N Scale Highlight

N Master™ 1932 ARA Box Cars!

Considered among the most important designs in American railroad history, thousands of American Railway Association (ARA) box cars were produced for over 23 railroads before the end of World War II. They originated in the early 1920s, when the ARA sought to produce a standard all-steel box car. Over 60,000 were made from the original 1923 design, but it wasn't until a new design was presented in 1932 that the member railroads gave their approval.

Five prototypes were tested extensively the following year. During the next decade, over 14,500 cars were produced. In 1937, the design evolved, and eventually became the ground work for the Post-war AAR box cars. Used for general freight purposes, they were phased out in the 1960s.

Our all-new Atlas Master® Line model recreates this utilitarian box car in two body styles. Body Style 1 features a "Long tab" body, Murphy panel roof and 4/4 Dreadnaught ends. Body Style 2 also features a "Long tab" body, but with an 11 panel flat riveted roof and flat riveted ends. In addition to an undecorated version in each style, five meticulously rendered paint schemes bring this significant era of American Railroad history to life. Estimated for October delivery, they are the perfect gift for anyone who craves the authenticity of living history on their layout.

All New Model!

(Item #50 000 117)

N Scale Highlight

N Master™ GP38-2 Locomotives!

Back by popular demand and available in both DCC Ready and DCC Equipped versions, the Atlas Master® Line GP38-2 is scheduled to arrive just in time to add sparkle to your holiday layout, or grant the wishes of your favorite model railroader!

With its strikingly accurate features, this run's dazzling paint schemes and stunning details will delight those who seek the highest quality and performance combined with exquisite decoration. Eight new road names and five undecorated versions are offered, three featuring split radiators. Choose from Dynamic, Non-Dynamic, and Extended Range Dynamic Brakes. The pilots come standard, or with snow plow.

The Dash 2 locomotive series, unveiled by EMD in 1972, featured such significant changes as a solid-state, modular electrical control system and improved engine components designed to increase traction and reduce exhaust emissions. The workhorse GP38-2 remains one of the most successful locomotives ever built. Most are still in service today.

New Paint Schemes!

N Scale Highlight

N Trainman® C&O Cupola Caboose!

In Clifton, New Jersey, just minutes from where Atlas headquarters stands today, the Magor Car Corporation was building the first all-steel cabooses for the Chesapeake & Ohio Railroad in 1937. Magor, along with St. Louis Car Company and ACF®, built a total of 350 cabooses for the C&O using a similar design. Although the last were produced in 1949, their practical functionality kept many in service through the end of regular caboose usage in the 1980s. Rebuilt and modernized over time, cabooses of similar design were also built for Pere Marquette, Missouri Pacific and Chicago & Eastern Illinois.

All this and more make these all-new Atlas Trainman® models an attractive and affordable enhancement to layouts spanning several eras. Their colorful and accurate paint schemes are complimented by window glazing, friction bearing caboose trucks and crisply molded body details. Six desirable road names and two undecorated versions are offered in this run. Look for them at your hobby shop this December!

See them and their stunning details for yourself at www.atlastrainman.com/NFreight/tmncaboose.htm
