# ORDERING INFORMATION & TERMS

March 2019

Dear Model Railroader,

Welcome to the March 2019 Atlas ASMC consumer edition of product Announcements and Arrivals. This All Scales Monthly Catalog (ASMC) is the core of our guaranteed pre-order system. Prior to the start of supplier production, Atlas announces to authorized dealers, distributors and e-subscribers that we are ready to take orders. This notification comes in the form of Atlas' All Scales Monthly Catalog (ASMC) which focuses in on the current month's planned and specified announcements and allows consumers to place guaranteed pre-orders with their local hobby shop for those specific products by a given date. If you need assistance finding a dealer near you, don't forget our Hobby Store Locator! Check out the locator at <http://shop.atlasrr.com/storeLocator.aspx>. You can also view and reserve products via Atlas' online store [shop.atlasrr.com](http://shop.atlasrr.com).

This month's ASMC is like the pot of gold at the end of a modeler's rainbow with exciting announcements and arrivals in all scales. More brand new models are being announced in N scale – RS-2 Locomotives and 45' Logging Flat Cars, along with Auto Parts Box Cars and more. HO modelers will delight in our brand new Gunderson® Multi-Max™ Autorack, as well as returning favorites such as the S-2 Locomotive and Berwick Box Car. O Scalers are in luck as well, with new paint schemes on PS-2 Hoppers and 60' Auto Parts Box Cars. In addition to all of these newly announced products, we have new locomotives, rolling stock and track arriving regularly. Our latest Arrivals are listed on pages 32-39 of this catalog. Many items have remaining quantities available. Please contact your Atlas Dealer or visit [www.atlasrr.com](http://www.atlasrr.com) to place an order today!

We hope that you enjoy the product selections on the pages within, and as always, thank you for your continued support of Atlas!

Sincerely,

Joe Kolnoski  
Vice President of Sales

- Low-friction mechanism
- Dynamic brakes
- Factory-installed AccuMate<sup>®</sup> magnetic knuckle couplers
- Accurate painting and lettering

**PROTOTYPE INFORMATION:**

After a successful first run of road switchers (The RS-1), Alco's second attempt at a versatile four axle locomotive came in late 1946. This was the stylized RS-2, keeping similar features as the RS-1 (Long carbody and short front nose), but with many upgrades. The most notable features were the rounded carbody and a new 244 prime mover, which increased the horsepower to 1,500, a 500hp upgrade over the RS-1. With the added horsepower, the RS-2 was received well by railroads for its ability to tackle any service it was given. On a daily basis, one could see two RS-2's powering a general merchandise freight, plying the hills with a loaded coal train coming back from the tipple, or running a passenger train at speed. The Delaware & Hudson would later retrofit their fleet with steam boilers and water tanks for passenger service. The Laurentian was one such service it powered, with dual RS-2's and a striking lightning stripe consist. Alco and Canadian counterpart, Montreal Locomotive Works, successfully built over 370 of these versatile locomotives for railroads large and small. A good example was the Southern, Delaware & Hudson, and the New York Central ordered over 20 each, whereas the Birmingham Southern and the Texas and Pacific railroads both ordered just a single locomotive. The success of the RS-2 would later pave the way for the RS-3. Today, only a handful of prototypes exist, mostly in museums or on tourists operations.

### PROTOTYPE INFORMATION:

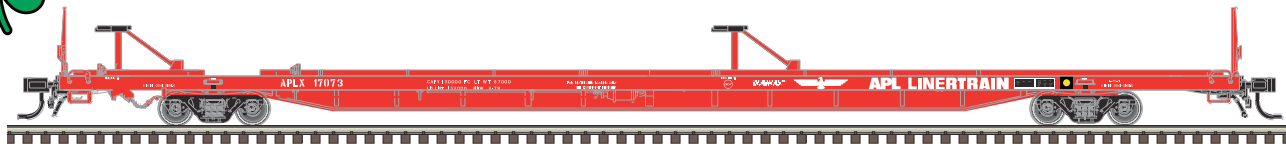

The railroads have long played a vital role to the logging industry. One of the key aspects is the ability of the railroads to carry large amounts of logs out of the forest to the mill using flat cars, many with specially designed side stakes to hold the logs in place on longer mainline trains. The 45' Logging Flat is based off of a Milwaukee Road prototype that features unique side stakes in sets of two at each end, with inward slots on the cars so smaller pieces of bark and timbers can pass through without causing damage to the car. Many railroads owned this type of car for service to and from the forest to the mill.

### PROTOTYPE INFORMATION:

The ACF® 89' 4" flat car was introduced in the late 60s as a result of a continuing need for more intermodal platform capacity. The Atlas model is based on the 1973 version that was originally designed to carry two trailers or combinations with containers. The cars have been used by Trailer Train and various railroads in intermodal service since that time. Many of these were modified in the late 80s to accept longer trailers. Most of those remaining in TTX service, today, have been modified with three hitches to accommodate up to three shorter package trailers.

### MODEL FEATURES:

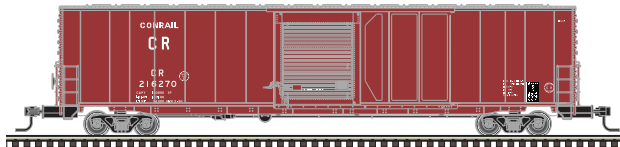

- Based on ACF Plans
- Two different styles of hitch
- Container pedestals
- Correct model year jack pads
- Recommended 13" radius minimum
- AccuMate couplers

### PROTOTYPE INFORMATION:

Built by American Car & Foundry in the late 1960s and early 1970s, the 60' Auto Parts Box Cars serviced assembly plants and component suppliers across the nation. The cars were equipped with either single or double doors, offering easy access to the freight inside, serving the auto industry well with their versatility. Many of these cars can still be found in service today throughout North America.

### MODEL FEATURES:

- 70-ton roller-bearing trucks
- Deluxe-style positionable door
- Prototypical painting and lettering
- Die-cast underframe with realistic details and separate end ladders
- AccuMate operating knuckle couplers
- Roof overspray

PROTOTYPE INFORMATION:

In late 1991, Norfolk Southern debuted the first two prototypes of its TOP GON® re-body program. Looking for a way to expand the capacity and the longevity of its coal car fleet, this program took in old hoppers, stripped them to the frame, and built an entirely new gondola body on top of that frame. With production starting in July of 1992, spanning multiple classes with multiple variations, NS' Roanoke East End Shops churned out over 18,000 of these cars, ending production in 1998. With almost 3,265 of class G-85R, G-86R and G-88R's in service, this model represents one of NS' most recognizable freight cars.

MODEL FEATURES:

- Ready-To-Run
- Injection-Molded Plastic
- Fine-Scale Detail
- Etched-Metal Brake Wheel Platforms
- Installed Internal Bracing
- Accurately Painted/Printed
- Multiple Numbers & Paint Variations
- Knuckle couplers

**MODEL FEATURES:**

- Fine scale handrails
- Redesigned & retooled hood, cab & chassis
- The first plastic HO-scale model of an S-2 locomotive to include accurate body panel details
- Option for horizontal or vertical radiators
- Redesigned truck frames with separately applied detail
- Directional LED lighting (includes cab rear light)
- Separately-applied grab irons, coupler cut levers, air hoses, piping, etc.
- Five-pole skewed armature motor with dual flywheels for optimum performance at all speeds
- Movable drop steps
- Chassis retooled for optional DCC/sound
- Dual-flywheels for maximum performance at all speeds
- Die-cast chassis for improved pulling performance

**ADDITIONAL FEATURES:**

- 21-pin Socket for DCC (Silver Series Model)
- Detailed cab interior with crew
- Exceptional painting and printing
- Factory-equipped with AccuMate<sup>®</sup> knuckle couplers

**DCC OPERATION FEATURES:**

- Supports all DCC-programming modes
- Flexible mapping of function keys F0 to F28.
- Follows all NMRA DCC standards and recommended practices

**Gold Models**  
**with ESU Sound**

**PROTOTYPE INFORMATION:**

Built by the American Locomotive Company (Alco) the low-hood S-2 was introduced in 1940 to replace Alco's earlier high-hood switchers. The 1000 horsepower S-2 was a turbocharged version of the S-1. There were 1,502 S-2s sold to North American Railroads. The versatility of the S-2s was evidenced by their service on class 1's, shortlines, and industrial railroads. Atlas' version is back in service, with new tooling, as well as a sound-equipped version for modeler enjoyment.

# NEW TOOLING!

### PROTOTYPE INFORMATION:

In 2013, Greenbrier Companies introduced their new design of 89' auto rack, the Multi-Max™. The new design allows for changing configurations from a Bi-Level to a Tri-Level (and back) without adding or removing decks. The racks are fully compatible with existing 89' auto racks. To this date, most of the racks have been built on Greenbrier Companies' own specially designed 89' flat cars. These cars are commonly seen in cuts of other similar autorack cars or a solid unit train of autorack cars. Currently, almost 10,000 cars (with racks), are running on North American rails. Atlas' rendition of the Multi-Max™ will feature multiple variations and road names.

### MODEL FEATURES:

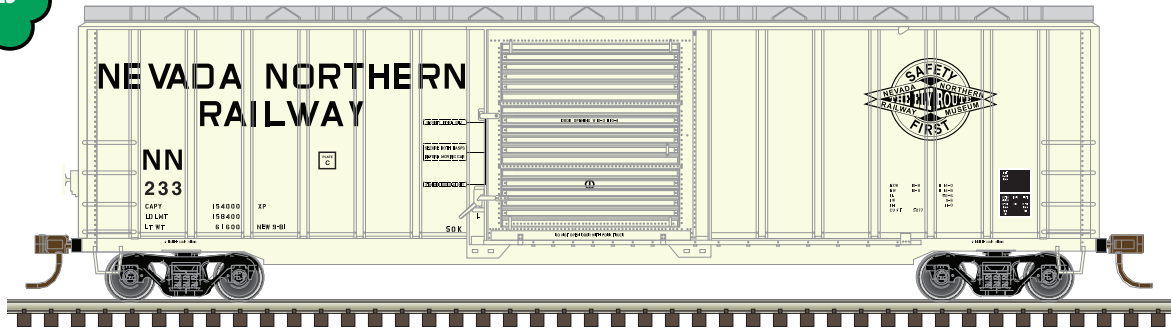

- Designed in the USA
- All new flat car and superstructure Tooling
- Newly tooled trucks
- Four body style variations to match different prototype configurations
- Highly detailed side screens to maximize prototypical appearance in scale
- Metal couplers
- Accurate painting and lettering

### PROTOTYPE INFORMATION:

In 1972, Berwick Forge & Fabricating, of Berwick, Pennsylvania began producing modern 50' sliding door box cars which featured their new corrugated non-terminating "sine-wave" ends. Initially sold to over 35 railroads across the nation, these box cars were an unfortunate casualty of the economic recession of the late 1970's and Berwick was forced to stop production in 1982. However, Berwick's 50' hauler found a place in railroad history through a strong second hand market that continues even today.

### MODEL FEATURES:

- Ready-To-Run
- Full under body detail with brake rigging
- Overhanging X-panel roof
- Non-terminating sine wave ends
- Separately applied wire grabs
- Detailed end ladders and brake gear
- Accurate painting and printing
- Blackened metal wheels
- AccuMate® couplers

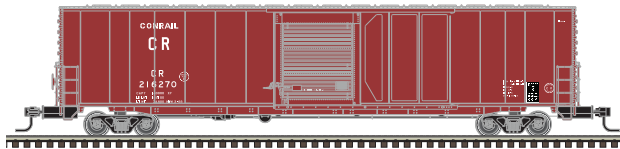

AccuMate® couplers are made under license from AccuRail, Inc.

### PROTOTYPE INFORMATION:

Built by American Car & Foundry in the late 1960s and early 1970s, the 60' Auto Parts Box Cars serviced assembly plants and component suppliers across the nation. The cars were equipped with either single or double doors, offering easy access to the freight inside, serving the auto industry well with their versatility. Many of these cars can still be found in service today throughout North America.

### MODEL FEATURES:

- 70-ton roller-bearing trucks with blackened metal wheels and adjustable screws
- Authentically painted and lettered detailed body with sliding doors and distinctive "Precision Design" recessed panels
- Prototypically designed roof and ends with full rivet detail
- Detailed die-cast metal underframe for improved operation
- Separate brake system and air reservoir
- Cushion underframe with extended coupler pockets
- Accurate painting and printing
- AccuMate® operating knuckle couplers with mounting screws
- Roof overspray

AccuMate® couplers are made under license from AccuRail, Inc.

PROTOTYPE INFORMATION:

In late 1991, Norfolk Southern debuted the first two prototypes of its TOP GON® re-body program. Looking for a way to expand the capacity and the longevity of its coal car fleet, this program took in old hoppers, stripped them to the frame, and built an entirely new gondola body on top of that frame. With production starting in July of 1992, spanning multiple classes with multiple variations, NS' Roanoke East End Shops churned out over 18,000 of these cars, ending production in 1998. With almost 3,265 of class G-85R, G-86R and G-88R's in service, this model represents one of NS' most recognizable freight cars.

MODEL FEATURES:

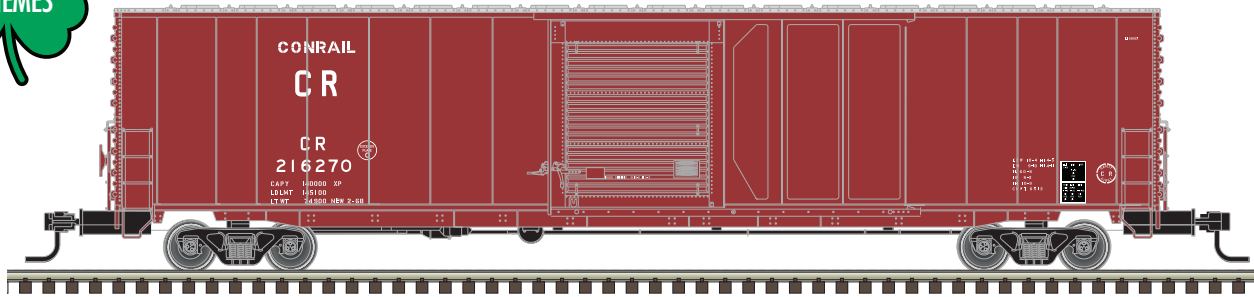

- Ready-To-Run
- Injection-Molded Plastic
- Fine-Scale Detail
- Separately Applied Wire Grab Irons
- Separately Applied Wire Cut Levers
- Etched-Metal Brake Wheel Platforms
- Installed Internal Bracing
- Accurately Painted/Printed
- 100-Ton Trucks w/Metal Wheels
- Multiple Numbers & Paint Variations
- Knuckle couplers

**PROTOTYPE INFORMATION:**

Built by American Car & Foundry in the late 1960s and early 1970s, the 60' Auto Parts Box Cars serviced assembly plants and component suppliers across the nation. The cars were equipped with either single or double doors, offering easy access to the freight inside, serving the auto industry well with their versatility. Many of these cars can still be found in service today throughout North America.

**PROTOTYPE INFORMATION:**

The highly successful PS-2 covered hopper was designed by Pullman Standard in the 1940s. This virtually all-welded 2-bay hopper had a 2003 cubic foot capacity and was well suited for a variety of transportable bulk commodities such as sugar, wheat and oat flour and calcium carbide. However by 1952, the demand for a larger covered hopper was quite evident. Pullman Standard quickly responded with new 3-bay car. This new hopper was just what the railroads and lessees wanted and it soon superseded the 2-bay car in production.
