## PRE-ORDER ANNOUNCEMENTS - FALL 2021

**GUARANTEED PRE-ORDER DUE DATE: WEDNESDAY NOVEMBER 10<sup>TH</sup> 2021**

Fall 2021

Dear Fellow Model Railroader,

Welcome to the Fall 2021 edition of the Atlas All Scale Monthly Catalog (ASMC). The ASMC is the basis of the distinctive “guaranteed” pre-order system. Before the Research & Development department gives the final go ahead for production, Atlas announces to its customers the products we are preparing to make. This announcement comes in the form of the ASMC that provides our customers with the opportunity to arrange a guaranteed pre-order if placed by the given deadline. If possible, Atlas will try to fill orders placed after a given deadline, but these can not be guaranteed.

The Fall 2021 HO & N Scale ASMC includes announcements of the N scale Classic line SD-7/9, for the first time with sound, and the HO Master HH600/660 which features the “Back by Popular Demand” New Haven “Full Balloon” scheme. There are plenty of boxcars and hoppers being offered to haul and shunt all the freight your layout can handle. Among the rolling stock announcements are the N Master Kaolin Tank Car and 2 Bay Offset Hoppers, the HO Master Plus Trinity 3230 Hoppers and a long awaited run of our popular HO Master 40’ Postwar Box Cars. Is road transportation lacking on your layout? Then you’ll want to order a few of our all new N scale Ford® F-250/F-350 Pickup Truck sets. All these items can be found on our website, [shop.atlasrr.com](http://shop.atlasrr.com).

While on the website, make sure to check out the ‘New Arrivals’ pages to see what has recently hit Atlas Dealers’ shelves or the ‘In-Stock’ pages to see what is still available in the Atlas Warehouse. We have plenty of exciting arrivals headed to retailers this Fall - just what you need to keep you busy during the long winter months! See a sampling of what is on the way to hobby shops on pages 28-34.

Need to do some track work? The new 148-page Atlas All Scales Track & Accessories Catalog is just the resource you need! We also offer a full line of instructional guides if you’re looking to start fresh with a brand new layout! For more information and a complete listing of our books, see page 36 or inquire at your local hobby shop. For assistance finding an Atlas Authorized Dealer near you, check out our Dealer locator at <https://shop.atlasrr.com/storelocator.aspx>.

Thank you for your interest and enthusiasm in these great products from Atlas Model Railroad Co.

Happy Model Railroading,  
Drew Postle,  
Atlas Sales Manager

The Atlas Classic N Scale SD-7 Locomotive is based on the prototype manufactured by EMD from February 1952 to November 1953. Utilizing a 1,500 hp engine and a longer underframe than the GP-7, the SD-7 was the first locomotive to use EMD's Flexicoil truck.

Built by EMD between 1954 and 1959, the SD-9 6-axle road switchers produced 1,750 HP and were used primarily for freight service throughout the US, both on main and secondary lines. Many SD-9 locomotives are still in service today, serving as road switchers for shortline & industrial railroads, and as yard switchers for major "Class 1" lines.

**Features:**

- Powered low friction drive
- Blackened metal wheels
- Dual brass flywheels
- Directional lighting
- Golden-white LEDs
- Body-mounted AccuMate® couplers

**Atlas Master™ Series Silver Additional Features:**

- Atlas Silver Sound Ready models are equipped with a speaker for easy conversion to sound with the addition of a decoder.

**Silver Sound Ready™**

Wired speaker and enclosure included for easy conversion to sound.

### DCC Operation Features (GOLD LOCOMOTIVES ONLY)

Supports all DCC-programming modes

DCC includes RailCom and RailComPlus, with 14, 28 or 128 speed steps and with 2-digit and 4-digit addressing.

Flexible mapping of function keys F0 to F28.

A total of 6 DCC function outputs are available, and all can be function mapped (disable, brightness, light effects) individually

Follows all NMRA DCC standards and recommended practices.

### ESU LokSound Features (GOLD LOCOMOTIVES ONLY):

Over 20 sound effects are available, including engine start-up and shutdown, prime mover sounds through all eight notches, bell, air horn, air compressor, dynamic brakes and more.

There are up to 16 user-selectable horns, 2 user-selectable bells, and 2 user-selectable synchronized brake squeals.

Manual and Automatic Notching modes with the ability to change modes "on the fly" are provided for true realism.

The three-compartment ACF® 3560 Center Flow Covered Hopper was designed for the transport of high-density dry bulk ladings of 50 – 60 pounds per cubic foot. Examples of these commodities include salt, fertilizer, starch, bauxite, and clay. The 100-ton car was designed to fit into the smallest modern plate diagram dimensions, Plate B.

### Features:

- V-frame ends
- Side sheet weld seams
- Roping staples
- Five roof hatches
- Body mounted brake gear
- True scale dimensions with accurate details
- Weighted, detailed underframes
- Equipped with AccuMate® knuckle couplers

AccuMate® couplers are made under license from AccuRail, Inc.

In 1992 Ford began producing the ninth generation of its' popular F-series trucks, which was the last generation to cover the entire model range from the basic ½ ton F-150 pickup through the medium duty F-800 commercial trucks. In production through 1998, the F-250 and F-350 pickup trucks featured new aerodynamic styling achieved by rounding off the angles on the hood and front fenders, as well as by enlarging and reshaping the grille to eliminate the square, boxy appearance of previous generations. The redesigned grille area also incorporated new larger, "wraparound" headlights and turn signals. Over the production lifetime of these light-duty pickups, a wide variety of cab configurations, detail trims, and power options were available from the factory, and the basic chassis of the 1-ton capable F-350 provided a solid base for work truck conversions. As such, the Ford F-250 and F-350 were well suited for moderate duty use by contractors, emergency services, public utility services, and railroad track and signals maintenance crews.

Atlas' new Ford F-250 Crew Cab and F-350 Standard Cab Work Trucks faithfully represent two of the common configurations of this popular pickup found in general service roles from the 1990s through the mid-2010s. The F-250 4 door Crew Cab has dual fuel doors, an 8-foot bed, and 4x4 styling, while the F-350 features a dual rear wheel configuration supporting a common aftermarket storage bed design and includes photo-etched extended-vision mirrors and an equipment rack. **Offered in matched pairs, these hard-working trucks are perfect for further detailing with Atlas N scale 3-D printed accessories such as oxy/acetylene tanks, compressors, tool boxes and more. Contact your local hobby shop or visit <https://shop.atlasrr.com/c-1505-n-scale-3d-printed-scenic-details.aspx> for more info!**

Features:

- Officially Licensed
- Prototypical trim packages (XL, XLT)
- Accurate design and detailing
- Pre-colored interiors and semi-detailed chass

\*Paint scheme is correct for a locomotive of a similar prototype.

Between 1931 and 1940 ALCO built 177 high hood (HH) switching locomotives of various horsepower ratings and body styles. The "HH" models were forerunners to the popular S-series of switchers which featured lower hoods. ALCO's high hood switchers were in production long before similar models from competitors EMC/EMD (1935) and Baldwin (1937). Interestingly, the "HH" model designation is a term coined by rail historians to describe what ALCO documentation had simply referred to as 600-hp or 660-hp switchers. In later years ALCO had referred to these early units as "high hood switchers" so this designation is appropriate.

Of the 177 high hood switchers built, 104 were HH600s, 18 were HH660s, 21 were HH900s and 34 were HH1000s. Some of the largest users of these models included New Haven, Lackawanna and New York Central. Various physical changes occurred during the 9 years these locomotives were in production. The biggest change occurred in 1934 when ALCO hired industrial designer Otto Kuhler to improve the appearance of their very boxy, utilitarian switchers. The post-1937 production units we are now offering featured many of his suggested improvements.

In 1938 ALCO introduced a line of high hood switchers powered by the new model 538 diesel engine which featured a cast iron engine block. This engine was offered in both a 660-hp (non-turbocharged 538) and 1000-hp (turbocharged 538-T) switcher, each weighing approximately 196,000 pounds. The horsepower rating could be adjusted downward slightly per customer specification by lowering the RPM of the diesel engine. Therefore, 600-hp and 900-hp models were offered concurrently. The HH600 and HH660 locomotive models we are offering were produced from 1938 to 1940 and were externally identical.

### Atlas Master™ Series Silver Additional Features:

- NMRA 21-pin plug for DCC (Decoder-ready)

\*Paint scheme is correct for a locomotive of a similar prototype.

### Features:

- Early Blunt truck with separate brake cylinders, molded coil spring detail (optional) and metal truck chains
- Separately-applied metal grab irons and lift rings
- Separately-applied fine scale handrails and stanchions, coupler cut lever and piping
- Directional lighting with golden-white LEDs
- Five-pole skewed armature motor with dual flywheels for optimum performance at all speeds
- NMRA 21-pin plug for DCC

### Sound Features for Gold Series :

(DCC Operation)

- Supports all DCC-programming modes
- Flexible mapping of function keys F0 to F31 .
- Follows all NMRA DCC standards and recommended practices.

### Sound Functionality Features:

- Over 20 sound effects are available, including engine start-up and shutdown, prime mover sounds through all eight notches, bell, air horn, air compressor, dynamic brakes and more.
- There are 16 user-selectable horns, 2 user-selectable bells, and 2 user-selectable synchronized brake squeals.
- Manual and Automatic Notching modes with the ability to change modes "on the fly" are provided for true realism.

**Atlas Master® is Atlas' premier line of high-end, fully detailed locomotives and freight cars that are the pinnacle of Atlas' research, development and engineering. Atlas Master® Line Rolling Stock items are highly detailed models that faithfully recreate the prototype down to the paint scheme and even railroad-specific details. The Atlas Master® Plus line incorporates all of the features of the Master line, PLUS etched details, walkways, grating, separate piping, metal couplers and many other fine details. This is as close to real as it gets.**

The Trinity 3230 Pressure Differential covered hopper is essentially a smaller version of TrinityRail's 5660 PD. The smaller version was developed from the base design introduced by Thrall Car in the late 1990s. The smaller size enables the cars to be loaded with heavier ladings such as cement and various grades of fly ash. Most of the cars are operated by Railcar (Leasing) companies or Shippers.

**Features:**

- Ready to run
- Injection molded plastic
- Fine scale detail
- Separately applied wire grab irons
- Separately applied wire cut levers
- Etched metal roofwalks
- Crisp painting and printing

Spurred by the postwar business boom and in an effort to replace worn out equipment, North American railroads built large numbers of 40' box cars to the AAR standard designs beginning in 1945. Prototypes were built with different combinations of roof styles, ends and doors. Our tooling includes many of the more common options for these details.

### Features:

- State of the art highly detailed tooling
- Many separately applied details such as ladders, grab irons, etc.
- 4 different end styles – 4/4, Early and Late Improved Dreadnaught or "Dartnot"
- 2 different roofs – straight or diagonal panel
- Superior or Youngstown doors
- Seven or eight rung ladders
- Fully detailed underframe
- Free rolling trucks with blackened metal wheelsets
- Carefully researched prototypical paint schemes

AccuMate® couplers are made under license from AccuRail, Inc.

This covered hopper model is based on a late 1970s 263,000 lbs GRL (Gross Rail Loading) 4750 cubic-foot capacity designed by Thrall Car primarily for grain transport.

**Features:**

- Weighted body
- Equipped with AccuMate® Knuckle Couplers
- Trucks equipped with free-rolling metal wheels
- Accurate painting and lettering

AccuMate® couplers are made under license from AccuRail, Inc.
