanced modelers through complex wiring operations. Over 100 diagrams complemented by a complete glossary.

#361 HO TRACK PLANNING TEMPLATES

\$3.95

(Contains the entire Atlas HO scale track line)

With Atlas Track Planning Templates, beginners can visualize the size and shape of their layout before they begin building;

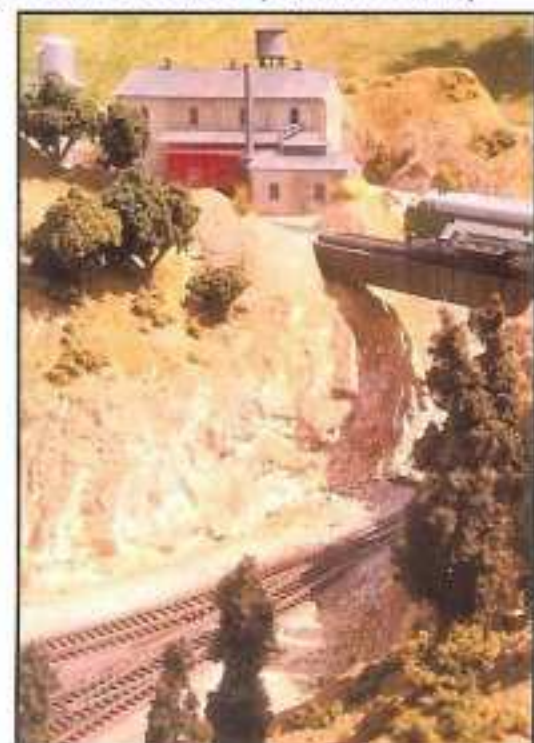

advanced modelers can determine whether or not a complex layout design will fit together the way they planned. The templates are exact paper replicas of all of the currently available Atlas track, switches, bridges, piers and viaduct. Each template can be copied on a copy machine to produce the amount of track pieces needed for a given layout. The templates can then be cut out and positioned, like pieces of track, into the desired layout shape.

Learn How To Build A Model Railroad By Video!

The Apple Valley Branch HO layout designed by *Model Railroader Magazine* was built by internationally respected modelers, for this 10-tape series. Included are instructions on how to lay Atlas track, wire your layout for Digital Command Control, and much more! Use the information on the tape to build a complete model railroad in any scale. Videos produced by Green Frog Productions, Marietta, GA.

Buy the *Building A Model Railroad* video series at a great price, or each video separately (listed below).

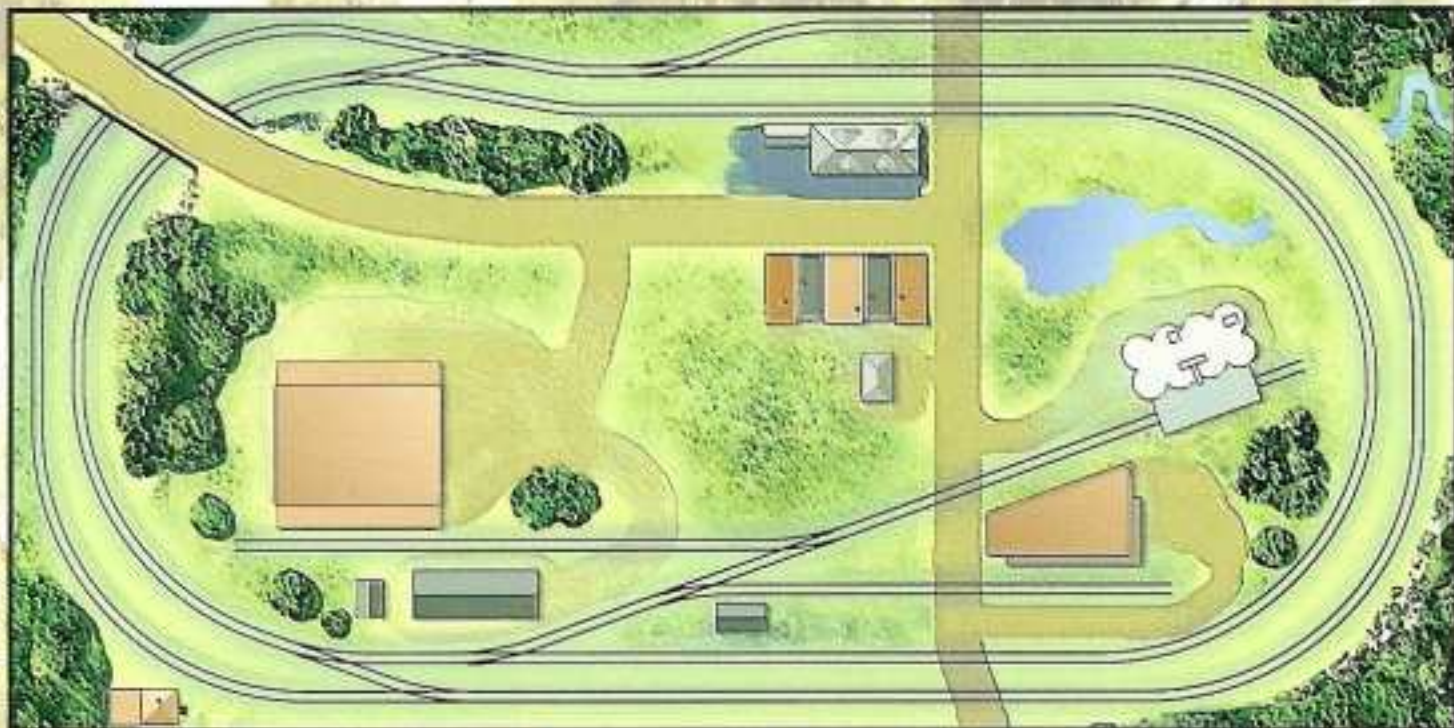

BUILDING A MODEL RAILROAD VIDEOS		
Item#	Tape Name	Price
379	Ten-Tape Series (a \$129 value)	\$109.95
380	Designing the Apple Valley Branch	\$12.95

EXCITING LAYOUT PACKAGES TO HELP YOU GET STARTED QUICKLY

Atlas has designed and tested 36 different, exciting HO layout configurations using Atlas Snap-Track®, Custom-Line® Track, Super-Flex® Track, bridges and piers. On the next few pages is a sample of the plans that have become the most popular over the years. You may ask your local Atlas retailer to put the necessary materials together for you. Materials list, detailed plan and building instructions can be found in one of our four HO layout instruction books (pg. 4).

If you wish to see all 36 Atlas HO layout plans, please ask your local retailer for a free Fantastic Layout Booklet which contains highlights of each layout. If your retailer does not have one available, please call Atlas directly to request one.

LAYOUT HO-6

The Trunk Line \$185.75
with **Power Pack** \$220.70
with optional second **Power Pack** \$255.65

Skill level: Beginner

This plan, instructions & a detailed list of "Atlas Products Required," can be found in Book #9: Atlas' Beginner's Guide to HO Model Railroading (See pg. 4)

Summary of Atlas products included in package:

- Over 72 pieces of track (including bumpers & rerailers)
- 8 Remote Snap-Switches®
- 2 Selectors
- Necessary amount of rail joiners & track nails

LAYOUT HO-10

The Yardmaster \$164.95
with **Power Pack** \$199.95
with optional second **Power Pack** \$234.90

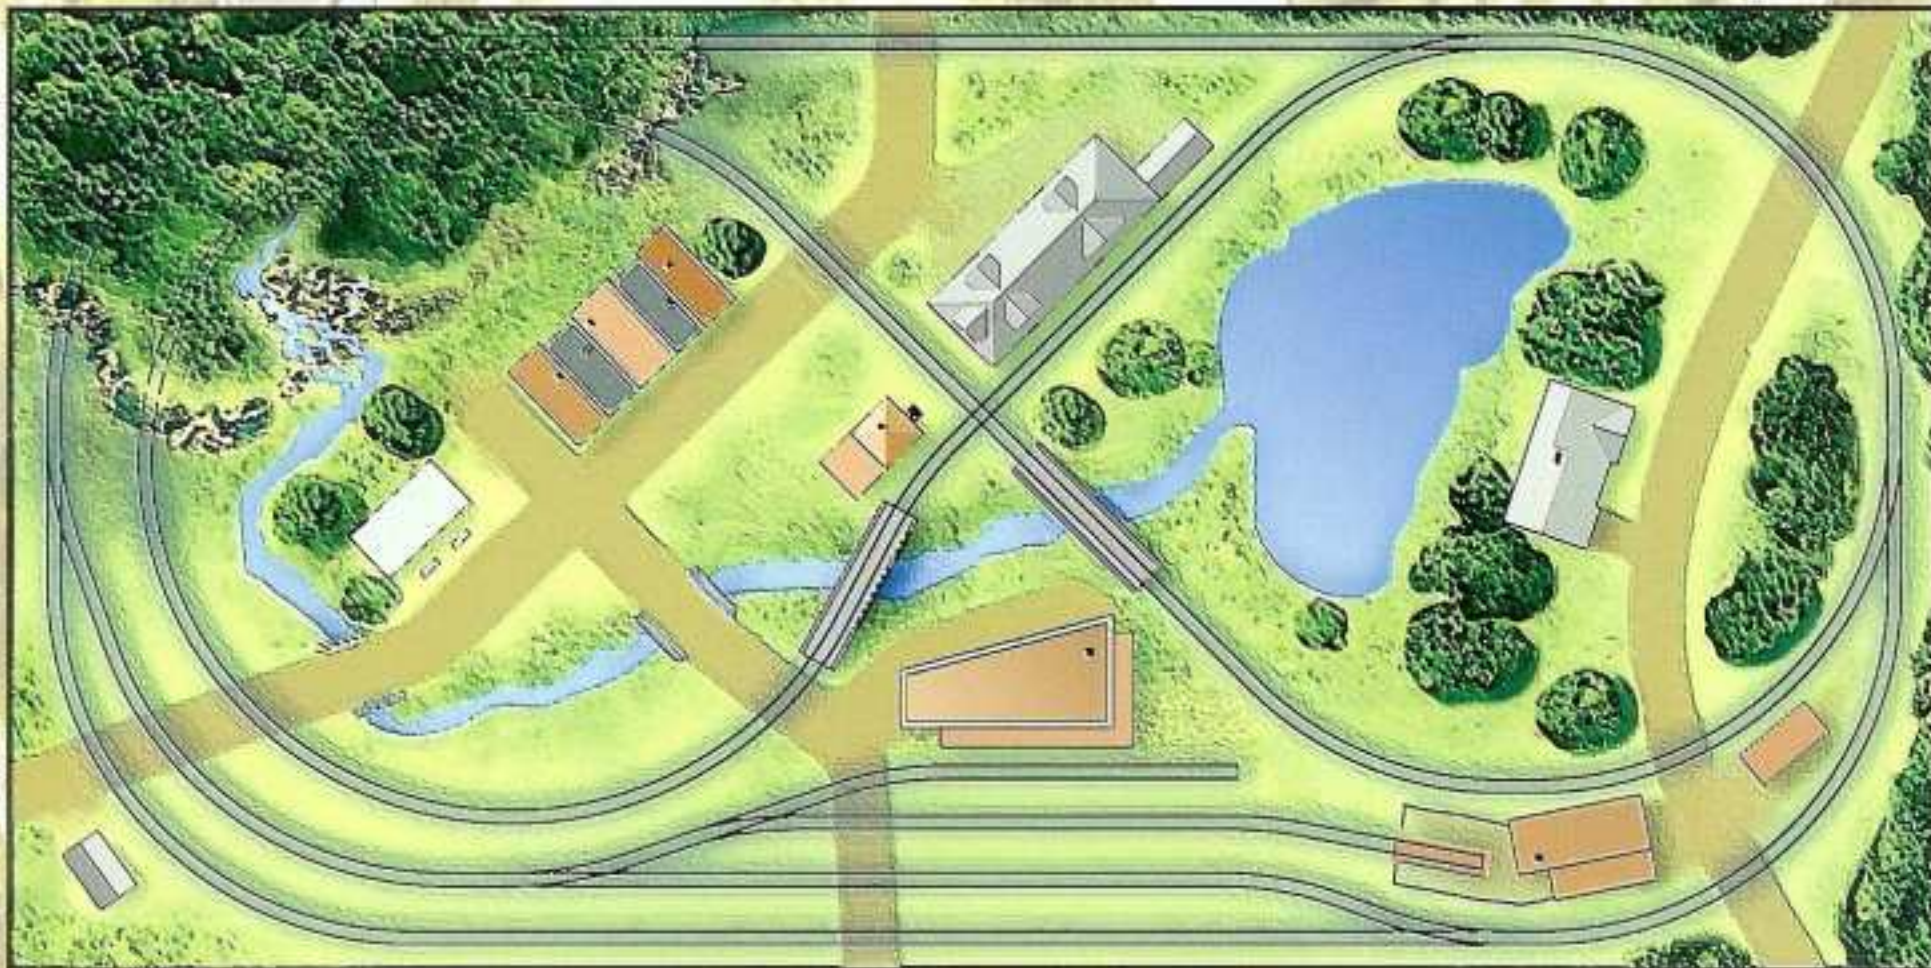

Skill level: Beginner

This plan, instructions & a detailed list of "Atlas Products Required," can be found in Book #9: Atlas' Beginner's Guide to HO Model Railroading (See pg. 4)

Summary of Atlas products included in package:

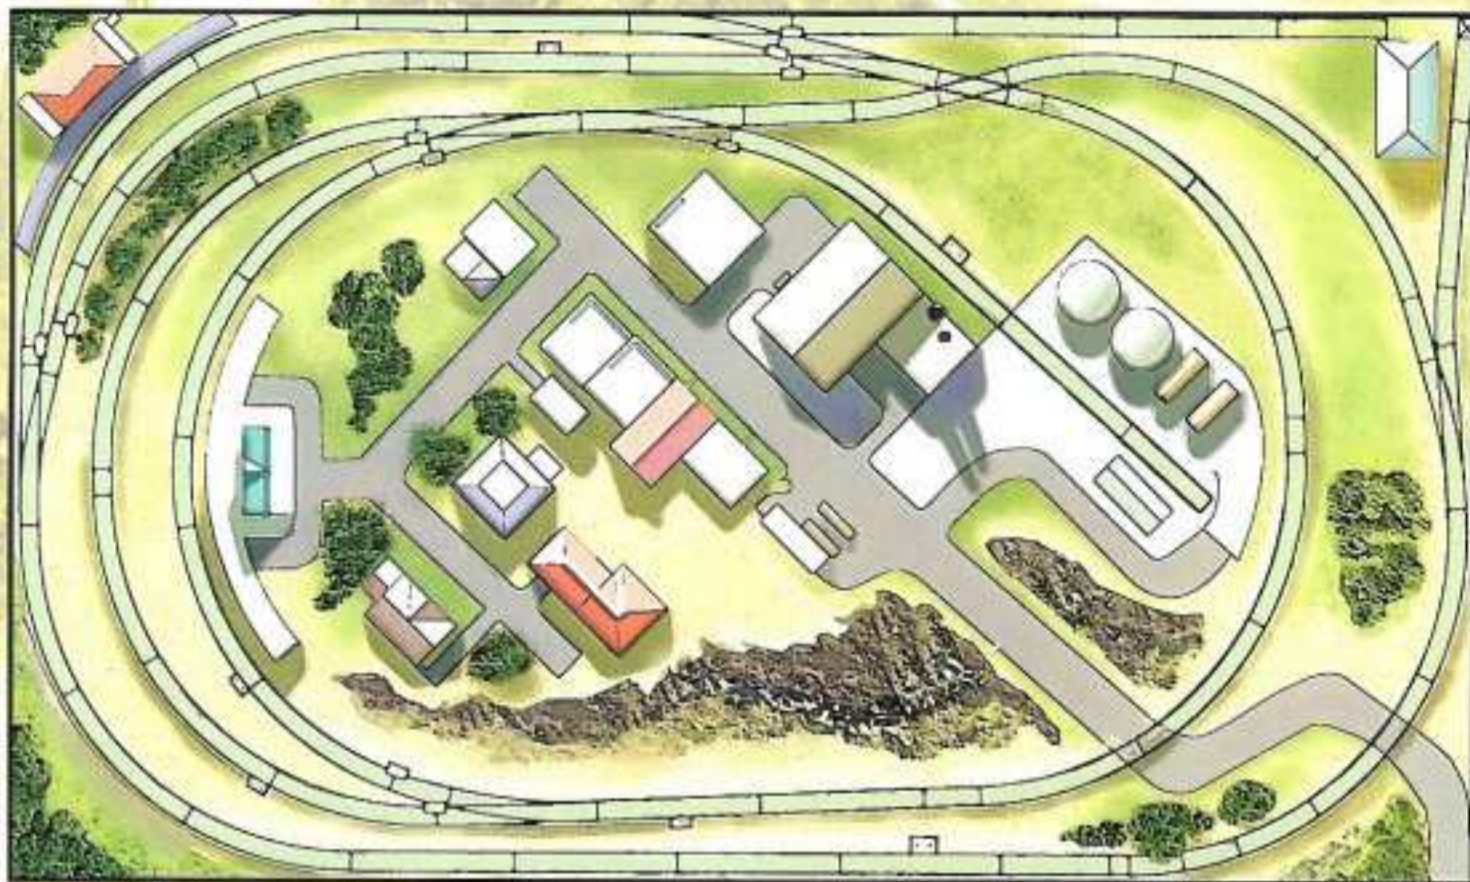

- Over 64 pieces of track (including bumpers & rerailers)
- 6 Remote Snap-Switches®
- 2 Selectors
- Necessary amount of rail joiners & track nails

READY, SET, GO!

Made To Last
A Lifetime

SPECIAL PRICE FOR 1999!
Was \$169.95 NOW A GREAT VALUE AT ONLY \$149.95 each

This high-quality set has everything you need to get a railroad up and running (see contents listed at right). The True-Track® assembles easily on any flat surface (including a carpet) and the high performance locomotive and freight cars are ready-to-run so no assembly is required.

What makes this set special is the true-to-life appearance, as evident in the prototypical True-Track® and authentically painted and detailed trains. There is no other set that compares in realism and quality to the Atlas Pro-Line Train Set.

Contents of Atlas' Pro-Line Train Sets:

TRACK

- True-Track®, Atlas' line of premium nickel silver roadbed-track
- 16 pieces to create a 56" x 38" expandable oval layout
- Assembles easily on any flat surface
- Terminal joiners for wiring included

LOCOMOTIVE

S2 or S4 "Switcher" Engine features:

- 5-pole skewed armature motor for reliable operation
- Sturdy, die cast mainframe
- Blackened wheels
- Dual-flywheels for maximum performance at all speeds

ROLLING STOCK

- Ready-to-run offset-side open hopper, PS-2 covered hopper and extended-vision caboose
- The finest details, painting and printing
- Blackened metal wheels

THE "POWER"

UL Listed Custom-Power® 1700 Power Pack includes separate power and reversing switches

ACCESSORIES

- Trackside Shanty Kit (assembly with glue - not included - required)
- Railer (to help you get the trains securely on the track)

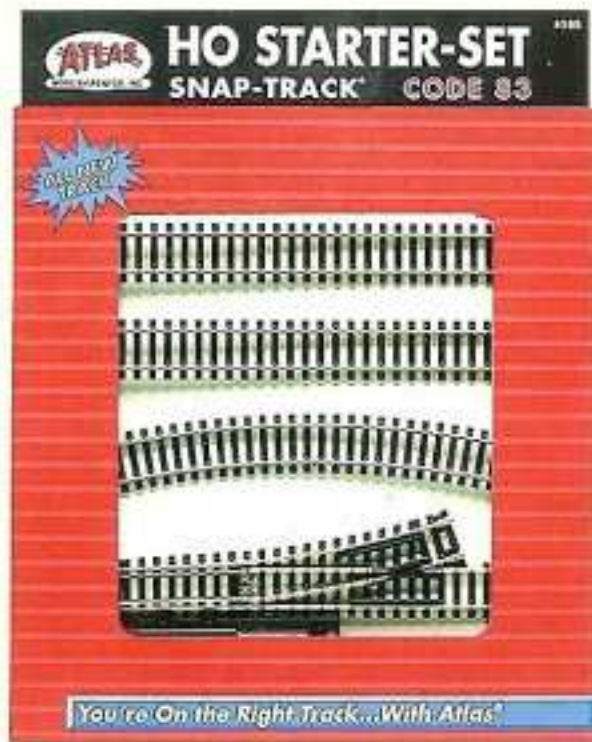

ATLAS PRO-LINE TRAIN SETS

Item#	Description	Price
1010	Santa Fe S-2, Milwaukee Road Open Hopper, Northern Pacific PS-2, Santa Fe Extended-Vision Caboose	149.95
1011	Burlington S-2, Milwaukee Road Open Hopper, Northern Pacific PS-2, CB&Q Extended-Vision Caboose	149.95
1012	Chessie System S-4, Pittsburgh & W. Virginia Open Hopper, Jersey Central PS-2, Chessie Extended-Vision Caboose	149.95
1013	Maine Central S-4, Pittsburgh & W. Virginia Open Hopper, Jersey Central PS-2, Maine Central Extended-Vision Caboose	149.95

HO Track Starter Sets

From the Collection of
"HOseeker"

These three sets are a snap for beginners to assemble. Each contains enough Snap-Track®, Snap-Switches® and components to assemble a 38" x 56" oval layout with passing siding. Easily expandable as your skill level advances, simply by adding more track (sold separately). Complete assembly instructions provided. Power pack sold separately (see page 20).

*For a complete explanation of Code 100 vs. Code 83 track, please see page 9.

HO TRACK STARTER SETS

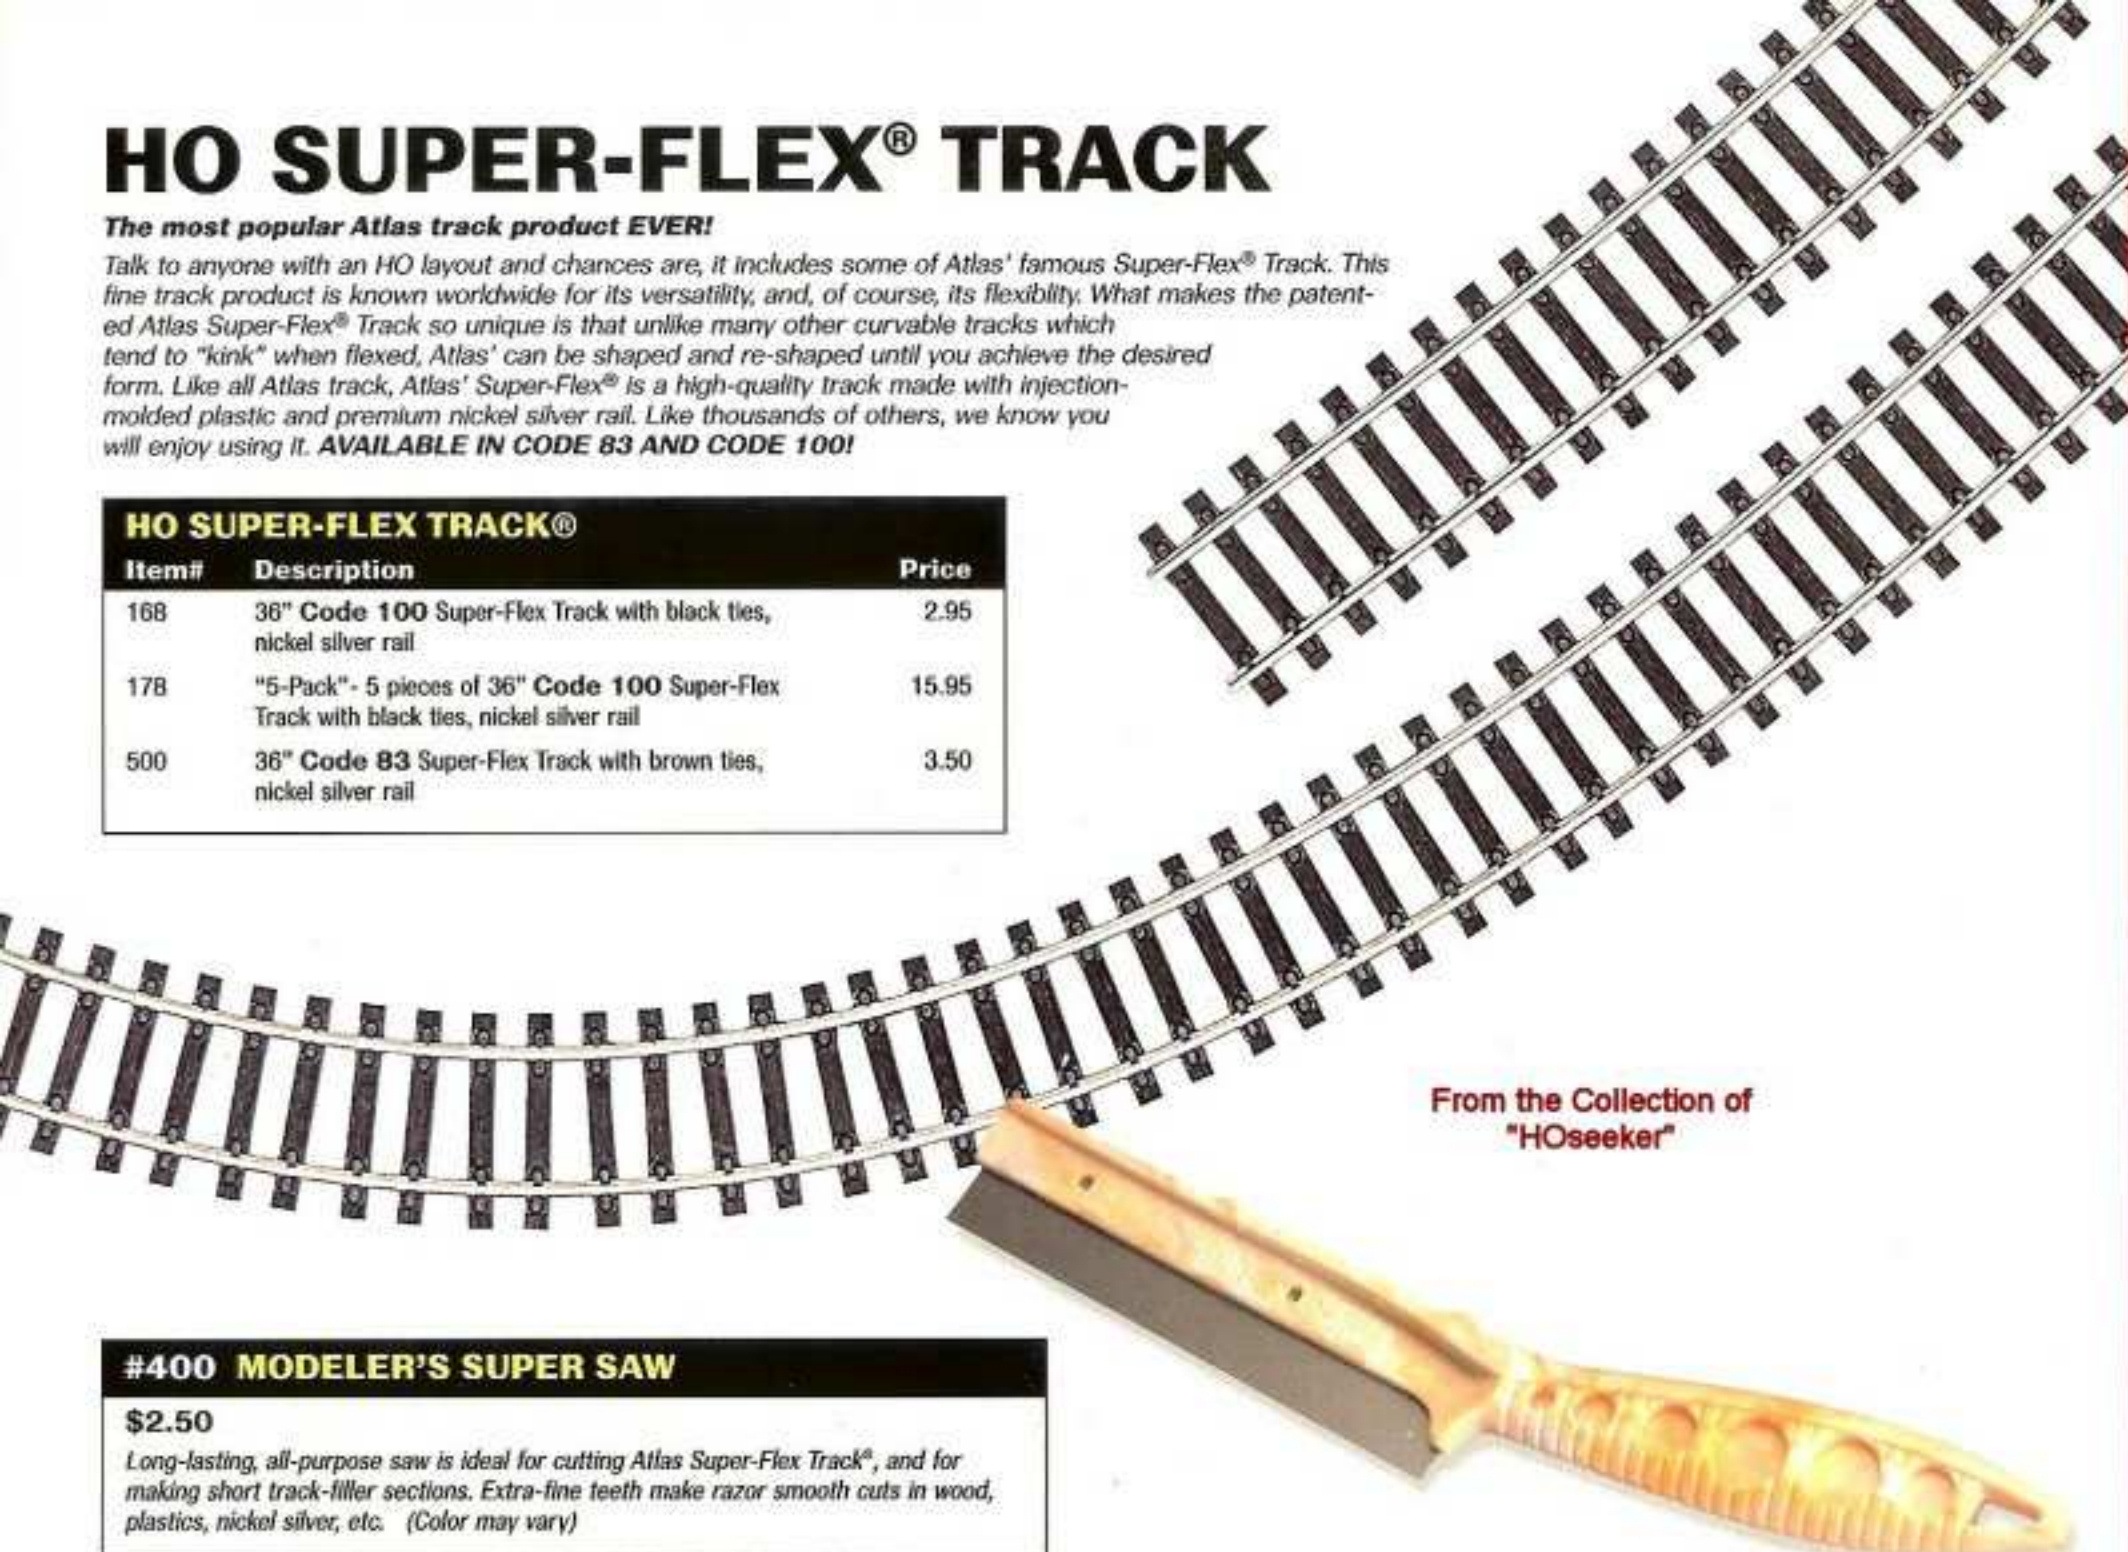

Item#	Description	Price
88	Code 100® Snap-Track® - black ties with nickel silver rail	\$29.95
588	Code 83® Snap-Track® - brown ties with nickel silver rail	\$29.95
488	True-Track® - code 83 Snap-Track® (brown ties) with plastic gray roadbed base	\$42.95

HO SUPER-FLEX® TRACK

The most popular Atlas track product EVER!

Talk to anyone with an HO layout and chances are, it includes some of Atlas' famous Super-Flex® Track. This fine track product is known worldwide for its versatility, and, of course, its flexibility. What makes the patented Atlas Super-Flex® Track so unique is that unlike many other curvable tracks which tend to "kink" when flexed, Atlas' can be shaped and re-shaped until you achieve the desired form. Like all Atlas track, Atlas' Super-Flex® is a high-quality track made with injection-molded plastic and premium nickel silver rail. Like thousands of others, we know you will enjoy using it. **AVAILABLE IN CODE 83 AND CODE 100!**

HO SUPER-FLEX TRACK®		
Item#	Description	Price
168	36" Code 100 Super-Flex Track with black ties, nickel silver rail	2.95
178	"5-Pack"- 5 pieces of 36" Code 100 Super-Flex Track with black ties, nickel silver rail	15.95
500	36" Code 83 Super-Flex Track with brown ties, nickel silver rail	3.50

From the Collection of "HOseeker"

#400 MODELER'S SUPER SAW
\$2.50
 Long-lasting, all-purpose saw is ideal for cutting Atlas Super-Flex Track®, and for making short track-filler sections. Extra-fine teeth make razor smooth cuts in wood, plastics, nickel silver, etc. (Color may vary)

SOME FACTS ABOUT ATLAS HO TRACK

What is the difference between Atlas Code 83 and Atlas Code 100 track?

The code of a piece of track is the height of the rail in thousandths of an inch. Code 83 rail is .083" high whereas code 100 rail is .100" high. In addition to the height of the rail being smaller, our code 83 has finer ties and rail, making it more exact to-scale and therefore more prototypical. code 83 comes with brown ties and nickel silver rail. Our HO code 100 track comes with black ties and nickel silver rail. Brown ties are more prototypical. Code 100 is on the following pages; code 83 can be seen on pages 18 & 19.

Our code 83 line is rapidly expanding to include all of the pieces currently available in our full-line of code 100 track. In 1998 will be the release of new code 83 items that, once available, will allow modelers to build the layouts in some of our layout instruction books using code 83 track. Until then, only code 100 can be used to construct the layouts contained in our books (as seen on page 4). Stay tuned to our web site for up-to-date information on code 83 track releases, www.atlasrr.com

The piece of track snapped into the roadbed of our new True-Track line is code 83 Snap-Track.

Black ties, nickel silver rail
Code 100

Brown ties, nickel silver rail
Code 83

HO Code 100 Track

Atlas is the leading manufacturer of model railroad track, worldwide. You will find that our track is easy to use & will last on your layout for years.

STRAIGHT SNAP-TRACK® SECTIONS

Description	Item #	Price
9" (6 pcs./pkg.)	821	\$4.30
6" (4 pcs./pkg)	822	\$2.35
3" (4 pcs./pkg)	823	\$2.35
1 1/2"(4 pcs./pkg.)	825	\$2.35

***All HO Code 100 track comes with black ties and nickel silver rail.**

From the Collection of "HOseeker"

CURVED SNAP-TRACK® SECTIONS

Description	Item #	Price
15" radius (6 pcs./pkg.)	831	\$4.30
1/2-15" radius (4 pcs./pkg.)	832	\$2.35
18" radius (6 pcs./pkg.)	833	\$4.30
1/2-18" radius (4 pcs./pkg.)	834	\$2.35
1/3-18" radius (4 pcs./pkg.)	835	\$2.35
22" radius (6 pcs./pkg.)	836	\$4.30

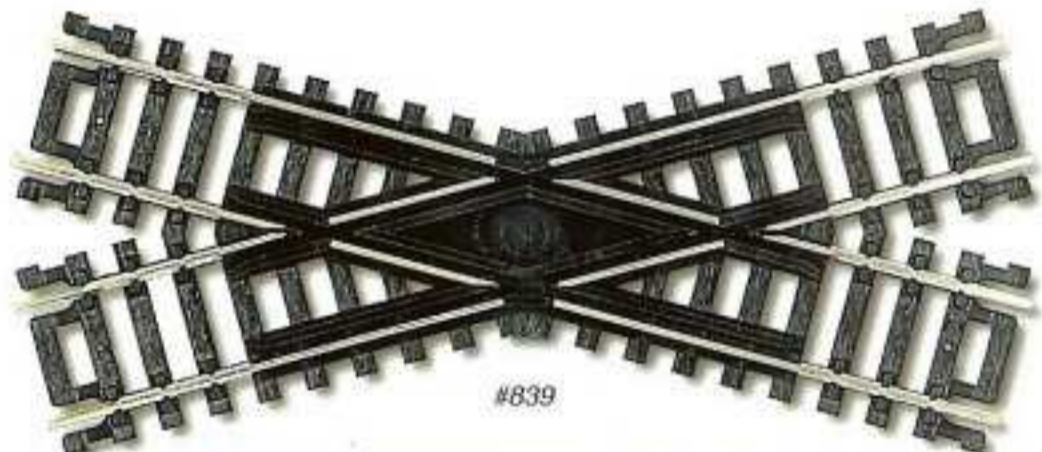

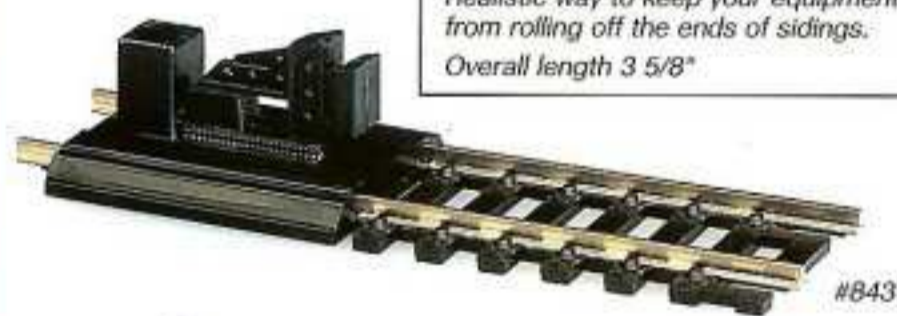

BULK TRACK

Description	Item #	Price
9" Straight	150	\$.68
15" Radius	151	\$.68
18" Radius	152	\$.68
22" Radius	153	\$.68
Retailer	155	\$1.35

Atlas also offers the above HO Snap-Track® pieces in bulk (no packaging). Pricing is per single piece.

15" and 18" radius circles require 12 full sections. 22" radius circle requires 16 full sections.

#843 BUMPER
\$2.35 (2 pieces per pack)
 Realistic way to keep your equipment from rolling off the ends of sidings.
 Overall length 3 5/8"

#839 30° SNAP CROSSING
\$5.95
 Each leg is 6" long. See page 13 for Custom-Line® Crossings available in many other angles of intersection.

TERMINAL SECTIONS

Description	Item #	Price
9" straight	840	\$2.95 ea.
18" radius curved	845	\$2.95 ea.

For quick, solderless connections from the power pack to track. See also pre-wired #842 Terminal joiners on page 11.

#849

#849 DEAD-END UNCOUPLER

\$2.95

For use with horn-hook style couplers. One-way ramp uncouples cars entering siding. Equipment remains coupled when leaving siding. Not for use on "through" lines.

#844 RERAILER

\$4.75 (3 pieces per pack)

A sweep of the hand places rolling stock on rails. Automatically rerails derailed equipment in hard to reach hidden areas.

#844

RAIL JOINERS

Description

Universal Rail Joiner

Fits all Atlas HO Track (48 per pkg., nickel silver)

Plastic Insulating (24 per pkg.)

Terminal Joiners (1 pr., nickel silver)

(Terminal Joiners are rail joiners with wires attached to allow electricity to flow from the power pack to the rails.)

#2540 TRACK NAILS

\$2.95 (approx. 400 per 2 oz. package)

Used to attach track or roadbed to layout table.

#847 SNAP-TRACK® ASSORTMENT

\$2.95

Includes two each of 6 short pieces; 3/4", 1", 1-1/4", 1-1/2", 2" and 2-1/2"

#847

***All HO Code 100 track comes with black ties and nickel silver rail.**

SNAP-SWITCHES®-REMOTE CONTROL

Description	Item #	Price
Lefthand	850	\$12.95
Righthand	851	\$12.95

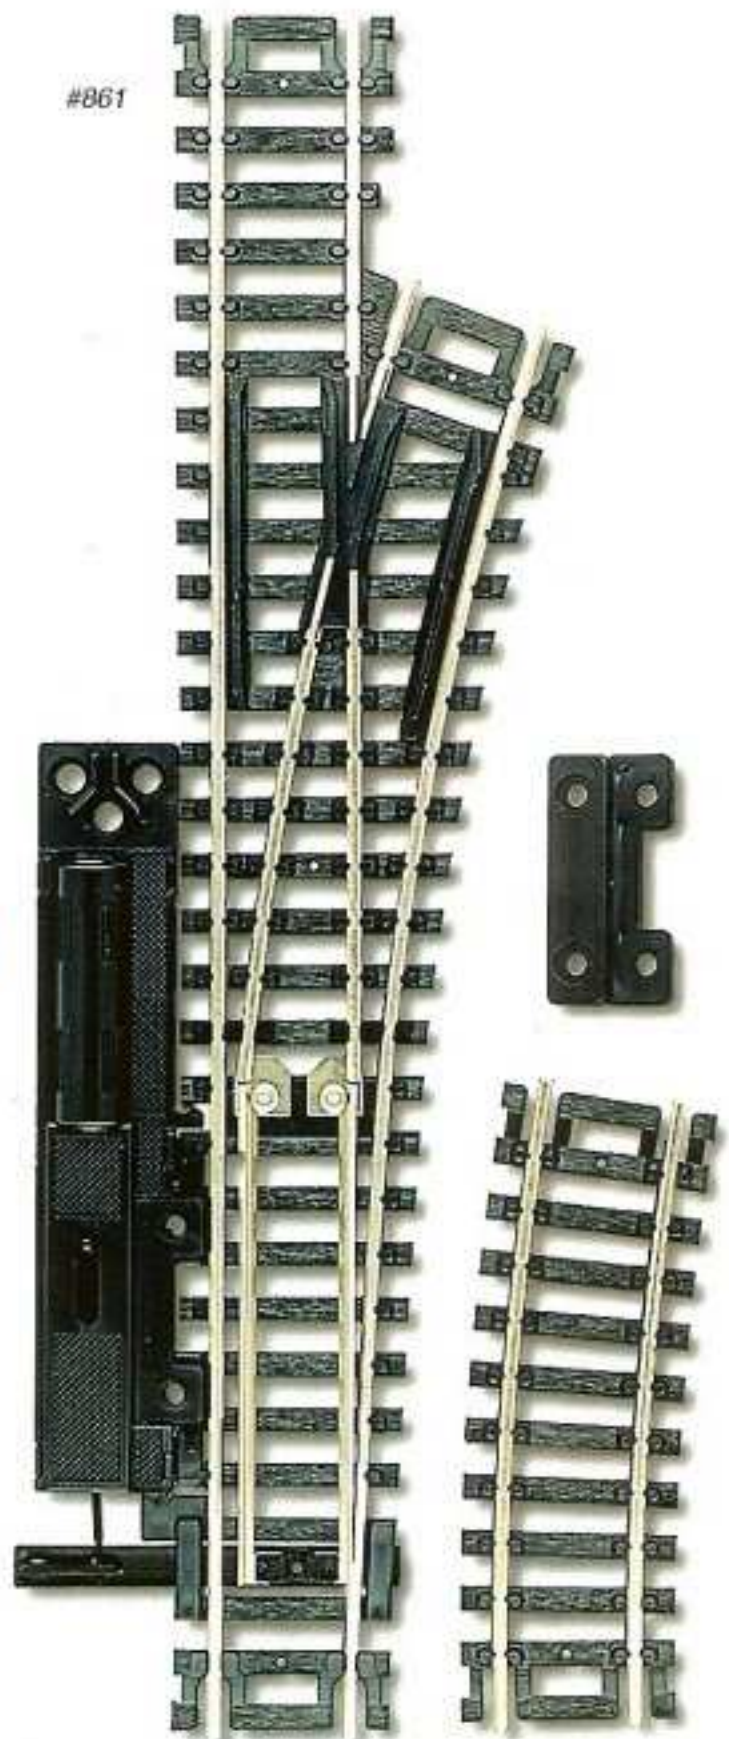

These switches have a remote control switch machine attached so you can wire the switch to be "thrown" (changing the direction of the rail), from your control panel, rather than from the switch itself. Comes with a 1/3 18" radius section, making the curved leg equal to a regular 18" radius section. To add a passing track and siding, simply replace a 9" straight section. When replacing an 18" radius curved section with an Atlas Snap-Switch®, add a 1-1/2" straight section to the opposite side.

SNAP-SWITCHES®-MANUAL

Description	Item #	Price
Lefthand	860	\$8.35
Righthand	861	\$8.35

Manual switches can only be "thrown" (changing the direction of the rail) by flipping a lever on the switch by hand. Manual Snap-Switches® can be easily converted to remote control with #52 Lefthand and #53 Righthand switch machines. Manual Snap-Switches® come with a manual switch machine.

From the Collection of "HOseeker"

SWITCH MACHINES-REMOTE CONTROL

Description	Item #	Price
Lefthand	52	\$6.50
Righthand	53	\$6.50

(Pictured above attached to switch #850)
Snap-on remote switch machines will quickly and easily convert any Atlas code 100 HO switch to remote control. With a remote control switch, you can wire the switch to be "thrown" (changing the direction of the rail) from your control panel, rather than from the switch itself.

SWITCH MACHINES-MANUAL

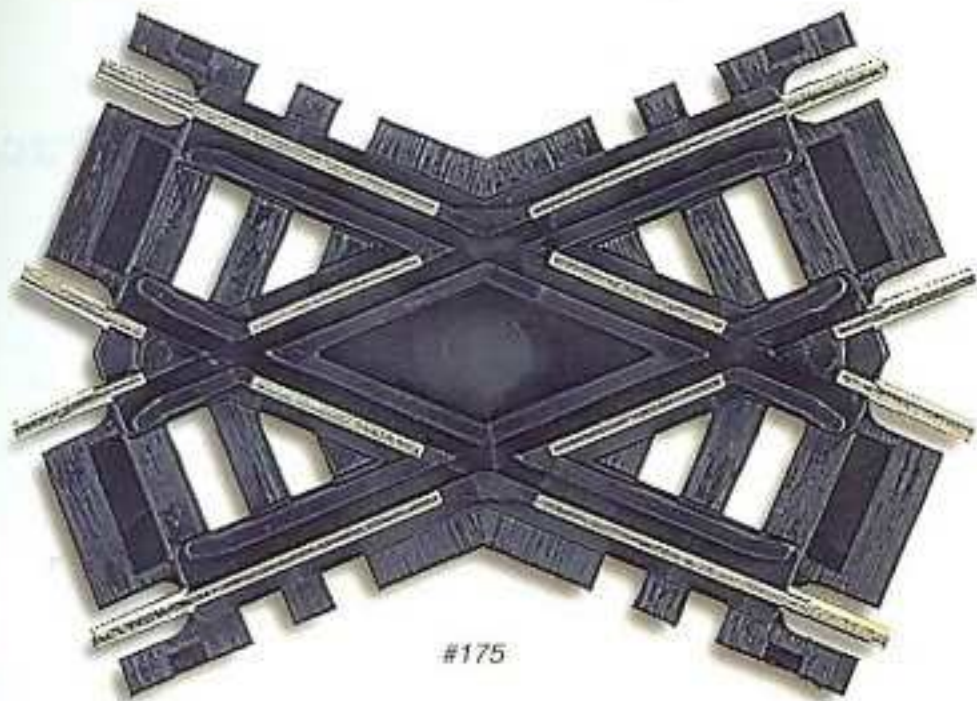

Description	Item #	Price
Lefthand	62	\$1.95
Righthand	63	\$1.95

(Pictured above attached to switch #861)
With a manual switch machine attached to your switch, you can flip a lever by hand and change the direction of the rail.

#65 UNDER-TABLE SWITCH MACHINE

\$6.50

Nicely hides beneath your layout so you can throw your switches without being seen. Can be used with all Atlas (and many other) HO and N scale switches. Please see page 20 for drawing and usage instructions.

#175

What is the difference between Custom-Line® Turnouts and Snap-Switches®?

1. Custom-Line® Turnouts are #4, #6 or Wye turnouts. The track section of the Atlas #4 turnout splits at an angle of 12 degrees and 50 minutes; for #6 switches that angle is 9 degrees, 30 minutes; and for Wye switches it is 19 degrees, 12 minutes. This angle determines how sharp of a turn the switch (and therefore your trains) will make. For Snap-Switches®, we talk about the 18" radius that the switch is designed to create. If a Snap-Switch® and included 1/3 18" radius is connected to eleven, 18" radius curved sections of track with a 1-1/2" piece opposite the switch, a complete oval will result.

2. Custom-Line® Turnouts have metal frogs that can be powered if necessary. Snap-Switches® have plastic frogs which cannot be powered.

NOTE: A Snap-Switch® and a #4 Custom-line Turnout are not interchangeable in Atlas layout plans.

HO CUSTOM-LINE® CROSSINGS

Description	Item #	Price
19° - 6"	171	\$5.95
25° - 4 1/2"	172	\$5.95
30° - 4"	173	\$5.95
45° - 3"	174	\$5.95
60° - 3"	175	\$5.95
90° - 6"	176	\$5.95
12 1/2° - 9"	177	\$6.50

Precisely engineered angles of intersection solve most crossing requirements. For double crossovers use the 25° crossing with #4 Custom-Line Mark 3 Turnouts, or the 19° crossing with #6 turnouts. The 12 1/2° and 19° crossings are especially suited for junctions between double-track mainlines. A wide variety of single and double-track wyes and many other arrangements appear in Atlas layout instruction books on page 4.

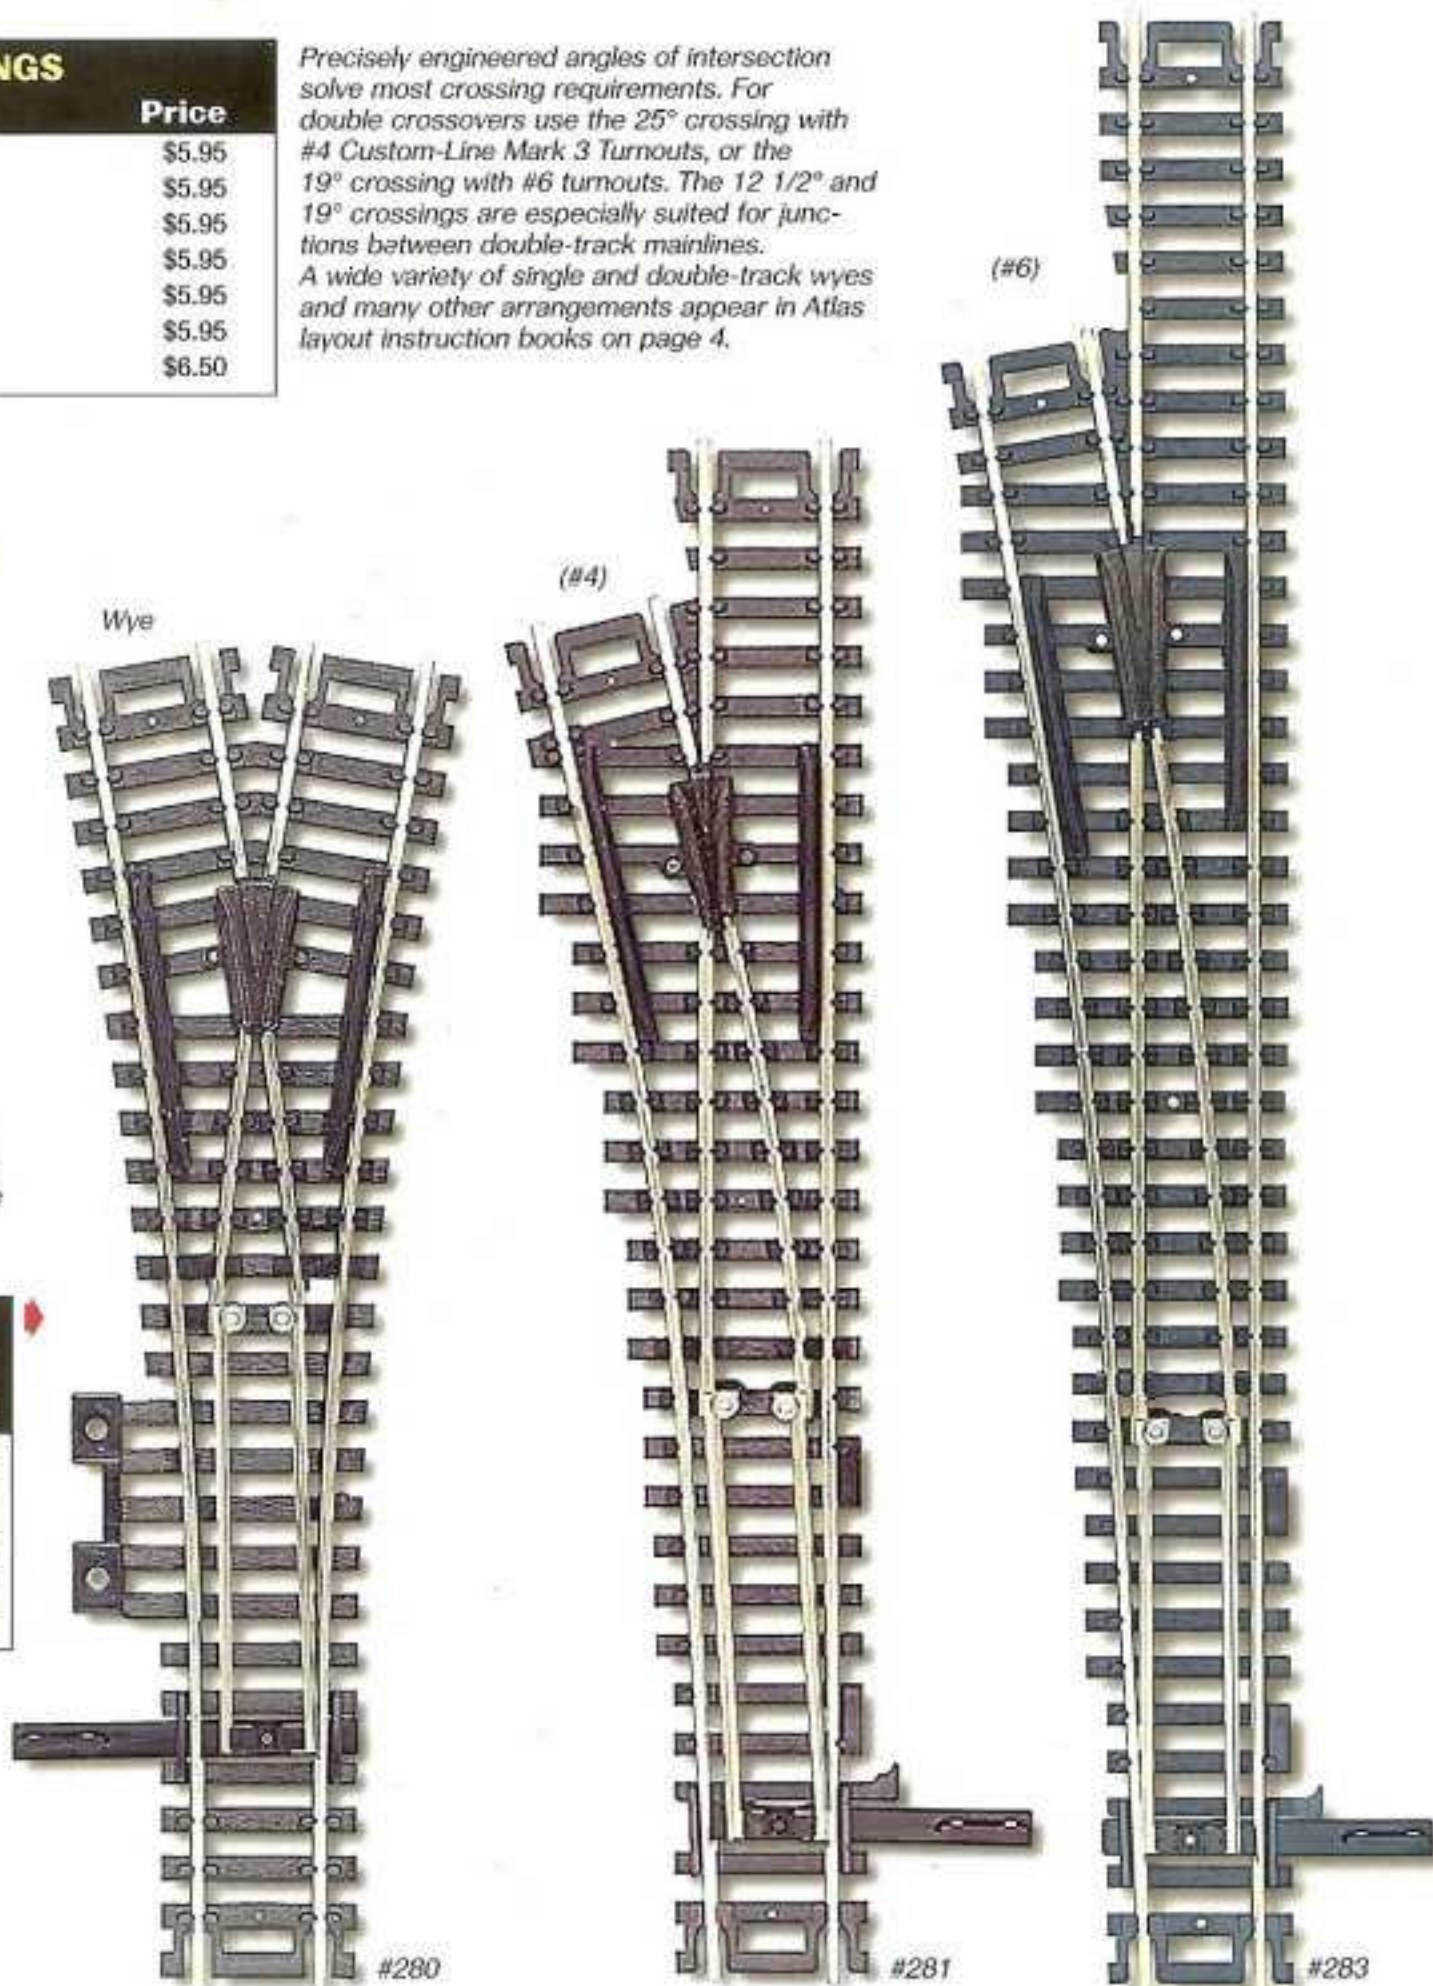

From the Collection of
"HOseeker"

What is the difference between a #4 and a #6 Custom-Line® Turnout?

The difference is the angle at which the two tracks diverge or split. With #4 turnouts, the tracks diverge at a sharper angle than the #6's. Therefore, the type of turnout you use may be determined by the space you have for your layout.

CUSTOM-LINE® MARK 3 TURNOUTS

Description	Item #	Price
Wye Turnout	280	\$9.75
#4 Turnout - Left	281	\$9.75
#4 Turnout - Right	282	\$9.75
#6 Turnout - Left	283	\$9.75
#6 Turnout - Right	284	\$9.75

ATLAS HO TRUE-TRACK®

Premium Quality Roadbed Track Made With Fine-scale Code 83 Track

Like all Atlas model railroad products, True-Track® adheres to high quality, prototype standards that the hobby world demands. The result is a roadbed track with true-to-prototype gray, graveled roadbed; correctly angled roadbed shoulder and code 83 brown ties and nickel silver rail. It looks every bit like real track with roadbed and ballast.

There is no roadbed track that can match up to the scale-model quality and versatility of Atlas' True-Track®. It is easy to assemble and affordably priced, but do not mistake True-Track® for a toy. It is a true hobby track system, created for the novice modeler looking not only for realistic appearance but unparalleled performance in a ready-to-run roadbed track.

True-Track® features Atlas' world-renowned "Snap-Track®" that has been setting the standard for HO track for over 40 years. The piece of Snap-Track® can be removed and used separately if desired. For more information on True-Track®, please turn to page 16.

#488 TRUE-TRACK STARTER SET

\$42.95

In one box you'll find all the pieces of True-Track® you need to build a 38" x 56" oval layout with passing siding in less than 20 minutes! The set contains 18 pieces of sectional track, two fantastic-looking switches with manual switch machines and terminal joiners for easy track-to-power pack wiring. Easy-to-follow assembly instructions provided.

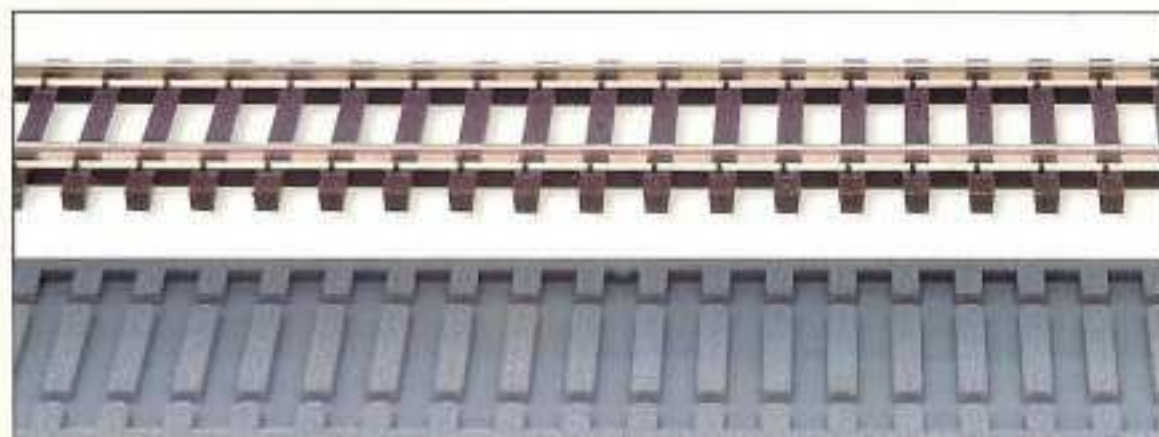

From the Collection of
"HOseeker"

Did You Know...

Atlas' HO True-Track® is our standard code 83 Snap-Track® locked into a piece of gray, plastic roadbed. The roadbed serves as a base, allowing you to assemble True-Track® quickly, on any flat surface. It is perfect for beginners who want an easy way to get started running trains without having to build a permanent layout table. But True-Track® is much more than just a ready-to-run roadbed track.

True-Track® is two tracks in one. You can actually take the piece of code 83 track out of the True-Track® roadbed and use it as a typical piece of model railroad track. As you advance in the hobby you may decide to lay your own roadbed and ballast the track yourself. Atlas' Code 83 track shown on the next three pages is the perfect choice for any modeler ready to work with track without a roadbed base. It is prototypically accurate, has fine brown ties and nickel silver rail, and is the

choice of discerning HO modelers everywhere. It is fast becoming our most popular track line.

So with True-Track® you're getting two tracks for the price of one - ready-to-run roadbed track for getting started, and Code 83 Snap-Track® for when you're ready to move on. It's a great investment for anyone ready to get started in an exciting hobby.

Why Atlas Code 83 Track?

Atlas' HO code 83 track is the track of the future. It looks great (because it's prototypical), it's reliable (because it's Atlas), and it's the same price as our code 100 line (because we want you to be able to afford it)! You will find that many brands of code 83 on the market are very expensive, and that is one reason why not every modeler chooses to use code 83. With Atlas, you don't have to worry about price, or reliability, so make code 83 your track of choice.

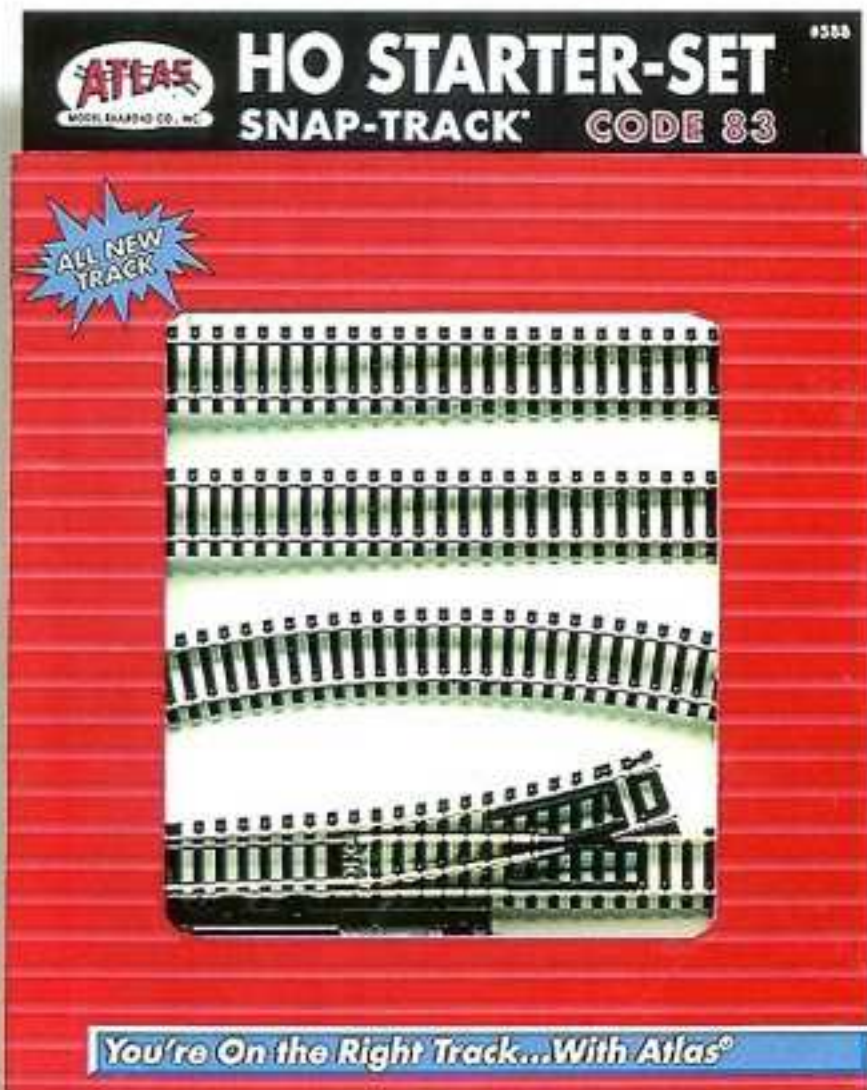

The pieces available in code 83 (brown ties) will soon mirror the pieces available in code 100 (black ties), and after that we will start releasing new radii, different radii/numbered switches, and other exciting products to continue to expand the code 83 line. So if you're in this hobby for the long haul, try our code 83 line because you won't be disappointed.

#588 CODE 83 SNAP-TRACK® STARTER SET

\$29.95

This set is a snap for beginners to assemble. Contains enough code 83 Snap-Track and components to assemble a 40" x 56" oval layout with passing siding, including two manual Snap-Switches®. Easily expandable as your skill level increases. Complete assembly instructions provided.

Power pack sold separately (pg. 20).

#6 SUPER-SWITCHES

Item #	Description	Price
505	Lefthand	11.50
506	Righthand	11.50

1. Accurately scaled and spaced ties.
2. Blackened metal frog allows powering by Atlas Snap-Relay.
3. Frog angle is true #6 - 9°30'.
4. Frog and guardrail flangeways set to NMRA standards.
5. New points eliminate rivets, providing better electrical contact and improved appearance.
6. Four spikes per tie, staggered like U.S. prototype.
7. Designed for under-table switch machines or manual ground throws.
8. Concealed nail holes.
9. Designed for use with common rail system.

Code 83 can be used with Code 100, using our transition joiners (item #551, previous page)

Custom-Line® Turnouts

The Custom-Line® Turnouts are prototypically accurate, featuring blackened metal frogs and rivetless switch points that provide superior electrical conductivity. These turnouts can be powered using an under-table switch machine (shown on page 20) or standard remote and manual code 83 switch machines (shown on page 19). All Custom-Line® Turnouts have the same geometry as the current Atlas code 100 versions, for drop-in installation in Atlas' and other layout plans.

Custom-Line® Turnout Frog Angles:

#4 Turnout - 12°, 50'

#6 Turnout - 9°, 30'

Wye Turnout - 14°, 56'

- Plastic frog (cannot be powered) •
- Cut-outs for rail joiners •

CODE 83 REMOTE SNAP-SWITCHES® - 18" RADIUS (includes remote switch machine)

Item #	Description	Price
540	Lefthand	12.95
541	Righthand	12.95

These switches have a remote control switch machine attached so you can wire the switch to be "thrown" (changing the direction of the rail), from your control panel, rather than from the switch itself. Comes with a 1/3 18" radius section, making the curved leg equal to a regular 18" radius section. Adding passing tracks and sidings is simple since Atlas Code 83 Snap-Switches® will fit wherever you have 9" straight or 18" radius curved sections. When replacing a 18" radius section, you must add a 1 1/2 section directly across from the turnout.

CODE 83 MANUAL SNAP-SWITCHES® - 18" RADIUS (includes manual switch machine)

Item #	Description	Price
542	Lefthand	8.35
543	Righthand	8.35

Manual switches can only be "thrown" (changing the direction of the rail) by flipping a lever on the switch by hand. Manual Code 83 Snap-Switches® can be easily converted to remote control with #584 Lefthand and #585 Righthand switch machines.

CODE 83 SWITCH MACHINES

Item #	Description	Price
584	Lefthand Remote	6.95
585	Righthand Remote	6.95
586	Lefthand Manual	2.75
587	Righthand Manual	2.75

At one-third the size of existing units, these are the smallest HO switch machines on the market! Also fits True-Track switches shown on page 14-15.

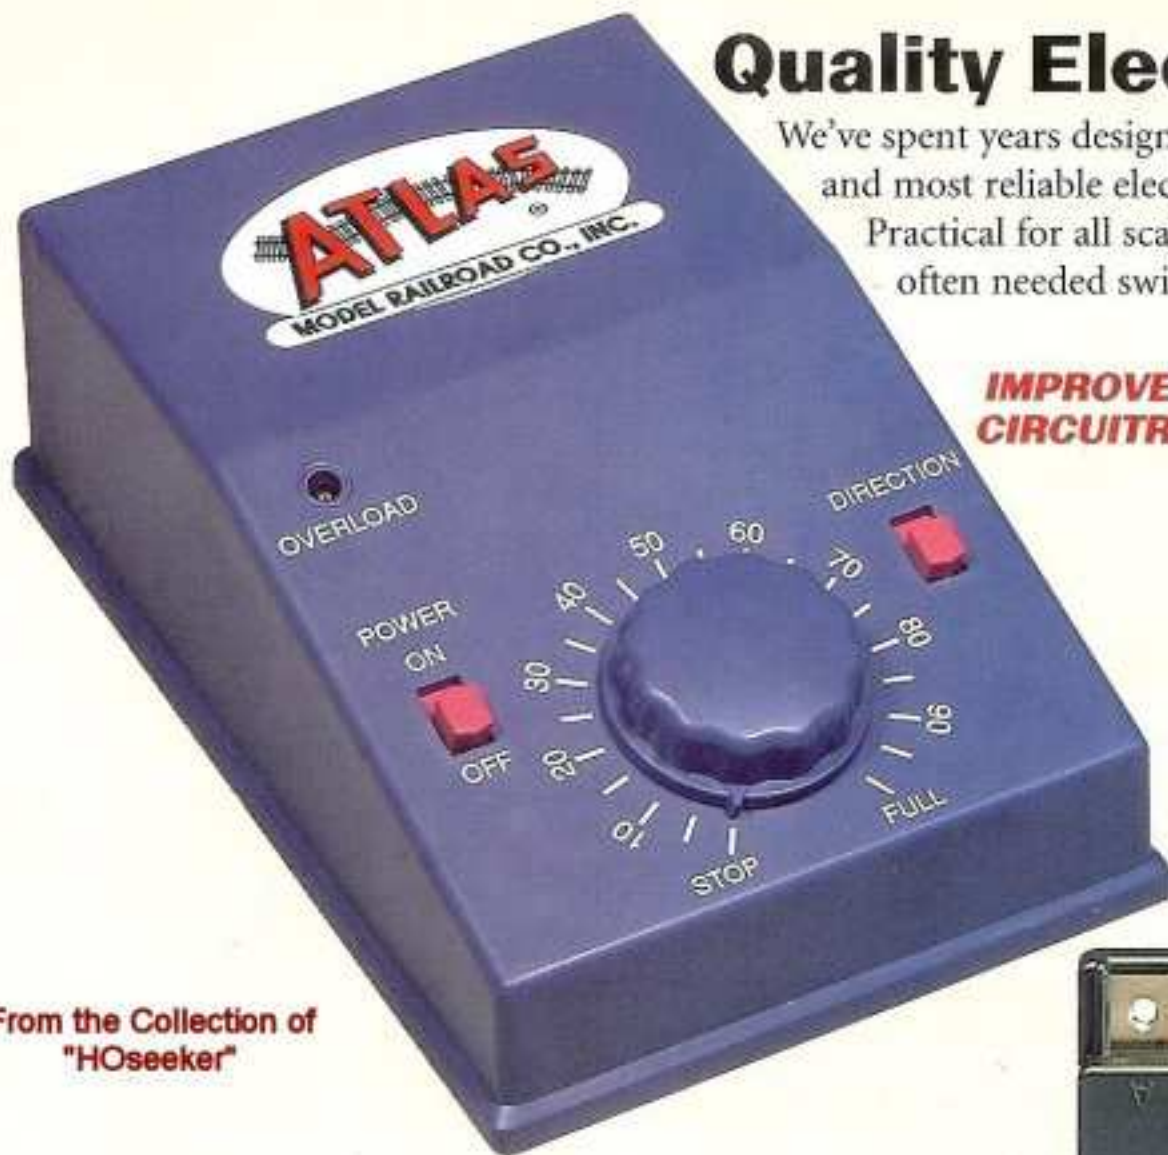

#541

#542

Quality Electrical Components

We've spent years designing and perfecting what we believe is the easiest and most reliable electrical wiring system in model railroading today. Practical for all scales, the system consists of multiple sets of the most often needed switch types, internally pre-wired by printed circuitry.

IMPROVED CIRCUITRY!

#310 ATLAS CUSTOM POWER® 1700 POWER PACK

\$34.95

Designed for reliable operation, the Custom Power® 1700 Power Pack has recently been enhanced by the addition of a transistor that protects circuitry and a thermal fuse for overload protection. Other features include:

- Separate power and reversing switches
- Circuit breaker protection
- Overload indicating lamp
- No pulse power to damage precision motors

Output: 14V DC, 17V AC, 1.2 Amps at no load. Total output 17V A.

#200 SNAP RELAY

\$7.95

A double-pole, double-throw relay with actuating mechanism driven by a momentary-power, twin coil solenoid. (A solenoid is a cylindrical coil of insulated wire in which an iron core is made to move back and forth by a flow of electric current.)

With just a few simple connections, this small device, which may be mounted anywhere, can:

- Power the frogs on Atlas' Code 83 #6 & Mark 3 turnouts.
- Control trackside signal lamps to show turnout point positions
- Operate control panel lamps to show settings of remotely located turnouts (switches)
- Provide selective track siding control. Sidings are powered only when points are aligned for siding. Siding remains "dead" when points are set for the mainline.
- Control X-sections automatically. This very useful track arrangement is thoroughly discussed in *The Complete Atlas Wiring Book*.

From the Collection of "HOseeker"

#56 SWITCH CONTROL BOX

\$2.95

Controls Atlas (or other twin coil) switch machines with SPDT momentary action. Button position indicates turnout setting. Can be coupled together in any number without wiring. Switch identification labels included.

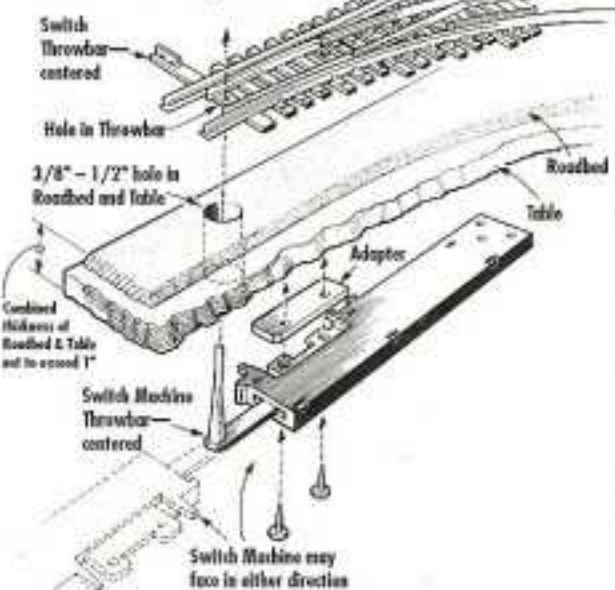

#65 UNDER-TABLE SWITCH MACHINE (FOR HO & N)

\$6.50

Nicely hides beneath your layout so you can throw your turnouts without seeing the machine. Can be used with all Atlas (and many other) HO and N scale turnouts.

Typical HO installation

For use with Left-hand or Right-hand Turnouts

#205 CONNECTOR

\$6.25

A device to turn electric power on or off to track section or accessories. Has three SPST on-off switches in parallel. Can be coupled together in any number.

#210 TWIN

\$6.25

A component consisting of two double-pole, double-throw reversing switches wired in parallel. Useful for reversing section and turntable control on single-cab layouts, plus many other applications.

#215 SELECTOR

\$6.25

This device enables the operation and control of two trains at the same time. Has four single-pole, double-throw switches to provide two-cab operation for four blocks. May be ganged together in any number to control additional blocks without inter-switch wiring. Can be used as area selectors for four-cab operation. Couples with #220 Controller.

#220 CONTROLLER

\$6.50

This control provides the simplest way to wire and control tricky reverse loops, wyes and turntables. Has reversing switches for two mainline cabs plus a switch, selectable by either cab, for directional control on reversing loops, etc. Couples with #215 Selectors.

#201 SPADE TONGUE SOLDERLESS CONNECTOR

\$3.25

A handy small electrical hook-up connector designed for tight spaces. For #18-22 wire and #3 screw post. Maximum width is .218", 24 pieces per package.

ATLAS LAYOUT WIRE

Item #	Description	Price
315	Black	5.45
316	Red	5.45
317	Green	5.45
318	Yellow	5.45
319	Blue	5.45

This colored wire will make wiring your layout easier than ever! Use different color wires for the different types of connections so you can keep track of what is what. Twenty gauge stranded copper; 50' reel.

\$3.25 (72" per package)

Prototypical Scale Accuracy

In keeping with Atlas standards, each HO freight car is a scale-model representation of an actual freight car that ran or is still running on one of America's fine railroads. Each car has been detailed, painted and printed to match the prototype, making the resemblance of the model to its real-life counterpart simply uncanny.

Each model comes ready-to-run, which means no assembly is required. Sometimes we include a small detail part for you to apply, just to add a nice finishing touch.

All other details are molded right on the car, in the correct places. You have to pick an Atlas freight car up and look closely to really appreciate the quality of the model. Look for our entire line of fine quality, ready-to-run cars at your local hobby shop.

FORD TRACTOR CABS

This HO model is based on the common prototype of the 1984 Ford LNT9000 tractor. Features include seat, steering wheel and rubber tires. Decorated models include printed Ford logos. This is an officially licensed Ford product.

45' PINES TRAILERS

The 45' Pines Trailers include two landing gears - fully extended or retracted, rubber tires, separate rear door bars and prototypical lettering schemes and numbers. Each road name is available in three numbers each.

Atlas HO freight cars feature free-rolling trucks with blackened metal wheels, body mounted couplers and coupler pockets with improved screw-attached covers designed to stay tightly in place. The coupler pockets will accept Kadee® #5, InterMountain and AccuMate® or McHenry couplers. And for extra added value, all cars produced after July of 1998 will come factory equipped with ACCUMATE™ couplers (all items marked as "NEW"). ACCUMATE™ couplers are made under license from AccuRail, Inc.

A NOTE ABOUT HOW WE PRODUCE OUR HO FREIGHT CARS TO GIVE YOU MULTIPLE ROADNUMBERS ...

All HO freight cars are offered in multiple road numbers. As a road number sells out, we rerun the car with a new road number. The last number of the item reflects how many times we've run that specific roadname with a different road number. For example, 1891-5 shows that the Chesapeake & Ohio Open Hopper was offered in four other road numbers. Although 1891-5 reflects what we currently have in stock, you may be able to find the previous item numbers (1891-1 through 1891-4) at your local hobby store.

Caboose Features

- Detailed air reservoir, brake cylinder and triple valve
- Blackened metal wheels; free-rolling Barber Bettendorf roller-bearing caboose trucks
- Complete window glazing
- Pre-formed wire grab-irons included for the modeler to install
- Weighs 3.3 oz.

Atlas is proud to offer a new HO locomotive model that before now, has never been offered in plastic- the GE U23B. The DCC-ready HO U23B is also the first Atlas HO locomotive to come factory-equipped with reliable, realistic-looking *ACCUMATE* couplers, adding even more value to this high quality Atlas engine.

Additional features of the ready-to-run U23B model include a 5-pole skewed armature motor for reliable operation, dual-flywheels for maximum performance at all speeds, directional lighting, sturdy die cast mainframe, front and rear plows, separate grab irons, and extra-thin handrails. Blackened wheels and trucks appropriate to the roadname prototype style further complete the model, making it an accurate representation of the real U23B.

There will be two road numbers plus an unnumbered unit for each roadname.

The ACCUMATE couplers on the HO U23B are made under license from Accurail, Inc.

\$99.95 each

THE FOLLOWING IS A LIST OF THE ROADNAMES AND ITEM NUMBERS OF ADDITIONAL ATLAS HO LOCOMOTIVES IN STOCK.

Future HO Classic Locomotives:

RS-3 RS-11 RSD-4/5
C-424 (Phase I & II)
RSD-12 C-425

Atlas proudly continues the *Classic Locomotives* Line with the HO RS-1. The Classic line includes re-releases of the most popular locomotives Atlas has ever made. Each Classic may be retooled to include the addition of new parts, updates to framework and internal drives, and the incorporation of the latest Digital Command Control technology*. Although they are models you may recall from the past, the future Classic locomotives promise to be technologically superior to their predecessors.

After being out of production for over 10 years, the RS-1 locomotive returns with directional lighting, factory installed ACCUMATE couplers, a die-cast mainframe, and a dual flywheel equipped five-pole skewed armature motor. Each roadname will be available in two roadnumbers, for added variety.

*The RS-1 will not have the DCC plug installed. Modelers wishing to convert this model to DCC should use one of the board mounted decoders available from various manufacturers.

The ACCUMATE couplers on the HO RS-1 are made under license from Accurail, Inc.

LEADERS IN LOCOMOTIVE TECHNOLOGY

LOCOMOTIVE REPAIRS

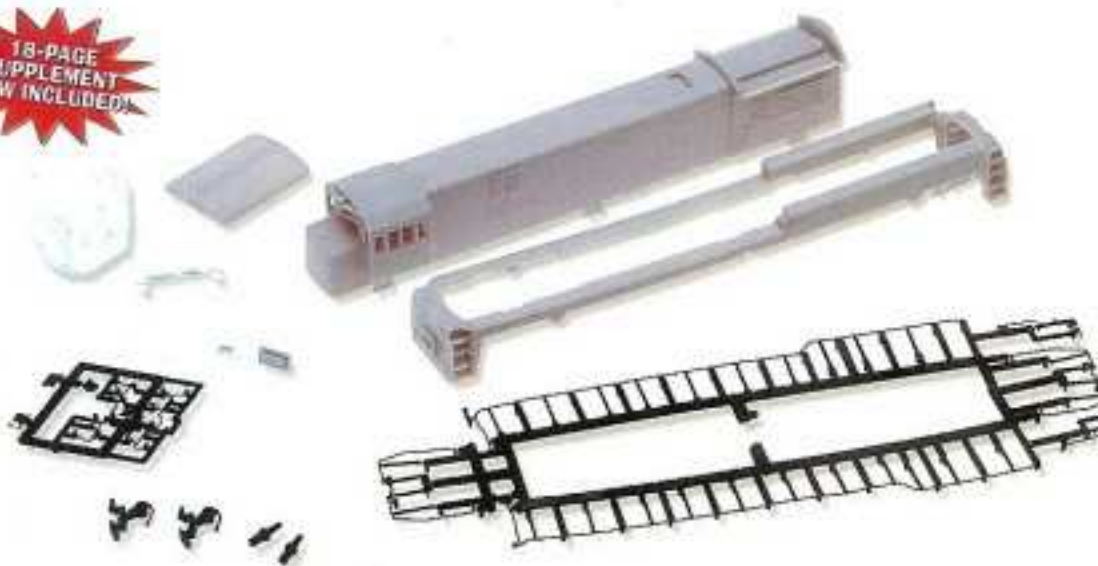

Our locos are built to last, but after years of use, some parts may become misaligned or broken. Often your retailer or our repair technician can suggest what part you could purchase to fix your Atlas locomotive yourself. We stock most parts for our recent locomotives which are listed in our Parts Catalog (below). You can purchase these parts from your retailer or from the Parts Catalog if you do not have a local hobby shop. If you are unable to fix your locomotive yourself, your local retailer may offer a repair service, or send it to our repair technician and he'll fix it for you. Please send your locomotive along with your name, address, telephone number, and a brief description of the problem to the address on the back of this catalog. Once he determines what parts will be needed to fix it, he'll call you to let you know how much you'll need to pay for parts. In addition to part costs, there is a basic repair fee of \$15.00 (this fee includes diagnostics and return shipping). *Pictured below are just a few of the over 2,000 parts that can be found in Atlas' Parts Catalog.*

#3 PARTS CATALOG

\$5.00

If you own an Atlas locomotive, this reference manual is a must. Contains exploded loco diagrams with all parts labeled, plus some part assembly instructions. Also includes complete lists of parts and prices for Atlas locos, freight cars, switches, track products, turntable and more. **Now includes 18-page supplement with updated parts listing and diagrams!**

#850225 BODY SHELL ASSEMBLY FOR HO U33C/36C LOCOMOTIVE

\$15.00

Each piece of the body shell assembly can be purchased separately. See Parts Catalog for descriptions, numbers & prices.

N SCALE LAYOUT PACKAGES

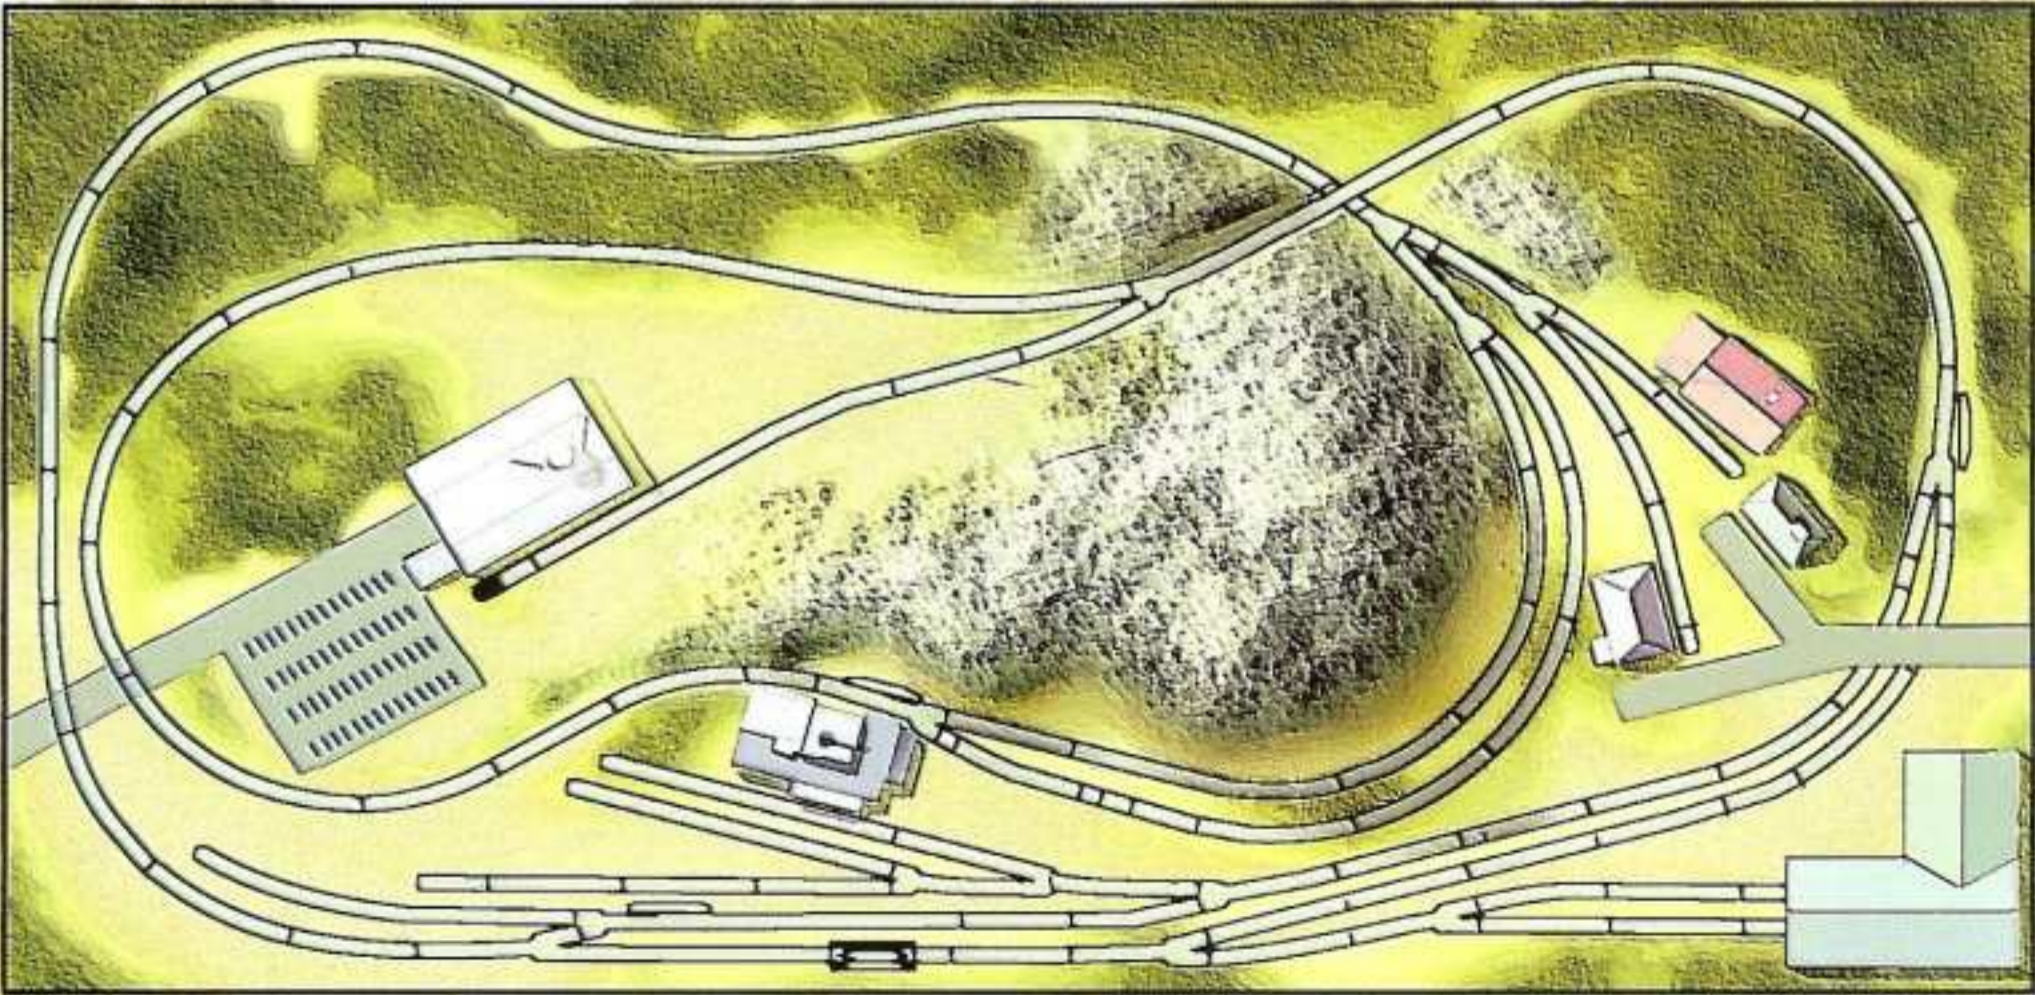

Atlas has designed and tested 18 different, exciting N scale layout configurations using Atlas Snap-Track, Super-Flex® Track, bridges and piers. On the next few pages is a sample of the plans that have become the most popular over the years. You may ask your local Atlas retailer to put the necessary materials together for you. Materials list, detailed plan and building instructions can be found in one of our two N scale layout instruction books (pg. 31).

If you wish to see all 18 Atlas N scale layout plans, please ask your local retailer for a free *Fantastic Layout Booklet* which contains highlights of each layout. If your retailer does not have one available, please call Atlas directly to request one.

From the Collection of "HOseeker"

***All layout packages on pages 32-34 are available in black track with nickel silver rail.**

LAYOUT N-17		Summary of Atlas products included in package:
The Scenic and Relaxed	\$274.95	• Over 110 pieces of track
with Power Pack	\$311.95	• 13 Remote switches, 12 switch control boxes
with optional second Power Pack	\$346.90	• Set of bridge piers, plate girder bridge, & deck truss bridge
		• 3 Selectors
		• Necessary amount of rail joiners and track nails
Skill level: Advanced		
This plan, instructions & a detailed list of "Atlas Products Required," can be found in Book #7: <i>Nine N Scale Railroads</i>		

Trees, scenery & buildings shown are not included in package

Table Size - 36" x 72"

A Layout Package Makes A Great Gift!

LAYOUT N-2

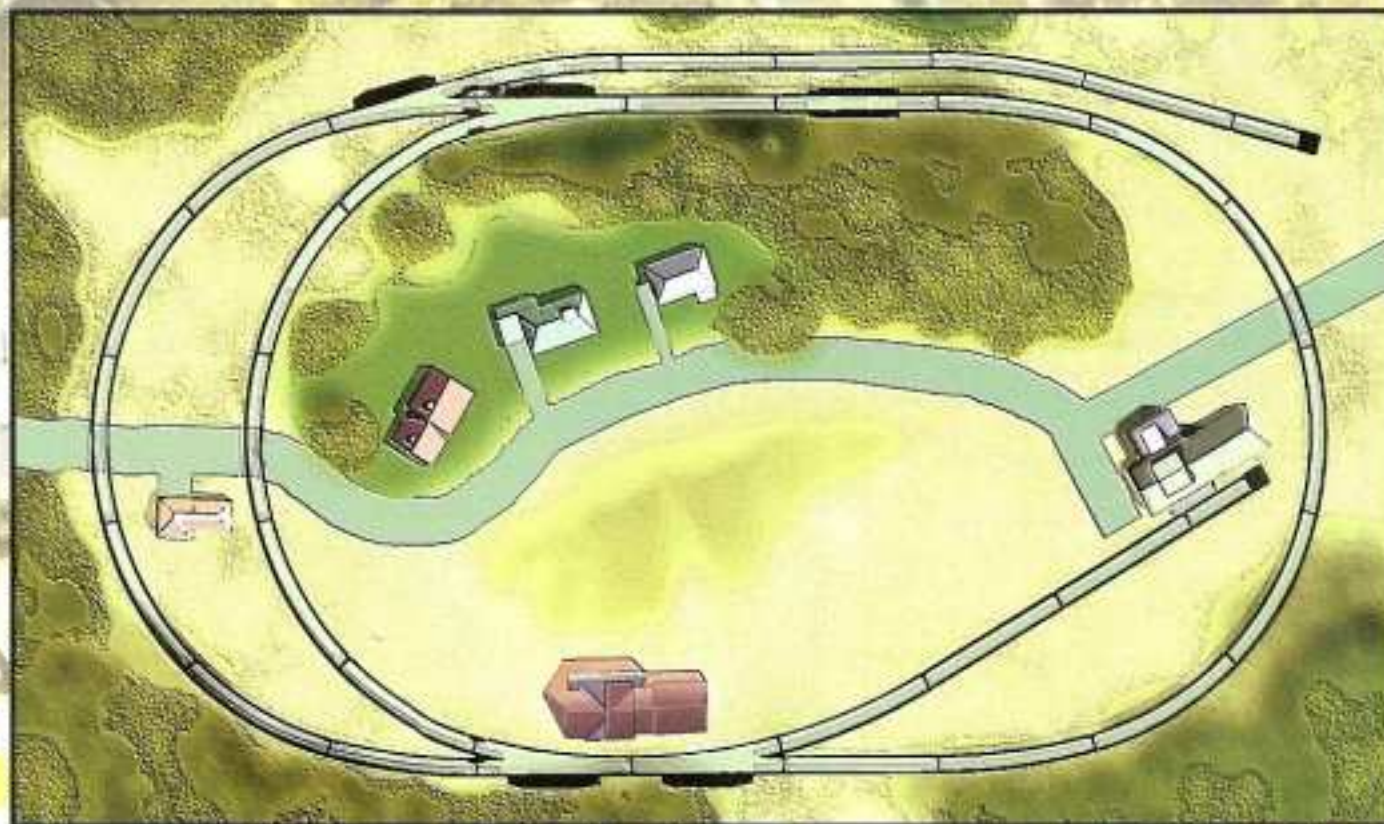

Loop With Passing \$83.50
Track and Siding
 with Power Pack \$118.50
 with optional second Power Pack \$153.45

Skill level: Beginner

This plan and a list of "Atlas Products Required" can be found in Book #6: Introduction to N Scale Model Railroading

Summary of Atlas products included in package:

- Over 30 pieces of track
- 4 Standard switches (2 remote, 2 manual) and 4 switch control boxes
- 1 Selector
- Necessary amount of rail joiners and track nails

Trees, scenery & buildings shown are not included in package

Table Size - 24" x 40"

LAYOUT N-5

Up & Over Figure 8 \$85.95
 with Power Pack \$120.90

Skill level: Beginner

This plan & a detailed list of "Atlas Products Required," can be found in Book #6: Introduction to N Scale Model Railroading

Summary of Atlas products included in package:

- Over 36 pieces of track (including bumpers & rerailers)
- 3 Remote switches and switch control boxes
- 1 Pier Set
- 1 Connector
- Necessary amount of rail joiners & track nails

From the Collection of "HOseeker"

Trees, scenery & buildings shown are not included in package

Table Size - 22" x 53"

From the Collection of
"HOseeker"

LAYOUT N-9

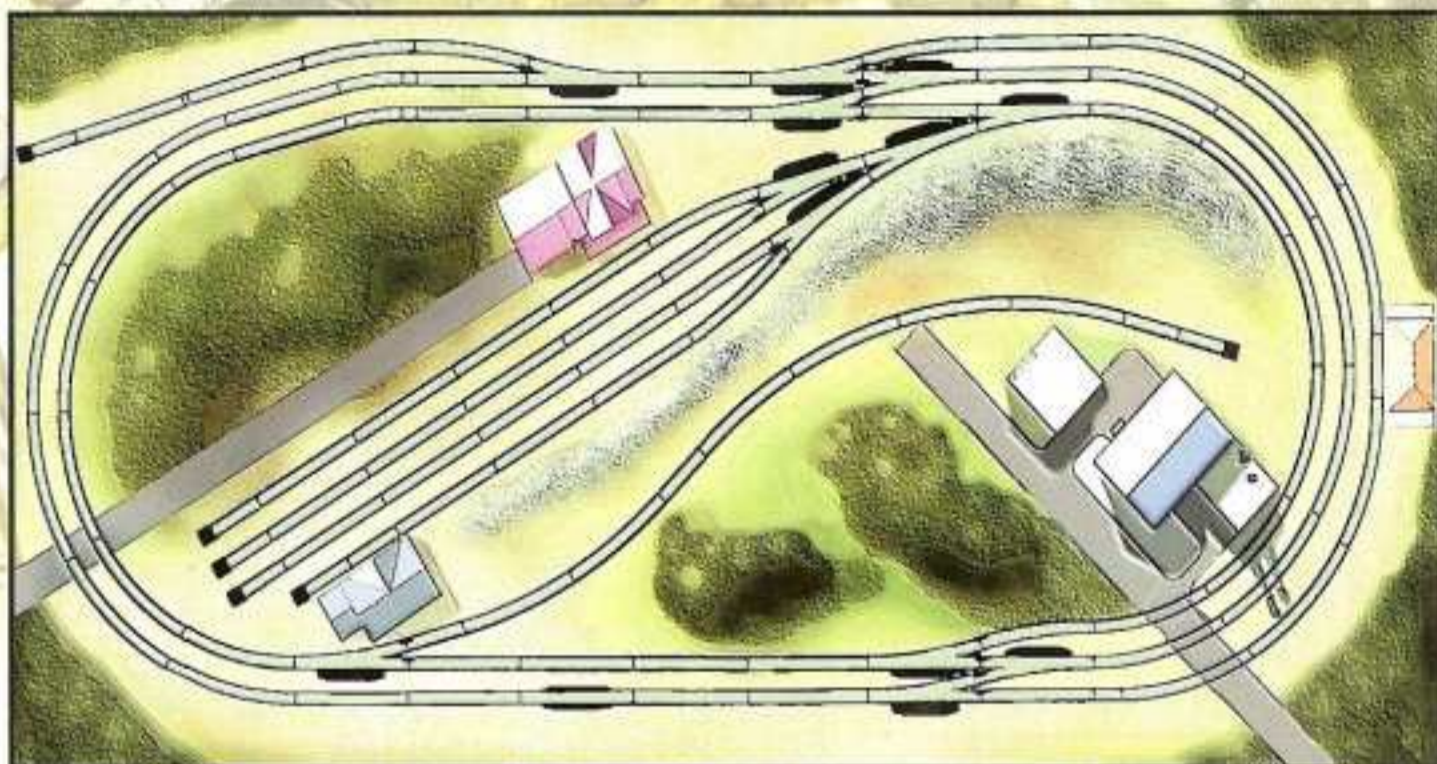

Multiple Track Arrangement \$241.95
with Power Pack \$276.90
with optional second Power Pack \$311.85

Skill level: Beginner

This plan & a detailed list of "Atlas Products Required," can be found in Book #6: Introduction to N Scale Model Railroading

Summary of Atlas products included in package:

- Over 90 pieces of track (including bumpers & rerailers)
- 11 Remote switches, 1 manual switch, 10 switch control boxes
- 3 Selectors
- Necessary amount of rail joiners & track nails

Trees, scenery & buildings shown are not included in package

Table Size - 27"x 60"

NOTE: Prices for layout packages were calculated using single piece retail prices.

LAYOUT N-11

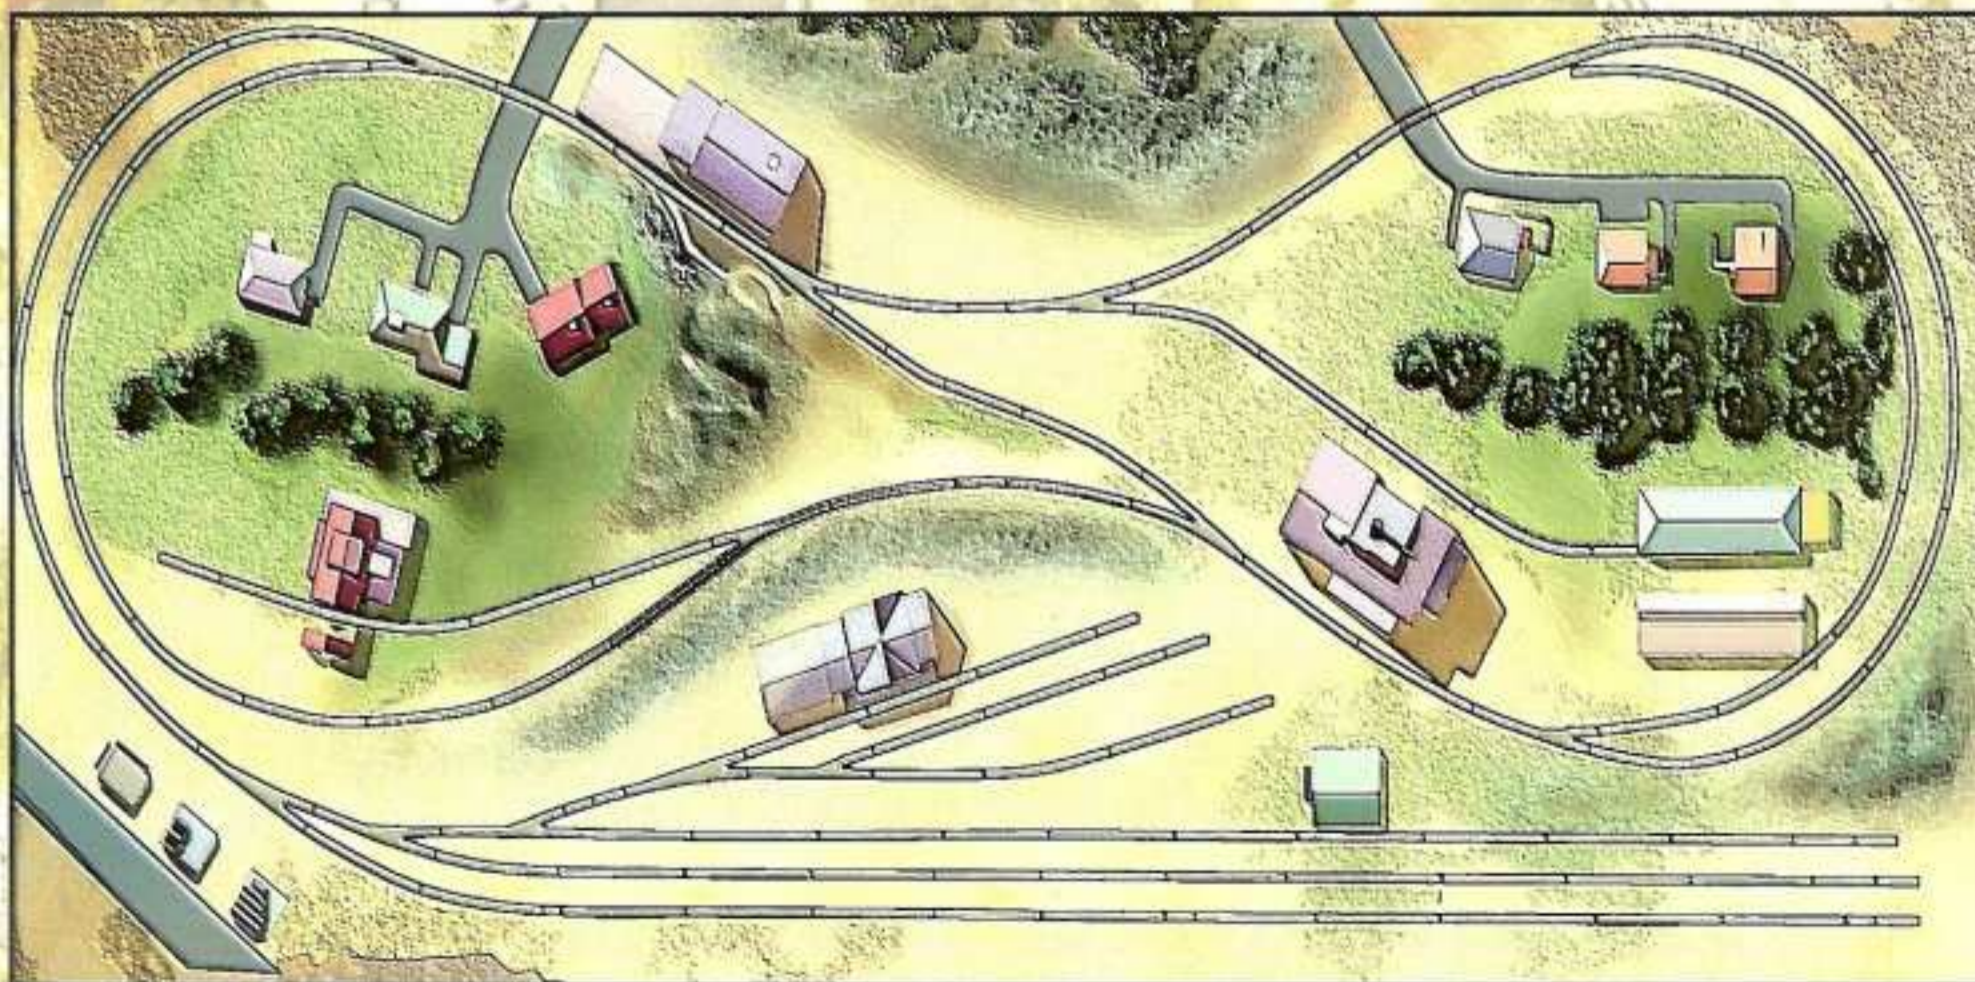

Unhinged & Horizontal \$286.95
with Power Pack \$321.90
with optional second Power Pack \$356.85

Skill level: Intermediate

This plan & a detailed list of "Atlas Products Required," can be found in Book #7: Nine N Scale Railroads

Summary of Atlas products included in package:

- Over 115 pieces of track (including bumpers & rerailers)
- 14 Remote switches, 13 switch control boxes
- 3 Selectors, 1 controller
- Necessary amount of rail joiners & track nails

Trees, scenery & buildings shown are not included in package

Table Size - 30"x 78"

ALL NEW PASSENGER STATION & PLATFORM KITS!

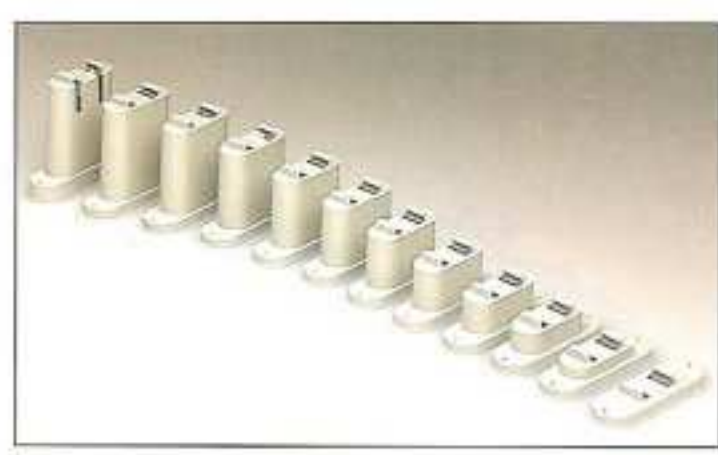

From the Collection of "HOseker"

N SCALE STRUCTURE KITS

Atlas has taken three popular HO structure kits and recreated them for N scalers! Each kit is modeled after an actual prototype and is molded in appropriate colors so painting is not required. Assembly is easy using plastic compatible glue (not included).

- #2840 Signal Tower** **\$14.95**
- Accessories that come with signal tower include a tool shed, barrels and an oil tank.
- #2841 Passenger Station Kit (includes one platform)** **\$19.95**
- #2842 Station Platform Kit (includes two platforms)** **\$10.95**

Intricate exterior details include: an inlaid brick chimney, drainage pipes, oil and eave supports and realistically shingled roof. Accessories that come with station and platform kits include a luggage cart with baggage and freight, a hand truck, and a freight scale.

#2541 OVER 'N UNDER PIER SET

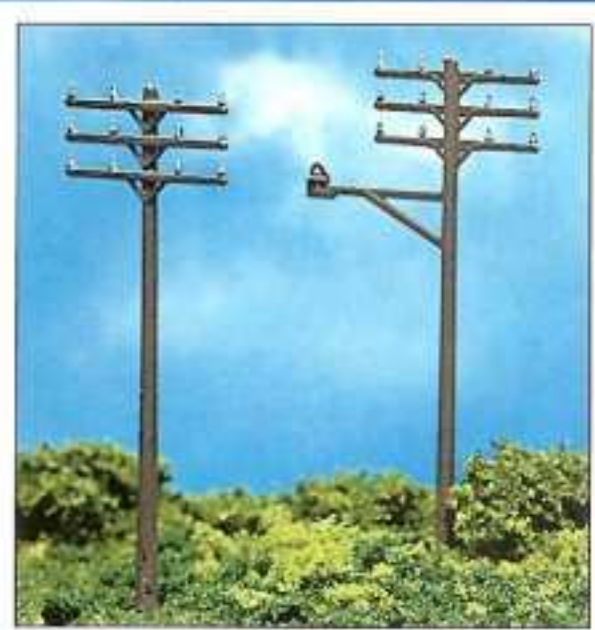

\$6.85
Two each of 12 graduated concrete piers plus #2542 Straight Pier Girder. Pier heights range from 9/64" through 1-11/16" by 9/64" increments. Grade with piers spaced at 5" intervals is 2.8%. (25 pieces per package)

#2826 VIADUCT KIT

\$3.85
Easy-to-build, assembles into 4-arch cut stone masonry single-track viaduct. Arches are 2-5/32" center-to-center and 3-1/4" high. Easily shortened to any length. Arch assembly without piers is 1" high.

All bridges are the same length as a standard 5" straight section. Snap them together atop the #2543 Bridge Piers in any number and arrangement, for an impressively realistic multi-span structure.

#2801 TELEPHONE POLES
\$1.80 (set of 12)

#2547 DECK TRUSS BRIDGE
\$3.50 (5" x 3/4" x 1-1/4")

#2548 PLATE GIRDER BRIDGE
\$3.50 (5" x 1-1/2" x 5/8")

#2546 WARREN TRUSS BRIDGE
\$3.50 (5" x 1-1/2" x 1-1/8")

#2543 BRIDGE PIERS
\$2.35 1-11/16" high 3 pieces per package

#2542 STRAIGHT PIER GIRDER
\$2.35 (5" long) 4 pieces per package

***All Atlas N scale track comes in nickel silver rail with black ties.**

SUPER-FLEX TRACK®

Item #	Description	Price
2500	30" Section with Black ties	2.50
2505	Super-Flex® Track 5-Pack (5, 30" sections)	12.95

Super-Flex Track®, which comes in approximately 30" sections, can easily be bent and shaped to curve to any radius. Ideal for spiral easement curves. Easily cut to any needed length with a #400 Modeler's Super Saw on page 9.

For an explanation of how to use Super-Flex Track®, see page 9.

From the Collection of "HOseker"

#2790 TURNTABLE

\$16.95

The fully assembled turntable features:

- 7-1/2" diameter deck
- Smooth manual operation
- 21 track positions with 15 degree stall spacing
- Geneva movement locks table in exact position every time
- Simulated wood brown turntable deck and concrete pit ring.

The N scale turntable can be motorized easily with the N scale motor drive unit.

#2540 TRACK NAILS

\$2.95

(approx. 400 per package; 2 oz.)

Used to attach track or roadbed to layout table. For HO and N scale.

#2791 MOTOR DRIVE

\$14.95

RAIL JOINERS

Item #	Description	Price
2535	Nickel silver (48 per package)	1.80
2538	Plastic insulating (24 per package)	.90
2539	Terminal Joiners (1 pr., nickel silver)	2.05

Terminal Joiners are rail joiners with wire attached to allow electricity to flow from the power pack to the rails.

Rail joiners are small clips used to join two sections of track mechanically. They come in metal (nickel silver) which also connects the rails electrically, and plastic which are insulated to isolate the two sections of track electrically.

#2520

CURVED SNAP-TRACK®

(6 PIECES PER PACK)

Description	Item #	Price
9-3/4" Radius Section	2510	2.25
1/2 - 9-3/4" Radius Section	2511	1.80
11" Radius Section	2520	2.25
1/2 - 11" Radius Section	2521	1.80
19" Radius Section	2526	2.25

**#2501 5" STRAIGHT
SNAP-TRACK®**

\$2.25

6 pieces per pack

#2501

BULK TRACK

Description	Item #	Price
5" Straight Section	2513	.32
9-3/4" Radius Section	2514	.32
11" Radius Section	2515	.32
19" Radius Section	2516	.32
Rerailer	2517	.50

Atlas also offers the above N scale
Snap-Track® pieces in bulk (no packaging).
Pricing is per single piece.

**#2509 SNAP-TRACK®
ASSORTMENT**

\$2.60

Includes two 2-1/2", four 1-1/4" and
four 5/8" sections. Provides you with
an easy way to fill short gaps in sec-
tional track layouts.

#2509

CROSSINGS

Degree	Item #	Price
15°	2564	5.50
20°	2565	5.50
30°	2566	5.50
45°	2567	5.50
60°	2568	5.50
90°	2569	5.50

A special track piece that permits
two tracks to cross one another,
but does not allow trains to move
from one track to the other.

#2567

#2536

**#2536 SNAP-TRACK®
BUMPER**

\$1.80

2 pieces per package
Realistic way to keep your
equipment from rolling off
the ends of track sidings.
Overall length is 2-3/4".

#2532 RERAILER

\$1.80 3 pieces per package

A sweep of the hand places rolling stock on rails. Automatically
rerails derailed equipment in hard to reach hidden areas.

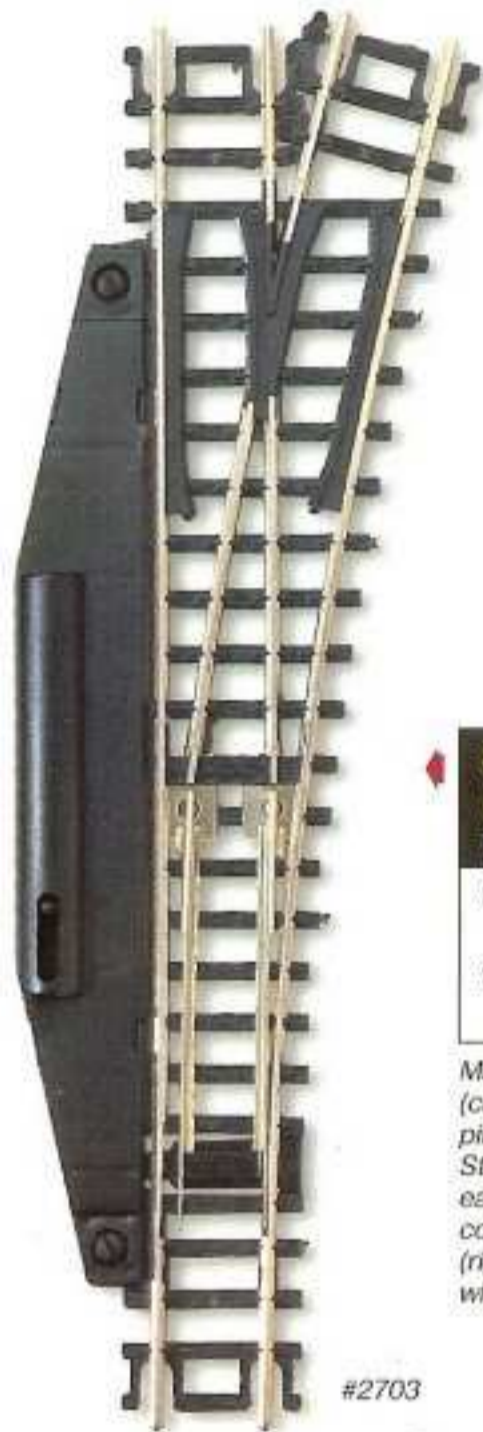

#2532

STANDARD SWITCHES

Our series of switches makes operating your layout a long lasting pleasure. More RELIABLE than ever, Atlas N switches feature:

- Refined and narrower flangeways at the frog and guard rails.
- Positive mechanical attachment of points. **From the Collection of "HOseeker"**

- Better electrical conductivity.
- Smaller switch machine for fit into tight spaces.
- Whole new series of Custom-Line® Switches intended for use with Atlas Under-Table Switch Machine or ground throws.

#2703

STANDARD SWITCHES (REMOTE)

Item#	Description	Price
2700	Standard Lefthand, Remote	13.95
2701	Standard Righthand, Remote	13.95

These turnouts have a remote control switch machine attached so you can wire the switch to be "thrown" (changing the direction of the rail), from your control panel rather than from the switch itself. Remote control turnouts include the #56 Switch Control Box shown on page 20, and one piece of 19" radius track.

STANDARD SWITCHES (MANUAL)

Item#	Description	Price
2702	Standard Lefthand, Manual	8.95
2703	Standard Righthand, Manual	8.95

Manual turnouts can only be "thrown" (changing the direction of the rail) by flipping a lever on the switch by hand. These Standard N scale manual turnouts can be easily converted to remote control with #2715 (lefthand) and #2716 (righthand) switch machines. Comes with one piece of 19" radius track.

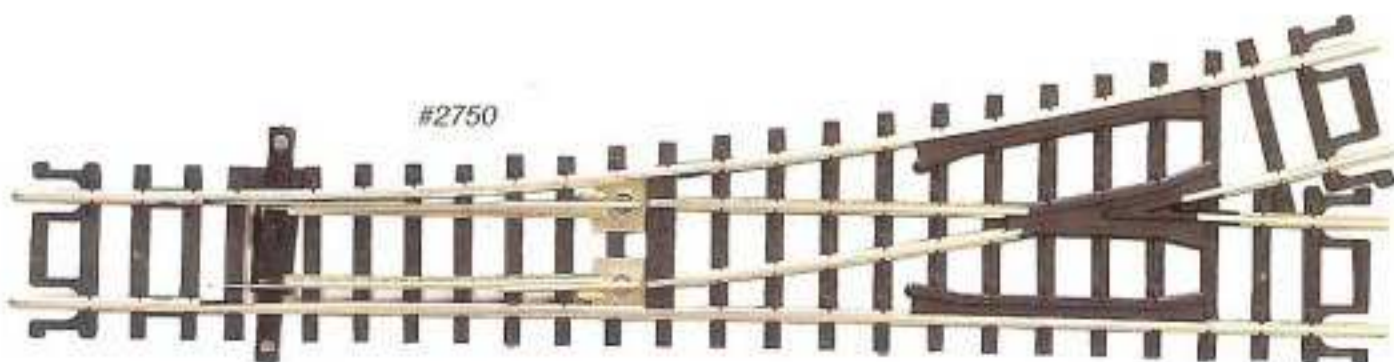

CUSTOM N LINE® STANDARD SWITCHES

Item#	Description	Price
2750	Custom Standard Lefthand	7.95
2751	Custom Standard Righthand	7.95

Custom N Line® turnouts are made to be used with the Atlas Under-Table Switch Machine (shown on page 19) or a ground throw. Unlike the other N scale turnouts which have shortened ties to allow for switch machine attachment, Custom N Line® turnouts have full-length ties. A double-ended throw-bar allows you to place your under-table switch machine on either side of the turnout. Comes with one piece of 19" radius track.

What's the difference between Standard and #6 Switches?

The difference between the Standard turnout and #6 turnout is the angle at which the curved piece of track splits from the straight piece. The rails of the Standard Switches split at a sharper angle than the #6 Switches, creating a sharper curve. Therefore, Standard switches work better in smaller spaces.

#2750

#6 TURNOUTS

#6 TURNOUTS (REMOTE)

Item#	Description	Price
2704	#6 Turnout Lefthand Remote	13.95
2705	#6 Turnout Righthand Remote	13.95

These turnout have a remote control switch machine attached so you can wire the switch to be "thrown" (changing the direction of the rail), from your control panel rather than from the turnout itself.

Remote control turnouts include the #56 Switch Control Box shown on page 20.

From the Collection of
"HOseeker"

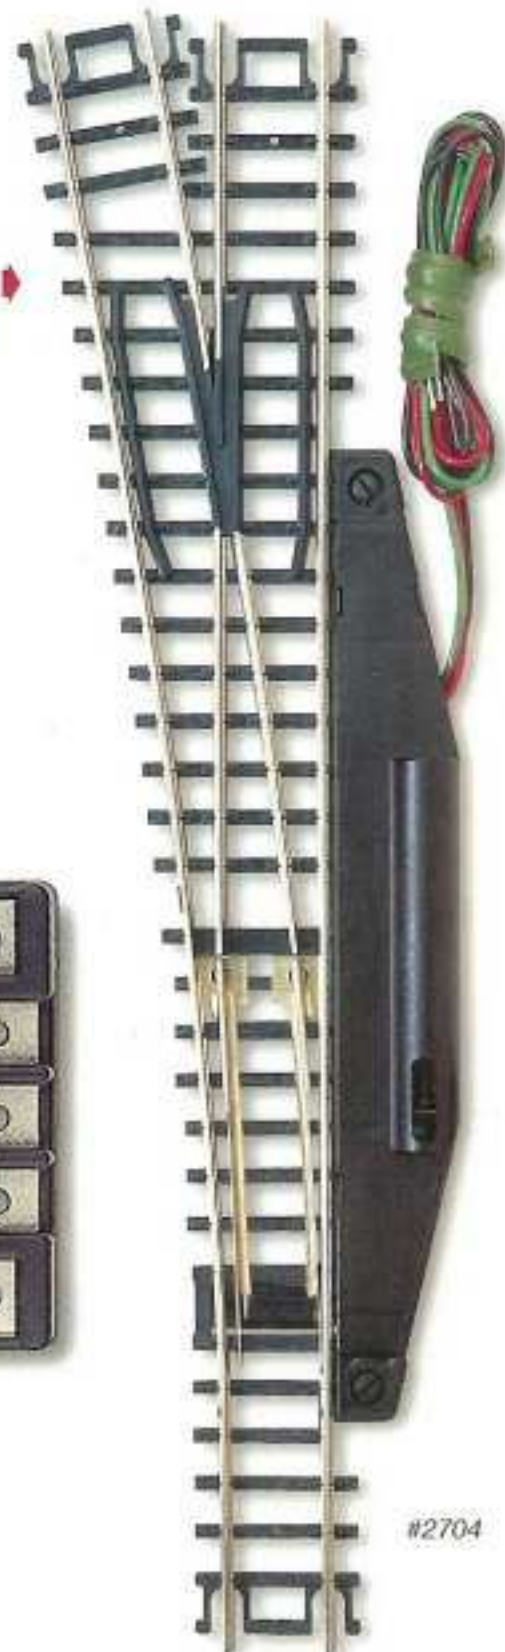

#6 TURNOUTS (MANUAL)

Item#	Description	Price
2706	#6 Turnout Lefthand Manual	8.95
2707	#6 Turnout Righthand Manual	8.95

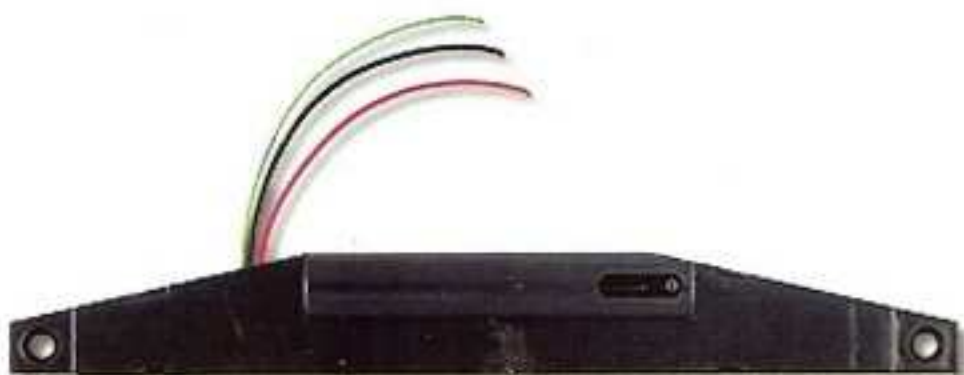

Manual turnouts can only be "thrown" (changing the direction of the rail) by flipping a lever on the turnout by hand. These #6 N scale manual turnouts can be easily converted to remote control with #2715 (lefthand) and #2716 (righthand) switch machines.

#2707

#2704

#2716

SWITCH MACHINES (REMOTE)

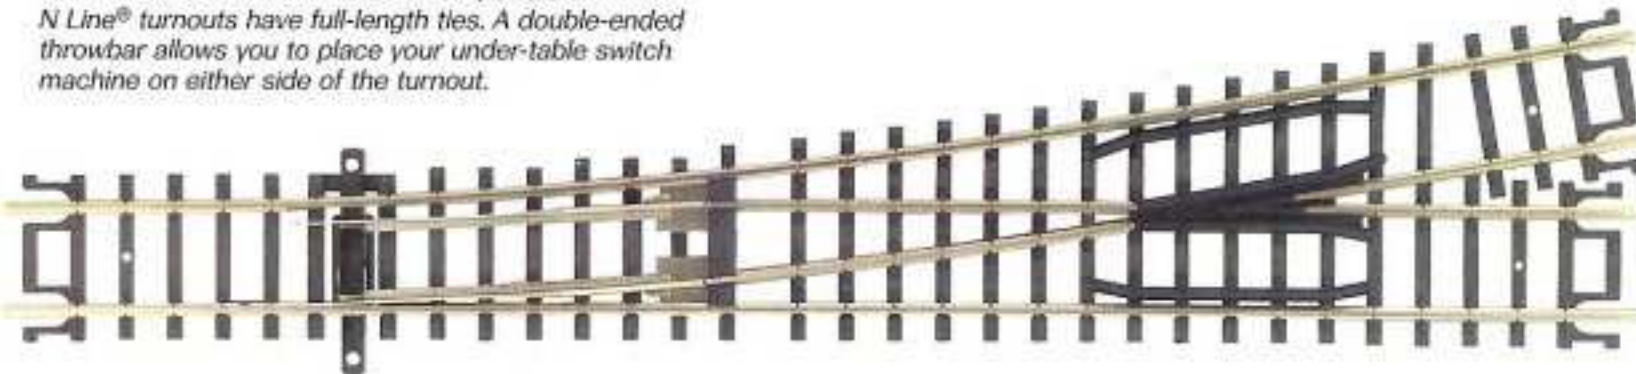

Item#	Description	Price
2715	Remote Left	6.95
2716	Remote Right	6.95

Screw-on remote switch machines will quickly and easily convert Atlas Standard or #6 N turnouts to remote control. With a remote control turnout, you can wire the turnout to be "thrown" (changing the direction of the rail) from your control panel, rather than from the turnout itself.

CUSTOM N LINE® #6 TURNOUTS

Item#	Description	Price
2752	#6 Custom Left	7.95
2753	#6 Custom Right	7.95

Custom N Line® turnouts are made to be used with the Atlas Under-Table Switch Machine (shown on page 19) or a ground throw. Unlike the other N scale turnouts which have shortened ties to allow for switch machine attachment, Custom N Line® turnouts have full-length ties. A double-ended throwbar allows you to place your under-table switch machine on either side of the turnout.

#65 UNDER-TABLE SWITCH MACHINE

\$6.50

Nicely hides beneath your layout so you can throw your turnouts without seeing the machine. Can be used with all Atlas (and many other) HO and N scale turnouts. **Please see page 20 for photo and usage instructions.**

Atlas brings N scale locomotives to the next level with the SD-60 and SD-60M locomotives. These large locomotives measure over 5" in length, and will further impress you with other exciting features such as a separate plow and a winterization hatch that you can install easily.

In keeping up with the latest in DCC technology, the SD-60 and SD-60M models come in two variations: one with a factory-installed Lenz DCC decoder-equipped PC board, and the other with PC boards designed to be replaced by DCC decoder-equipped boards in the future. Each roadname will be available with or without the decoder-equipped board.

Other standard features of these fine models include: directional lighting, blackened wheels, a dual flywheel equipped 5-pole skewed armature motor with a low friction mechanism, and full pilots with body mount Rapido couplers which can easily be changed to MicroTrains® #1015/1016 couplers.

PROTOTYPE INFORMATION

First introduced in 1984 by the Electro-Motive Division of General Motors, the SD60 was EMD's answer to General Electric's bid for a high horsepower heavy-duty drag operation locomotive, as well as a replacement for the SD-40 series. The six axle unit is used today in powering medium speed freight trains in main-line service as well as unit train coal service. SD60s were among the first locomotives to be equipped with a microcomputer for all control system functions and enhanced diagnostic features.

N SCALE SD-60M

To satisfy N scale demand for more modern locomotives, Atlas introduces the SD-60M.

The Atlas N SD-60M is a modification of the N SD-60, including the prototypically correct number of cab windows (depending on the roadname and number).

See description of the SD-60 on page 40 for a complete listing of details included on this model.

Atlas Classic
LOCOMOTIVES

N ALCO RS-1

Atlas Classics are a visit back to some of Atlas' most famous and popular locomotives ever made. Depending on the model, each Classic locomotive may be retooled to include the addition of plastic and digital parts, updates to framework and internal drives, and the incorporation of the latest Digital Command Control technology. Although they are models you may recall from the past, the future Classic locomotives promise to be technologically superior to their predecessors.

The RS-1, Atlas' fourth N Classic, features full pilots and body mounted Rapido couplers which can be changed to MicroTrains® #1015/1016 couplers. Other features include: 5-pole skewed armature motor, powered low friction drive, blackened metal wheels, dual brass flywheels, and directional lighting.

**The RS-1 will not have the DCC plug installed. Modelers wishing to convert this model to DCC should use one of the board mounted decoders available from various manufacturers.*

OUR STOCK INCLUDES OVER 25 DIFFERENT BODY STYLES FOR A TOTAL OF OVER 300 DIFFERENT N SCALE FREIGHT CARS!

Atlas's line of N scale freight cars is very extensive, and is constantly expanding. We work hard to produce only the finest cars with delicate detailing and outstanding printing quality.

Throughout the year as each in-stock freight car sells out, we will rerelease that car with the same roadname but a brand

new road number, giving you more variety. In addition, we'll continue to produce new body styles and new roadnames for existing freight car types. Stay tuned to our web site for the latest new N scale freight car announcements! www.atlasrr.com

Atlas' new N autoparts model has some details never included on an Atlas N freight car before, like a die-cast underframe with realistic details (in plastic), separate end ladders and positionable doors. Other highlights of this fine model include 70-ton roller bearing trucks and Rapido couplers that can be easily be changed to Micro-Trains® couplers.
