

O-27 TRAIN SETS INDUSTRIAL RAIL™

NOW AVAILABLE!

Atlas' colorful and fun Industrial Rail® Train Sets are not only part of the most affordable Atlas O product line, but they appeal to both the young and young at heart! Compatible with all traditionally sized O/O-27 trains, these easy to use sets are packaged with everything you need to get started! Each one includes a locomotive and the applicable passenger or freight cars, a loop of Industrial Rail® Roadbed Track, an 80-Watt Power Pack, hook-up wire, smoke fluid and a Starter Guide.

Expansion options are limitless. These train sets are complemented by the separate sale Industrial Rail® expansion packs of freight cars and track components. The Industrial Rail® track line is constantly growing and, with transition track, able to be joined to most available track systems, allowing you to easily combine it to any existing track in your layout. The robust 80 Watt power pack is a fantastic transformer that will serve you well not only for running your train set but as a power source for your future layout.

Pick up one of these sets and bring the joy of trains to your household today!

ATLAS RIGHT TRACK FREWARE!

With Atlas' Right Track Software (Version 10.0 - Freeware), beginners or advanced modelers can design a layout of just about any size using Atlas N, HO and O scale Super-Flex track, sectional track, switches, electrical components, bridges and buildings. Draw in the size and shape of your layout table, place and connect track, add elevations, helices, road bed and much more! Print out a list of products and a blueprint of your custom-designed layout, and you're on your way to construction.

The new RTS Version 10.0 contains the same quality features and functionality as earlier versions, but has been updated with exciting new features and tools! The new version complete with updated features is now available for download.

Get your FREE copy at www.atlasrr.com and start designing today!
