PRE-ORDER ANNOUNCEMENTS - SPRING 2020

GUARANTEED PRE-ORDER DUE DATE: WEDNESDAY MAY 13TH 2020

ORDERING INFORMATION & TERMS

Dear Model Railroader,

Orange you glad it's Spring? Welcome to the Spring 2020 Atlas ASMC Consumer edition of product Announcements and Arrivals. This All Scales Monthly Catalog (ASMC) is the core of our guaranteed pre-order system. Prior to the start of supplier production, Atlas announces to authorized dealers, distributors and e-subscribers that we are ready to take orders. This notification comes in the form of Atlas' All Scales Monthly Catalog (ASMC) which focuses in on the current month's planned and specified announcements and allows consumers to place guaranteed pre-orders with their local hobby shop for those specific products by a given date. If you need assistance finding a dealer near you, don't forget our Hobby Store Locator! Check out the locator at <http://shop.atlasrr.com/storeLocator.aspx>. You can also view and reserve products via Atlas' online store shop.atlasrr.com.

This edition of the ASMC is sure to help cure your spring fever! In both HO & N scale, we're featuring a new run of Trinity 64' Reefers, 5077 Single Door Box Cars and Extended & Standard Vision Caboose. **HO models will all feature metal couplers!** We're announcing a brand new locomotive in N scale – the GP60 with ditch lights, along with 40' Wood Reefers and Trainman Flat Cars. HO will also see the announcement of the new SD-24 and 26 Locomotives, with the addition of metal couplers and ditch lights as appropriate per the prototype. O scale rounds out the Spring offerings with Airslide Hoppers and Ford® F-100 Pickup Trucks - you'll find all of those wonderful models and more inside, as well as arriving locomotives, rolling stock and track in all scales.

We hope that you enjoy the product selections on the pages within, and as always, thank you for your continued support of Atlas!

Happy Modeling,

Joe Kolnoski
Vice President of Sales

BNSF Railway (ex VTR)

Green Mountain Railroad

PROTOTYPE INFORMATION:

Introduced in 1985 as the refined replacement for the five-year-old 50-series locomotives, the GP60 (and sister SD60) represented a significant leap in locomotive design for EMD. Incorporating computer technology to control locomotive operation and onboard diagnostics, the 3800 hp GP60 just may be the "ultimate" geep. Designed for hi-speed intermodal traffic, this locomotive could be found on the major transcontinental carriers in the service for which they were designed. In fact, a variation of the GP60 became so associated with the Santa Fe in the early 1990s, it came to represent the best that railroads had to offer in quality service.

TOTAL PIECES ORDERED			

MASTER MODEL FEATURES:

- Carrier Reefer Unit as appropriate per the prototype
- Ready-to-run
- Fine-scale detail
- Accurately painted/printed
- Prototypical ride height
- BLMA 100-Ton trucks
- BLMA 36" metal wheels
- Brown knuckle couplers

PROTOTYPE INFORMATION:

The refrigerated box car has long been a staple of railroading, delivering a wide variety of perishable goods from coast to coast. TrinityRail's 64' reefer is a modern take on the reefers of yesterday. Built by TrinityRail starting in late 2003, the ultra-modern 64' Refrigerated Box Car was designed to replace aging reefer cars. Large enough to fit the equivalent of four 53' trailer contents, these excess height, plate "F" cars have given new life to the once flourishing rail transport of refrigerated produce and other perishable goods. These cars feature modern refrigeration to transport produce, orange juice, frozen contents and more across the country while keeping the temperature constant. These cars have distinctive end platforms with an A/C unit and a fuel tank underneath.

Rath's Black Hawk Bacon

Producer's Produce

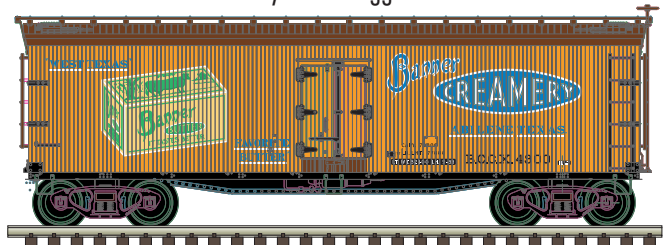

Canadian Northern Quebec

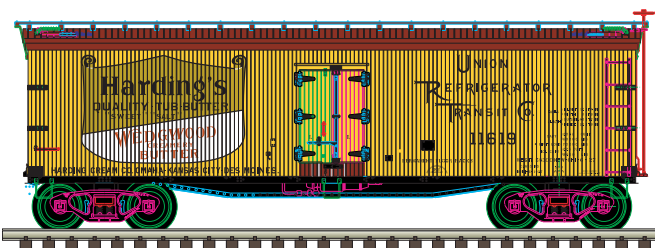

Kirby Frozen Eggs

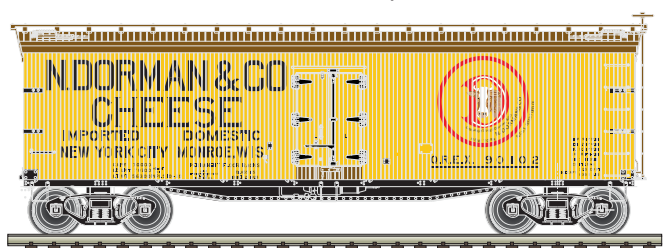

Parrot Potatoes

Banner Creamery

Harding's Butter

Dorman Cheese+

MASTER MODEL FEATURES:

- Accurate painting and printing including door hinges, ladders, grab irons and end straps
- Opening roof hatches
- Realistic handle and latch detail
- Wood grain finish detail on carbody
- Ready-to-run
- 40-ton friction bearing trucks with AccuMate® couplers

PROTOTYPE INFORMATION:

This highly detailed model is based on the 40' wood refrigerator cars built by Pullman for the Northern Refrigerator Car Co. in 1930. With its rooftop ice hatches, USRA-style fish belly underframe and vertical brake shaft, it is representative of the thousands of similar cars that were built during the "Billboard" era of American railroads.

+Paint scheme is correct for a car of a similar prototype.

PROTOTYPE INFORMATION:

This is FMC's entry into the Plate B IPD (Incentive Per Diem) box car era. The design was intended to be the "most universal", interchangeable on most common railroad clearances. The cars were available with and without end-of-car cushioning, and were offered in several door configurations.

Over 4,300 cars were produced from 1975-1979 by FMC's Portland, Oregon plant. The cars were delivered in numerous colorful shortline paint schemes, as well as the nationwide car pool fleet of Railbox. Many secondhand cars were later seen in Class 1 railroads and large leasing company fleets under additional shortline reporting marks.

MASTER MODEL FEATURES:

- Single or Double Sliding Door where appropriate
- Multiple body styles
- Body mounted couplers
- Plate B Box Car
- X-Panel Roof

**Atlas will donate a portion of the proceeds from the sale of the Railbox On Track for A Cure cars to the Susan G. Komen foundation for breast cancer research.

+Paint scheme is correct for a car of a similar prototype.

MASTER MODEL FEATURES:

- Thin endrails
- Window glazing
- Separate brake cylinder
- Open smoke stack
- Triple valve and air reservoir
- Roller-bearing caboose trucks
- Roofwalk where appropriate
- Accurate painting and lettering

PROTOTYPE INFORMATION: Based on prototypes that were built during the 1960s, these cabooses were popular on railroads from coast-to-coast. With the advancement of the End-of-Train device, cabooses slowly began to fall out of favor. However, in the early 2000's, "shoving platforms" began to appear as a place to safely house a crew when a reverse move was required. Instead of riding on the side of a freight car, the crew member now has a safe place to stand, while guiding the rear of a reverse move. Atlas' shoving platform cabooses will feature blanked out windows (Where appropriate).

PROTOTYPE INFORMATION: The Atlas Trainman 50' Flat car represents a general purpose flat car built in the 1950s. It could be found hauling many different types of commodities. The pockets along the sides of the car could be used for holding down cargo with chains or straps. Optionally stakes could be inserted into these pockets to help contain irregular loads such as logs. These cars lasted for many decades and could often times be found in maintenance of way (MOW) service near the end of their lives.

MASTER MODEL FEATURES:

- Accurate Couplers
- Crisp painting and printing
- User installable stakes

PROTOTYPE INFORMATION:

With over 220 units produced by EMD between July 1958 and March 1963, the SD-24 locomotive generated a total of 2,400 hp with its turbocharged 567D-3 prime mover and C-C wheel arrangement. The majority of SD-24s produced were purchased by four roads: Chicago Burlington & Quincy, Santa Fe, Southern, and Union Pacific. Atlas' HO scale model features details unique to each road name:

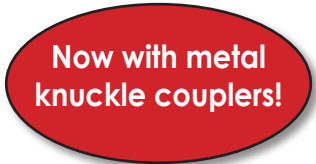

Burlington (CB&Q): High nose, single-chime air horn on short hood, Gyra-light on short hood (non-operating), winterization hatch

Santa Fe: Low nose, 3-chime horn mounted on left side of hood behind cab

Southern: High nose, 5-chime horn mounted on cab, bell detail on short hood

Union Pacific: Low nose, 3-chime horn mounted between 2nd and 3rd radiator fans, winterization hatch

Guilford 615, 643 & MAERSK (ATSF): equipped with ditch lights

- BLMA 36" metal wheels
- Kadee® couplers

**Equipped with
Kadee® Couplers!**

PROTOTYPE INFORMATION:

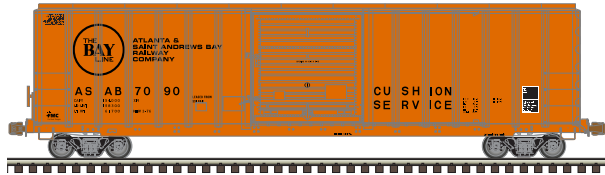

The refrigerated box car has long been a staple of railroading, delivering a wide variety of perishable goods from coast to coast. TrinityRail's 64' reefer is a modern take on the reefers of yesterday. Built by TrinityRail starting in late 2003, the ultra-modern 64' Refrigerated Box Car was designed to replace aging reefer cars. Large enough to fit the equivalent of four 53' trailer contents, these excess height, plate "F" cars have given new life to the once flourishing rail transport of refrigerated produce and other perishable goods. These cars feature modern refrigeration to transport produce, orange juice, frozen contents and more across the country while keeping the temperature constant. These cars have distinctive end platforms with an A/C unit and a fuel tank underneath.

PROTOTYPE INFORMATION:

This is FMC's entry into the Plate B IPD (Incentive Per Diem) box car era. The design was intended to be the "most universal", interchangeable on most common railroad clearances. The cars were available with and without end-of-car cushioning, and were offered in several door configurations.

Over 4,300 cars were produced from 1975-1979 by FMC's Portland, Oregon plant. The cars were delivered in numerous colorful shortline paint schemes, as well as the nationwide car pool fleet of Railbox. Many secondhand cars were later seen in Class 1 railroads and large leasing company fleets under additional shortline reporting marks.

MASTER MODEL FEATURES:

- Single or Double Sliding Door where appropriate
- Multiple body styles
- Metal knuckle couplers
- Plate B Box Car
- X-Panel Roof

Now with metal knuckle couplers!

**Atlas will donate a portion of the proceeds from the sale of the Railbox On Track for A Cure cars to the Susan G. Komen foundation for breast cancer research.

MASTER MODEL FEATURES:

- Thin endrails
- Accurate painting and lettering
- Window glazing
- Separate brake cylinder
- Open smoke stack
- Triple valve and air reservoir
- Roofwalk where appropriate
- Roller-bearing caboose trucks
- Metal knuckle couplers

PROTOTYPE INFORMATION: Based on prototypes that were built during the 1960s, these cabooses were popular on railroads from coast-to-coast. With the advancement of the End-of-Train device, cabooses slowly began to fall out of favor. However, in the early 2000's, "shoving platforms" began to appear as a place to safely house a crew when a reverse move was required. Instead of riding on the side of a freight car, the crew member now has a safe place to stand, while guiding the rear of a reverse move. Atlas' shoving platform cabooses will feature blanked out windows (Where appropriate).

MASTER MODEL FEATURES:

- True 1/4" scale dimensions and details
- Realistic see-through roof walks and brake wheel platform
- Separately-applied grab irons and brake line details
- Sprung die-cast 70-ton roller-bearing or Bettendorf trucks (depending on the road name)
- Opening hatches
- Minimum diameter curve (3-rail): 0-27
- Minimum radius curve (2-rail): 24"
- Die-cast articulated couplers (3-rail)
- Scale 33" wheels and Kadee® compatible scale couplers (2-rail)

PROTOTYPE INFORMATION:

The airslide covered hopper was introduced by General American Transportation Corporation (GATX) in 1953. Approx. 5000 of the 2600 cu. ft. cars were built between that year and 1969.

The airslide is primarily designed for the bulk shipment of dry, granular or powdered commodities. The design of that car is such that it can be loaded and unloaded quickly and with little spillage through the use of air pressure.

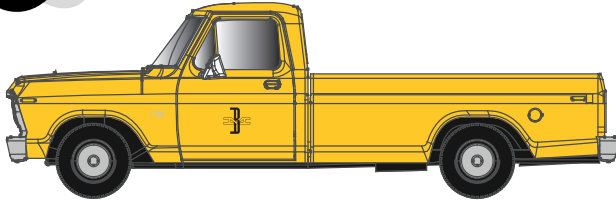

The most common commodities carried include: flour, sugar, starch, plastic pellets, cement, powdered chemicals and carbon black.

One truck per pack

1ST TIME OFFERED WITH RAILROAD SCHEMES!

PROTOTYPE INFORMATION:

1953 was the birth year for the Ford F-100 series of trucks. The designs were pivotal in Ford's line of pickups, as they made significant improvements and body changes which included the design being a bit more "boxy" with less curves. By 1973, Ford had advanced to the "Sixth Generation" of the F-series line. This venerable truck saw improvements over the previous generation's, with front disc brakes, gas tank relocation under the bed, better air conditioning and heating systems, and increased space inside the cab. The F-100 could be found almost anywhere, from commercial use, maintenance of way for railroads, public works, etc. Atlas' recreation of the F-100 would look right at home on your layout parked in a driveway, making a convenience store run, or in service for the car department in a yard.

MASTER MODEL FEATURES:

- Chrome plated grille and bumpers
- Plastic headlight and rear tail light lenses
- 1/48th scale
