

"Models So Good, You'll Think They're Real"

ATLAS HO VEHICLES BY WELLY - NOW AVAILABLE!

New to the Atlas lineup, these HO Scale vehicles by Welly look just like their real counterparts and will add that special touch to your layout.

Accurately detailed and offered in popular colors, these vehicles will look right at home parked in front of our garage kits, on the streets of your layout, or as loads on open auto racks.

To see more, go to www.atlasrr.com/Cars/welly.htm

ATLAS HO MASTER™ & TRAINMAN® LOCOMOTIVES

Atlas' HO Master™ and Trainman® locomotives are some of the best models available on the market today and telling them apart can be more difficult than some would imagine. You can thank our R&D department for that, who try to fit as much detail as possible into each release to recreate the prototype faithfully. While the detail levels may differ between the two lines, you can be assured that the performance won't, as each locomotive uses the same high quality motor to keep any in your fleet running long and strong.

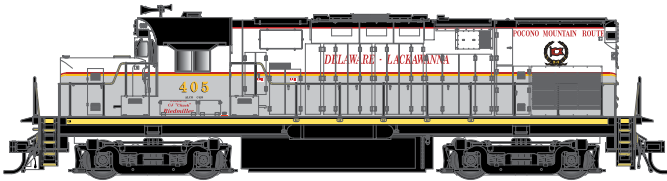

MODEL NAME	ARRIVAL DATE	PAGE #

ATLAS HO MASTER™ C420 PHASE I LOCOMOTIVES

Vermont Northern

FEATURES:

- Newly redesigned AAR type B truck sideframes with optional bearing covers
- Long hood with or without dynamic brake detail used where appropriate
- Long Island Railroad units will feature correct air horn placement and include smoke deflectors for the long hood
- Flat or "step" pilots used where appropriate
- 3,100 gallon fuel tank

ADDITIONAL FEATURES:

- Separately-applied scale detail parts include: windshield wipers, metal grab irons, coupler cut levers, multiple-unit hoses, train line hoses, fine scale handrails, drop steps, cab sun shades and more!
- See through step detail on sill
- Etched metal radiator walkway
- Painted crew members
- Factory-equipped with AccuMate® knuckle couplers
- Coupler pocket designed to accept AccuMate® Proto-couplers
- Directional lighting with golden-white LEDs
- Five-pole skewed armature motor with dual flywheels for optimum performance at all speeds

ATLAS MASTER® SILVER SERIES ADDITIONAL FEATURES:

- NMRA 8-pin plug for DCC (Decoder-ready)

ATLAS MASTER® GOLD SERIES ADDITIONAL FEATURES:

- Electronic Dual-Mode® Decoder (e-DMD) that allows your locomotive to run in DCC or traditional DC

QSI® QUANTUM SYSTEM™ FEATURES INCLUDING:

(Atlas Master® Gold Series locomotives only)

- Dual speaker system
- Authentic diesel engine sounds
- Squealing brakes
- Doppler effect
- Air let-off in neutral
- Coupler impact sounds when operated with DCC
- Helper mode that mutes the whistle and bell for double heading
- And more!

Note: Due to the higher starting voltage required to operate the sound system, it is not possible to MU a non-sound-equipped loco in DC (analog) mode

ATLAS HO MASTER™ U30B PHASE II LOCOMOTIVES

Powered by a V16 FDL prime mover, the 3,000 h.p. U30B was GE's answer to EMD's popular GP40 and ALCO's C430 Locomotive. A total of 295 U30Bs were built by GE between 1966 and 1975.

This model represents a late "phase 2" U30B locomotive. The primary spotting feature of phase 2 units was the hood below the radiator, which was evenly built out to the same width as the radiator. A U30B could be differentiated from the lower-horsepower U23B by the presence of two sets of four tall engine access doors near the center of the long hood. During production, the U30B was equipped with various trucks, including Blomberg trucks from EMD trade-in locomotives, AAR-style trucks, or GE's own four-axle "FB2" truck.

Norfolk & Western owned the most phase 2 U30Bs with a total of 75 units; all included a high short hood. Other major owners included C&O, Frisco and Western Pacific. While some U30Bs found homes on other railroads after being retired by their initial owner, very few examples of this model are still in service today.

ATLAS HO MASTER™ 53' CIMC CONTAINERS

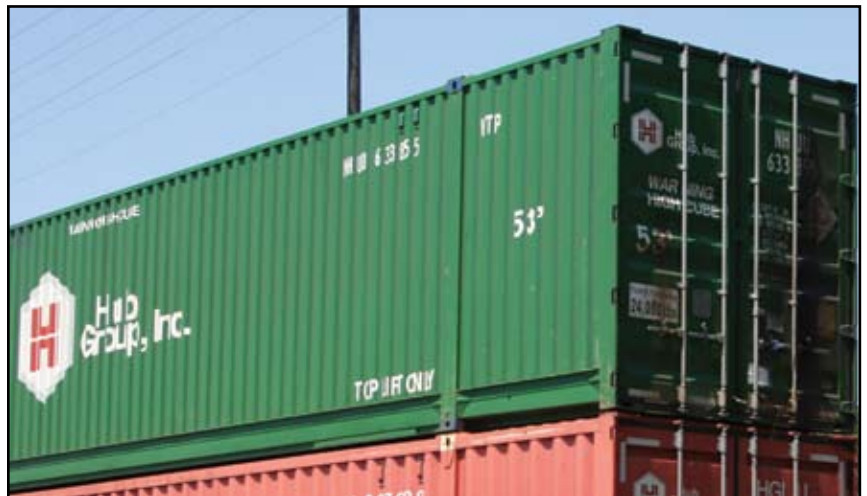

Prototype photos by Dave Casdorff

Contemporary domestic intermodal operations are based on the 53' long dry-van container. Atlas Model now introduces an entirely different 53' steel-bodied container in HO scale, the CIMC 53. The new container features an entirely new side corrugation design as well as new roof, new front wall, and new door styles. Present operators include Norfolk Southern, Union Pacific and the recent UMAX.

Atlas HO MASTER™ 42' Coil Steel Cars

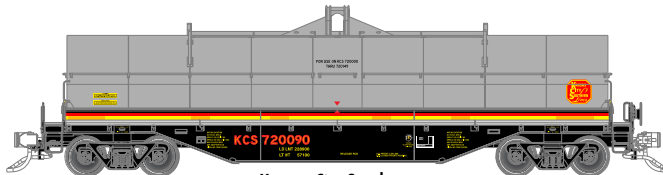

The increased volume of coiled steel transportation gave rise to a new purpose-built freight car. Previously rolls of coiled-steel had generally traveled in specially equipped gondola cars. In the 1960's a lighter type of car emerged specifically for hauling coils of steel in an integral trough. The car type gained popularity and eventually over 17,000 cars were built. Atlas' model replicates a 42' design with a distinctive fishbelly side sill.
