

ATLAS TRAINMAN[®] N SCALE RELEASES

They're finally here! The highly anticipated N Scale additions to Atlas' exciting line of TRAINMAN[®] products made their debut in late 2006. Joining their instantly popular counterparts in HO and O Scales, the Atlas N TRAINMAN[®] line is our newest category of affordable, scale locomotives and rolling stock, designed for performance and compatibility with any N Scale layout.

Beginning in 2005, the Atlas TRAINMAN[®] lines, first released in Atlas O and then Atlas Model HO Scale, made headlines and a stunning impact on the model railroad market, whether appearing at trade shows, in hobby shops, in the industry media or on the worldwide web. The Atlas TRAINMAN[®] lines have been embraced by modelers worldwide for their scale accuracy, detailing, reliable performance, quality and value. While most additions to the N TRAINMAN[®] line can be seen in this catalog, please visit our website, www.atlastrainman.com, regularly to see the very latest in shipping schedules and new product announcements.

Just what makes Atlas TRAINMAN[®] products so unique? For starters, they are fully assembled, built to scale and ready-to-run. All items are equipped with Atlas trucks featuring the AccuMate[®] Knuckle Couplers. Combined with accurate details, molded parts and weighted, detailed underframes, Atlas N TRAINMAN[®] products are the result of extensive research and painstaking design by our highly regarded in-house Research and Development staff.

Media experts have called them "fantastic bargains", "ground-breaking", "good solid starter equipment", "winners", and "up to the expected Atlas standards." TRAINMAN[®] products were created to fill a void in the market and answer modeler's requests. This moderately-priced line quickly caught on with families, newcomers and experienced modelers who want to add more variety to their layouts without sacrificing quality for price.

The TRAINMAN[®] line, engineered for many hours of high performance fun, is also an homage to our founder, Stephan J. Schaffan Jr., the original "Trainman", who believed that model railroading should be accessible to everyone. We invite you to examine these strikingly accurate models for yourself to fully experience the value and quality they offer! Welcome to the world of the ATLAS N TRAINMAN[®], where there's always...

MODEL RAILROAD FUN FOR EVERYONE!TM

NOTE: Select current models have now joined the ATLAS N TRAINMAN[®] line. They feature all the same great details you have come to love about TRAINMAN[®]. An example of one of these additions is the 90 Ton Hopper.

"You're On The Right Track...With Atlas![®]"

GATX AIRSLIDE COVERED HOPPER

Decorated MSRP: \$9.95/Undecorated MSRP: \$7.95

Undecorated available: • Item #3850

PROTOTYPE INFO

The Airslide Covered Hopper was introduced by General American Transportation Corporation (GATX) in 1953. Primarily designed for the bulk shipment of dry, granular or powdered commodities, the Airslide can be loaded and unloaded quickly and with little spillage through the use of air pressure. The most common commodities carried include: flour, sugar and starch.

ATLAS MODEL FEATURES:

- Accurate painting and printing
- AccuMate® couplers
- Ready-to-run
- Realistic roof walks and brake line details
- 70-ton roller-bearing or friction-bearing trucks

PROTOTYPE INFO

The 90 ton hopper represents one of the most common coal car designs placed in service during the 60's and 70's. The steel carbody has 12 panels/13 ribs on the sides and three hoppers. Nearly every major coal carrying railroad in the eastern United States had a fleet of cars just like these or very similar. Thousands were built and many are still in service today.
