N SCALE Highlight

N Master™ Dash 8-40C Locomotive!

Atlas has an all-new Master™ Line model to add sizzle to your N Scale plans this summer! The Dash 8-40C, announced in February 2008, is expected to pull into hobby shops in July in both DCC-ready and DCC-equipped versions; each available in five popular road names.

First built for Union Pacific in the late 1980s by General Electric, the DASH 8-40C diesel locomotives were identified by an enlarged exhaust stack and the mounting of the dynamic brake grids in a square-like unit behind the cab, which housed an enlarged equipment blower fan. These six-axle, 4,000 hp engines remain in service today in North America.

When the box says "Atlas", you know the contents are filled with the features you desire most. This run includes such outstanding details as separate coupler cut levers, directional lighting, golden white LEDs, painted safety rails, blackened metal wheels, dual flywheel equipped five-pole skewed armature motor with a low friction mechanism, factory-installed AccuMate® magnetic knuckle couplers and more! Undecorated DCC-ready models are available in Phase 1 and 2 versions. Analog decorated items have three road numbers each. DCC-equipped models have two road numbers each.

HOT New Model!

(Item #51803 - HO model shown)

For complete details, please visit, www.atlasrr.com/nloco/ndash840c.htm, and page 22 of this catalog.

N Scale Highlight

N Master™ 48' Pines Trailers!

You asked, so we've made more! Atlas Master™ Line brings you new paint schemes and road numbers for the realistic 48' Pines Trailer. Arriving in September 2008, those with new paint schemes will be available in three road names with three road numbers each. New road numbers will be available in two popular road names from the previous run; BNSF and CSX*. Since we know some prefer to create their own paint schemes, we also offer an undecorated version.

(Item #50000056)

During the late 1980s, the railroads succeeded in making intermodal trailers a viable part of the transportation network. The then standard 45' trailer eventually gave way to the new 48' standard length. Pines, a trailer manufacturer of the period, offered an intermodal version of a 48' trailer that became very popular with the railroads and private intermodal companies. Today, thousands of these trailers still ride the steel rails delivering packages and products throughout the United States, making it an appropriate addition to any layout.

The Atlas model features two sets of landing gear, (fully extended or retracted), a prototypical top rail reinforcement strip, improved design on the door-to-roof interface, hinges and latches, rear bumper detail, rivets and more, all designed to deliver the ultimate realism you expect from Atlas.

Get all the details at www.atlasrr.com/nfreight/n48trailers1.htm, and page 24 of this catalog.

Go Intermodal!

N SCALE HIGHLIGHT

N Trainman® GP15-1 Locomotive!

The Atlas Trainman® brings you an all-new model! Expected to premiere this October in hobby shops everywhere, Atlas' release of the GP15-1 marks the first time this exceptional locomotive has been produced in N Scale. Atlas announced the N Scale debut of the GP15-1 in May and orders quickly poured in. It's sure to be an instant collector's item, so don't wait to secure yours!

Built between 1976 and 1982, the EMD GP15-1 four-axle diesel locomotive was powered by a 12-cylinder EMD 645E engine that generated 1,500hp. It was commonly used as a light road or yard switcher. A total of 310 units were built for American railroads, making it a familiar national icon that will enhance the layout of the most discriminating modeler.

Atlas is proud to introduce this DCC-ready locomotive to N Scale! We've packed in such desirable features as scale dimensions and details, directional lighting, blackened metal wheels, dual flywheel equipped 5-pole skewed armature motor with a low friction mechanism and factory-installed AccuMate® magnetic knuckle couplers! This historic first run includes one undecorated unit and four road names, each with two road numbers.
