

# PRE-ORDER ANNOUNCEMENTS

Atlas determines the approximate amount of freight car and locomotive production run quantity by the number of dealer/distributor orders received during the specified pre-order time period. To assure the receipt of a desired model, from a specific store, it is highly recommended to order during this period. Please use the pre-order form found in the center of this quarterly catalog and place your order with one of the authorized Atlas hobby stores listed alphabetically by state at the back.

If you miss the pre-order deadline, check with your hobby store, or Atlas on-line ([www.atlasrr.com](http://www.atlasrr.com)) for availability of any desired product. Atlas carries a large inventory of in-stock items in all of its scales and product lines.

'Announcements' are products that will typically be delivered in 4-6 months.

## ATLAS N TRUE-TRACK®

Long known for its predominance in producing reliable, high performance track products, Atlas elevates the standard once again with its all-new line of roadbed track in N Scale. The latest addition to Atlas' highly regarded track line comes with Code 65 rail, smaller than similar track currently on the market, enhancing the track's scale look while at the same time allowing most equipment to operate flawlessly. With tie spacing matching US prototype, mottled highlights, dark brown ties and simulated ballast roadbed, the first six items in this line are sure to please those who appreciate maximum realism on their layout.

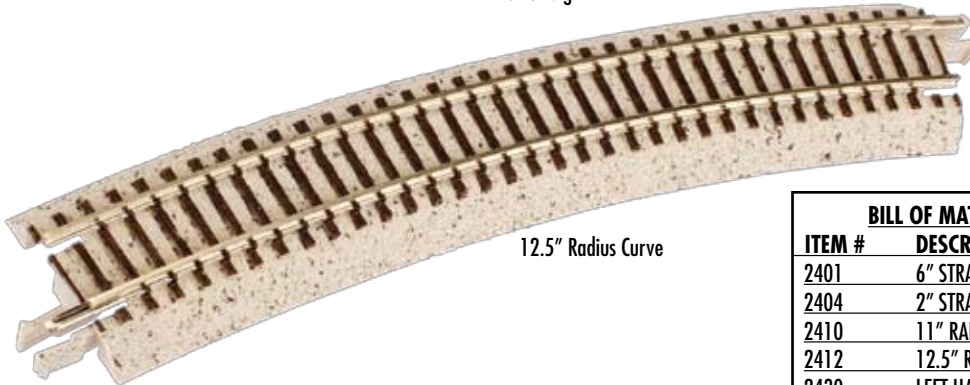

Below is an example of one of the many new N Scale True-Track® Layouts that can be created. This compact layout has all the basic necessities for operation: a passing track and several sidings where cars can be spotted and a loop that allows for continuous running.

Arriving in your hobby shop just in time for your seasonal layout plans, Atlas N Scale True-Track® Roadbed Track is a gift that will keep on giving many hours of smooth-running model railroad fun.
