ORDERING INFORMATION & TERMS

March 2017

Dear Model Railroader,

Welcome to the March 2017 Atlas ASMC consumer edition of product Announcements and Arrivals. Each individual All Scales Monthly Catalog (ASMC) is based on the bi-annual All Scales Catalog (ASC) that is released in January and July of each year.

The All Scales Catalog (ASC) provides an overview of Atlas planned product announcements and arrivals for the following six months. The All Scales Monthly Catalog (ASMC) focuses in on each month's planned and specified announcements and allows consumers to place guaranteed pre-orders with their local hobby shop for those specific products by a given date. If you need assistance finding a dealer near you, don't forget our Hobby Store Locator! Check out the locator at <http://shop.atlasrr.com/storeLocator.aspx>.

Both catalogs are widely distributed and shared with thousands of dedicated Atlas consumer fans in accordance with their scale preference. This distribution is accomplished through targeted electronic messaging as well as via handouts at shows throughout the year. You can ensure that you receive the latest Atlas news and offers, in your preferred scale(s), delivered directly to your email inbox by visiting www.atlasrr.com and signing up for our email newsletter – the Atlas Insider.

March's edition of the ASMC is like a pot of gold at the end of the HO, N and O modelers' rainbow. Locomotives being announced this month include the N Master C628/630 and the HO Trainman GP39-2. HO modelers will love the New Model - FMC 5503 Double Door Box Car, as well as the tried and true Trainman 3560 Covered Hopper (also available in N scale). We didn't leave O scale modelers out of the excitement - brand new O Trainman Pullman Bradley Passenger Cars are being announced, along with Master line 53' GARX Express Reefers. You'll find all of those wonderful models and more inside, as well as arriving freight cars, locomotives and track in all scales.

Sincerely,
Joe Kolnoski
Vice President of Sales

ATLAS TRACK PLANNING BOOKS

MODEL RAILROADING MADE EASY!

With detailed diagrams, step-by-step instructions, and myriad layout options, Atlas books guide you through every phase of layout building. Each book is aimed at specific skill levels and includes the fundamentals of foundations, track laying, wiring, scenery, as well as a convenient "Products Required" list with each layout. Atlas' popular and interesting layouts can be viewed at www.atlasrr.com or www.atlaso.com!

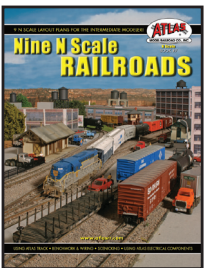

Item #6

#6 INTRODUCTION TO N SCALE MODEL RAILROADING - \$7.95

N scale fun starts here! This complete, easy to read book is ideal for beginners. It's all here – glossary, tools, benchwork, track laying, wiring, tips and more for nine basic layouts. (N1-N9)

#7 NINE N SCALE RAILROADS - \$8.95

Designed for intermediate modelers, this book details the techniques of benchwork, track laying, wiring and scenery for constructing nine engaging layouts that differ from those in book #6 in their size, detail and sophistication. (N10-N18)

Item #7

#9 ATLAS BEGINNER'S GUIDE TO HO MODEL RAILROADING - \$7.95

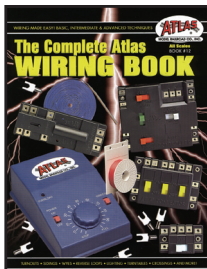

Here's your ticket to HO fun! Clear diagrams, comprehensive instructions, tips and a chapter on "Finishing Touches" put you on the right track to a successful layout. Blueprints for 12 basic layouts allow for future expansion with either Code 83 or Code 100 track. (HO1-HO12)

#11 HO LAYOUTS FOR EVERY SPACE - \$8.95

Packed with guidelines, shortcuts, tips and 11 layout options for either Code 83 or Code 100 track. More than 75 detailed diagrams make this edition a must for every HO modeler! A chapter on designing your own track plan is also included. (HO13-HO23)

#12 THE COMPLETE ATLAS WIRING BOOK - \$8.95

The Atlas Electrical Wiring System for all scales is made easy. Over 100 updated diagrams are complemented by a complete glossary, step-by-step instructions and advanced techniques.

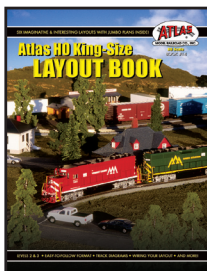

Item #12

#13 SEVEN STEP-BY-STEP HO RAILROADS - \$8.95

Whether beginner, intermediate, or advanced, every HO model railroader will find their ideal layout among the explicitly detailed and fully tested plans offered. Eliminate common pitfalls and learn from the many tips included to create your dream layout with Code 83 or Code 100 track. (HO24-HO30)

#14 HO KING-SIZE LAYOUT BOOK - \$13.95

For the intermediate and advanced modelers, this book contains six large layouts in an easy-to-follow scale format. Four plans fold out to become 11" x 17". Plans can be built with Code 83 or Code 100 track. (HO31-HO36)

Item #14

#15 BLUEPRINTS FOR TEN HO TRUE-TRACK® LAYOUTS - \$4.95

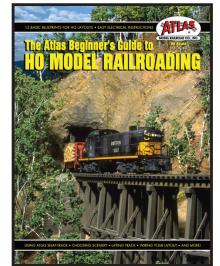

Fast and easy layouts using popular Atlas Code 83 True-Track® roadbed track. Wiring, tips, accessories and "finishing touches" are all included in this Level 1 book. (TT1-TT10)

#6008 ATLAS O 36 3-RAIL LAYOUT BOOK - \$9.95

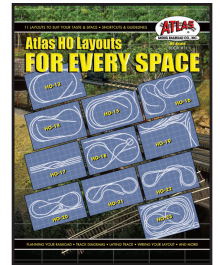

This book is a must-have for those who have discovered the superiority of the Atlas 21st Century Track® System. Everything you need for successful layout planning and building is here!

#0140 ATLAS O, LLC 40' WOOD REEFER COLLECTOR'S GUIDE - \$6.00

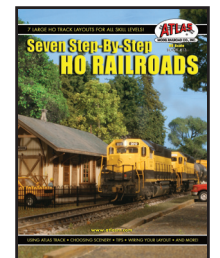

This collector's guide is filled with history, fun facts and over 100 color photos of 40' Wood Refrigerator Cars making this unique booklet a must for your O scale library.

CSX*

FEATURES:

- NMRA 8-pin plug for DCC
- The same drive as our basic Master Series™, in an affordable locomotive
- Five-pole skewed armature motor with dual flywheels
- Separately applied hand rails and end railings
- Matching cabooses available separately
- Locating dimples for grab irons
- True scale dimensions with accurate details
- Realistic die-cast underframes
- Equipped with AccuMate® Couplers
- As with our Master Series™ GP-38, this model features either a 2,600 or 3,600 gallon fuel tank, depending on the prototype.

DCC OPERATION FEATURES:

- Supports all DCC-programming modes
- Flexible mapping of function keys F0 to F28.
- A total of six DCC function outputs are available
- Follows all NMRA DCC standards and recommended practices.

ANALOG (DC) OPERATION FEATURES:

- The LokSound Select Dual-Mode decoder allows your Atlas Gold Series locomotive to be used on DC as well as on DCC layouts.
- Please note that the Atlas Quantum Engineer will NOT operate an Atlas Gold Series locomotive equipped with a LokSound Select decoder on an analog (DC) layout. However, the sound and lighting functions of the LokSound Select decoder in the Atlas Gold Series locomotive can be controlled by an easy-to-use basic DCC system
- Also note that on a DC-powered layout, a DCC and sound equipped locomotive CANNOT be consisted with another locomotive that does not also have both DCC and sound. (This statement does NOT apply to DCC-equipped locomotives operating on a DCC layout.)

ESU SOUND FUNCTIONALITY FEATURES:

- Over 20 sound effects are available, including engine start-up and shutdown, prime mover sounds through all eight notches, bell, air horn, air compressor, dynamic brakes and more.
- There are 16 user-selectable horns, 2 user-selectable bells, and 2 user-selectable synchronized brake squeals.
- Manual and Automatic Notching modes with the ability to change modes "on the fly" are provided for true realism.

US Army Hospital Car

ATLAS MASTER[®] TROOP SERIES CARS

NEW MODEL! America's railroads found themselves short of equipment needed to handle the volume of soldiers that were traveling by train after the US entered World War II. Some Pullman sleepers were reassigned to troop service and box cars were converted into kitchen cars, but the expanding needs of the military required a better solution. The Defense Plant Corporation resolved the capacity issue by ordering 2,400 troop sleeping cars built by the Pullman-Standard Car Manufacturing Company between 1943 and 1946, 800 kitchen cars built by the American Car & Foundry Company between 1943 and 1944, and 40 hospital kitchen cars built by AC&F in 1944. All of these cars were based on the standard AAR 50'6" box car with the intent that they could be sold to railroads after the war. The car design proved successful and, as intended, after the war many served for another two decades or more in head-end baggage and express service. They were also assigned to company service and maintenance-of-way outfits. Over the years modifications were made to the cars, with windows plated over and passenger doors replaced with sliding or plug doors. Some examples can still be found today in railroad museums across the country.

Production WWII Troop Sleeping and Kitchen Cars (excerpt)

America's Railroads Serve the Nation During its Wartime Emergency

By Pat Wider

During the war years, America's railroads were required to provide for the transportation of millions of soldiers, sailors and Marines from their training bases and camps throughout the country to the ports of embarkation and naval bases on the East, West, and Gulf coasts. As a consequence, the Defense Plant Corporation contracted for the new construction of 2,400 troop sleeping cars, 800 troop kitchen cars, and 40 hospital kitchen cars, with deliveries beginning in 1943 and ending in 1946. The troop sleeping and kitchen cars were government-owned but operated and maintained by the Pullman Company as part of its normal "pool". The food service provided to the troops was normal army rations handled by regular army mess crews.

In order to save money and time, the designs for the sleeping and kitchen cars were based on the A.A.R. standard 50'6" box car. While the cost of building the cars was a small fraction of the cost of a standard Pullman sleeping car, the Pullman Company made it clear to their employees that: "Our service in these cars is to conform in every respect to the customer service you are accustomed to deliver in connection with the regular Pullmans. These cars will bear the name Pullman."

PULLMAN-STANDARD TROOP SLEEPING CARS

The 2,400 production triple-deck troop sleepers were built by the Pullman-Standard Car Manufacturing Company in their Michigan City plant in two lots: car numbers 7000 to 8199 from October 1943 through March 1944 and car numbers 8300 to 8499 and 9000 to 9999 from October 1945 through May 1946. The side doors on the first lot of cars were provided with trap doors and step wells closed with pressed pans. Those on the second lot lacked the wells and had simple flat-section steel steps. Side windows on the second lot also had unpainted aluminum sashes.

The troop sleepers were of riveted carbon-steel construction with heavily reinforced ends. They had end doors similar to those on standard railway passenger cars – there were no vestibules, but each car was fitted with passenger car diaphragms and faceplates. Sliding doors on each side at about the center of the car facilitated loading and unloading. On each side of the car there were ten sliding windows about 2.5' wide by 3' high. Each window was equipped with roll shades and mesh screens. In addition to the main windows, there were smaller windows at each end of the car opposite the washbasins for each toilet room.

When made up for night occupancy, the cars had sleeping accommodations for 29 passengers and one porter with each having an individual bed. Their berths were arranged in tiers of three running crosswise with the aisle along one side instead of in the center as in a conventional sleeping car. For daytime use, the top berths remained fixed, forming a ceiling for the sleeping section and space for the storage of bedding and linen. The middle berth dropped down to form a back for the seat converted from the lower berth. Standard Pullman bedding was provided for each berth and two wooden coat hangers were permanently attached to each berth. Each berth was also furnished with a rack for the soldier's rifle.

There were four washbasins, two at each end of the car, with hot and cold-water faucets and two enclosed toilets, one at each end of the car.

Low voltage light fixtures were present in the cars, providing light for soldiers to write letters, read and play cards.

AMERICAN CAR & FOUNDRY TROOP KITCHEN CARS

The 800 troop kitchen cars were built by the American Car & Foundry Company in its Chicago plant from October 1943 through March 1944

(car numbers K-100 through K-499) and in their Berwick plant from October 1945 through January 1946 (car numbers K-600 through K-999).

The kitchen car equipment consisted of two U.S. Army coal ranges connected in tandem. Each range was equipped with a back filled with water and was connected to a shared positive-exhaust smokejack. A canopy was installed over the ranges with connections to two roof exhaust ventilators. The ranges were located on one side of the car adjacent to the door opening. A coal box of half-ton capacity was located opposite the range and had a roof hatch for loading coal. An expanded metal bin was installed next to the range for wood. Adjacent to the range was a deep sink of heavy galvanized steel having a center partition with wooden drain boards and a splash back. A single swing faucet was provided for hot and cold water supply. Across from the sinks was the cook's work table. Across the car from the range was a utensil cupboard, refrigerator with two ice wells and a meat cutting table. Other equipment included a bread locker, shelves, drawers, and a folding service table and crew shower.

Troop kitchen cars were typically located near the center of the train to facilitate dispensing food from each end. Each car was capable of furnishing meals for 250 persons. Cars were stocked with food and kitchen utensils by unit mess sergeants. Each military unit employing the car provided its own cook and mess crew. Aside from the cooking utensils, all equipment was stationary. At mealtimes, men were issued paper plates and cups. Entrees were carried in stock pots by two men, with a third following to serve as the trio proceeded through the aisles. After meals were consumed, kitchen police crews gathered leftovers and trash that were burned at the first opportunity.

AMERICAN CAR & FOUNDRY HOSPITAL KITCHEN CARS

The 40 hospital kitchen cars were built by AC&F in its Chicago plant from February 1944 to March 1944 (car numbers 8731 to 8770). These cars were used in conjunction with hospital ward cars that were converted at the same time in AC&F's St. Charles, MO plant. The hospital kitchen cars were essentially identical to the troop kitchen cars except that 32-volt axle-generators and suitable fixtures were used for lighting.

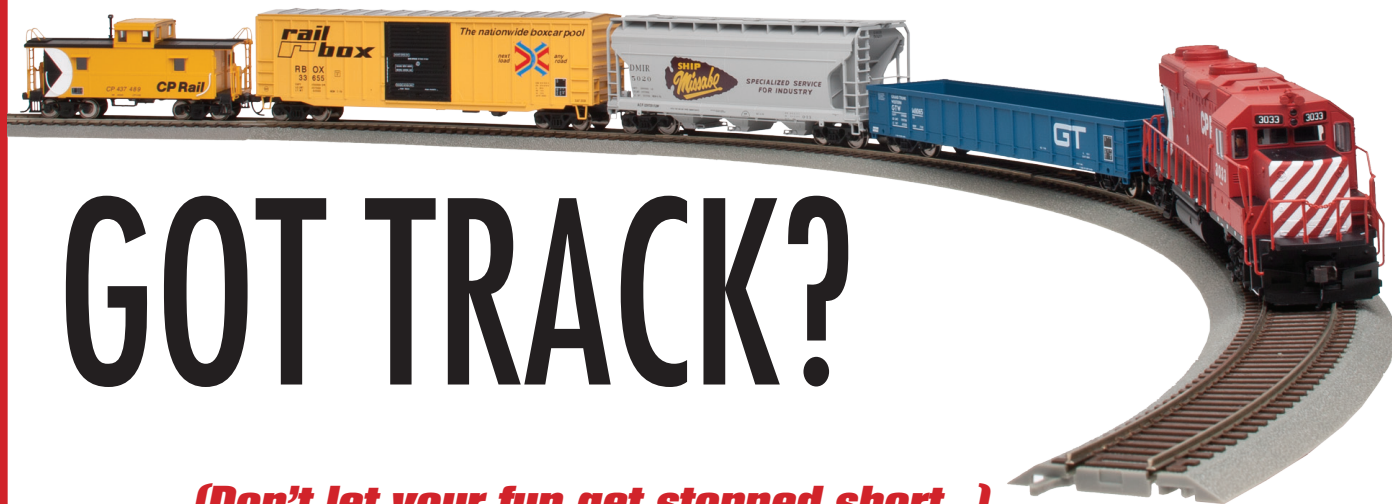

PAINTING AND LETTERING

According to the AC&F bill of materials, the sides and ends of the first 400 troop kitchen cars were painted with Pullman-Standard green enamel paint. The roof, brake parts and trucks were painted black. Lettering was medium yellow paint mixed with gold stencil paste. The sides and ends of the second 400 troop kitchen cars were painted with Pittsburgh Pullman-Standard synthetic green enamel. The roof, brake parts, and trucks were black. Lettering was Pittsburgh gold enamel paint. The U.S. Army hospital kitchen cars were painted dark olive drab with a black roof, white lettering and red crosses. The Pullman-Standard troop sleeping cars were painted in the same manner as the troop kitchen cars.

POSTWAR MODIFICATIONS

In 1947 the U.S. War Assets Administration Office of General Disposal offered 2,290 troop sleepers and troop kitchen cars for sale to the railroads at a fraction of their original cost. The cars were considered to be very suitable for conversion to head-end baggage and express cars for passenger train service.
