PRE-ORDER ANNOUNCEMENTS - SUMMER 2021

GUARANTEED PRE-ORDER DUE DATE: WEDNESDAY SEPTEMBER 8TH 2021

Summer 2021

Dear Fellow Model Railroader,

Welcome to the Summer 2021 edition of the Atlas All Scale Monthly Catalog (ASMC). The ASMC is the basis of the distinctive "guaranteed" pre-order system. Before the Research & Development department gives the final go ahead for production, Atlas announces to its customers the products we are preparing to make. This announcement comes in the form of the ASMC that provides our customers with the opportunity to arrange a guaranteed pre-order if placed by the given deadline. If possible, Atlas will try to fill orders placed after a given deadline, but these can not be guaranteed. Occasionally, Atlas will speculate on order quantities to bring product to market faster, however, in these noted instances no orders are guaranteed and allocations, based on supply and demand, are typically necessary.

The Summer ASMC includes GP40s in all three scales. The N and HO versions will include ditch lights on appropriate roads for the first time. The popular Trainman 50'6" Boxcars and C&O Cupola Cabooses will be offered in both N and HO Scales. The N Scale announcements will wrap up with the 1932 ARA Boxcars and the Difco Side Dump Cars. HO announcements will include the 53' Evans Double Plug Door Boxcars and the 70 Ton Hart Ballast Hoppers. Joining the Premier GP40 in O scale, will be the Trainman 52'6" Flat cars with a pipe load, Master 50' PS-1 Double Door Modernized Boxcar and the Premier Operating Dump Car.

A special limited edition version of the GP40 is being offered in all three scales. This model is a collaboration between Atlas and Operation Lifesaver in celebration of Operation Lifesaver's 50th Anniversary in 2022 and is decorated in a striking metallic gold and black paint scheme. Operation Lifesaver, Inc. (OLI) is a non-profit organization and nationally-recognized leader of rail safety education. Since 1972, Operation Lifesaver remains dedicated to preventing collisions, injuries and fatalities on and around railroad tracks and highway-rail grade crossings, with the support of public education programs in states across the U.S. A portion of the proceeds from the sale of this locomotive will be donated to Operation Lifesaver in an effort to assist them in providing rail safety education.

All these items can be found on our website, shop.atlasrr.com. While on the website, make sure to check out the 'New Arrivals' pages to see what has recently hit Atlas Dealers' shelves or the 'In-Stock' pages to see what is still available in the Atlas Warehouse. Need to do some track work? The new 148-page Atlas All Scales Track & Accessories Catalog is just the resource you need! For assistance finding an Atlas Authorized Dealer near you, check out our Dealer locator at <https://shop.atlasrr.com/storelocator.aspx>.

Thank you for your interest and enthusiasm in these great products from Atlas Model Railroad Co.

Happy Model Railroading,
Drew Postle,
Atlas Sales Manager

Atlas' high quality N Scale locomotive is modeled after the GP-40 that was produced by the Electro Motive Division in the late 1960s and early 1970s. The GP-40 was a 3000 horsepower locomotive best characterized by the three full size radiator fans on the rear of the roof.

Features:

- Directional lighting
- Walkway safety tread
- Blackened metal wheels
- Scale Speed[™] motor
- Factory-equipped with AccuMate[®] knuckle couplers
- Dynamic brakes (as appropriate by railroad)
- Golden-white LEDs

AccuMate[®] couplers are made under license from AccuRail, Inc.

DCC Operation Features (GOLD LOCOMOTIVES ONLY)

**CSX Licensed Product*

Supports all DCC-programming modes

DCC includes RailCom and RailComPlus, with 14, 28 or 128 speed steps and with 2-digit and 4-digit addressing.

Flexible mapping of function keys F0 to F28.

A total of 6 DCC function outputs are available, and all can be function mapped (disable, brightness, light effects) individually

Follows all NMRA DCC standards and recommended practices.

ESU LokSound Features (GOLD LOCOMOTIVES ONLY):

Over 20 sound effects are available, including engine start-up and shutdown, prime mover sounds through all eight notches, bell, air horn, air compressor, dynamic brakes and more.

There are up to 16 user-selectable horns, 2 user-selectable bells, and 2 user-selectable synchronized brake squeals.

Manual and Automatic Notching modes with the ability to change modes "on the fly" are provided for true realism.

A goal of the American Railway Association (ARA) in the early 1920s was to produce an all-steel box car that could be recognized as a standard by the member railroads. Although the original design presented in 1923 produced in excess of 60,000 cars, it wasn't until a new design was presented in 1932 that the member railroads gave their approval.

After extensively testing five prototypes in 1933, over 14,500 cars were produced for twenty-three railroads throughout the following decade. This design soon evolved into the 1937, Modified 1937, and Postwar AAR box cars.

Although not the most popular design produced, numerically speaking, the 1932 ARA Standard box car is considered one of the most important designs in railroad history.

Features:

- Accurate painting and printing
- Friction-bearing trucks
- AccuMate® couplers

AccuMate® couplers are made under license from AccuRail, Inc.

Side Dump cars are a very versatile class of railroad car, designed to deposit their load to either side of the tracks, rather than between the rails like a ballast hopper. This feature is utilized by the railroads in maintenance-of-way roles for rapidly building up fills and cuts with stone, rip-rap or soil as well as for depositing ballast. Side dump cars are also used in revenue service hauling ore, limestone, gravel, and coal, in industrial settings hauling waste or recycling materials, and in mining operations. Their low sides enable easy loading of material, and their rapid discharge rates – some less than 10 seconds – and ability to take a lot of abuse have earned them the nickname of a “dump truck on rails”.

The Atlas DIFCO (Differential Steel Car Company) side dump car is modeled after the air-activated, all-welded construction, 50 cubic yard car which has been a familiar fixture on the rails both in the US and abroad from the late 1960s through today, and features prototypically accurate scale dimensions, roller bearing trucks, and knuckle couplers.

Features:

- AccuMate® couplers
- Accurate painting and printing
- 100-ton roller-bearing trucks

AccuMate® couplers are made under license from AccuRail, Inc.

In 1974, ACF® built the first box car for Railbox, a subsidiary of the Trailer Train Company. They went on to produce 5,400 50' cars over the next six years, receiving large orders from Class I railroads, shortlines and box car leasing companies. These box cars have a 50' 6" interior length designed to fit slightly larger Plate C dimensions. This yielded a capacity of nearly 5,300 cubic feet. Most of the cars were built with non-cushioned underframes.

Features:

- Prototypical non-terminating corrugated ends
- Diagonal paneled roof
- Single 10-foot YSD design sliding door (non-operating)
- Detailed cross-member attachment rivets on the side sills
- Weighted, detailed underframes
- True scale dimensions with accurate details
- Equipped with AccuMate® knuckle couplers

AccuMate® couplers are made under license from AccuRail, Inc.

+Paint scheme is correct for a car of a similar prototype.

The first all-steel cabooses built for the Chesapeake & Ohio Railroad were produced in 1937 by the Magor Car Corporation in Clifton, N.J. Magor, along with St. Louis Car Company and ACF, ultimately built a total of 350 cabooses for the C&O using a similar design. The last were produced in 1949. Through subsequent rebuilding and modernization, many remained in service through the end of regular caboose usage in the 1980s. Cabooses of a similar design were also built for Pere Marquette, Missouri Pacific and Chicago & Eastern Illinois.

Features:

- Crisply molded body detail
- Weighted, detailed underframe
- Equipped with AccuMate® knuckle couplers
- Window glazing

AccuMate® couplers are made under license from AccuRail, Inc.

+Paint scheme is correct for a car of a similar prototype.

Susquehanna

In 1966 EMD introduced a new line of locomotives based on the 16-cylinder 645-series prime mover. The "40-series" included a six-axle and four-axle model, the latter being the GP40. A total of 1,145 units were produced between 1966 and 1972. These turbocharged 3,000hp locomotives were used primarily in road freight service. The GP40 was a versatile locomotive that could be found across the US hauling drag freights over mountain passes and leading high-speed intermodal trains across flat terrain. Three rooftop radiator fans at the rear of the long hood differentiate a GP40 from its lower horsepower counterpart, the GP38, which has two fans at this location. Many GP40s are still in service today.

Features:

- Golden-white LEDs
- Realistic die-cast underframe
- Five-pole skewed armature motor with dual flywheels for optimum performance at all speeds
- Directional lighting
- Factory-equipped with AccuMate® knuckle couplers
- Detailed cab interior with crew
- Separately-installed scale windshield wipers, metal grab irons and fine scale handrails
- Movable drop steps
- Walkway safety tread
- Coupler cut bars
- Multiple unit hoses and trainline hoses
- Snowplow

Additional feature parts included but not installed (GP-40):

Electrical cabinet air filter box (ECAFB)

Two engine compartment roof vents which were added by many railroads sometime after delivery

AccuMate® couplers are made under license from AccuRail, Inc.

This 53' boxcar was manufactured in the 1960s and '70s by Evans Company and was used primarily to haul produce, wood and paper products, and canned goods. The prototype is an insulated RBL featuring a 16 foot opening and double plug doors.

Features:

- 70-ton roller-bearing trucks
- Blackened metal wheels
- Two-piece underframe
- Separate brake cylinder
- Air reservoir
- End platforms
- AccuMate® couplers

AccuMate® couplers are made under license from AccuRail, Inc.

Built by ACF® from 1940-1953, the 70-Ton Hart Ballast Cars were formally known as “Hart Selective Service Ballast Cars”, due to the use of specially-designed doors which allowed the lading to be discharged one of three ways: to the center of the rails, to the center and sides of the rails, or to the side of the rails only.

Features:

- Die-cast chassis
- Ready-to-run
- 70-ton friction-bearing trucks
- Separately-applied side-dump doors which can be positioned open or closed
- Separately-applied grab irons, coupler cut lever, train line hose, and air brake piping detail
- Fully detailed interior, including cross-bracing and side stiffeners
- AccuMate® Proto-Coupler ready (screws for Proto-coupler will be included in the packaging)
- Accurate painting and printing

AccuMate® couplers are made under license from AccuRail, Inc.

In 1974, ACF® built the first box car for Railbox, a subsidiary of the Trailer Train Company. They went on to produce 5,400 50' cars over the next six years, receiving large orders from Class I railroads, shortlines and box car leasing companies. These box cars have a 50' 6" interior length designed to fit slightly larger Plate C dimensions. This yielded a capacity of nearly 5,300 cubic feet. Most of the cars were built with non-cushioned underframes.

Features:

- Prototypical non-terminating corrugated ends
- Diagonal paneled roof
- Single 10-foot YSD design sliding door (non-operating)
- Detailed cross-member attachment rivets on the side sills
- Weighted, detailed underframes
- True scale dimensions with accurate details
- Equipped with AccuMate® knuckle couplers

AccuMate® couplers are made under license from AccuRail, Inc.

+Paint scheme is correct for a car of a similar prototype.

The first all-steel cabooses built for the Chesapeake & Ohio Railroad were produced in 1937 by the Magor Car Corporation in Clifton, N.J. Magor, along with St. Louis Car Company and ACF, ultimately built a total of 350 cabooses for the C&O using a similar design. The last were produced in 1949. Through subsequent rebuilding and modernization, many remained in service through the end of regular caboose usage in the 1980s. Cabooses of a similar design were also built for Pere Marquette, Missouri Pacific and Chicago & Eastern Illinois.

Features:

- True scale dimensions with accurate details
- Weighted, detailed underframes
- Equipped with AccuMate® Knuckle Couplers
- Trucks equipped with free-rolling metal wheels
- Clear window inserts & separately applied side railings

AccuMate® couplers are made under license from AccuRail, Inc.

+Paint scheme is correct for a car of a similar prototype.

In 1966 EMD introduced a new line of locomotives based on the 16-cylinder 645-series prime mover. The "40-series" included a six-axle and four-axle model, the latter being the GP40. A total of 1,145 units were produced between 1966 and 1972. These turbocharged 3,000hp locomotives were used primarily in road freight service. The GP40 was a versatile locomotive that could be found across the US hauling drag freights over mountain passes and leading high-speed intermodal trains across flat terrain. Three rooftop radiator fans at the rear of the long hood differentiate a GP40 from its lower horsepower counterpart, the GP38, which has two fans at this location. Many GP40s are still in service today.

Features:

- Directionally Controlled Headlights
- Metal Wheels, Axles and Gears
- Die-Cast Truck Sides, Pilots and Fuel Tank
- (2) Remotely Controlled Proto-Couplers
- Colorful Paint Scheme
- Metal Chassis
- Metal Handrails and Decorative Horn
- (2) Precision Flywheel Equipped Motors
- (2) Engineer Cab Figures
- Intricately Detailed ABS Body
- Lighted Cab Interior
- Illuminated Number Boards
- Lighted Marker Lights
- Spinning Roof Fans
- Metal Body Side Grilles
- Operating Smoke Unit
- Locomotive Speed Control
- Proto-Sound 3.0 DCS
- Unit Measures: 15 1/2" x 2 3/4" x 4"
- Operates On O-31 Curves

Two road numbers are available per road name, except for Port Harbor & Penn Central (Red "C") which have one.

Atlas O's 50' PS-1 Box Car represents a classic American freight car from the 1950s and 1960s, when fifty-foot box cars became the standard. Many railroads of the period operated Pullman Standard's box cars, but details were often specific to each company. One of details that differed was the supplier of the doors (Youngstown or Pullman Standard styles).

Features:

- Highly detailed ABS body
- 50-ton Bettendorf or 70-ton roller-bearing sprung die-cast trucks as per the prototype (70-ton roller-bearing trucks come with rotating bearing caps)
- Youngstown or Pullman Standard style doors as per the prototype
- Separately-applied grab irons, ladders and brake line details
- Minimum diameter curve: O-36 (3-rail)
- Minimum radius curve: 36" (2-rail)
- Die-cast articulated couplers (3-rail)
- Kadee®-compatible scale couplers (2-rail)

Two road numbers are available per road name.

Side Dump cars are a very versatile class of railroad car, designed to deposit their load to either side of the tracks, rather than between the rails like a ballast hopper. This feature is utilized by the railroads in maintenance-of-way roles for rapidly building up fills and cuts with stone, rip-rap or soil as well as for depositing ballast. Side dump cars are also used in revenue service hauling ore, limestone, gravel, and coal, in industrial settings hauling waste or recycling materials, and in mining operations. Their low sides enable easy loading of material, and their rapid discharge rates – some less than 10 seconds – and ability to take a lot of abuse have earned them the nickname of a “dump truck on rails”.

Features:

- Metal Wheels and Axles
- Die-Cast 4-Wheel Trucks
- Operating Die-Cast Metal Couplers
- Decorative Brake Wheels
- Fast-Angle Wheel Sets
- Needle-Point Axles
- Die-Cast Metal Body
- Operating Dump w/Shake Action
- Unit Measures: 12 1/16 x 2 5/8 x 2 1/2
- Operates On 0-31 Curves

Four road numbers are available per road name.

The flat car can be considered the workhorse of the railroad. Its simple design allows for the loading of virtually anything imaginable from pipes to airplane fuselages.

This Trainman® model is based upon the general service flat cars that were built by the Canadian Pacific circa 1953. The cars were constructed from riveted steel and feature fishbelly side sills. The decks are in an interesting combination of wood and steel that has been accurately duplicated on our model. A realistic pipe load with deck tie-downs is included with the cars.

Features:

- Roller-bearing trucks with rotating bearing caps
- Accurate painting and lettering
- Separately applied brake wheel
- Scale dimensions and accurate details
- Realistic pipe load with separately applied load tie-downs
- Die-cast trucks and couplers
- Two road numbers are available per road name.
- Weighted, detailed underframes
- 2-Rail cars feature scale wheels and body-mounted scale couplers
- 3-Rail trucks pre-drilled for the Adjust-A-Coupler® System (sold separately)
- Length: 13.125"
- Minimum diameter curve: 0-31 (3-Rail)
- Minimum radius curve: 24" (2-Rail)

OPERATION LIFESAVER 50TH ANNIVERSARY LOCOMOTIVE

In 1966 EMD introduced a new line of locomotives based on the 16-cylinder 645-series prime mover. The "40-series" included a six-axle and four-axle model, the latter being the GP40. A total of 1,145 units were produced between 1966 and 1972. These turbocharged 3,000hp locomotives were used primarily in road freight service. The GP40 was a versatile locomotive that could be found across the US hauling drag freights over mountain passes and leading high-speed intermodal trains across flat terrain. Three rooftop radiator fans at the rear of the long hood differentiate a GP40 from its lower horsepower counterpart, the GP38, which has two fans at this location.

This model is a collaboration between Atlas and Operation Lifesaver, Inc., in celebration of Operation Lifesaver's 50th Anniversary in 2022. The locomotive features a distinctive metallic gold and black paint scheme, decorated with Operation Lifesaver's brand new anniversary logo and will be equipped with operating ditch lights (N & HO Scale).

For a complete listing of the features available in each scale, visit www.atlasrr.com or see pages:

- 4-9 for N Scale
- 18-23 for HO Scale
- 32-33 for O Scale

O Scale models are offered in 3-Rail with Proto Sound 3.0 DCS. N and HO models are available in Silver Sound Ready and Gold ESU Sound Equipped versions:

**Silver
Sound Ready™**

Silver Sound Ready™ - Atlas Silver Sound Ready models are equipped with a speaker for easy conversion to sound with the addition of a decoder. If you need assistance with the upgrade of a Sound Ready model, please contact Atlas Customer Service at 908-687-0880 or csdept@atlasrr.com

**Gold Models
with ESU Sound**
