

HO & N GAUGE TRACK ARRIVALS

4th QUARTER 2012 through 2nd QUARTER 2013 ARRIVAL

The track items listed on the following pages are scheduled to arrive during the 4th Quarter of 2012 through the 2nd Quarter of 2013. For up-to-date information on the latest Atlas arrivals, please visit our website, www.atlasrr.com

Item #	Description	MSRP/Unit
HO & N Scale Electrical Components & Accessories		
0056	Switch Control Box	\$5.50
0200	Snap Relay	\$14.25
0205	Connector	\$10.95
0210	Twin	\$10.95
0215	Selector	\$10.95
0220	Controller	\$11.55

#0215 - Selector

SELECTOR #0215

This device enables the operation and control of two trains at the same time. It has four single-pole, double-throw switches to provide two-cab operation for four blocks and may be ganged together in any number to control additional blocks without inter-switch wiring. The Selector can be used as area selectors for four-cab operation, and couples with the #0220 Controller.

#0205 - Connector

CONNECTOR #0205

A device to turn electric power on or off to track sections or accessories. It has three SPST on-off switches in parallel and can be coupled together in any number.

#0210 - Twin

TWIN #0210

The Twin is a component consisting of two double-pole, double-throw reversing switches wired in parallel. Useful for reversing section and turntable control on single-cab layouts, plus many other applications.

#0056 - Switch Control Box (12 pcs.)

SWITCH CONTROL BOX #0056

Controls Atlas (or other twin coil) switch machines with SPDT momentary action. Button position indicates turnout setting. It can be coupled together in any number without wiring. Switch identification labels are included.

#0220 - Controller

CONTROLLER #0220

This Controller provides the simplest way to wire and control tricky reverse loops, wyes and turntables. It has reversing switches for two main line cabs plus a switch, selectable by either cab, for directional control on reversing loops, etc. Couples with the #0215 Selector.

SNAP RELAY #0200

The Snap-Relay is a double-pole, double-throw relay with actuating mechanism driven by a momentary-power twin coil solenoid (A solenoid is a cylindrical coil of insulated wire in which an iron core is made to move back and forth by a flow of electric current). With just a few simple connections, this small device, which may be mounted anywhere, can:

- Power the frogs on Atlas' Code 83 #6 & Mark 3 turnouts in "HO" or Atlas O 2-Rail switches
- Control trackside signal lamps to show turnout point positions
- Operate control panel lamps to show settings of remotely located turnouts (switches)
- Provide selective track siding control; sidings are powered only when points are aligned for siding; siding remains "dead" when points are set for the main line
- Control X-sections automatically; this very useful track arrangement is thoroughly discussed in The Complete Atlas Wiring Book (Item #0012)

#0200 - Snap Relay
