# ORDERING INFORMATION & TERMS

Dear Model Railroader,

Welcome to the April 2017 Atlas ASMC consumer edition of product Announcements and Arrivals. Each individual All Scales Monthly Catalog (ASMC) is based on the bi-annual All Scales Catalog (ASC) that is released in January and July of each year.

The All Scales Catalog (ASC) provides an overview of Atlas planned product announcements and arrivals for the following six months. The All Scales Monthly Catalog (ASMC) focuses in on each month's planned and specified announcements and allows consumers to place guaranteed pre-orders with their local hobby shop for those specific products by a given date. If you need assistance finding a dealer near you, don't forget our Hobby Store Locator! Check out the locator at <http://shop.atlasrr.com/storeLocator.aspx>.

Both catalogs are widely distributed and shared with thousands of dedicated Atlas consumer fans in accordance with their scale preference. This distribution is accomplished through targeted electronic messaging as well as via handouts at shows throughout the year. You can ensure that you receive the latest Atlas news and offers, in your preferred scale(s), delivered directly to your email inbox by visiting [www.atlasrr.com](http://www.atlasrr.com) and signing up for our email newsletter – the Atlas Insider.

April's edition of the ASMC is full of products that discerning HO, N and O modelers desire. A few of the highlights are the HO Trainman Plus Genset II Locomotive with ESU sound, Ford® LNT 9000 Tractor Cabs in N and HO, and a new run of O 3 & 6 Bay Cylindrical Hoppers. You'll find all of those wonderful models and more inside, as well as arriving freight cars, locomotives and track in all scales.

Sincerely,  
Joe Kolnoski  
Vice President of Sales

**ATLAS TRAINMAN® HO NRE GENSET II LOCOMOTIVE**

**Ordering:** <http://shop.atlasrr.com/d-360-april-2017-ho-scale-pre-orders.aspx>

**Information:** <http://www.atlastrainman.com/HOLoco/tmhogenset1.htm>

**NEW PAINT SCHEMES!**

Tacoma Rail

Metro Ports/Port of LA

Amtrak

Modesto & Empire Traction

Indiana Harbor Belt

CSX\*

**NEW ROAD NUMBERS!**

**FEATURES:**

- Finer scale handrails (Replacement handrails for earlier models are now available.)
- NMRA 8-pin plug for DCC
- True scale dimensions with accurate details
- Separately applied grab irons
- Ditch lights
- Cab roof details (air conditioners, GPS, antennae)
- MU cables
- Realistic die-cast underframes
- Equipped with AccuMate® Couplers

**DCC OPERATION FEATURES:**

- Supports all DCC-programming modes
- Flexible mapping of function keys F0 to F28.
- A total of six DCC function outputs are available
- Follows all NMRA DCC standards and recommended practices.

**ANALOG (DC) OPERATION FEATURES:**

- The LokSound Select Dual-Mode decoder allows your Atlas Gold Series locomotive to be used on DC as well as on DCC layouts.
- Please note that the Atlas Quantum Engineer will NOT operate an Atlas Gold Series locomotive equipped with a LokSound Select decoder on an analog (DC) layout. However, the sound and lighting functions of the LokSound Select decoder in the Atlas Gold Series locomotive can be controlled by an easy-to-use basic DCC system
- Also note that on a DC-powered layout, a DCC and sound equipped locomotive CANNOT be consisted with another locomotive that does not also have both DCC and sound. (This statement does NOT apply to DCC-equipped locomotives operating on a DCC layout.)

**ESU SOUND FUNCTIONALITY FEATURES:**

- Over 20 sound effects are available, including engine start-up and shutdown, prime mover sounds through all eight notches, bell, air horn, air compressor, dynamic brakes and more.
- There are 16 user-selectable horns, 2 user-selectable bells, and 2 user-selectable synchronized brake squeals.
- Manual and Automatic Notching modes with the ability to change modes "on the fly" are provided for true realism.

# A VISIT TO THE MODESTO & EMPIRE TRACTION COMPANY

BY • PAUL GRAF

In 2015, the annual N Scale Enthusiast convention was held in Sacramento, CA. I had arrived to the convention early, so on Monday while other early attendees headed off to ride the Napa Valley Wine Train, I headed out to visit the Modesto & Empire Traction Company. This was partially a courtesy visit as well as a railfan excursion, as the MET has done several special runs with Atlas (more on this later).

The Modesto Interurban Railway was organized in 1909 to connect Modesto with Empire, a distance of five miles. In 1911 the Modesto and Empire Traction company was formed to operate the rail line. The railroad is family owned, as it has been since it was formed, and operates over 28 miles of industry trackage, and nearly 40 miles of total trackage, in the Beard Industrial Park, which is a sister company. Traffic includes wine, canned goods, paper products, corn syrup, cooking oil, feed & grain, lumber, and packaging materials to name a few. MET connects on the west end with Union Pacific (former Southern Pacific) and on the east with BNSF (former Santa Fe).

I pulled into the parking lot at the MET main offices, which are housed in the original depot built in 1911. I was met by Jim Ross, given a brief tour of the offices and then we hopped in

Jim's SUV for a tour of the property. We spent the next two hours or so driving around the industrial park, with Jim pointing out the various customers. Recognizable shippers include Hampton Lumber, Del Monte, E & J Gallo Winery, Frito-Lay, Georgia-Pacific, International Paper, Nestle, Seneca, and Bunge Foods. As mentioned above, there is a varied traffic base, and many of the industries with seasonal products (fruits and vegetables) don't overlap, so the traffic remains fairly constant. The one variable that can make operations a little more interesting is the arrival of one or more unit trains, which are unloaded in a covered building accessed by a loop track. If the train or trains exceed the capacity of the loop track, it is often necessary to stash cars in any available piece of track. A second track is being added to the loop to help with this operation.

Being that my visit was on a Monday, the workload was light, and there was only one crew on duty. We went in search of them, and swung by the engine house/operations center. The crew was on a break, which gave me a chance to check out the locomotives sitting outside. M&ET operates completely with RailPower Gensets. I was able to get a close up look at these, as most of them were sitting outside the shop. Inside the shop were the now idled SW1500s, which are awaiting disposition. These were a stopgap measure between the 70 tonners and the Gensets, and don't meet the California emissions rules.

Next, I was shown how the operations work. There are two large flat screen monitors mounted on the wall, with an aerial view of the railroad. Computer graphics show the location of each job, making it easy for the dispatcher to keep each job safely apart. There can be three or four jobs out on the railroad at busy times and around shift changes. We were then informed that the crew was going back out

**Atlas is proud to announce the HO Trainman® Plus Genset II Locomotive painted in an M&ET scheme, available for pre-order on pages 12 to 13 of this ASMC.**

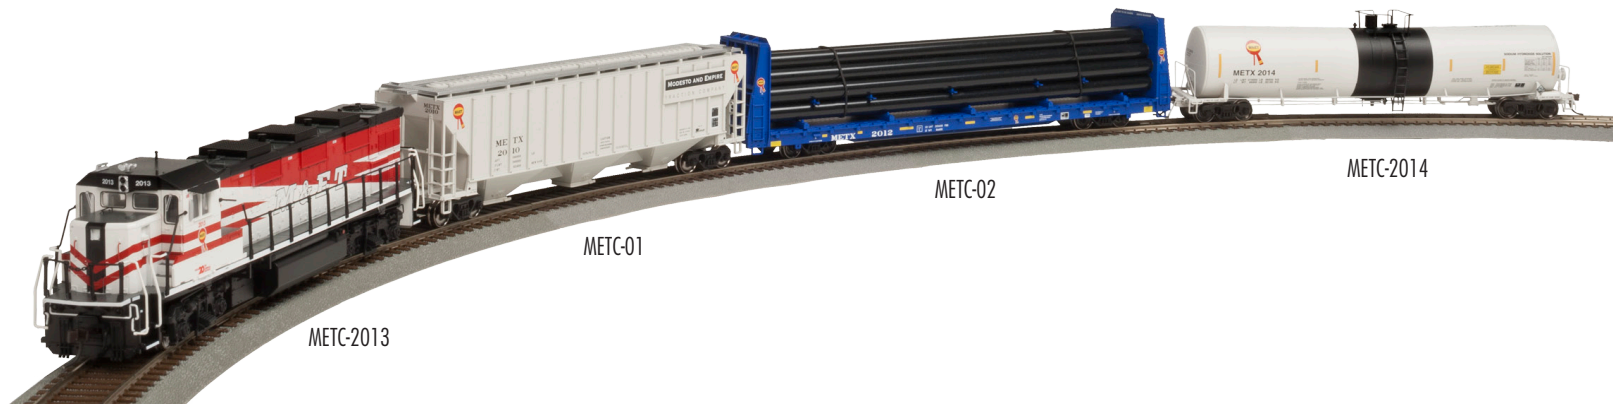

to sort some cars for one of the customers, so Jim took me over to the yard so we could watch. I grabbed a few more photos of the crew drilling cars, and then we headed back to the office.

As I mentioned earlier, we have done a few special runs for the railroad in the past, which they give out to their customers and use as promotional items. A listing is shown below, along with some photos. At the time of my visit, we were working on another special run for MET, and Jim and I reviewed the concept artwork.

Jim briefly left me in the hallway for a few minutes while he attended to some other business, and I was able to review some of the photos and information on the walls. One of the items was a framed blueprint of one of the MET's early steam locomotives, # 7, a 2-6-2 built in 1923 by Baldwin. What was really interesting about this, though, was the note below the blueprint – the locomotive was fitted with a prototype version of Magntraction! It was outfitted with an Evans Adhesion Device, which consisted of electromagnets that were used for assistance in starting or braking heavy trains. They also seemed to do a good job of collecting ferrous junk from around the rails. With that, my visit to this small, yet very busy and interesting railroad was complete. I said my goodbyes to Jim, got in my car and headed back to the convention.

# GOT TRACK?

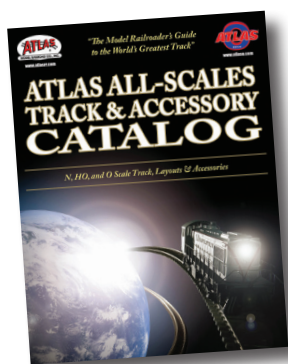

*(Don't let your fun get stopped short...)*

## ATLAS HAS PLENTY!

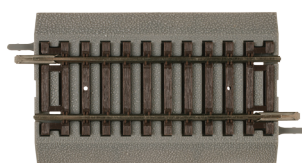

Whether you're finishing an existing layout, starting a new one, or just giving that trainset loop some extra pieces, Atlas has the 'right track' for you. The rugged plastic construction, nickel silver rail and U.S. prototype detail, assures longevity, maximum conductivity and accurate realism that guarantees your trains look good and keep running smoothly.

Atlas track provides industry leading **quality** at unequaled **value**, and our selection is so large we have an entire catalog devoted to it. HO and N scale track, in a variety of rail sizes, is fully stocked and ready to ship to you and your favorite Atlas authorized dealer now.

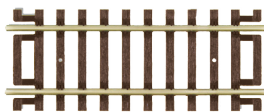

For more information, and the dealer nearest you, visit [www.atlasrr.com](http://www.atlasrr.com), or call 1-800-872-2521 and request a catalog of your own. And remember...*You're on the right track, (and trains) ...with Atlas!*
