

SUMMER 2020 ARRIVALS CATALOG

Locomotives, Rolling Stock, Track & Accessories

ATLAS MASTER® N GP38 LOCOMOTIVE, PGS. 4-5

July 2020

Dear Model Railroader,

Welcome to the Atlas Summer 2020 Arrivals Catalog that highlights the latest locomotives, rolling stock, track & accessories arriving at Atlas Authorized Dealers during July, August and September 2020. The vast array of products that have recently arrived or are imminently arriving in all scales will be sure to keep you and your layout happily busy all summer. Among them are the N Master GP38 & C420 and HO Master Dash 8-40C/CW locomotives, several varieties of tank cars in N, HO & O, as well as O Gunderson® Maxi IV Well Cars.

Though these items are no longer available through the Atlas exclusive 'guaranteed pre-order system', they will be available by contacting Atlas Authorized Dealers. To contact a Dealer near you check out the Atlas Dealer Locator at <http://shop.atlasrr.com/storeLocator.aspx>.

The updated Atlas Online Store makes it easy for you to view products and accurately identify the inventory status of each and every Atlas product in all four available model railroad scales - N, HO, O and now Z. The Stock Status indicator reflects the product status of a listed item at any given time - in-stock, pre-order, backorder, or sold out. Atlas has an historical and unwavering dedication to prototypical accuracy. Unless otherwise noted, every paint scheme that appears on a model we produce has been carefully researched and recreated to look exactly as it did on the prototype.

If you haven't already, please sign up for our email newsletter – the Atlas Insider - by visiting <https://shop.atlasrr.com/t-emailsignup.aspx>. Doing so will ensure that you never miss out on special offers, news or our All Scales Monthly Catalog, featuring each month's announcements, arrivals and more!

Something "more" for the Summer 2020 Arrivals Catalog are surprise announcements and arrivals of the 2nd production run of the HO Multi-Max rolling stock and Atlas O Louisiana Hot Sauce and Kung-fu Fighter 25,500 Gallon Tank Cars. These exquisitely rendered prototype models were produced in very limited quantities and are scheduled to arrive shortly in August. The cars can be viewed in greater detail on the back cover of this Arrival Catalog. The limited edition order forms will be sent to Atlas Authorized Dealers and Distributors early next week.

Sincerely,

Joe Kolnoski
Vice President of Sales

50 005 063	Union Pacific (Gray/Red)	20469

The original design dates back to the early Fifties, when it was offered in single- and double compartment versions. The name lends itself to the "action" created by an air-permeable fabric lining in the bottom of the compartment. Unloading the car involves pumping air under the lining fluidizing the commodity which in turn is drawn out of the compartment by pneumatic or other means. This type of car was primarily used for sugar, flour, and starch (and sometime certain types of plastics).

The subject of these models is one of the double compartment cars, the 4180 cubic-foot design. It was introduced in 1962 and through a number of design changes continued in production until 1980 when the taller 4566 cubic-foot design supplanted the 4180. During that time a little over 5,000 were built.

Features:

- Ready to run
- Injection molded plastic
- Fine scale detail
- Metal wheels
- Etched metal roofwalks
- Crisp painting/printing

Propane or Liquefied Petroleum Gas (LPG) is both a naturally occurring product and a by-product of the refining process. During the 1940s, the petroleum industry began marketing LPG as a cleaner and more efficient fuel than the existing coal and oil. Transporting LPG requires specially designed high-pressure tank cars. During the early 40s the only ACF tank car that qualified was the 10,500 gallon high-pressure tank car. After the war, ACF set out to design a whole new car for the emerging industry. As a result the 11,000 gallon tank car was introduced by ACF in 1947. Many thousands were built up through the mid-1950s.

The Atlas model faithfully reproduces this late steam/early diesel era tank car in two versions (with and without platform rails). The cars with top platform rails were used where there was no elevated loading/unloading facility. The cars without the top platform rails were often specified for customers that had access to elevated loading and unloading facilities.

Features:

- Finely molded handrails
- Tank fittings and safety placards
- 50-ton friction-bearing trucks with AccuMate® couplers
- Accurate painting and lettering
- Platform where appropriate

Side Dump cars are a very versatile class of railroad car, designed to deposit their load to either side of the tracks, rather than between the rails like a ballast hopper. This feature is utilized by the railroads in maintenance-of-way roles for rapidly building up fills and cuts with stone, rip-rap or soil as well as for depositing ballast. Side dump cars are also used in revenue service hauling ore, limestone, gravel, and coal, in industrial settings hauling waste or recycling materials, and in mining operations. Their low sides enable easy loading of material, and their rapid discharge rates – some less than 10 seconds – and ability to take a lot of abuse have earned them the nickname of a “dump truck on rails”. The Atlas DIFCO (Differential Steel Car Company) side dump car is modeled after the air-activated, all-welded construction, 50 cubic yard car which has been a familiar fixture on the rails both in the US and abroad from the late 1960s through today, and features prototypically accurate scale dimensions, roller bearing trucks, and knuckle couplers

Features:

- Prototypically accurate dimensions
- Accurate paint schemes
- 100 Ton roller bearing, truck mounted couplers

This 50' General American Corporation RBL (AAR class for an insulated bunkerless refrigerator car with loading devices), designed in the early 1960s, was revolutionary for its all welded body construction and wide variety of load restraining devices available to customers. These cars were designed for transporting goods that needed to be shielded from extreme temperature variations. While initially used to transport canned goods and newsprint, the cars became very popular for shipping beverages and perishables. While not providing actual refrigeration a refrigerated load could expect to hold its temperature within a few degrees for several days in transit.

Features:

- Ready to run
- Injection molded plastic
- Fine scale detail
- Separately applied wire cut levers
- Etched metal roofwalks
- Crisp painting/printing
- Etched metal crossover platforms

This is FMC's entry into the Plate B IPD (Incentive Per Diem) box car era. The design was intended to be the "most universal", interchangeable on most common railroad clearances. The cars were available with and without end-of-car cushioning, and were offered in several door configurations.

Over 4,300 cars were produced from 1975-1979 by FMC's Portland, Oregon plant. The cars were delivered in numerous colorful shortline paint schemes, as well as the nationwide car pool fleet of Railbox. Many secondhand cars were later seen in Class 1 railroads and large leasing company fleets under additional shortline reporting marks.

Features:

- Single or Double Sliding Door where appropriate
- Multiple body styles
- Body mounted couplers
- Plate B Box Car
- X-Panel Roof

**CSX Licensed Product*

Built by American Car & Foundry in the late 1960s and early 1970s, the 60' Auto Parts Box Cars serviced assembly plants and component suppliers across the nation. The cars were equipped with either single or double doors, offering easy access to the freight inside, serving the auto industry well with their versatility. Many of these cars can still be found in service today throughout North America.

Features:

- 70-ton roller-bearing trucks
- Deluxe-style positionable door
- Prototypical painting and lettering
- Die-cast underframe with realistic details and separate end ladders
- AccuMate® operating knuckle couplers
- Roof overspray

AccuMate® couplers are made under license from AccuRail, Inc.

Just like in HO, our high quality, ready-to-run N scale tank car is modeled after American Car and Foundry's insulated general service tank car designed primarily for transporting chlorine.

Features:

- Separately-applied brake detail
- Finely molded handrails
- Tank fittings, safety placards and metal safety bars
- 100-ton roller-bearing trucks with AccuMate® couplers
- Accurate painting and lettering

Propane or Liquefied Petroleum Gas (LPG) is both a naturally occurring product and a by-product of the refining process. During the 1940s, the petroleum industry began marketing LPG as a cleaner and more efficient fuel than the existing coal and oil. Transporting LPG requires specially designed high-pressure tank cars. During the early 40s the only ACF tank car that qualified was the 10,500 gallon high-pressure tank car. After the war, ACF set out to design a whole new car for the emerging industry. As a result the 11,000 gallon tank car was introduced by ACF in 1947. Many thousands were built up through the mid-1950s.

The Atlas model faithfully reproduces this late steam/early diesel era tank car in two versions (with and without platform rails). The cars with top platform rails were used where there was no elevated loading/unloading facility. The cars without the top platform rails were often specified for customers that had access to elevated loading and unloading facilities.

Features:

- Finely molded handrails
- Tank fittings and safety placards
- 50-ton friction-bearing trucks with AccuMate® couplers
- Accurate painting and lettering
- Platform where appropriate

Our high quality, ready-to-run HO scale tank car is modeled after American Car and Foundry's insulated general service tank car designed primarily for transporting chlorine.

Features:

- Brake rigging molded separately
- Scale handrails
- Metal safety bars, tank fittings and safety placards
- AccuMate® couplers
- Screw-attached 100-ton roller-bearing trucks for added reliability
- Accurate painting and lettering
- Brake wheel chain

*CSX Licensed Product

Built by American Car & Foundry in the late 1960s and early 1970s, the 60' Auto Parts Box Cars serviced assembly plants and component suppliers across the nation. The cars were equipped with either single or double doors, offering easy access to the freight inside, serving the auto industry well with their versatility. Many of these cars can still be found in service today throughout North America.

Features:

- 70-ton roller-bearing trucks with blackened metal wheels and adjustable screws
- Authentically painted and lettered detailed body with sliding doors and distinctive "Precision Design" recessed panels
- Prototypically designed roof and ends with full rivet detail
- Detailed die-cast metal underframe for improved operation
- Separate brake system and air reservoir
- Cushion underframe with extended coupler pockets
- AccuMate® operating knuckle couplers with mounting screws
- Roof overspray

AccuMate® couplers are made under license from AccuRail, Inc.

Ford Trademarks and Trade Dress used under license to Atlas Model Railroad Co., Inc.

During World War I, the US railroads experienced a critical equipment shortage due to increased traffic needs. This 55 Ton Hopper Car was one of the body types designed by the United States Railroad Administration (USRA) to relieve this shortage. Built in 1918, 25,000 of these cars were primarily assigned to the great coal-hauling roads of the east and mid-west. The car design was very successful and later became one of the standard cars of the American Railway Association.

Features:

- Die-cast centerbeam and chassis
- Wire grab irons
- Die-cast stirrups
- Opening, sprung hopper doors
- Die-cast Andrews trucks
- Prototypical painting and lettering
- Die-cast articulated couplers with trainline detail (3-Rail)
- Scale die-cast couplers and 33" wheelsets (2-Rail)
- Minimum diameter curve (3-Rail): 0-31
- Minimum radius (2-Rail) : 24"

Four road numbers are available per road name.

Atlas' model of the Trinity 25,500 gal, features an insulated, general-purpose design. This was introduced in 1986 and production continues today. There are at least 13,000 presently in service. Typical commodities include vegetable oil, tallow, styrene, benzene, asphalt, biodiesel, acrylates, and numerous other chemicals.

Features:

- Accurate painting and printing
- Numerous detail fittings and components specific to prototype
- Highly detailed body with prototypical jacket seams
- Metal end sills, lower side safety rails and safety rail support
- Length over couplers: 15.5"
- Minimum radius curve: 36" (2-Rail)
- Minimum diameter curve: 0-54 (3-Rail)

Four road numbers are available per road name.

The Atlas Master® Gunderson Maxi-IV Well Car has been tooled from the ground up to be a centerpiece of an intermodal fleet, resulting in a finely-detailed, full scale model that will look fantastic running on a layout. The minimum radius to run this car is O-54 (recommended O-72) for 3-Rail and 36" for 2-Rail. Our 53' Jindo and CIMC containers are the perfect complement to this, and other, models.

Features:

- Full Scale
- Finely detailed
- Equipped with low friction trucks with rotating bearing caps (2-Rail and 3-Rail)
- 3-Rail O-54 minimum radius with supplied articulated couplings (Recommended O-72)
- 2-Rail minimum 36" radius
- Newly tooled containers will be offered for separate sale
- Die-cast construction

Based upon cars built by the General American Car Company for the Cudahy Packing Co. in 1925, the 36' wood reefer is representative of the thousands of cars that transported meat, dairy, beer and food products well into the 1960's.

Features:

- Accurate painting and lettering
- Highly detailed ABS body
- Separately-applied grab irons, ladders and stirrups
- Hatch styles and truss rods appropriate per road name
- Separately-applied door hardware
- Opening hatches and doors
- Die-cast chassis
- Detailed braking system
- 40-ton Bettendorf-style die-cast sprung trucks
- Die-cast articulated couplers (3-rail)
- Die-cast scale couplers with internally sprung knuckles (2-rail)
- 33" scale metal wheels (2-rail)
- Minimum diameter curve (3-rail): 0-31
- Minimum radius curve (2-rail): 24"

Two road numbers are available per road name.

2001042	Norfolk Southern First Responders Training Car (Black/Red)	2001092
2001048E	Railbox "On Track for a Cure" (Pink/Black/Silver)	2001098E

*CSX Licensed Product

**Alternate History Paint Scheme

A portion of the proceeds from the Railbox "On Track for a Cure" cars will be donated to the Susan G. Komen foundation for breast cancer research.

Two road numbers are available per road name except for "Railbox on track for a cure", which has only one.

In 1974, ACF® built the first box car for Railbox, a subsidiary of the Trailer Train Company. They went on to produce 5,400 50' cars over the next six years, receiving large orders from Class I railroads, shortlines and box car leasing companies. This O scale box car is a stunning replica, designed to enhance your layout and provide many hours of reliable operation.

Features:

- Prototypical non-terminating corrugated ends
- Diagonal paneled roof
- Single 10' YSD design sliding door
- Weighted, detailed underframes
- Separately-applied end ladders, brake wheels and end platforms
- True scale dimensions with accurate details
- Die-cast roller bearing trucks with rotating bearing caps
- Die-cast couplers
- Accurate painting and lettering
- 2-Rail cars feature scale wheels and body mounted scale couplers
- 3-Rail trucks pre-drilled for Adjust-A-Coupler® systems (sold separately)
- Minimum diameter curve: 0-31 (3-Rail)
- Minimum radius curve: 24" (2-Rail)
