N Scale Highlight

N Master™ C420 phase 2A & phase 2B Locomotive!

This latest addition to Atlas' N Scale fleet of highly detailed Master Line™ locomotives, an all-new low-nose "phase 2" C420, is due to arrive in hobby shops in June 2008. All phase 2 versions will feature the low/vertical mounted engine air intake located ahead of the radiator area on the long hood. Early phase 2 locomotives feature phase 1-style walkways/sills with stanchions mounted into the top walkway deck (referred to as "Phase 2a" models). Later phase 2 locomotives feature a revised configuration where the stanchions are mounted to the sides of the sill (referred to as "phase 2b" models).

Phase 2a production ran from December 1964 through September 1965. Phase 2b units were produced from December 1965 through the end of C420 locomotive production in August 1968.

Features of this beautifully painted and decorated locomotive include flat or "step" pilots used where appropriate, long hood with or without dynamic brake where appropriate, 3,100 or 2,400 gallon fuel tank used when appropriate per road name, separately-applied coupler cut levers, painted safety rails, dual flywheels, directional lighting, blackened metal wheels, Scale Speed™ motor, factory installed AccuMate® magnetic couplers, and low nose headlight in low position where appropriate per road name.

To see the available road names, and road numbers, please visit www.atlasrr.com/nloco/nc420a.htm and page 104 of this catalog.

N SCALE Highlight

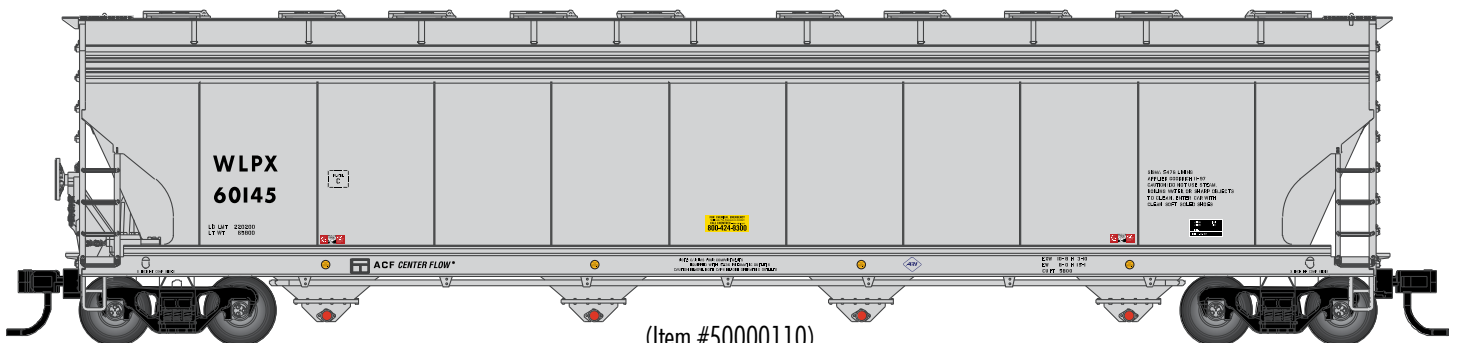

The Summer is Sizzlin' with...

N Master™ ACF® 5800 Centerflow Plastics & Grain Hoppers!

Don't wait to order this new Atlas Master Line™ freight, due to arrive in hobby shops in July. You'll marvel at its exceptional features - nine full-width panel body with ten weld seams! Ten 20" hatches or continuous hatch (grain)! Pneumatic or gravity outlets (grain)! It's a sure-fire way to enhance your summer model railroading enjoyment.

The 5800 cubic foot covered hopper evolved from the earlier 5701 for transporting bulk plastic pellets. Most of these were acquired by private companies including leasing companies, chemical companies, oil companies, and plastics companies.

Additional features include etched metal roof walks, transverse mounted air reservoir, continuous hatch and gravity outlets (5748 Grain), 100-ton roller-bearing trucks and AccuMate® couplers. To admire the fine details, paint schemes and road numbers for yourself, please visit www.atlasrr.com/NFreight/n5800cf.htm and page 108 of this catalog.

N Master™ DASH 8-40C Locomotive - New Model!

Things will be heating up this July at your local hobby shop when the all-new Atlas N Dash8-40C locomotives roll in! Sizzling with the fine details only Atlas Master Line™ can deliver, these stunning locomotives come in phase 1 and phase 2 undecorated versions, as well as five road names with three road numbers each. Atlas Master Line® locomotives are the epitome of high quality, prototypical accuracy, superior performance and fine detailing, built to the strictest standards of research, engineering and production. They are specifically designed to bring the discriminating modeler many hours of smooth performance and impressive pulling power.

First built for Union Pacific in the late 1980s by General Electric, the DASH 8-40C diesel locomotives were identified by an enlarged exhaust stack and the mounting of the dynamic brake grids in a square-like unit behind the cab, which housed an enlarged equipment blower fan. These six-axle, 4,000 hp engines are still in service today throughout North America.

The hot, hot Atlas version features a separate coupler cut lever, directional lighting, golden white LEDs, painted safety rails, blackened metal wheels, dual flywheel equipped 5-pole skewed armature motor with a low friction mechanism, and factory-installed AccuMate® magnetic knuckle couplers.

Don your shades and check them out at www.atlasrr.com/nloco/ndash840c.htm and on page 107 of this catalog.
