N Scale Highlight

Atlas N Master™ 5701 Centerflow Plastics Hopper - *New Model!*

Atlas proudly introduces this exciting all-new model, announced in August 2007 and scheduled for January 2008 delivery. Offered in one undecorated unit and six meticulously decorated roadnames with two road numbers each, this hopper is sure to add realism and interest to your layout!

This sleek hopper features an eight full-width panel body with nine weld seams, but that's just the start. Other desirable features include etched metal roof walks, ten 20" hatches, a longitudinal mounted air reservoir, pneumatic outlets, 100-Ton Roller Bearing Trucks and AccuMate® couplers.

The prototype of the 5701 cubic foot covered hopper was introduced in the early 1970s for transporting bulk plastic pellets. Since 1972, ACF® has built nearly 15,000 cars. Most were acquired by private companies, including those involved in leasing, chemicals, oil and plastics.

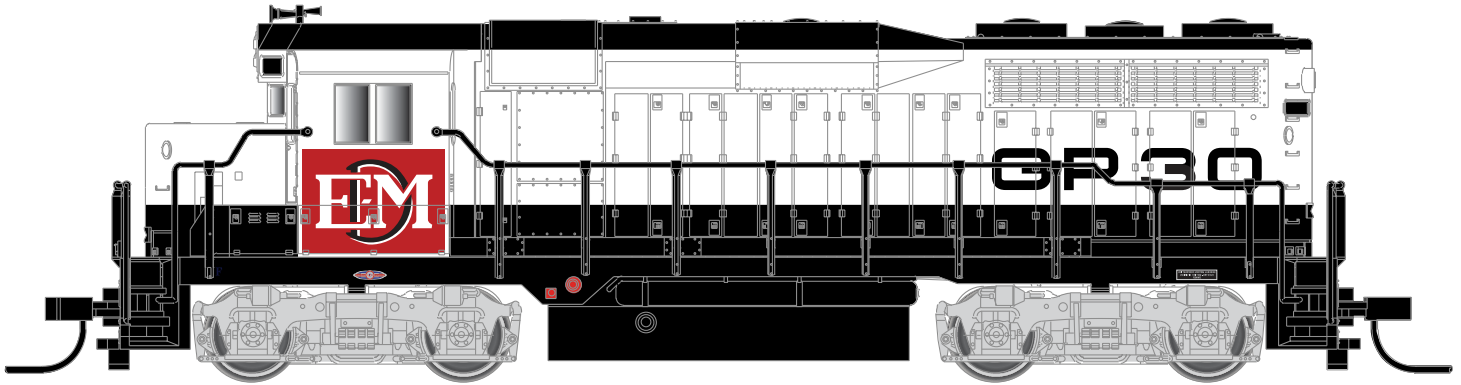

Our N Scale Product Development crew picked this car for its "very cosmopolitan" usage. Details and photos are available on page 20 of this catalog, and at www.atlasrr.com/NFreight/n5701p.htm

N SCALE HIGHLIGHT

Atlas N Master® GP-30 Phase 1 Locomotive

New Tooling!

Building on the success of the Phase2 GP-30 locomotive, Atlas proudly introduces the GP-30 Phase 1 Locomotive. First introduced by Kato exclusively for Atlas in 1993, Atlas now brings you the Phase 1 version. This run's broadened road selection includes Reading, which only owned the Phase 1 version.

Announced in September 2007, our model is scheduled to arrive in February 2008. It comes in two undecorated units, one with and one without the nose headlight, as well as six roadnames with three road numbers each. This run also features the popular EMD Demonstrator in its trademark colors of black, red and white.

A total of 948 units of the prototype were produced between March of 1962 through November 1963, 338 of them Phase 1. Built by the Electro-Motive Division of General Motors, the primary spotting features can be seen in the cab, altered to increase space, and the lack of a handrail stanchion immediately behind the cab. The locomotives were four-wheel truck road switchers used in heavy-haul freight services throughout the country.

Ours features a scale Speed™ Motor, golden-white LEDs, directional lighting, dual brass flywheels, a low-friction mechanism, factory-installed AccuMate® magnetic knuckle couplers, accurate painting and lettering, a powered low-friction drive, blackened metal wheels and nose headlight as appropriate per road name. View this exceptional addition to Atlas' N Scale fleet on page 22 of this catalog, and at www.atlasrr.com/nloco/ngp30.htm.

N Scale Highlight

Atlas N Scale Track – Perfect for Your Layout!

A great train running experience needs more than good cars, you need good track as well. Atlas' N Scale Code 55 & Code 80 track lines are finely detailed to bring a realistic look to your layout, and extensive enough to fit your modeling needs. In addition to its good looks, Atlas track is extremely reliable, serving you as well years from now as it does today.

N Code 55 (Brown Ties/Nickel Silver Rail):

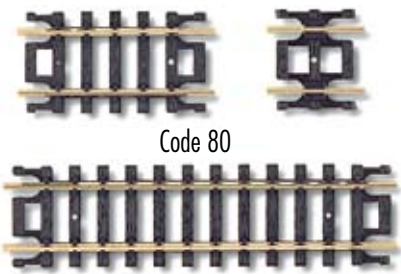

The modeler's track with prototypical ties and rails. For those wanting a more prototypical look to their layout, Code 55 is the track of choice. The ties are finer and the rail smaller than Code 80 and has the same hallmarks of Atlas quality that all of our track products feature.

Code 55

N Code 80 (Black Ties/Nickel Silver Rail):

The time-tested Atlas standard. Its rails are a little bit higher than Code 55, making it more compatible with the wheels on older freight cars. This durable track has been used on thousands of model railroad layouts over the past 30 years and will continue to be used by modelers everywhere.

Code 80

Sometimes wiring your layout can seem a little intimidating. That's why Atlas has provided the perfect resource for help with out #12 *Complete Atlas Wiring Book*. It's loaded with tips and tricks to help you with your foray into wiring, this book will help you achieve reliable running from your Atlas track and accessories. For a complete track listing please see pages 30-31.
