"In terms of performance and reliability, my Atlas HO engine... is the best I've ever owned. The pleasure of seeing and experiencing my Atlas engine effortlessly pulling 20 freight cars to me is what model railroading is all about."

Atlas customer - James, Chicago, IL

"With the ultra high level of detailing, outstanding decoration and superb performance, Atlas has raised the bar more than a notch or two--for other manufacturers, and themselves as well."

Model Railroad News, August 2000  
HO GP-40 Locomotive...see page 10.

From the Collection of  
"HOseeker"

"Atlas' commitment to the model railroader for striving to produce the highest quality and most accurate models possible is surely self-evident in the HO AEM-7."

Model Railroad News, March 2000  
HO AEM-7 Locomotive...see page 7.

"These excellent, ready-to-run cars will be welcomed by anyone modeling a recent time period, regardless of their chosen prototype."

Railroad Model Craftsman, October 2000  
HO ACF 60' Auto Parts Car...see page 14.

"I am extremely pleased with the magnificent detail in design and the splendid smooth operating of my new HO AEM-7 locomotive."

Atlas customer - Donald, Rockford, IL...see page 7.

"This model accurately captures the prototype's proportions and included some innovative details in its construction."

Model Railroader, February 2000  
Atlas N ACF Auto Parts Car...see page 41.

"Atlas has maintained its modern reputation for quality with this fine locomotive."

Model Railroader, October 2000  
N SD-35 Locomotive...see page 39.

(See page 39 for N SD-35 details.)

(See page 3 & 4  
for DCC details.)

Atlas Master DCC  
A Complete System in 1-2-3!

1. Commander - For Control
2. Generator - For Power
3. Decoder - For Operation

\*Prices subject to change without notice  
Atlas Catalog ©2001

## TABLE-OF-CONTENTS

• Introduction to Atlas Model Railroad Co., Inc.

### GETTING STARTED

- Atlas Master DCC System 3-4
- The Difference Between N, HO and O Scale 5
- Instruction/Reference Books, Track Templates & the Atlas CD Library 6

### HO SCALE

- HO Locomotives 7-12
- HO Ready-To-Run Rolling Stock 13-18
- An Introduction to HO Track - HO Track FAQ's 19-20
  - Code 83 vs. Code 100 vs. True-Track®
  - Super-Flex® Track
  - Track Nails & Rail Joiners
- Code 83 Track (brown ties, nickel silver rail) 21-24
  - Snap-Track®
  - Super-Switches® & Custom-Line® Turnouts
- True-Track® (roadbed track) 25
- Code 100 Track (black ties, nickel silver rail) 26-29
  - Snap-Track® & Related Accessories
  - Snap-Switches® & Custom-Line® Turnouts
- HO Layout Packages 30-32
- HO Accessories, Piers & Bridges 33
- HO Trackage Structure Kits 34
- HO Roundhouse & Accessories 35

### ELECTRICAL COMPONENTS

- Electrical Components for Both Scales 36

### N SCALE

- N Locomotives & Lubricants 37-39
- N Rolling Stock 40-46
- N Track- 47-50
  - Super-Flex® Track, Snap-Track® & Related Accessories
  - Standard & Custom-Line® Turnouts
- N Layout Packages 51-52
- N Structure Kits, Bridges, Piers & Accessories 53-54

**NEW!**

## Atlas Master DCC A Complete System in 1-2-3!

2.

3.

From the Collection of  
"HOseeker"

### First things first...

#### WHAT IS DIGITAL COMMAND CONTROL?

Simply put, Digital Command Control (DCC) is a way to control your layout that simulates real life train operation. With DCC you can operate multiple locomotives independently at the same time (at varying speeds and direction) on the same section of track, without a computer and without complex wiring required. Digital Command Control systems communicate with decoders that control locomotives and turnouts on your railroad just like an actual dispatcher!

An alternative to digital is analog which is a layout run with a standard (DC) power pack.

#### WHY USE A DIGITAL SYSTEM RATHER THAN AN ANALOG SYSTEM?

First, since a digital system allows you to control your trains, not your track, layout wiring is much simpler. Second, digital systems provide extremely reliable operation. Third, DCC systems can be expanded easily, without requiring you to rewire your layout. You can add additional devices (like a hand-held throttle for example) simply and easily.

#### WHY ATLAS MASTER DCC?

Atlas has been a pioneer and leader in the model railroad industry for over 50 years. Traditionally known for our track, trains and accessories, Atlas has remained at the forefront of innovation and technology. We are committed to offering you the most realistic and high quality products imaginable. Since DCC simulates prototypical train operation, Atlas Master DCC is a logical extension of our line. What's more, with this new system, we provide model railroaders of all skill levels an inexpensive, easy way to get involved in DCC.

### NOW FOR THE 1-2-3 PART....

Atlas Master DCC really is as easy as 1-2-3. There are only three things you need to get started in DCC, and Atlas offers all of them.

### WHAT MAKES THE HO DUAL-MODE DECODER SO SPECIAL?

*Good question. Normally, running decoder-equipped engines on a standard analog layout will result in an inappropriate speed differential. Atlas' new Dual-Mode™ Decoder eliminates this speed differential, allowing your decoder-equipped Atlas locomotives to perform flawlessly on either an analog or digital layout. So you can take your decoder-equipped locomotive to a friend's analog layout and enjoy running your locomotive!*

### COMING SOON!

**Accessory Decoders** - Allows you to control your turnouts using the Commander

**Automatic Reversing Module** - Automatically sets the polarity on a reversing loop

**Hand Held Unit/Walk-Around Throttle** - Works just like the Commander and gives you the flexibility to freely move about your layout

The Atlas HO GP-38, Atlas Commander and HO Dual-Mode™ Decoder have received NMRA conformance warrants.

## Three Reasons to Choose Atlas Master DCC

- It's **FLEXIBLE**.
- It's **AFFORDABLE**.
- It's backed by unconditional **SUPPORT**.

"HOseeker"

### WANT TO KNOW MORE?

Visit our web site at [www.atlasrr.com](http://www.atlasrr.com). To ask questions, email: [dcc@atlasrr.com](mailto:dcc@atlasrr.com)

### ALSO INTRODUCING THE ATLAS MASTER DCC LOCOMOTIVE SERIES.

For the first time ever, EVERY HO GP-38 (low and high-nose) and GP-40 (high nose) units, as well as the new HO Dash 8-40B locomotives released will have the Dual-Mode™ Decoder factory-installed! See pages 9,10 & 12 for more details.

### DCC Duo-Pack (Item #332)

- Value! Save \$10

\$179.95

Contains one Atlas Commander and one Atlas Generator

## 1. The Atlas Commander. (Item #330)

For complete control of your trains and accessories. Controls speed and functions like headlights, ditchlights and sound of up to 99 locomotives, and 99 accessories (i.e., turnouts). Supports up to five additional Commanders and/or walk-around throttles and three additional power stations (for added power). Controls up to three functions per decoder (available functions depend on the capability of the decoder)

Other Features Include:

- Intuitive button and dial control
- Command station and power station in one
- Easy hook up to Atlas Generator (Item #335)
- Stack function for simple recall of up to 8 engines

## 2. The Atlas Generator. (Item #335)

Provides power to the Atlas Commander. Any layout, either complete or under construction, can be easily converted to DCC by replacing your power packs with the Atlas Commander for control, and the Atlas Generator for power.

Features Include:

- Provides power to the Atlas Commander (Item #330)
- UL Recognized Component
- Thermal fuse for overload protection
- Easy access terminals hold wires in place
- Output: 15V 3.0 Amp
- Input: 120VAC min., 50-60 Hz

## 3. The Atlas HO Dual-Mode™ Decoder. (Item #340)

New, patent-pending technology. This multi-function decoder can easily be installed into almost all Atlas locomotives produced over the last 15 years, as well as most other manufacturers' locomotives with a motor-mounted light board. Each decoder comes with the headlights set to Function 0, so beginners can get started right out of the box. (Note: programming of Function 1 is available for advanced users. See below for more details.) These decoders are affordable, so you can make your entire fleet DCC-ready! N scale Dual-Mode Decoders are expected to be released in early 2001.

*Note: Decoder-equipped locomotives and accessories can be controlled with the Atlas Commander.*

HO Dual-Mode Decoder Specifications:

- Extra function can be used to dim headlights (Rule 17)
- Support for Advanced Consist Control and Extended Addressing
- Provides 1 Amp continuous motor current
- Size: 2.88"L x 0.68"W x .26 "H
- 14, 28 or 128 speed step selectable
- Full support for operations mode programming (long and short) and full support for all forms of programming as described in NMRA RP-9.2.3
- Two function outputs with a current rating of 200 mA that can be configured for either directional lighting, or lights and Function 1
- Functions which can be programmed to match the requirements of each locomotive (i.e., ditch lights or other special effects)

From the Collection of  
"HOseeker"

## N Scale vs. HO Scale vs. O Scale

The most popular question asked by new model railroaders is "What's the difference between the scales available?" Here's some information to help you learn more about model railroad "scales."

### PROPORTION AND SIZE

It's easy to define the various scales in terms of a ratio. N is 1:160 the size of real trains, HO is 1:87, and O scale is 1:48. This means, for example, that HO is 1/87th as long as its prototype, 1/87th as tall, and in every dimension its proportions are 1:87. In terms of actual size, HO scale locomotives and freight cars, depending on the type (whether it's a switcher engine or a more modern GE locomotive, for example) could range anywhere from 5" to 9" long and about 2" high. The track is 1 1/8" wide. N scale is just about half the size of HO, with locomotives and cars measuring about 3" to 4" long and 1" high, and the track 5/8" wide. O scale is the biggest of the three, with locomotives being anywhere from one to two feet long, and about 5"-6" high; the track is about 2-1/4" wide. If you are familiar with classic Lionel trains, then you know what size O is.

### PRODUCT AVAILABILITY

Since HO is the most popular scale (by definition of the most modelers engaging in it), it's the scale that enjoys the greatest variety of available products. N scale is second to HO, and has picked up speed in the race for popularity over the past ten years. The variety of products available in N scale therefore follows close behind HO. O gauge, on the other hand, services a more limited market and is offered by a select few companies, limiting the variety of products available. However, Atlas O, LLC has added significantly to the amount and type of products available for O modelers everywhere. To order an Atlas O catalog, please call (908) 687-9590.

### PRICING

Contrary to what might seem logical, there is no ratio between price and size when it comes to scale models. HO and N scale tend to be in the same price range when it comes to locomotives; however HO freight cars are about twice as expensive as N scale. In contrast, O products are significantly more expensive than both HO and N due not only because of its size, but because of the smaller market, type of detail and auxiliary features (like sound) that are the cornerstone of O railroading.

### OPERATING ABILITY

Because of its minute size, N scale tends to be considered the "operating scale," enabling you to fit a complex layout with lots of operating capability into a small space. HO takes up a lot more space, but some consider it to be a more reasonable size to handle. HO tends to offer just as much operation ability as N, it just requires a larger area to do it in. O scale layouts tend to be less complex, but no less fun, since they generally incorporate sound, operating accessories and other such functions which make operation exciting and very life-like.

So, if you're looking for HO and N scale, please see the following pages for a variety of fine-quality, prototypical products designed, developed and manufactured by Atlas Model Railroad Company, Inc.

### HO LAYOUT INSTRUCTION BOOKS

Item#	Description	Price
#9	<i>Beginner's Guide to HO Model Railroading</i> Beginner (Level 1) 44 pages, Layouts HO-1 to HO-12	\$3.95
#11	<i>HO Layouts for Every Space</i> Intermediate (Level 2) 52 pages, Layouts HO-13 to HO-23	\$4.95
#13	<i>Seven Step-By-Step HO Railroads</i> All skill levels (Levels 1-3) 52 pages, Layouts HO-24 to HO-30	\$4.95
#14	<i>HO King-Size Plan Book</i> Advanced (Level 3) 68 pages, Layouts HO-24 to HO-30 (Four 11 x 17 fold out track plans included)	\$6.95

### N LAYOUT INSTRUCTION BOOKS

Item#	Description	Price
#6	<i>Introduction to N Scale Model Railroading</i> Beginner (Level 1) 37 pages, Layouts N-1 to N-9	\$3.95
#7	<i>Nine N Scale Railroads</i> Advanced (Levels 2-3) 56 pages, Layouts N-10 to N-18	\$4.95

### REFERENCE BOOKS FOR ALL SCALES

Item#	Description	Price
#3	<i>Parts Catalog</i> (Contains exploded diagrams, parts, pricing, and some assembly, repair and maintenance information)	\$5.00
#12	<i>The Complete Atlas Wiring Book</i> All skill levels - 56 pages (Step-by-step instructions on how to install and use electrical components)	\$4.95

### TRACK PLANNING TEMPLATES

Item#	Description	Price
360	<i>N Track Planning Templates</i> (Contains the entire Atlas N scale track line)	\$2.95
361	<i>HO Track Planning Templates</i> (Contains the entire Atlas HO scale track line)	\$3.95

### THE ATLAS LIBRARY - NOW ON ONE CD-ROM!

Item#	Description	Price
371	<i>The Entire Atlas Library (For PC's Only)</i> (Contains every Atlas HO and N scale layout instruction book, the Complete Atlas Wiring Book & the Parts Catalog, all on one interactive CD-ROM!) <b>A GREAT VALUE!</b>	\$19.95

## Books & Track Templates

To help you get started building a layout that suits you, Atlas offers layout instruction books for beginner, intermediate & advanced model railroaders. Each layout book is aimed at a specific skill level and contains a variety of interesting railroad plans along with step-by-step instructions on building a layout table, laying down roadbed and track, wiring and scenery techniques for each layout.

(For information on our popular RTS layout planning program which is now FreeWare, see page 52)

The CD-ROM version of each book includes all the text, blueprints, figures, diagrams and materials lists. Understanding and planning your layout will be easier than ever before with this new CD-ROM product. (Based on Logos Library Software, a popular concept in CD-ROM books.)

System Requirements: PC with 386SX or better, Windows '95 or '98, floppy drive, 5MB hard drive disk space, 4MB RAM (8MB recommended), mouse and VGA monitor.

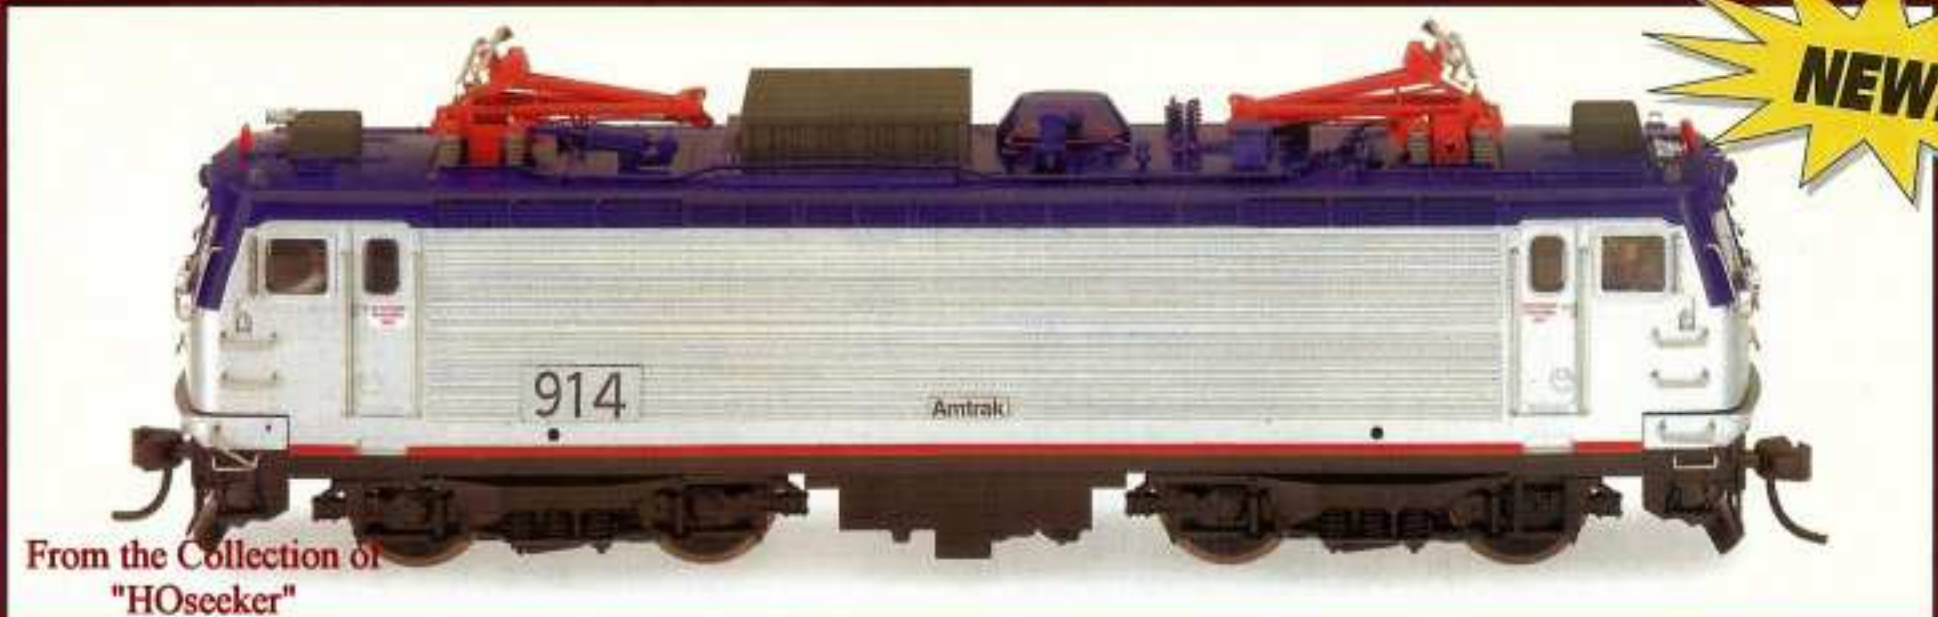

#361 - HO Track Template

From the Collection of "HOseeker"

Visualize the size and shape of your layout before you begin building. Templates are exact replicas of all current Atlas track, switches, bridges, piers and viaduct.

**HO Electric Locomotives**

Atlas' HO scale electric locomotive - the AEM-7/ALP-44 is electrifying! Features include operating pantographs, die-cast chassis, dual flywheels, operating headlights and marker lights which are directional, full-cab interior with painted crew members, separately-applied wire grab irons, astounding roof detail and factory-equipped AccuMate® couplers. Each unit also includes an integral switch on the circuit board which allows you to select either pantographs or track power for easy operation.

## HO RS-11 Classic Locomotives

ATLAS PROUDLY CONTINUES the Classic Locomotive Line with the HO RS-11. Extremely popular in its time in service as well as when Atlas first created it as a model in the 80's, the RS-11 locomotive is a masterpiece of railroad craftsmanship. Characterized by the deep notches in the hood ends, Atlas captures the spirit of the prototype in true HO scale dimensions.

# Atlas Classic

Standard features include directional lighting, a die-cast main-frame, dual-flywheel equipped five-pole skewed armature motor and factory-equipped with AccuMate® knuckle couplers.

Atlas' RS-11 is richly restored with brand NEW features including separately-applied wire grab irons, corrected wheel base, MU hoses and coupler cut bars, frame mounted couplers, two painted crew members, as well as improved painting and printing.

The RS-11 is equipped with the NMRA 8-pin plug for DCC. A few more HO Atlas Classic

### HO RS-11 CLASSIC LOCOMOTIVES

### **NEW! Atlas Master GP-38 & GP-40 Locomotives!**

All Atlas locomotives have incredible details, but our mold designers have outdone themselves with the tooling of the new **Atlas Master HO GP-38 (high nose and low nose versions) and GP-40 (high nose) Locomotives**. Each unit has details never before seen on an Atlas locomotive, like movable drop steps, walkway safety tread, coupler cut bars and multiple unit hoses, just to name a few.

This new series of **Atlas Master Locomotives** also represents the height of model railroad technology. Each locomotive comes with the patented Atlas Dual-Mode™ Decoder pre-installed. This decoder allows the Atlas Master Locomotive to operate flawlessly on any kind of layout, whether it's analog (run using a standard DC power pack) or digital (run using a Digital Command Control [DCC] system). So if you don't currently use DCC on your layout, you can pull the Atlas Master Locomotive out of the box and run it, as is, to experience the ultimate in Atlas locomotive performance. There will be no speed differential, typically found when running decoder-equipped engines on analog layouts. If you do use DCC on your layout, simply follow the directions included with your locomotive. And just as it does in analog mode, the locomotive will run flawlessly in digital mode.

Other standard features of the GP-40 and GP-38 include realistic die-cast underframe, a five-pole skewed armature motor with dual-flywheels for optimum performance at all speeds, directional lighting, separately-installed scale windshield wipers, metal grab irons and fine scale handrails, as well as factory-equipped with AccuMate® couplers.

For more information on our HO Dual-Mode™ Decoder and the Atlas Master DCC System, please see pgs. 3-4.

Additional feature parts included but not installed:

- Snowplow
- Electrical cabinet air filter box (ECAFB)
- Two engine compartment roof vents which were added by many railroads sometime after delivery (GP-40 only)

The GP-38 and GP-40 locomotives are available in dynamic or non-dynamic brake versions, with either a 2600 or 3600 gallon fuel tank as appropriate by railroad.

The AccuMate® couplers on the GP-38/GP-40 are made under license from Accurail, Inc.

Price: TBA

(DASH 8-40B prototype - Photo courtesy of Paul Graf)

*Built in the late 1980's by GE, the DASH 8-40B diesel locomotives were identified by their dynamic brake gear located along the roof line between the cab and engine compartment, with ventilation provided by large roof-top grilles. These four-axle, high horsepower engines are still in service today in North America.*

*Atlas' authentic DASH 8 features a wealth of details including crew figures, separately-installed scale windshield wipers, metal grab irons and fine scale handrails. Also included are highly detailed coupler cut bars, MU hoses, snowplow, shock absorbers, piping on trucks, a die-cast underframe, a five-pole skewed armature motor with dual-flywheels for optimum performance at all speeds, directional lighting, a simulated roof-top beacon and comes factory-equipped with AccuMate® knuckle couplers.*

*\*As an Atlas Master Locomotive, these units will come equipped with the HO Dual-Mode™ Decoder pre-installed (see pgs 3-4).*

## HO Ready-To-Run Rolling Stock

### RAISING THE BAR OF FREIGHT CAR SCALE ACCURACY

To keep up with modelers' demand for unmatched realism, with each new HO freight car release Atlas raises the bar by increasing the level of detail. As an example, the new HO Pressuraide (see righthand page) will come with an etched metal roof walk, an intricate detail not found on many other ready-to-run freight cars on the market.

When you look at a real freight car from one of America's finest railroads and compare it with the Atlas HO or N scale model, you will see much more than just a similarity. You'll notice that the model is a true miniature representation of the real thing. That's when you know you are looking at an Atlas HO scale freight car and not a toy. All of the details are in the exact same position as the prototype, from the ladders, roof walks, brake gear, etc., to the paint, print & road numbers. When done correctly, the illusion is that you are holding a real train in the palm of your hand. That's what Atlas model railroading is all about.

Each model comes ready-to-run, which means no assembly is required. Sometimes we include a small detail part for you to apply, just to add a nice finishing touch. All other details are molded directly onto the car in the correct places. You have to pick up an Atlas freight car and look at it closely to admire the fine details each car possesses. Look for our entire line of high quality, ready-to-run cars at your local hobby shop.

#### HO 60' ACF® DOUBLE DOOR AUTO PARTS CAR

Item#	Description	Price
1670	Undecorated - <b>NEW!</b>	\$18.95
1671-2	Canadian Pacific - <b>NEW!</b>	\$19.95

**A NOTE ABOUT HOW WE PRODUCE OUR HO FREIGHT CARS TO GIVE YOU MULTIPLE ROAD NUMBERS ...**

All HO freight cars are offered in multiple road numbers. Periodically we will rerun the car with a new road number. The last number of the item reflects how many times we've run that specific road name with a different road number. For example, 1891-5 shows that the Chesapeake & Ohio Open Hopper was offered in five other road numbers. Although 1891-6 reflects what we currently have in stock, you may be able to find the previous item numbers (1891-1 through 1891-5) at your local hobby store.

Code 83 Track

## HO Track FAQ's

*Atlas is the leading manufacturer of model railroad track, worldwide. Here are some answers to the most Frequently Asked Atlas Track Questions...*

*There are quite a few track manufacturers out there. Why should I use Atlas track?*

Atlas has been making HO scale model railroad track for over 50 years. We are known throughout the world for our famous Snap-Track®, patented Super-Flex Track®, and Custom-Line® Turnouts. Atlas track and switches are made from quality, injection-molded plastic and nickel silver rail so that you can be sure the layout you build will be reliable. What's more, Atlas track is surprisingly affordable.

*What's the difference between Atlas HO code 83 and code 100 track?*

Literally, the code of a piece of track is the height of the rail in thousandths of an inch (meaning code 83 rail is .083" high; code 100 rail is .100" high). The significant difference lies in the physical appearance of the two types of track. Atlas code 83 track has fine, brown ties whereas code 100 has slightly thicker black ties. Because of its accuracy (and the color of the ties), code 83 is more prototypical, and therefore more realistic than code 100. Code 83 is known as a finer-scale track, and is the choice of discerning modelers. Atlas carries a full line of both code 100 and code 83 products.

*I've heard that some rolling stock may not run on code 83 track. Is this true?*

The only rolling stock that may have problems on any code 83 track are some older European-mode models. The reason is the flanges are too large. If you are running trains made within the last 20 years or so, you should not have a problem with Atlas code 83 track.

*Does Atlas offer that easy-to-use roadbed track?*

Yes, Atlas' brand of roadbed track is called True-Track®. Seen on page 25, True-Track contains a section of code 83 track, snapped into a gray, graveled roadbed base. It is easy to assemble and can be set up just about anywhere because it does not need to be secured to a board.

*How is Atlas' True-Track different from other brands, say Bachmann's EZ Track®?*

True-Track is more versatile because the track can be removed from the roadbed and used separately. This gives you options. For example, as you grow into the hobby you may decide you want to ballast your own track. With True-Track, you can do just that.

*Where do I start?*

Atlas offers four HO Layout Instruction Books that contain a total of 36 different railroad plans. Simply choose one and you're ready to go! See page 6 for details.

For more information, or to ask our track experts more technical questions, please visit our web site at [www.atlasrr.com](http://www.atlasrr.com). There is a forum there which is monitored by Atlas representatives during normal business hours.

**"You're On The Right Track® ...With Atlas!"**

# The Most Popular Atlas Track Product Ever!

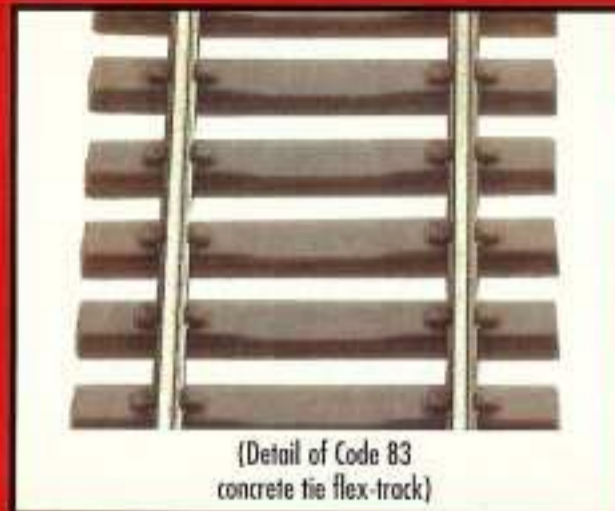

Talk to anyone with an HO layout and chances are it includes some of Atlas' famous Super-Flex® Track. This fine track product is known worldwide for its versatility, and, of course, its flexibility. What makes the patented Atlas Super-Flex® Track so unique is that unlike many other curvable tracks which tend to "kink" when flexed, Atlas' can be shaped and re-shaped until you achieve the desired form. Like all Atlas track, Atlas' Super-Flex® is a high-quality track made with injection-molded plastic and premium nickel silver rail. Like thousands of others, we know you will enjoy using it. AVAILABLE IN CODE 83 AND CODE 100!

#2540

#170

(Detail of Code 83 concrete tie flex-track)

## HO Track Nails & Rail Joiners

Rail joiners are small clips used to join two sections of track mechanically. They come in metal (nickel silver) which also connects the rails electrically, and plastic which are insulated to isolate the two sections of track electrically.

### HO SUPER-FLEX® TRACK

Item#	Description	Price
168	36" Code 100 Super-Flex Track with black ties, nickel silver rail	\$3.15
178	"5-Pack" - 5 pieces of 36" Code 100 Super-Flex Track with black ties, nickel silver rail	\$17.15
500	36" Code 83 Super-Flex Track with brown ties, nickel silver rail	\$3.75
502	36" Code 83 Super-Flex Track with simulated concrete ties	\$3.75
598	Code 83 Flex-Track End Ties - 6 per pkg.	\$1.95

### MODELER'S SUPER SAW

Item#	Description	Price
400	Long-lasting, all-purpose saw is ideal for cutting Atlas Super-Flex® Track, and for making short track-filler sections. Extra-fine teeth make razor smooth cuts in wood, plastics, nickel silver, etc. (Color may vary)	\$2.70

### RAIL JOINERS

Item#	Description	Price
55	Plastic Insulating - 24 per pkg.	\$1.15
170	Universal Rail Joiner - 48 per pkg., nickel silver Fits all Atlas HO Track	\$1.95
842	Terminal Joiners - 1 pr., nickel silver Terminal joiners are rail joiners with wires attached to allow electricity to flow from the power pack to the rails.	\$2.10

## Why Atlas Code 83 Track?

Atlas HO code 83 track is the choice of discriminating modelers of all skill levels and has become the new standard in model railroading. Featuring prototypically-fine brown ties and nickel silver rail, it not only looks realistic but is incredibly reliable. And it's the same price as our code 100 line which makes it extremely affordable.

Seven years ago we started with a few basic pieces of code 83 track. Today the entire line is available at your local hobby store, including switches, crossings, straight and radius pieces, allowing you to create any one of a number of interesting and exciting layouts, including every layout in our popular HO layout instruction books!

### HO CODE 83 CROSSINGS

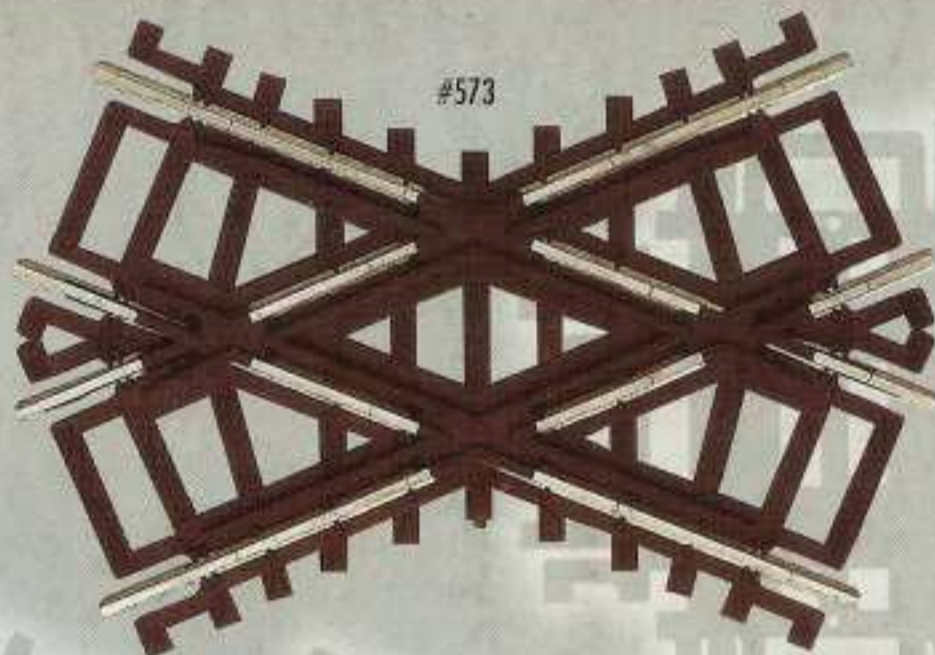

Item#	Description	Price
571	12 1/2° Crossing	\$6.95
572	19° Crossing	\$6.40
573	25° Crossing	\$6.40
574	30° Crossing	\$7.45
575	45° Crossing	\$6.40
576	60° Crossing	\$6.40
577	90° Crossing	\$6.40

### RAIL JOINERS

Item#	Description	Price
170	HO Universal Rail Joiners - 6 per card (Nickel Silver)	\$1.95
551	Transition Joiners - Used to connect Code 83 and Code 100 track	\$2.10
552	Plastic Insulating - 24 per pkg.	\$1.20

### STARTER SETS

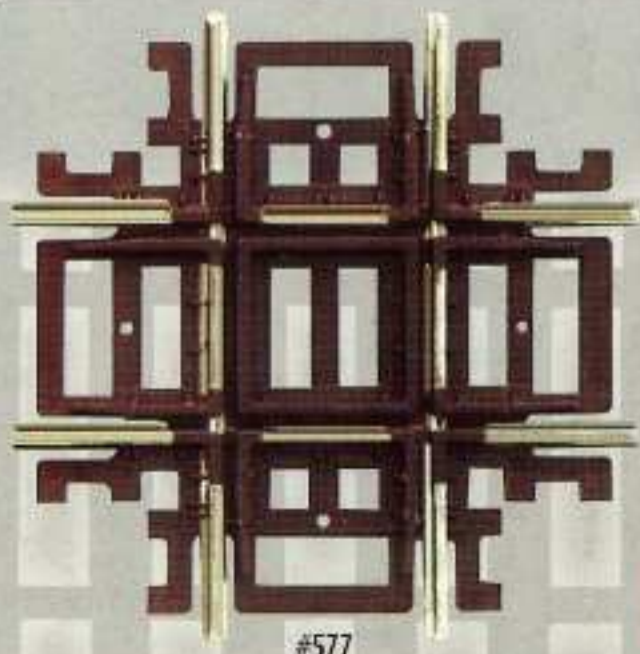

Item#	Description	Price
588	Code 83 Snap-Track® - (brown ties with nickel silver rail)	\$32.25

#573

#551

#577

Get started on the right track with Atlas' HO Code 83 Starter Set. A snap for beginners to assemble, it contains enough Snap-Track®, Snap-Switches® and components to assemble a 40" x 56" oval layout with passing siding. Easily expandable as your skill level advances, simply by adding more track (sold separately). Complete assembly instructions provided. Power pack sold separately, see pages 35-36. (Brown ties, nickel silver rail)

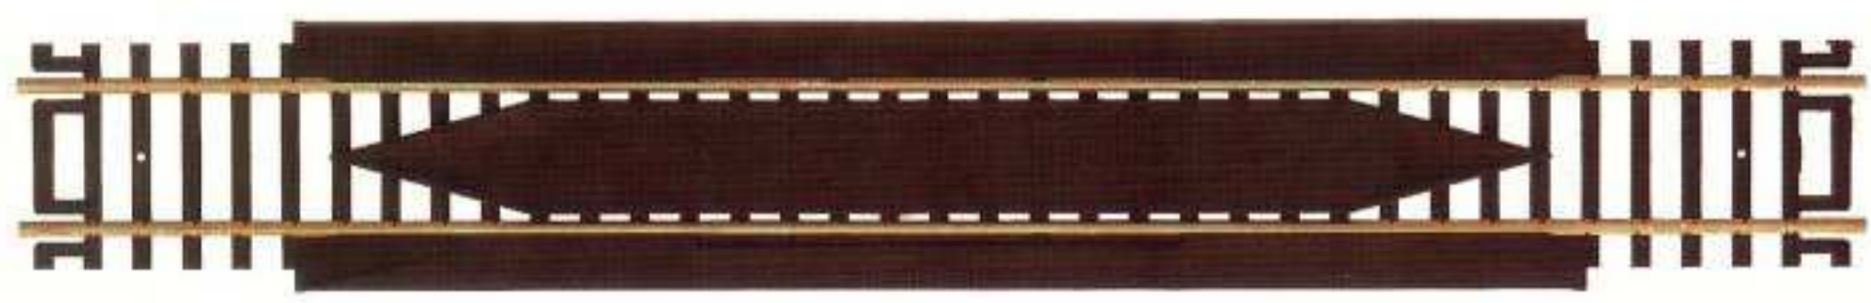

**A Full Line Of Atlas Code 83 Is Now Available!**

"HOseeker"

#561

## HO Code 83 Custom-Line® Turnouts

The Custom-Line® Turnouts are prototypically accurate, featuring blackened metal frogs and rivetless switch points that provide superior electrical conductivity. These turnouts can be powered using an under-table switch machine (shown on pages 35-36) or standard remote and manual code 83 switch machines (shown on page 24). All Custom-Line® Turnouts have the same geometry as the current Atlas code 100 versions, for drop-in installation in Atlas' and other layout plans.

#560

Custom-Line® Turnout Frog Angles:

#4 Turnout - 12°, 50'

#6 Turnout - 9°, 30'

Wye Turnout - 14°, 56'

### HO CODE 83 #6 SUPER-SWITCHES®

Item#	Description	Price
505	Left hand	\$12.35
506	Right hand	\$12.35

### HO CODE 83 CUSTOM-LINE® TURNOUTS

Item#	Description	Price
560	Wye Custom-Line® Turnout	\$11.75
561	#4 Custom-Line® Turnout - Left hand	\$11.75
562	#4 Custom-Line® Turnout - Right hand	\$11.75
563	#6 Custom-Line® Turnout - Left hand	\$11.75
564	#6 Custom-Line® Turnout - Right hand	\$11.75

## HO Code 83 Super-Switches®

1. Accurately scaled and spaced ties.
2. Blackened metal frog allows powering by Atlas Snap-Relay.
3. Frog angle is true #6 - 9°30'.
4. Frog and guardrail flangeways set to NMRA standards.
5. New points eliminate rivets, providing better electrical contact and improved appearance.
6. Four spikes per tie, staggered like U.S. prototype.
7. Designed for under-table switch machines or manual ground throws.
8. Concealed nail holes.
9. Designed for use with common rail system.

• PERFORMANCE • RELIABILITY •

## HO Code 83 Remote Snap-Switches®

These switches have a remote control switch machine attached so you can wire the switch to be "thrown" (changing the direction of the rail), from your control panel rather than from the switch itself. Comes with a 1/3 18" radius section, making the curved leg equal to a regular 18" radius section. Adding passing tracks and sidings is simple since Atlas Code 83 Snap-Switches® will fit wherever you have 9" straight or 18" radius curved sections. When replacing a 18" radius section, you must add a 1-1/2" straight section directly across from the turnout.

#563 - NOW AVAILABLE!

- All HO Code 83 Snap-Switches® are designed for above or under-table switch machine. Under-table switch machine shown on pages 35-36.
- Plastic frog (cannot be powered)
- Cut-outs for rail joiners

## HO Code 83 Switch Machines

At one-third the size of existing units, these are the smallest HO switch machines on the market! Also fits True-Track switches listed on page 25.

From the Collection of "HOseeker"

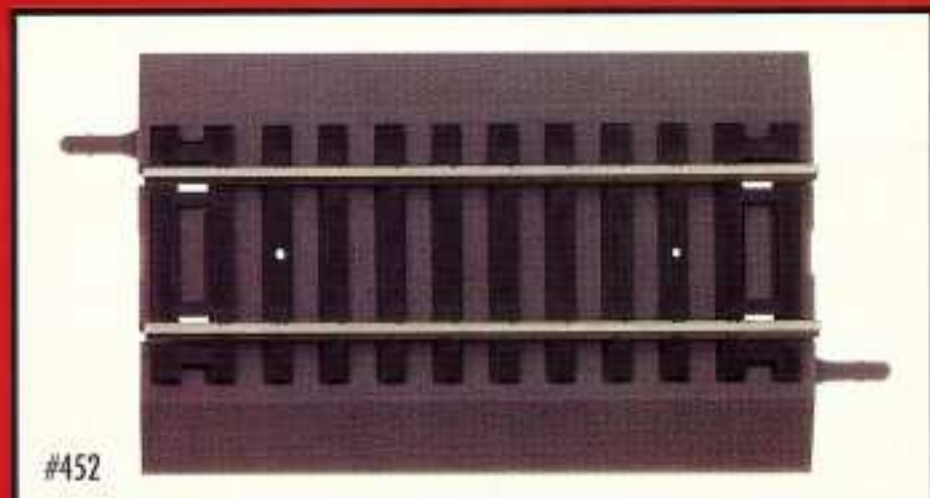

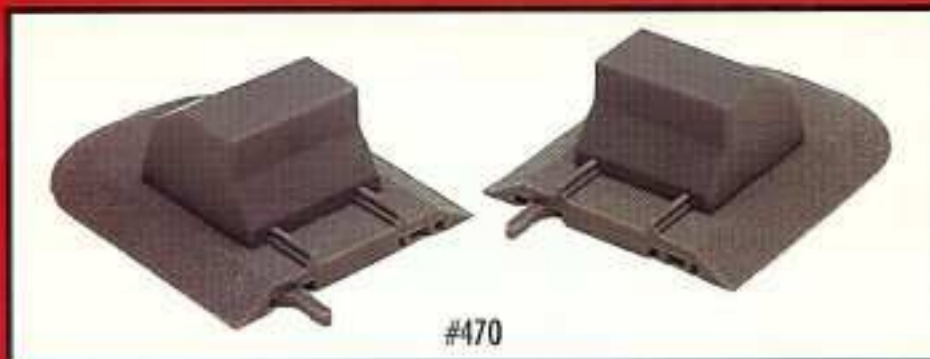

HO CODE 83 SWITCH MACHINES		
Item#	Description	Price
584	Left hand Remote	\$7.45
585	Right hand Remote	\$7.45
586	Left hand Manual	\$2.95
587	Right hand Manual	\$2.95
HO CODE 83 REMOTE SNAP-SWITCHES® - 18" RADIUS		
Item#	Description	Price
540	Left hand (includes remote switch machine)	\$13.90
541	Right hand (includes remote switch machine)	\$13.90
HO CODE 83 MANUAL SNAP-SWITCHES® - 18" RADIUS		
Item#	Description	Price
542	Left hand (includes manual switch machine)	\$8.95
543	Right hand (includes manual switch machine)	\$8.95

## HO Code 83 Manual Snap-Switches®

Manual switches can only be "thrown" (changing the direction of the rail) by flipping a lever on the switch by hand. Manual Code 83 Snap-Switches® can be easily converted to remote control with #584 Lefthand and #585 Righthand switch machines.

**You're On The Right Track® ...With Atlas Code 83!**

Enter the exciting world of model railroading with the True-Track® Starter Set. True-Track is a premium, "all-in-one roadbed track" made with nickel silver rail and brown ties for realistic appearance. It contains enough Snap-Switches® and components to assemble a 38" x 56" oval layout with passing siding. Since True-Track has a roadbed base, you can assemble your layout almost anywhere! Assembly instructions provided. Power pack sold separately, see pages 35-36.

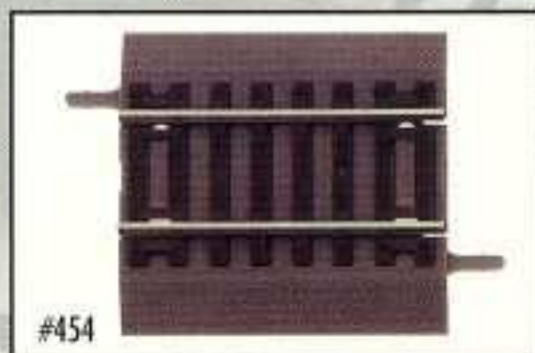

## HO True-Track®

### PREMIUM QUALITY ROADBED TRACK MADE WITH FINE-SCALE HO CODE 83 TRACK

Like all Atlas model railroad products, True-Track® adheres to high quality, prototype standards that the hobby world demands. The result is a roadbed track with true-to-prototype gray, graveled roadbed; correctly angled roadbed shoulder and code 83 brown ties and nickel silver rail. It looks every bit like real track with roadbed and ballast.

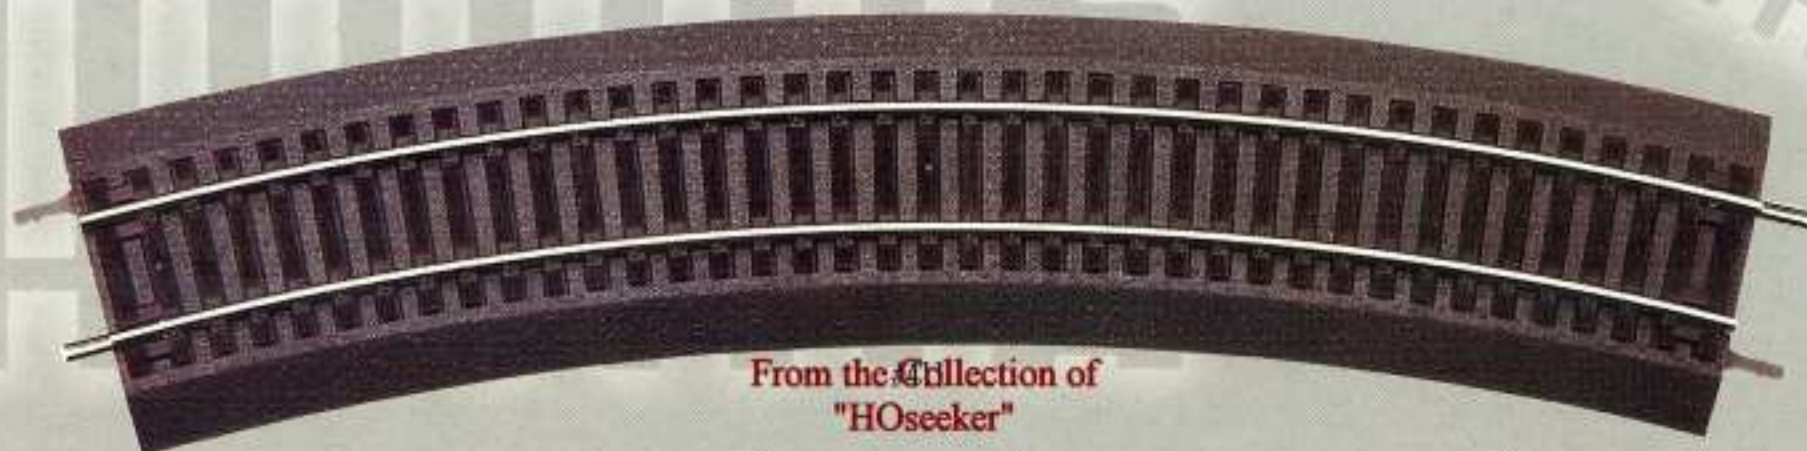

There is no roadbed track that can match up to the scale-model quality and versatility of Atlas' True-Track®. It is easy to assemble and affordably priced, but do not mistake True-Track® for a toy. It is a true hobby track system, created for the novice modeler looking not only for realistic appearance but unparalleled performance in a ready-to-run roadbed track.

True-Track® features Atlas' world-renowned "Snap-Track®" that has been setting the standard for HO track for over 40 years. The piece of Snap-Track® can be removed and used separately if desired (see photo on page 19).

### HO TRUE-TRACK®

Item#	Description	Price
410	9" Straight section (per piece)	\$1.15

#850

### Code 100 Snap-Switches®

#### HO CODE 100 SNAP-SWITCHES® - REMOTE CONTROL

Item#	Description	Price
850	Lefthand	\$13.90
851	Righthand	\$13.90

These switches have a remote control switch machine attached so you can wire the switch to be "thrown" (changing the direction of the rail), from your control panel, rather than from the switch itself. Comes with a 1/3 18" radius section, making the curved leg equal to a regular 18" radius section. To add a passing track and siding, simply replace a 9" straight section. When replacing an 18" radius curved section with an Atlas Snap-Switch®, add a 1-1/2" straight section to the opposite side.

#### HO CODE 100 SWITCH MACHINES - REMOTE CONTROL

Item#	Description	Price
52	Lefthand	\$6.95
53	Righthand	\$6.95

(Pictured right attached to switch #861) Snap-on remote switch machines will quickly and easily convert any Atlas code 100 HO switch to remote control. With a remote control switch, you can wire the switch to be "thrown" (changing the direction of the rail) from your control panel, rather than from the switch itself.

#### HO CODE 100 SNAP-SWITCHES® - MANUAL

Item#	Description	Price
860	Lefthand	\$8.95
861	Righthand	\$8.95

Manual switches can only be "thrown" (changing the direction of the rail), by flipping a lever on the switch by hand. Manual Snap-Switches® can be easily converted to remote control with #52 Lefthand and #53 Righthand switch machines. Manual Snap-Switches® come with a manual switch machine.

#### HO CODE 100 SWITCH MACHINES - MANUAL

Item#	Description	Price
62	Lefthand	\$2.10
63	Righthand	\$2.10

(Pictured right attached to switch #861) With a manual switch machine attached to your switch, you can flip a lever by hand and change the direction of the rail.

#### UNDER-TABLE SWITCH MACHINE

Item#	Description	Price
65	Nicely hides beneath your layout so you can throw your switches without being seen. Can be used with all Atlas (and many other) HO and N scale switches. Please see page 36 for drawing and usage instructions.	\$6.95

#861

#280

## What Is The Difference Between A #4 And A #6 Custom-Line® Turnout?

The difference is the angle at which the two tracks diverge or split. With #4 turnouts, the tracks diverge at a sharper angle than the #6's. Therefore, the type of turnout you use may be determined by the space you have for your layout.

### HO CODE 100 CUSTOM-LINE® CROSSINGS

Item#	Description	Price
171	19° - 6"	\$6.40
172	25° - 4 1/2"	\$6.40
173	30° - 4"	\$6.40
174	45° - 3"	\$6.40
175	60° - 3"	\$6.40
176	90° - 6"	\$6.40
177	12 1/2° - 9"	\$6.95

### HO CODE 100 CUSTOM-LINE® MARK 3 TURNOUTS

Item#	Description	Price
280	Wye Turnout	\$10.50
281	#4 Turnout - Left	\$10.50
282	#4 Turnout - Right	\$10.50
283	#6 Turnout - Left	\$10.50
284	#6 Turnout - Right	\$10.50

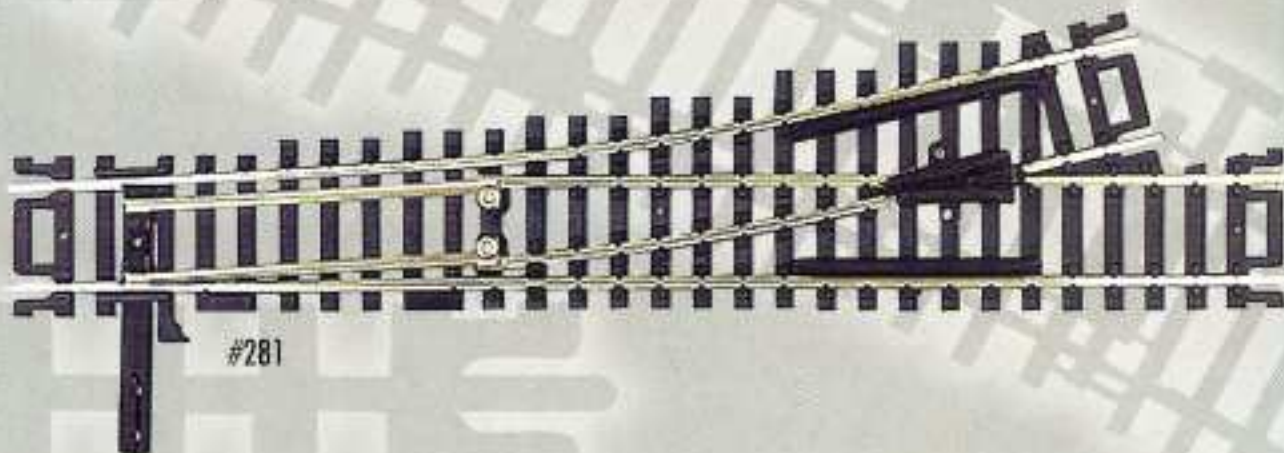

#175

Precisely engineered angles of intersection solve most crossing requirements. For double crossovers use the 25° crossing with #4 Custom-Line Mark 3 Turnouts, or the 19° crossing with #6 turnouts. The 12 1/2° and 19° crossings are especially suited for junctions between double-track mainlines. A wide variety of single and double-track wyes and many other arrangements appear in the Atlas layout instruction books on page 6.

## HO Custom-Line® Track

### WHAT IS THE DIFFERENCE BETWEEN CUSTOM-LINE® TURNOUTS & SNAP SWITCHES®?

1. Custom-Line® Turnouts are #4, #6 or Wye turnouts. The track section of the Atlas #4 turnout splits at an angle of 12° and 50 minutes; for #6 switches that angle is 9 degrees, 30 minutes; and for Wye switches it is 19 degrees, 12 minutes. This angle determines how sharp of a turn the switch (and therefore your trains) will make. For Snap-Switches®, we talk about the 18" radius that the switch is designed to create. If a Snap-Switch® and included 1/3 18" radius is connected to eleven, 18" radius curved sections of track with a 1-1/2" piece opposite the switch, a complete oval will result.
2. Custom-line® Turnouts have metal frogs that can be powered if necessary. Snap-Switches® have plastic frogs which cannot be powered.  
NOTE: A Snap-Switch® and a #4 Custom-line Turnout are not interchangeable in Atlas layout plans.

# Exciting Layout Packages To Help You Get Started Quickly

Atlas has designed and tested 36 different, exciting HO layout configurations using Atlas Snap-Track®, Custom-Line® Track, Super-Flex® Track, switches, bridges and piers. On the next few pages is a sample of the plans that have become the most popular over the years. You may ask your local Atlas retailer to put the necessary materials together for you. Materials list, detailed plan and building instructions can be found in one of our four HO layout instruction books (pg. 6).

If you wish to see all 36 Atlas HO layout plans, please ask your local retailer for a free *Fantastic Layout Booklet* which contains highlights of each layout. If your retailer does not have one available, please call Atlas directly to request one.

NOTE: Prices for layout packages were calculated using single piece retail prices.  
(Trees, scenery & buildings are not included in packages.)

## All Layout Packages Available In Either Code 100 (black ties) Or Code 83 Track (brown ties)!

### LAYOUT HO-7

*The Junior Pretzel* - \$198.50  
with Power Pack - \$233.45  
with optional second Power Pack - \$268.40

**Skill level:** Beginner

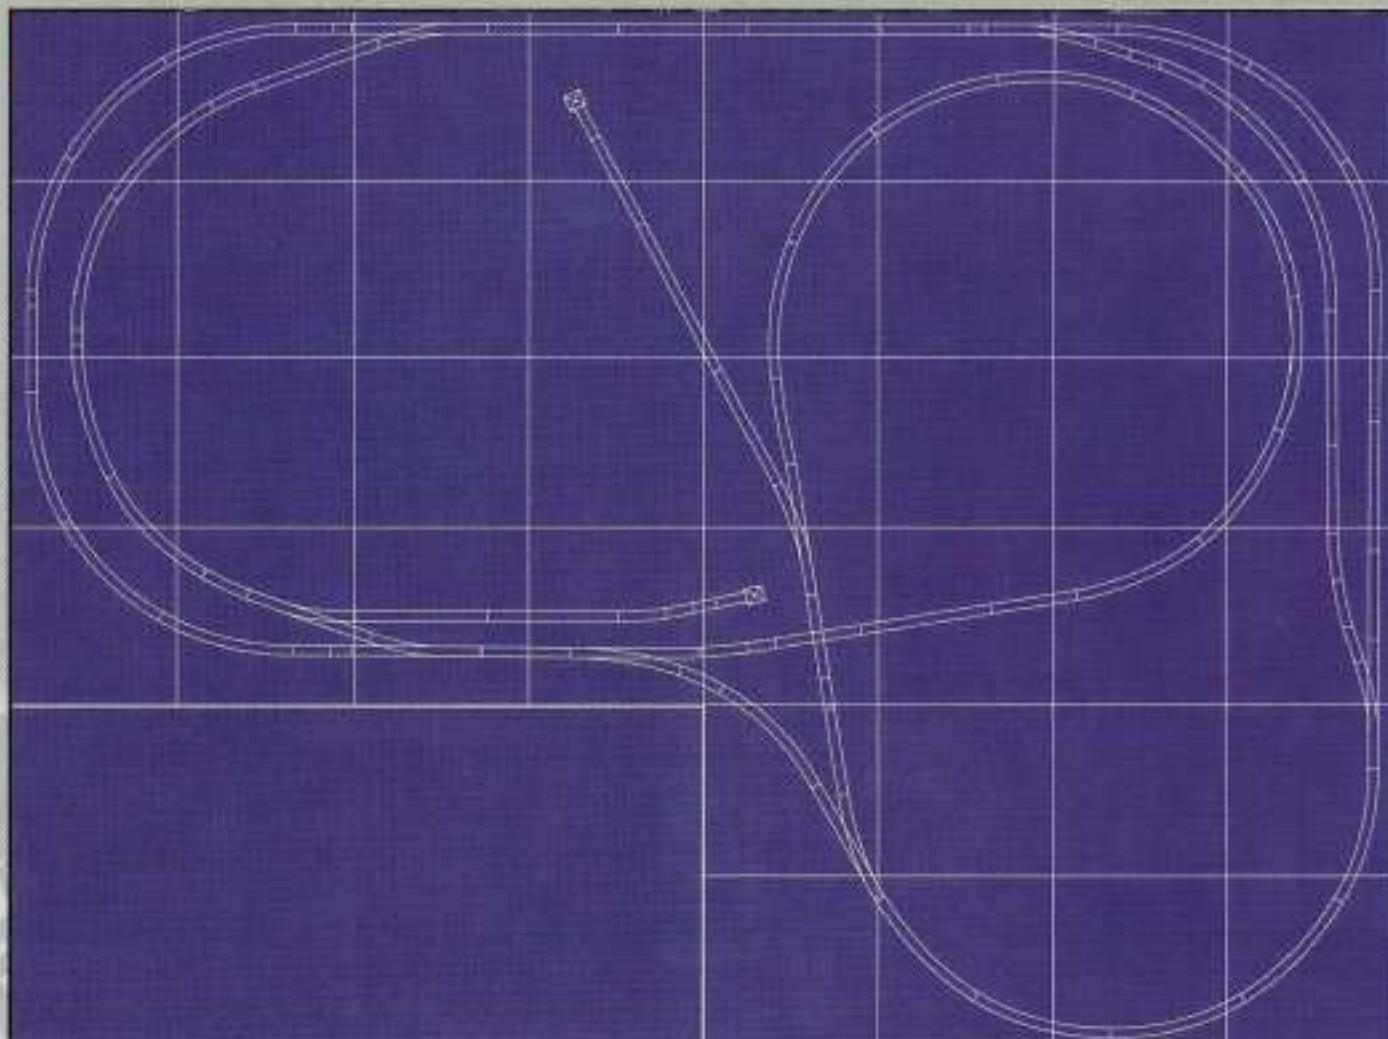

This plan, instructions & a detailed list of "Atlas Products Required," can be found in Book #9: Atlas' Beginner's Guide to HO Model Railroading (See pg. 6)

**Summary of Atlas products included in package:**

- Over 69 pieces of track (including bumpers & rerailers)
- 8 Remote Snap-Switches®
- 2 Selectors
- Necessary amount of rail joiners & track nails

From the Collection of "HOseeker"

Table Size: 6' x 8'

### LAYOUT HO-11

*The Out-And-Back* \$225.00  
with Power Pack - \$259.95  
with optional second Power Pack - \$294.90

**Skill level:** Beginner

This plan, instructions & a detailed list of "Atlas Products Required," can be found in Book #9: Atlas' Beginner's Guide to HO Model Railroading (See pg. 6)

**Summary of Atlas products included in package:**

- Over 71 pieces of track (including bumpers & rerailers)
- 9 Remote Snap-Switches®
- 2 Selectors
- Necessary amount of rail joiners & track nails

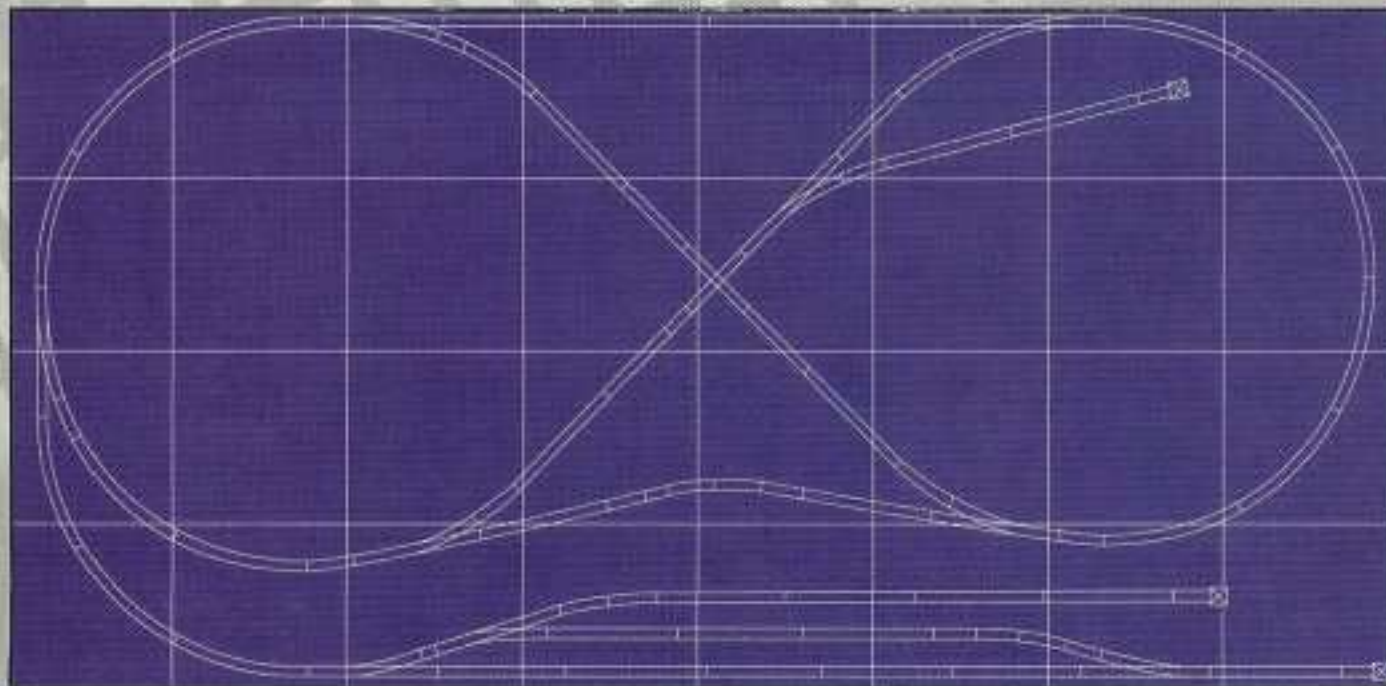

Table Size: 4' x 8'

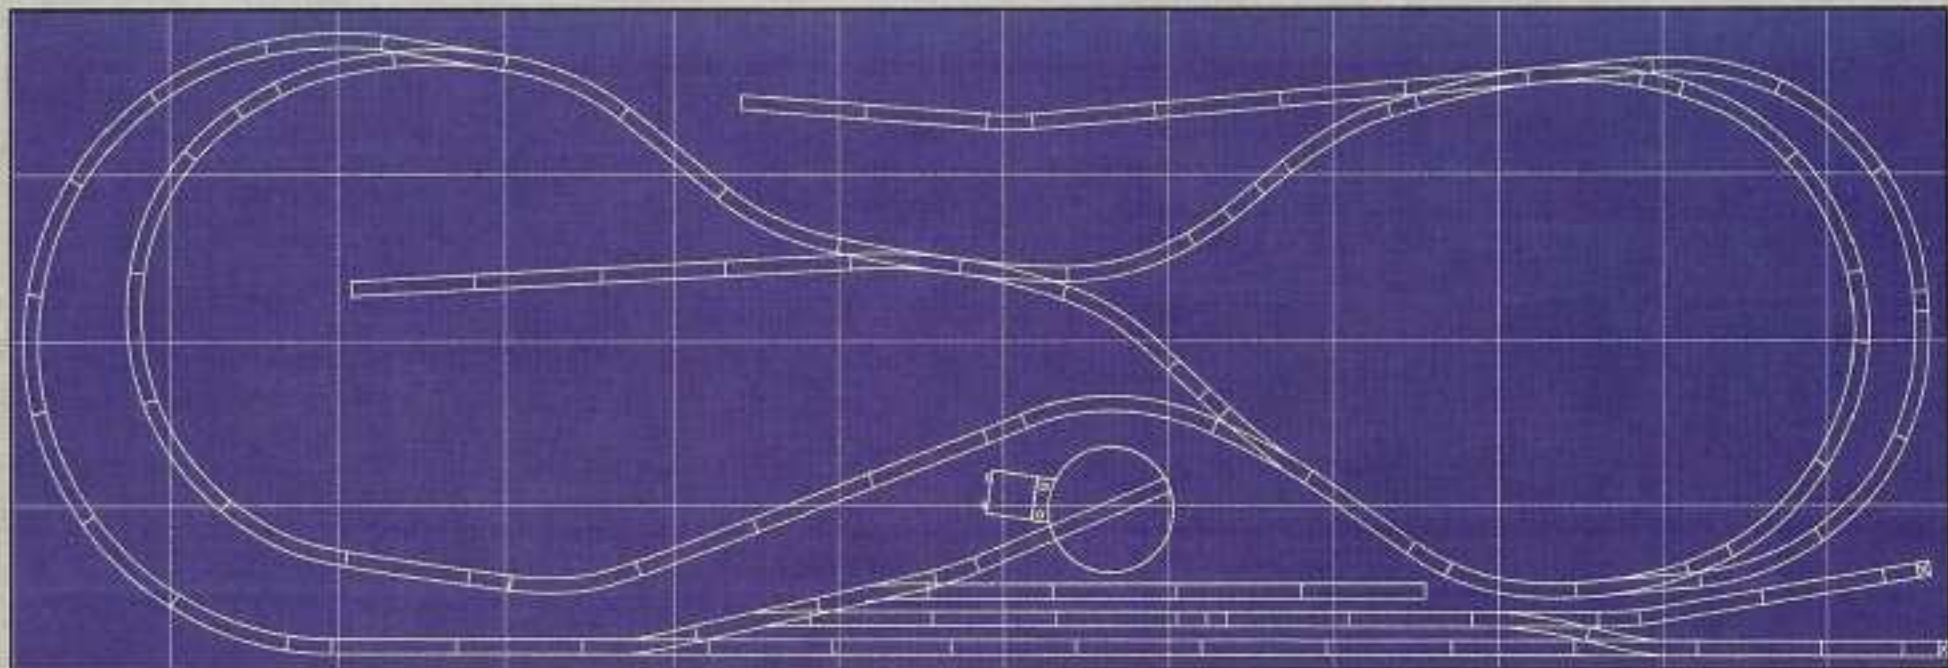

Table Size: 4' x 12'

**LAYOUT HO-20**

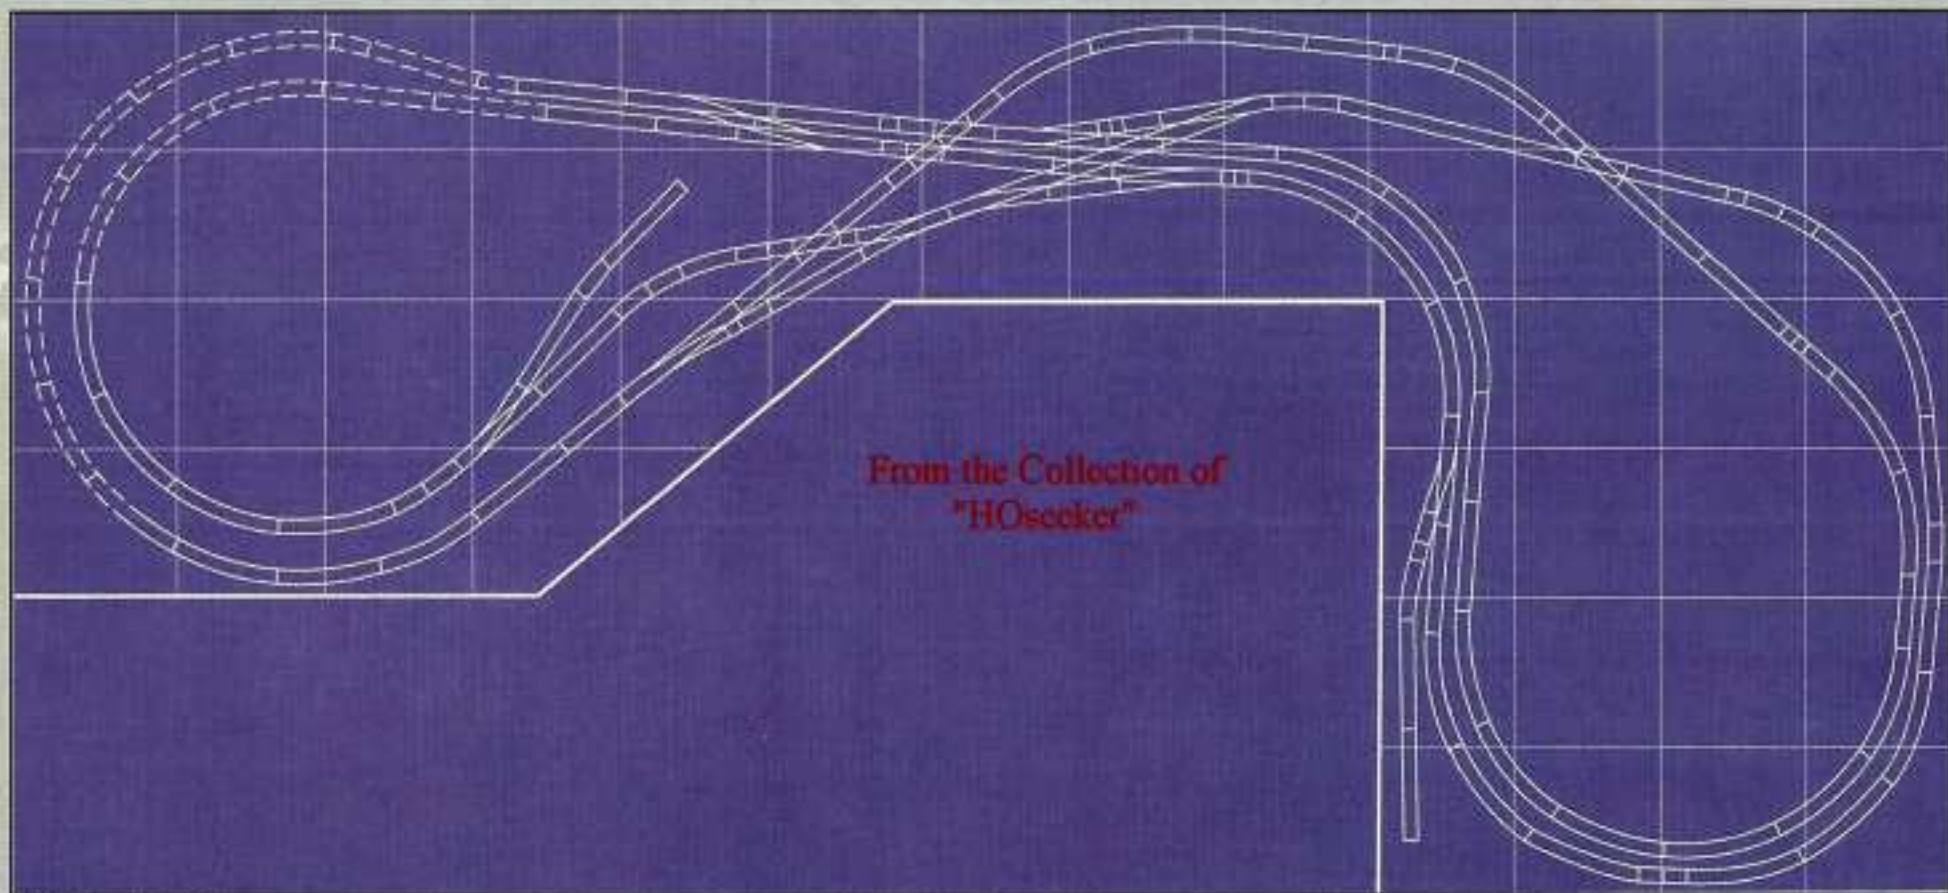

*The Expanded Out-And-Back* - \$418.95  
with Power Pack - \$453.90  
with optional second Power Pack - \$488.85

**Skill level:** Intermediate

This plan, instructions and detailed list of "Atlas Products Required," can be found in Book #11: HO Layouts for Every Space (See pg. 6)

**Summary of Atlas products included in package:**

- Over 110 pieces of track (including bumpers)
- Turntable and motor drive
- 13 remote switch machines
- 10 Custom-Line® Turnouts
- 3 Selectors
- Necessary amount of rail joiners & track nails

From the Collection of  
"HOseeker"

Table Size: 6' x 13'

**LAYOUT HO-22**

*Grade Crossing Deluxe* - \$362.75  
with Power Pack - \$397.70  
with optional second Power Pack - \$432.65

**Skill level:** Intermediate

This plan, instructions and detailed list of "Atlas Products Required," can be found in Book #11: HO Layouts for Every Space (See pg. 6)

**Summary of Atlas products included in package:**

- Over 122 pieces of track
- 10 Custom-Line® Turnouts
- 2 Selectors
- Necessary amount of rail joiners & track nails

**Fantastic Layout Booklet**

**This 31-page booklet was designed to make it easy for you to choose YOUR fantastic layout! All 54 Classic HO and N scale layout plans are included, each with a brief description, table size required, suggested retail price, and the layout instruction book that contains the complete plan. For your free copy, please send a \$.55 stamped, #10 self-addressed envelope to:**

**Atlas Fantastic Layouts, 603 Sweetland Avenue, Hillside, NJ 07205.**

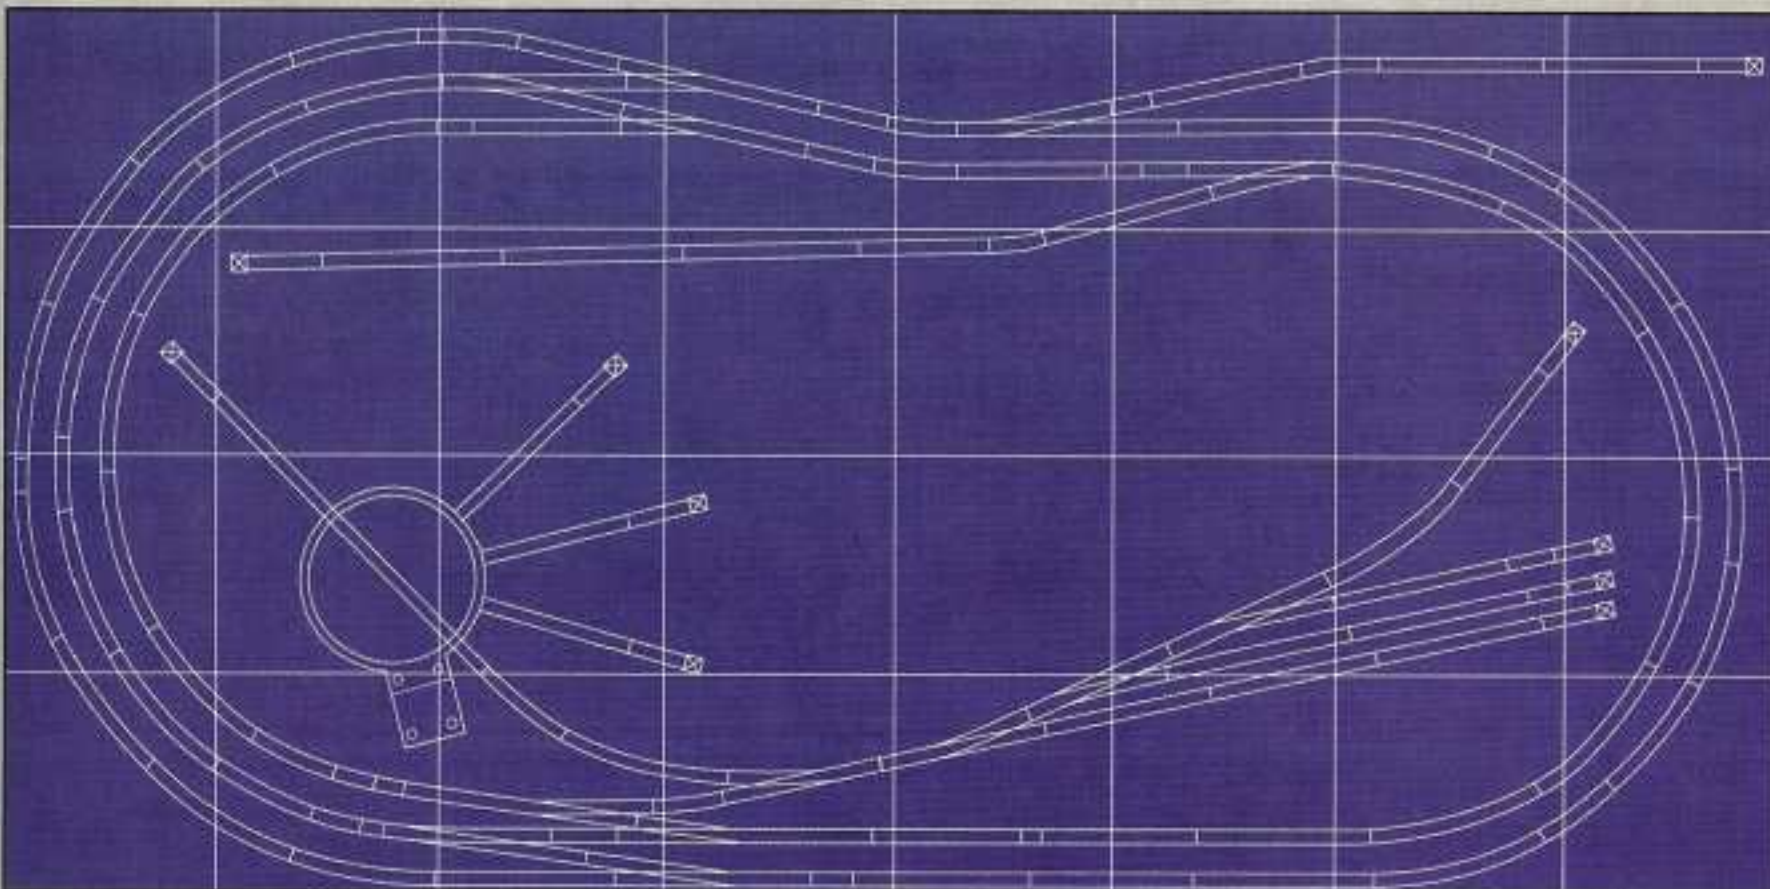

Table Size: 4' x 8'

**LAYOUT HO-25**

**Great Eastern Trunk** - \$432.95  
 with Power Pack - \$467.90  
 with optional second Power Pack - \$502.85  
**Skill level:** Intermediate

This plan, instructions and detailed list of "Atlas Products Required," can be found in Book #13: Seven Step-By-Step HO Railroads (See pg. 6)

**Summary of Atlas products included in package:**

- Over 92 pieces of track (including bumpers & rerailers)

- 13 Custom-Line® Turnouts
- 13 remote switch machines
- Turntable and Motor Drive Unit
- 14 Electrical controls (incl. selectors, controllers & switch control boxes)
- Necessary amount of rail joiners & track nails

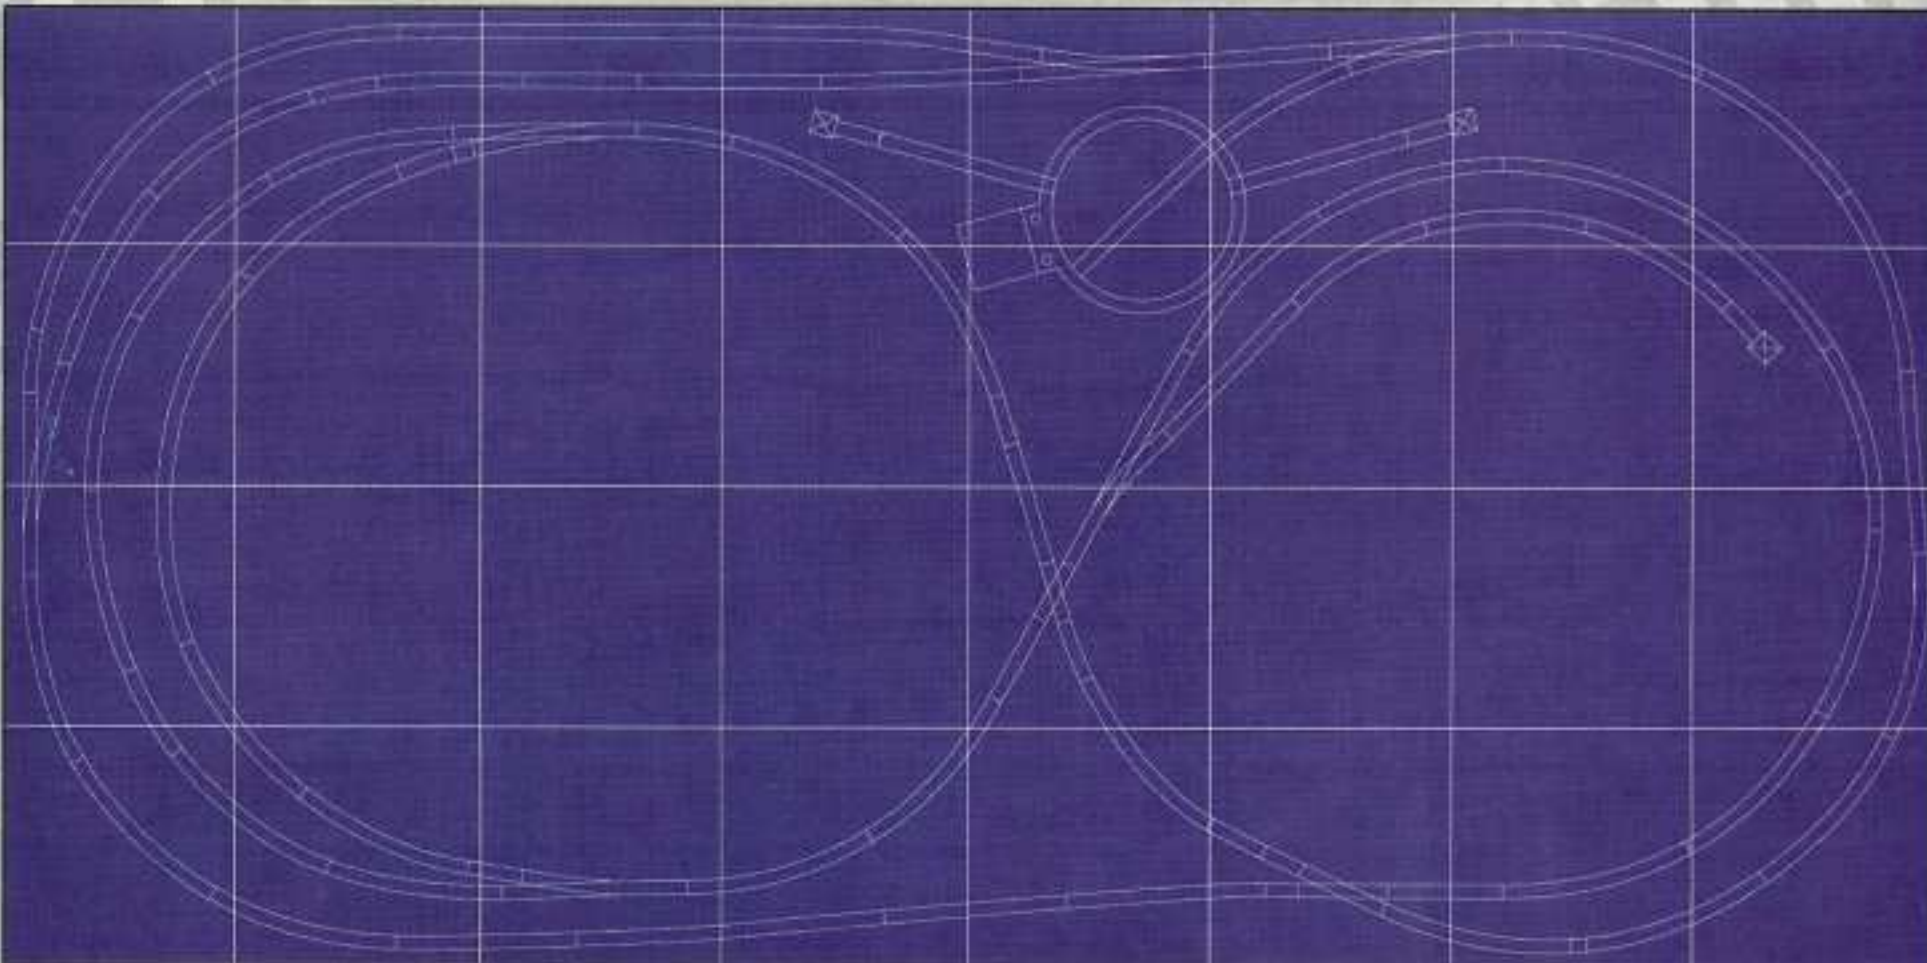

Table Size: 4' x 8'

**LAYOUT HO-31**

**Waterlevel Western** - \$293.50  
 with Power Pack - \$328.45  
 with optional second Power Pack - \$363.40  
**Skill level:** Intermediate

This plan, instructions and detailed list of "Atlas Products Required," can be found in Book #14: HO King-Size Plan Book (See pg. 6)

**Summary of Atlas products included in package:**

- Over 60 pieces of track (including bumpers & rerailers)
- 4, 36" Sections Super-Flex® Track
- 2 Custom-Line® Crossings

- 6 Custom-Line® Turnouts
- 6 remote switch machines
- Turntable and Motor Drive Unit
- 9 Electrical controls (incl. selectors, controllers & switch control boxes)
- Necessary amount of rail joiners & track nails

## HO ACCESSORIES

Item#	Description	Price
304	HO Turntable Motor Drive Unit	\$21.45
305	HO Manual Turntable	\$21.45
709	HO Roundhouse Kit (14-3/8" x 15" x 4-5/8") - <b>NEW!</b>	\$24.95

The basic 3-stall kit features brick detail, opening doors, stalls spaced at 15°, an office, two styles of ventilators and modular construction. Molded in appropriate colors, it is expandable with additional 3-stall kits as desired. Designed to work with Turntable #305 and Motor Drive #304.

## ATLAS CUSTOM POWER® 1700 POWER PACK

Item#	Description	Price
310	Designed for reliable operation, the Custom Power® 1700 Power Pack has recently been enhanced by the addition of a transistor that protects circuitry and a thermal fuse for overload protection. Other features include:	\$34.95

- Separate power and reversing switches
- Circuit breaker protection
- Overload indicating lamp
- No pulse power to damage precision motors

Output: 14V DC, 17V AC, 1.2 Amps at no load.  
Total output 17 VA.

## UNDER TABLE SWITCH MACHINE - HO & N

Item#	Description	Price
65	Nicely hides beneath your layout so you can throw your turnouts without seeing the machine. Can be used with all Atlas (and many other) HO and N scale turnouts.	\$6.95

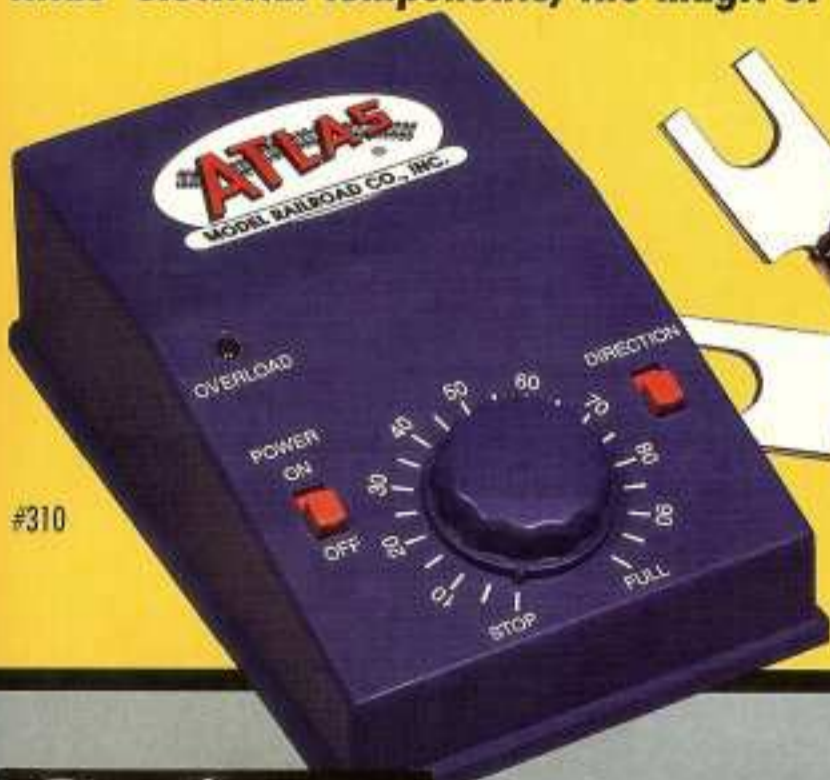

## ATLAS LAYOUT WIRE

Item#	Description	Price
312	5 Conductor Ribbon Wire - <b>NEW!</b>	\$15.95
315	Black (#316-Red, #317-Green #318-Yellow, #319-Blue)	\$5.85ea.

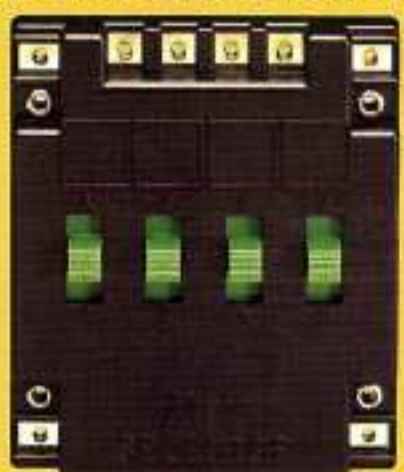

# Electrical Components For All Scales

We've spent years designing and perfecting what we believe is the easiest and most reliable electrical wiring system in model railroading today. Practical for all scales, the system consists of multiple sets of the most often needed switch types, internally pre-wired by printed circuitry. With Atlas' electrical components, the magic of train operation comes to life!

## ELECTRICAL COMPONENTS

Item#	Description	Price
56	<b>Switch Control Box</b> Controls Atlas (or other twin coil) switch machines with SPDT momentary action. Button position indicates turnout setting. Can be coupled together in any number without wiring. Switch identification labels included. (Shown on page 49)	\$3.15
200	<b>Snap Relay</b> A double-pole, double-throw relay with actuating mechanism driven by a momentary-power twin coil solenoid. (A solenoid is a cylindrical coil of insulated wire in which an iron core is made to move back and forth by a flow of electric current.) With just a few simple connections, this small device, which may be mounted anywhere, can: <ul style="list-style-type: none"> <li>• Power the frogs on Atlas' Code 83 #6 &amp; Mark 3 turnouts.</li> <li>• Control trackside signal lamps to show turnout point positions</li> <li>• Operate control panel lamps to show settings of remotely located turnouts (switches)</li> <li>• Provide selective track siding control. Sidings are powered only when points are aligned for siding. Siding remains "dead" when points are set for the mainline.</li> <li>• Control X-sections automatically. This very useful track arrangement is thoroughly discussed in <i>The Complete Atlas Wiring Book</i>.</li> </ul>	\$8.55
201	<b>Spade Tongue Solderless Connector</b> A handy small electrical hook-up connector designed for tight spaces. For #18-22 wire and #3 screw post. Maximum width is .218", 24 pieces per package.	\$3.50
205	<b>Connector</b> A device to turn electric power on or off to track section or accessories. Has three SPST on-off switches in parallel. Can be coupled together in any number.	\$6.70
210	<b>Twin</b> A component consisting of two double-pole, double-throw reversing switches wired in parallel. Useful for reversing section and turntable control on single-cab layouts, plus many other applications.	\$6.70
215	<b>Selector</b> This device enables the operation and control of two trains at the same time. Has four single-pole, double-throw switches to provide two-cab operation for four blocks. May be ganged together in any number to control additional blocks without inter-switch wiring. Can be used as area selectors for four-cab operation. Couples with #220 Controller.	\$6.70
220	<b>Controller</b> This control provides the simplest way to wire and control tricky reverse loops, wyes and turntables. Has reversing switches for two mainline cabs plus a switch, selectable by either cab, for directional control on reversing loops, etc. Couples with #215 Selectors.	\$6.95

## N Train Master Locomotives

The new N scale locomotive is based on one of the most popular locomotives ever made—Fairbanks Morse's 2400 horsepower, single engine, six-axle Train Master.

Setting a new standard in N scale, Atlas' highly detailed locomotive features:

- Directional lighting • Painted safety rails
- Blackened metal wheels • Etched metal radiator grilles
- Factory-installed AccuMate<sup>®</sup> magnetic knuckle couplers for added value
- Dual-flywheel equipped 5-pole skewed armature motor with a low friction mechanism

From the Collection of  
"HOseeker"

## N B23-7 Locomotives

Atlas' newest N scale locomotive is modeled after GE's B23-7 diesel engine with 2250 horsepower and a distinctive carbody. Identified by its wide radiator, floating-bolster truck and power assembly access doors that are just forward of the step in the hood, the B23-7 was built in 1977 and is still in service today.

# N SCALE ROLLING STOCK

**OUR STOCK INCLUDES OVER 27 DIFFERENT BODY STYLES FOR A TOTAL OF OVER 400 DIFFERENT N SCALE FREIGHT CARS!**

Atlas' line of N scale freight cars is very extensive, and is constantly expanding. We work hard to produce only the finest cars with delicate detailing and outstanding printing quality. Periodically, freight cars will be re-released with new road numbers, giving you more variety. In addition, we'll continue to produce new body styles, and new road names for existing freight car types. Stay tuned to our web site for the latest new N scale freight car announcements! (33,000 Gallon Tank Car)

For extra value, all N freight cars produced after May 2000 will come factory-equipped with AccuMate couplers. This knuckle type coupler allows for remote magnetic coupling/uncoupling and is more prototypical than the standard Rapido type coupler. To assist modelers in the transition period, Atlas will include a set of standard Rapido couplers in every product box. AccuMate® couplers are manufactured by Atlas under a licensing agreement with AccuRail®, Inc.

den areas.)

#2703

## N Standard Switches

Our series of switches make operating your layout a long lasting pleasure. More **RELIABLE** than ever, Atlas N switches feature:

- Refined and narrower flangeways at the frog and guard rails
- Positive mechanical attachment of points
- Better electrical conductivity
- Smaller switch machine for fit into tight places
- Whole new series of Custom-Line® Switches intended for use with Atlas Under-Table Switch Machine or ground throws

## N Standard Switches (Remote)

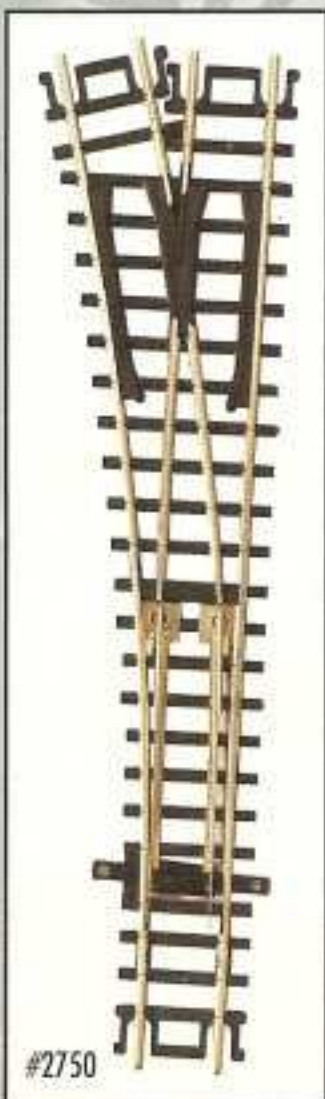

These turnouts have a remote control switch machine attached so you can wire the switch to be "thrown" (changing the direction of the rail), from your control panel rather than from the switch itself.

From the Collection of  
"HOseeker"

Remote control turnouts include the #56 Switch Control Box (shown below) and one piece of 19" radius track.

#56

#2750

STANDARD SWITCHES (REMOTE)		
Item#	Description	Price
2700	Standard Left hand, Remote	\$14.95
2701	Standard Right hand, Remote	\$14.95
STANDARD SWITCHES (MANUAL)		
Item#	Description	Price
2702	Standard Left hand, Manual	\$9.60
2703	Standard Right hand, Manual	\$9.60
CUSTOM N LINE® STANDARD SWITCHES		
Item#	Description	Price
2750	Custom Standard Left hand	\$8.55
2751	Custom Standard Right hand	\$8.55

## N Standard Switches (Manual)

Manual turnouts can only be "thrown" (changing the direction of the rail) by flipping a lever on the switch by hand. These Standard N scale manual turnouts can be easily converted to remote control with #2715 (left hand) and #2716 (right hand) switch machines. Comes with one piece of 19" radius.

## Custom N Line® Standard Switches

Custom N Line® turnouts are made to be used with the Atlas Under-Table Switch Machine (shown on pages 35-36) or a ground throw. Unlike the other N scale turnouts which have shortened ties to allow for switch machine attachment, Custom N Line® turnouts have full-length ties. A double-ended throw-bar allows you to place your under-table switch machine on either side of the turnout. Comes with one piece of 19" radius track.

#2700

# What Is The Difference Between Standard and #6 Switches?

The difference between the Standard turnout and #6 turnout is the angle at which the curved piece of track splits from the straight piece. The rails of the Standard Switches split at a sharper angle than the #6 Switches, creating a sharper curve. Therefore, Standard Switches work better in smaller spaces.

From the Collection of "HOseeker"

#2704

## N #6 Turnouts (Remote)

These turnouts have a remote control switch machine attached so you can wire the switch to be "thrown" (changing the direction of the rail), from your control panel rather than from the switch itself.

Remote control turnouts include the #56 Switch Control Box (shown left). Description listed on page 36.

## N #6 Turnouts (Manual)

Manual turnouts can only be "thrown" (changing the direction of the rail) by flipping a lever on the switch by hand. These #6 N scale manual turnouts can be easily converted to remote control with #2715 (left hand) and #2716 (right hand) switch machines.

## Custom N Line® #6 Turnouts

Custom N Line® turnouts are made to be used with the Atlas Under-Table Switch Machine (shown on pages 35-36) or a ground throw. Unlike the other N scale turnouts which have shortened ties to allow for switch machine attachment, Custom N Line® turnouts have full-length ties. A double-ended throw-bar allows you to place your under-table switch machine on either side of the turnout.

### #6 TURNOUTS (REMOTE)

Item#	Description	Price
2704	#6 Turnout Left hand, Remote	\$14.95
2705	#6 Turnout Right hand, Remote	\$14.95

2753	#6 Custom Right hand	\$8.55

### SWITCH MACHINES (REMOTE)

Item#	Description	Price
2715	Left hand	\$7.45
2716	Right hand	\$7.45

#2716

## Switch Machines (Remote)

Screw-on remote switch machines will quickly and easily convert Atlas Standard or #6 N turnouts to remote control. With a remote control turnout, you can wire the turnout to be "thrown" (changing the direction of the rail) from your control panel, rather than from the turnout itself.

## Exciting Layout Packages To Help You Get Started Quickly

Atlas has designed and tested 18 different, exciting N scale layout configurations using Atlas Snap-Track, Super-Flex® Track, switches, bridges and piers. On the next few pages is a sample of the plans that have become the most popular over the years. You may ask your local Atlas retailer to put the necessary materials together for you. Materials list, detailed plan and building instructions can be found in one of our two N scale layout instruction books (pg. 6).

If you wish to see all 18 Atlas N scale layout plans, please ask your local retailer for a free *Fantastic Layout Booklet* which contains highlights of each layout. If your retailer does not have one available, please see below.

From the Collection of  
"EFDocker"

NOTE: Prices for layout packages were calculated using single piece retail prices.  
(Trees, scenery & buildings are not included in packages.)

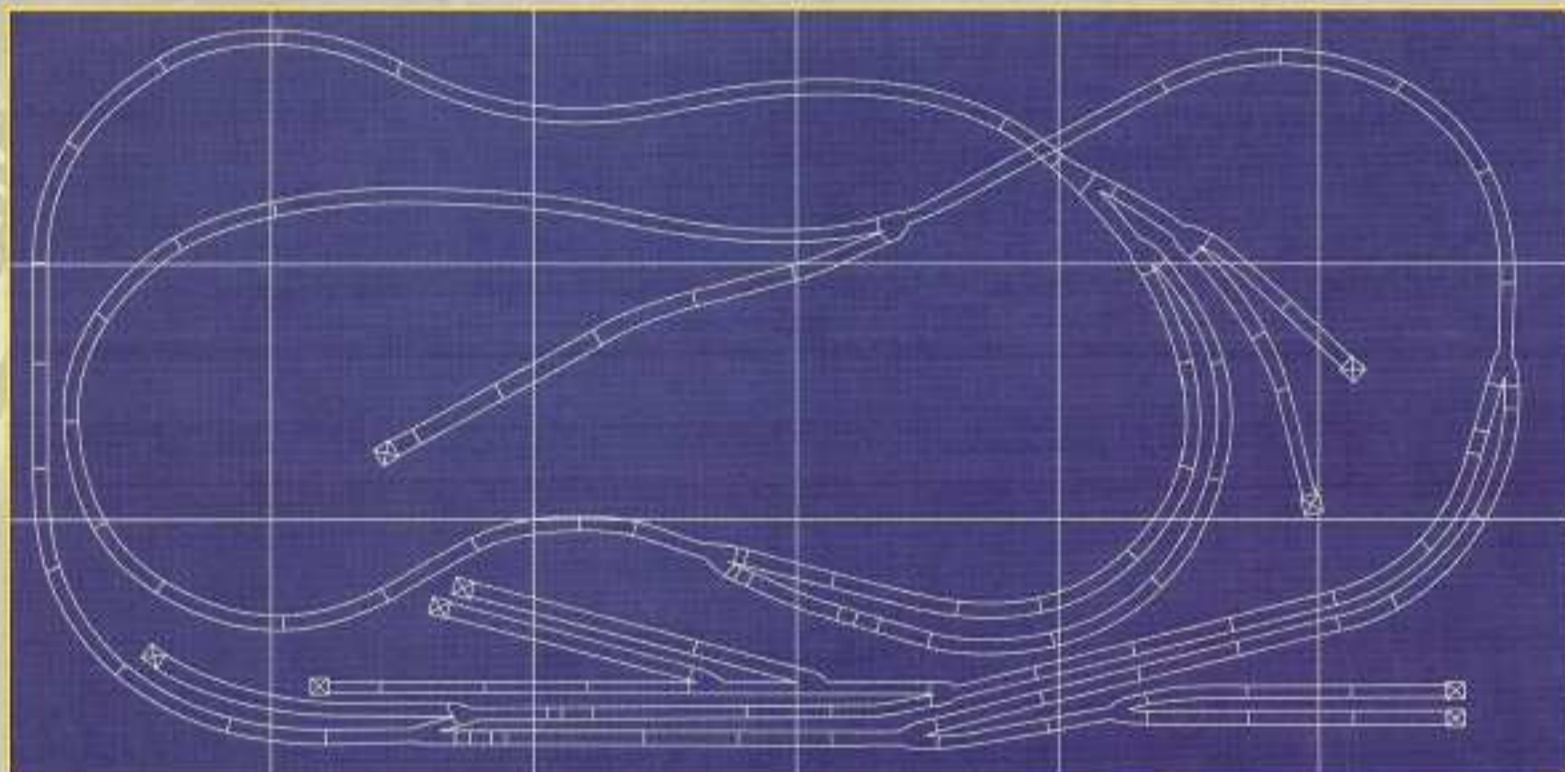

Table Size: 36" x 72"

### LAYOUT N-17

*The Scenic and Relaxed* - \$402.95  
with Power Pack - \$437.90  
with optional second Power Pack - \$472.85

#### Skill level: Advanced

This plan, instructions and detailed list of "Atlas Products Required," can be found in Book #7: *Nine N Scale Railroads* (See pg. 6)

#### Summary of Atlas products included in package:

- Over 110 pieces of track

- 13 Remote switches
- 12 Switch control boxes
- Set of bridge piers, plate girder bridge & deck truss bridge
- 3 Selectors
- Necessary amount of rail joiners & track nails

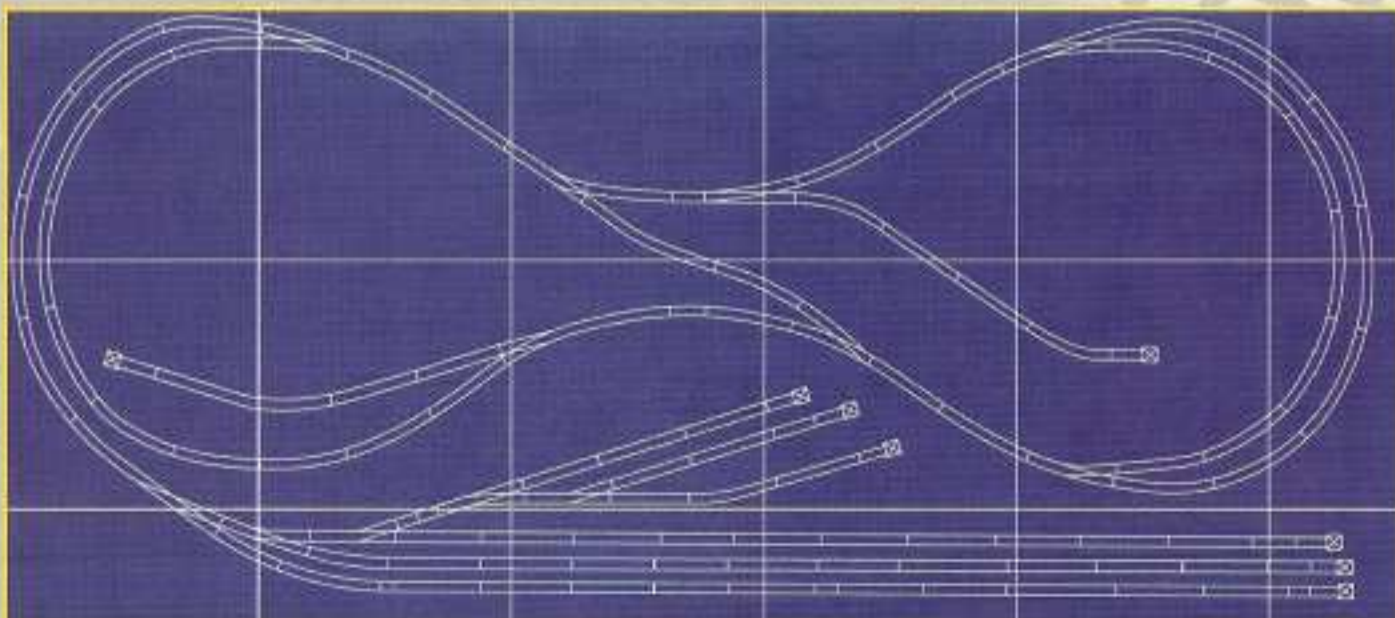

Table Size: 30" x 78"

### LAYOUT N-11

*Unhinged & Horizontal* - \$352.95  
with Power Pack - \$387.90,  
with optional second Power Pack - \$422.85

#### Skill level: Intermediate

This plan, instructions and detailed list of "Atlas Products Required," can be found in Book #7: *Nine N Scale Railroads* (See pg. 6)

#### Summary of Atlas products included in package:

- Over 115 pieces of track (including bumpers and rerailers)
- 14 Remote switches
- 13 Switch control boxes
- 3 Connectors, 1 controller
- Necessary amount of rail joiners & track nails

# Atlas' Right Track Software Is Now **FREE!**

With Atlas' Right Track Software (Version 5.0-Freeware), beginners or advanced modelers can design a layout of just about any size using Atlas N, HO and O scale Super-Flex track, sectional track, switches, electrical components, bridges and buildings. Draw in the size and shape of your layout table, place and connect track, add elevations, helices, roadbed and much more! Print out a list of products used on your layout and a blue-print-and you're on your way to construction!

RTS Freeware 5.0, contains the same quality features and functionality as previously-released RTS Version 4.0, as well as updated libraries and improved on-screen help. Visit [www.atlasrr.com](http://www.atlasrr.com) for more information about RTS Freeware 5.0.

From the Collection of  
"HOsecker"

To get your **FREE** copy of Atlas' RTS Freeware 5.0 (\$34.95 value):

1. **DOWNLOAD** from our web site at [www.atlasrr.com](http://www.atlasrr.com) (click on SOFTWARE) or
2. **REQUEST A CD-ROM** (for PC,s running Windows 95 or higher) by sending \$5.00 to Atlas RTS Freeware Offer, 603 Sweetland Avenue, Hillside, NJ 07205. (Disk comes with installation instructions and on-screen help; no printed manual is available).

\*Technical support will not be provided with RTS Freeware 5.0. If desired, you may purchase an unlimited technical assistance User Support Contract for \$19.95. If you purchased RTS Version 4.X for \$34.95, you are still entitled to free telephone and email support if you have a valid warranty card on file.

## LAYOUT N-2

**Loop With Passing Track and Siding** - \$88.95

with Power Pack - \$123.90

with optional second Power Pack

**Skill level:** Beginner

This plan, instructions & a detailed list of "Atlas Products Required," can be found in Book #6: Introduction to N Scale Model Railroading (See pg. 6)

**Summary of Atlas products included in package:**

- Over 30 pieces of track
- 4 Remote switches
- 4 Switch control boxes
- 1 Selector
- Necessary amount of rail joiners & track nails

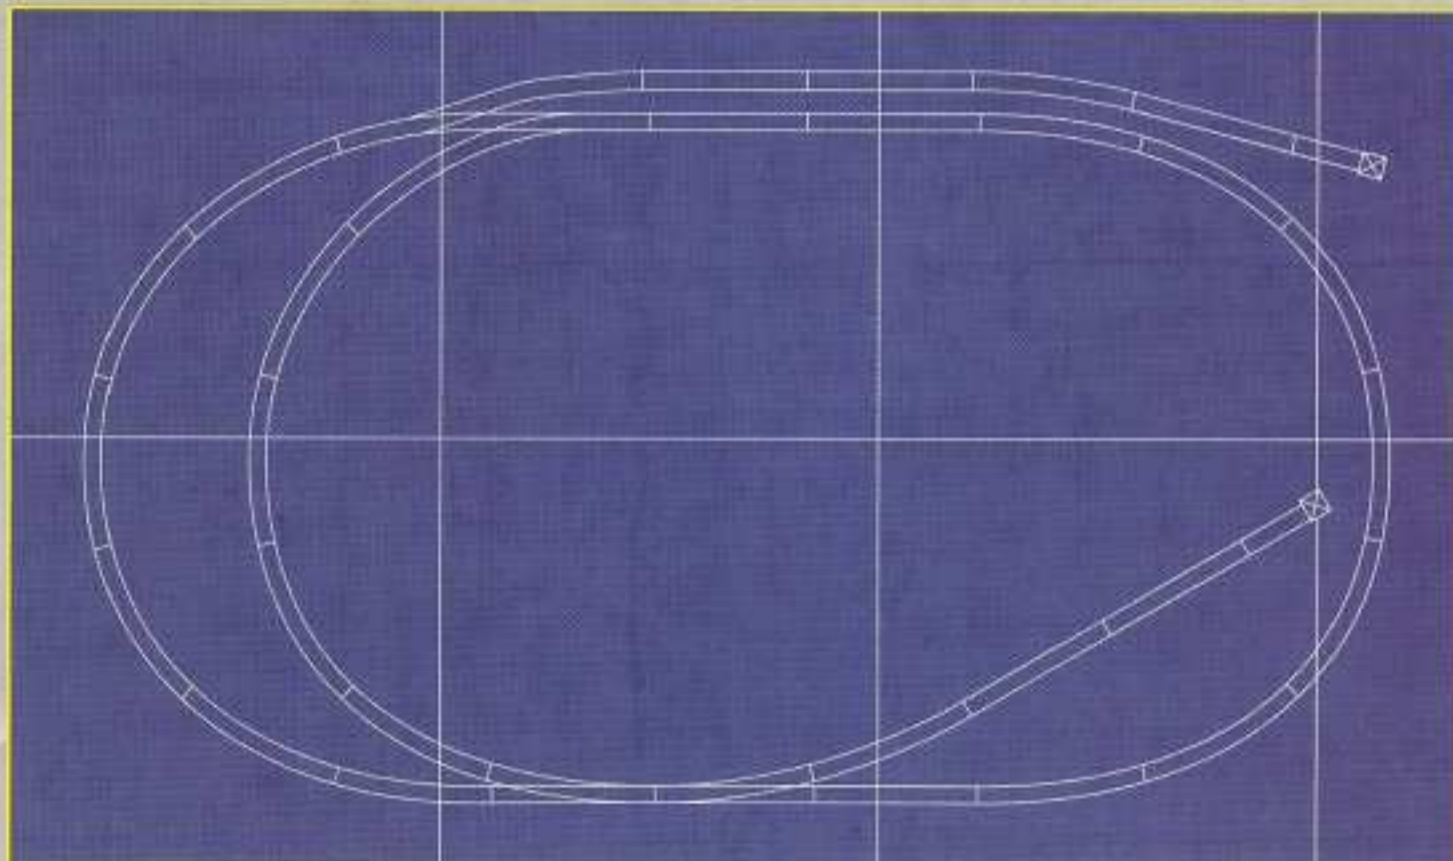

Table Size: 24" x 40"

## LAYOUT N-5

**Up & Over Figure 8** - \$101.50

with Power Pack - \$136.45

**Skill level:** Beginner

This plan, instructions and detailed list of "Atlas Products Required," can be found in Book #6: Introduction to N Scale Model Railroading (See pg. 6)

**Summary of Atlas products included in package:**

- Over 36 pieces of track (including bumpers and rerailers)
- 3 Remote switches
- 3 Switch control boxes
- 1 Connector
- Necessary amount of rail joiners & track nails

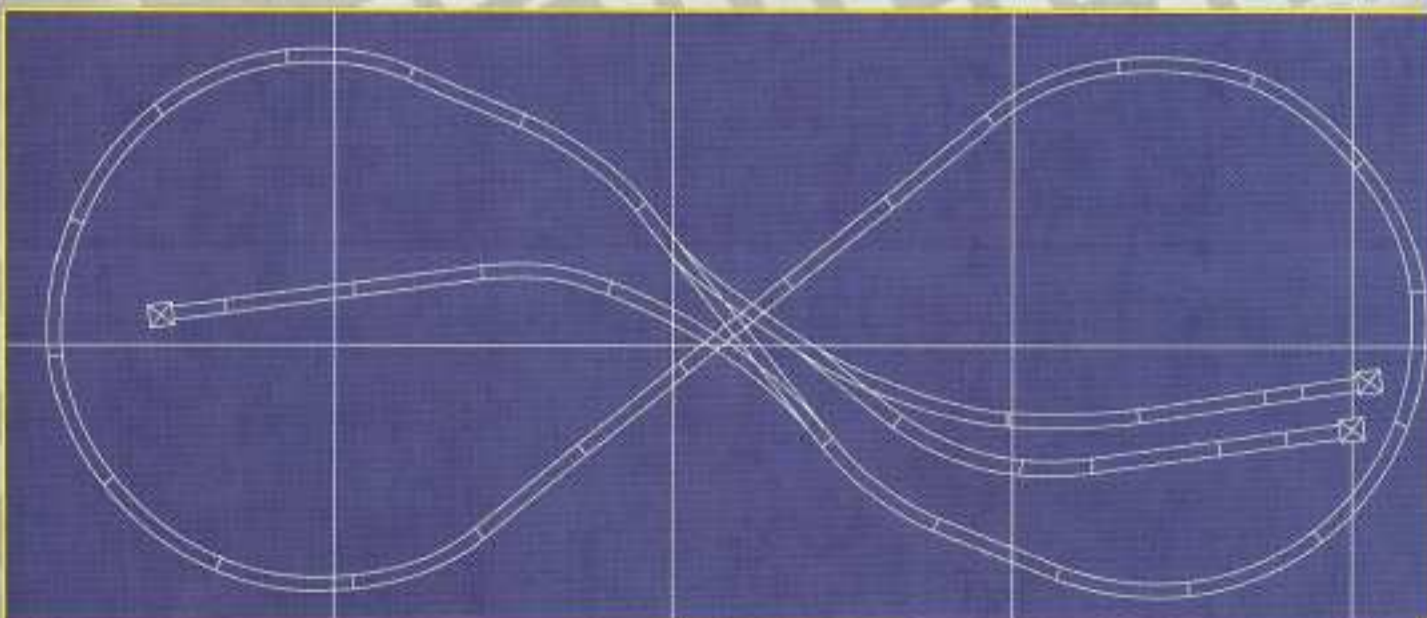

Table Size: 22" x 53"

## N Roundhouse

The basic 3-stall kit features brick detail, opening doors, stalls spaced at 15 degrees, an office, two styles of ventilators and modular construction. Molded in appropriate colors, it is expandable by additional 3-stall kits as desired. Each stall fits max. 8" locomotive over couplers. Designed to work with Atlas N Turntable #2790 and Atlas N Motor Drive #2791.

#2843 - Model can be painted and weathered to match photo. (Photos by Ken Patterson)

### #2790 TURNTABLE

\$18.20 - The fully assembled\* turntable features:

- 7-1/2" diameter deck
- Smooth manual operation
- 21 track positions with 15° stall spacing
- Geneva movement locks table in exact position every time
- Simulated wood brown turntable deck and concrete pit ring.

The N scale turntable can be motorized easily with the N scale motor drive unit.

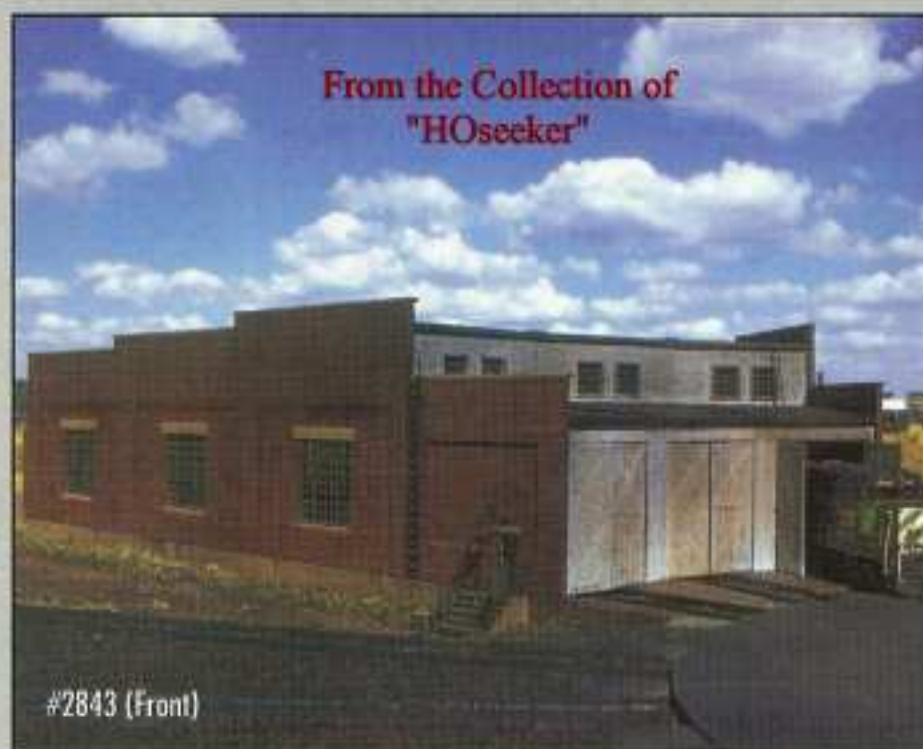

\*Handle must be attached.

### #2791 MOTOR DRIVE

\$15.95 - (Powerful DC motor with simple hookup)

### #2843 ROUNDHOUSE KIT - NEW!

TBA - (Longest section-10 3/8"; Widest section-11"; Highest section-3")

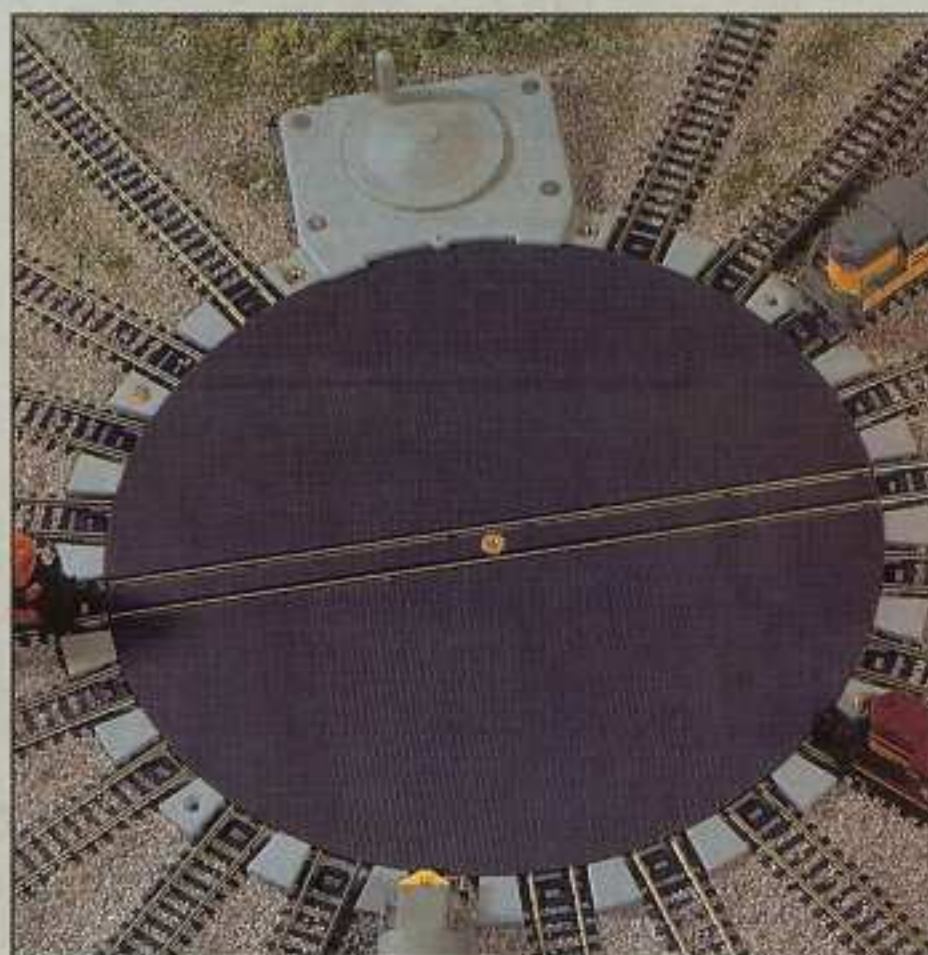

#2843 (Front)

#2843 (Back)

#2791

#2790

# N Scale Structure Kits

Atlas has taken three popular HO structure kits and recreated them for N scalers! Each kit is modeled after an actual prototype and is molded in appropriate colors so painting is not required. Assembly is easy using plastic compatible glue (not included).

From the Collection of  
"HOseker"

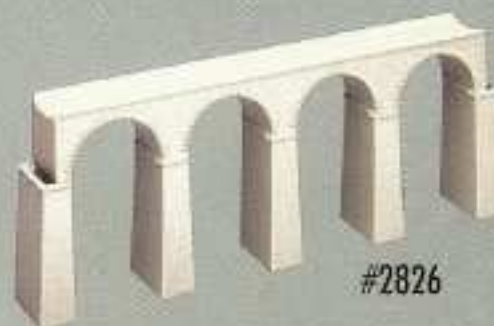

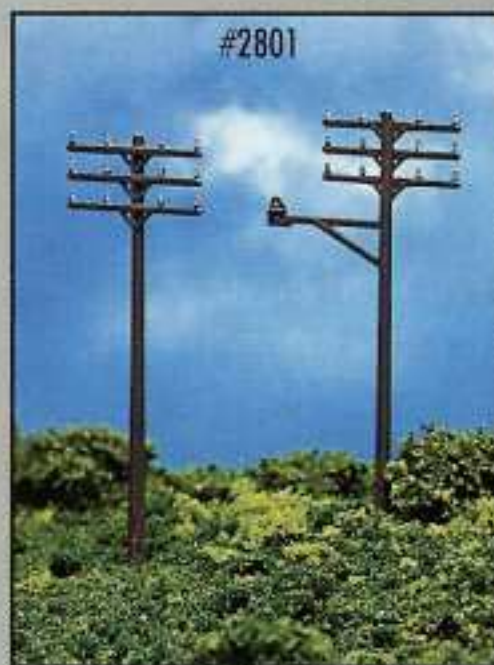

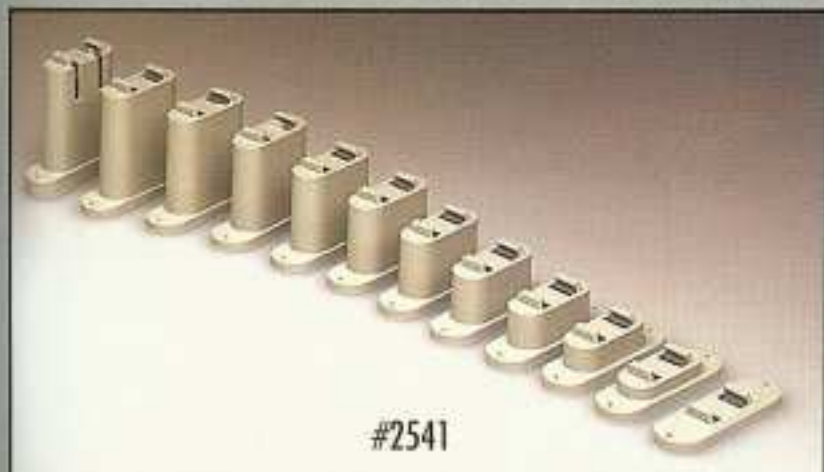

#2841 - Station Base dimensions: 3.24" x 2.34"

#2842 - Platform Base dimensions: 3.24" x 1.25"

#2840  
Base dimensions: 1.3" x 3"

Accessories that come with station and platform kits include a luggage cart with baggage and freight, a hand truck and a freight scale. Intricate exterior details of all kits above include: an inlaid brick chimney, drainage pipes, oil tank, eave supports and realistically shingled roof.

## N STRUCTURE KITS

Item#	Description	Price
2840	Signal Tower <i>Accessories include a tool shed, barrels and an oil tank.</i>	\$15.95
2841	Passenger Station Kit (includes one platform)	\$21.45
2842	Station Platform Kit (includes two platforms)	\$11.75

## #2801 TELEPHONE POLES

\$1.95 - (Set of 12)

## #2541 OVER 'N UNDER PIER SET

\$7.35 - 25 pieces per package

Two each of 12 graduated concrete piers plus #2542 Straight Pier Girder. Pier heights range from 9/64" through 1-11/16" by 9/64" increments. Grade with piers spaced at 5" intervals is 2.8%.

## #2826 VIADUCT KIT

\$4.15

Easy-to-build, assembles into 4-arch cut stone masonry single-track viaduct. Arches are 2-5/32" center-to-center and 3-1/4" high. Easily shortened to any length. Arch assembly without piers is 1" high.

## #2542 STRAIGHT PIER GIRDER

\$2.55 - (5" long, 4 pieces per package)

## #2543 BRIDGE PIERS

\$2.55 - (1-11/16" high 3 pieces per package)

## N BRIDGES

Item#	Description	Price
2546	Warren Truss Bridge (5" x 1-1/2" x 1-1/8")	\$3.75
2547	Deck Truss Bridge (5" x 3/4" x 1-1/4")	\$3.75
2548	Plate Girder Bridge (5" x 1-1/2" x 5/8")	\$3.75

**All bridges are the same length as a standard 5" straight section.**

Snap them together atop the #2543 Bridge Piers in any number and arrangement for an impressively realistic multi-span structure.

# Grand Valley HO Scale Layout

If you're ready to build an HO scale layout, this is the way to go! Woodland Scenics offers a complete, lightweight layout kit and Atlas provides the coordinating Track Pack. These products will have you on your way to a great 4' x 8' railroad in no time at all!

Both the Grand Valley Layout Kit and Atlas Track Pack are available at your local hobby shop!

(Trains and buildings not included.)

## #589 HO GRAND VALLEY LAYOUT TRACK PACK

\$69.95

Contains all the Atlas HO code 83 track, switches, bridges and rail joiners you need to build the Grand Valley Layout Kit shown above. For a complete list of all track pieces, please see <http://www.atlasrr.com/hotrackpack.asp>

**NEW!**

## #ST1483 HO GRAND VALLEY LAYOUT KIT

\$449.00

- Anyone can build the layout
- No dusty mess or expensive power tools
- Kit contained in one box
- Can be expanded as a module
- Track Plan printed on lightweight base
- Fully illustrated, easy-to-follow instructions

## #S1486 HO CITY & INDUSTRY BUILDING SET

\$149.00

**NEW!** 15 buildings for Grand Valley or any HO scale layout

## FOR YOU N SCALERS!

Woodland Scenics' popular Scenic Ridge Layout Kit (Item# ST1482) and Atlas' Track Pack (Item# 2588) are also available! Build a great 3' by 6' layout easily!
