PRE-ORDER ANNOUNCEMENTS - WINTER 2023

GUARANTEED PRE-ORDER DUE DATE: WEDNESDAY MARCH 22ND 2023

January 2023

Dear Model Railroader,

Happy New Year & welcome to the Winter 2023 edition of the Atlas HO & N Scale Monthly Catalog (ASMC). The ASMC is the basis of the distinctive Atlas Guaranteed Pre-Order system. Before the Research & Development department gives the final go ahead for production, Atlas announces to its customers the products we are preparing to make. This announcement comes in the form of the ASMC that provides our customers with the opportunity to arrange a guaranteed pre-order if placed by the given deadline. If possible, Atlas will try to fill orders placed after the given "due date", but these can not be guaranteed.

The Atlas HO & N Scale Winter 2023 ASMC includes announcements of the N scale GP-38 locomotives, along with GSI Flat Cars and 50' Mechanical Reefers. In HO, announcements include Dash 8 locomotives, 3 Bay Cylindrical Hoppers and 36' Wood Reefers along with 3 new styles of single and double track viaduct kits to fit all types of layouts. Offerings in both scales will include Mobile Office Containers and 17,600 Gallon Tank Cars. In addition to the above, this catalog features new Collectors' Series Holiday Cars, Alternate History Locomotives and Rolling Stock in N and HO, and new N, HO and Z layout lighting styles. All of these items plus detail parts & accessories (formerly BLMA) can be found on our website, shop.atlasrr.com.

While on the website, make sure to check out the 'New Arrivals' pages to see what has recently hit Atlas Dealers' shelves or the 'In-Stock' pages to see what is still available in the Atlas Warehouse. We have plenty of exciting product arrivals headed to your dealer now-just what you need during the model railroad winter months.

Need to do some track work? The 148-page Atlas All Scales Track & Accessories Catalog is just the resource you need! We also offer a full line of instructional guides if you're looking to start fresh with a brand new layout! For more information and a complete listing of our books, check out our website or inquire at your local hobby shop. For assistance finding an Atlas Authorized Dealer near you, check out our Dealer locator at <https://shop.atlasrr.com/storelocator.aspx>.

Don't miss out on all of the latest Atlas news, announcements, special offers and more. You can ensure that you receive the latest Atlas news delivered to your inbox by visiting shop.atlasrr.com and signing up for our email newsletter – *the Atlas Insider*.

Thank you for your interest and enthusiasm in the exceptional multi-scale product offerings created by Atlas Model Railroad Company.

Happy Modeling,

Drew Postle, Atlas Sales Manager

Norfolk & Western

Southern

Atlas' high quality N Scale locomotive is modeled after Electro Motive Division's 2000 horsepower GP-38 diesel introduced in the late 1960s and built through the early 1970s and is still in service today throughout North America. The GP-38 is usually identified by its two radiator fans located on top of the long hood and two small exhaust stacks.

Features:

- Directional lighting
- Walkway safety tread
- Blackened metal wheels
- Scale Speed™ motor
- Factory-equipped with AccuMate® knuckle couplers
- Dynamic brakes (as appropriate by railroad)
- Golden-white LEDs

**Silver & Gold
models now with
ditch lights!**

Silver Sound Ready

- Atlas Silver Sound Ready models are equipped with a speaker for easy conversion to sound with the addition of a decoder.

DCC Operation Features GOLD LOCOMOTIVES ONLY)

- Supports all DCC-programming modes
- DCC includes RailCom and RailComPlus, with 14, 28 or 128 speed steps and with 2-digit and 4-digit addressing.
- Flexible mapping of function keys F0 to F28.
- A total of 6 DCC function outputs are available, and all can be function mapped (disable, brightness, light effects) individually
- Follows all NMRA DCC standards and recommended practices.

ESU LokSound Features (GOLD LOCOMOTIVES ONLY):

- Over 20 sound effects are available, including engine start-up and shutdown, prime mover sounds through all eight notches, bell, air horn, air compressor, dynamic brakes and more.
- There are up to 16 user-selectable horns, 2 user-selectable bells, and 2 user-selectable synchronized brake squeals.
- Manual and Automatic Notching modes with the ability to change modes "on the fly" are provided for true realism.

AccuMate® couplers are made under license from AccuRail, Inc.

The 17,600 Gallon Corn Syrup Tank Car was built in large numbers by Trinity Industries between 1984 and 1998. They are commonly used in the transport of corn syrup, liquid sugar and molasses from processing facilities to bulk distribution centers. Over 7,000 cars were built and most remain in active service today.

Features:

- Three separate styles of manway / platform / ladder arrangements (used as appropriate per road name)
- Fine scale railings
- Separately applied brake rigging
- Separately applied manway "clamshell"-style cover (used when appropriate per road name)
- 100-Ton Roller Bearing Trucks
- Accurate painting and printing
- Full stand-alone brake system details
- Bottom outlet valve detail
- Stand-alone heater coil pipes
- Highly detailed body with prototypical jacket seams
- See-through top platform grating
- AccuMate® couplers

AccuMate® couplers are made under license from AccuRail, Inc

Formed in 1928 by the Baldwin Locomotive Works, American Locomotive Company and American Steel Foundries, General Steel Castings (GSC) quickly became the primary producer of single piece locomotive beds, car frames and other large castings for the railroad industry following the acquisition of Commonwealth Steel in 1929. While Commonwealth Steel was already well established in the industry, the joining of forces with several of the large locomotive makers (along with Pullman and the eventual acquisition of St. Louis Car Co.) enabled GSC to become a leader in the design and engineering of railcars, such as the industry-standard 53'6" Commonwealth flatcar which remained in production from the early 1950s through the 70s. In 1961, GSC changed their name to General Steel Industries (GSI) as the company diversified from solely casting products but remained a force in the railroad industry until the late 70s.

In 1956, GSC introduced their 60' flatcar, which was purchased by many railroads, and these cars had very long service lives. Offered either as a complete car or as "kits" which could be further configured by the purchaser depending on the intended service, this car could be found hauling lumber, poles, wallboard, heavy or military equipment, and even railcar frames and aircraft parts. Many of these cars are still used in company service today hauling wrecks or in other MOW capacities.

Features

- Die-Cast Metal Frame
- Fine-Scale Detail
- Prototypical Ride Height
- 70-Ton ASF Ride Control Trucks with Low Profile 33" Metal Wheels
- Body-Mounted Brown Knuckle Couplers
- Accurate era-specific paint schemes

Following the end of World War II, the wider acceptance of frozen food nationwide caused a shift in the traditional refrigerator car (or reefer) industry. While it was possible to maintain some foods in a frozen state by using heavily insulated ice reefers over relatively short distances, for some foods such as frozen orange juice – which had a low freezing point and required constant temperatures between 0 and -10 degrees F – or for travel over longer distances, a new method for railcar refrigeration was required. Companies such as Fruit Growers Express (FGE), Pacific Fruit Express (PFE), and Santa Fe began to explore mechanical methods of refrigeration. FGE, which was more invested in the new orange juice traffic, led the way in these designs with over 175 mechanical cars operating by 1952. Through exchange of information between all three companies, mechanical reefer design underwent numerous updates and changes throughout the 1950s and 60s, with converted ice reefers and the “new” 50’ designs soon giving way to the larger 57’ designs by the mid 1960s. The 50’ reefer, however, remained a staple in refrigerator car fleets throughout the 1960s and 70s.

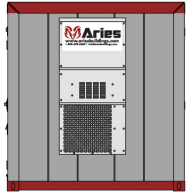

Features

- Colorful Painting and Printing
- Friction or Roller-Bearing Trucks as appropriate

To fulfill the need for portable, on demand office space at construction sites, railroad yards and many other places, companies began offering purpose-built and/or converted shipping containers for rent. These containers were fitted with office interiors, entrance/exit doors, lighting as well as air conditioning and other creature comforts. They are very versatile and are seen virtually everywhere.

This new Atlas model replicates a typical 40-foot version of the purpose-built office container.

Features:

- All New Tooling
- Accurate Doorway, Window and Light Fixture detail
- Separately applied parts include air conditioner units and electrical equipment
- Crisp Painting and Decoration

Prototype "Mobile Mini" mobile office container

HO Scale Santa Fe Yellow and Blue Bonnet Master Dash 8-40BW Locomotives

Silver MSRP: \$189.95

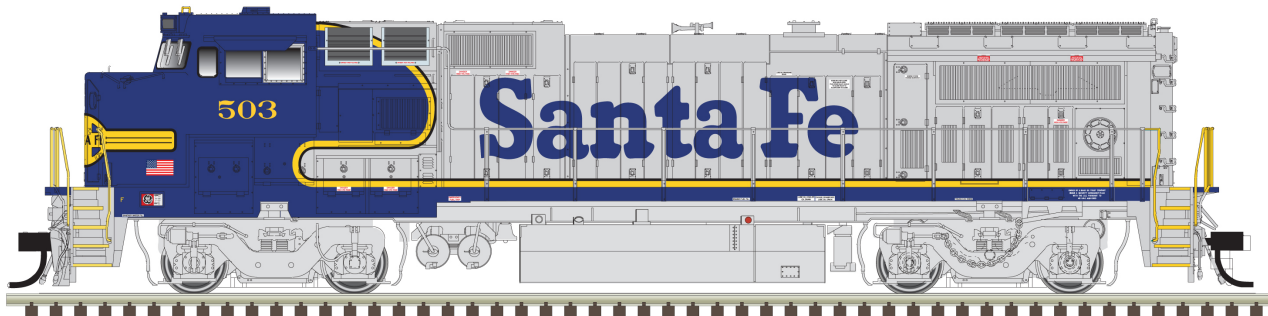

Gold MSRP: \$299.95

During the early 1990s the Atchison, Topeka and Santa Fe Railroad executives were enamored with high speed 4-axle power. This resulted in large orders of GP60M and 8-40BW locomotives. These new units would be the face of Santa Fe's rebranding going back to the "Super Fleet" image. All new Santa Fe road power locomotives built after 1990 received a new variation of the iconic warbonnet red and silver passenger service paint scheme. When Santa Fe placed their first order of 8-40BW locomotives they were extremely hungry for new power and opted to received 12 units painted in primer only to speed up delivery of the locomotives. These two Atlas Collector Series 8-40BW locomotives represent an alternate history scenario where the Santa Fe Topeka shop painted 2 of the 12 premier delivered locomotives in experimental yellow and blue bonnet paint schemes. In this alternate history scenario the Santa Fe top brass wanted to see how these 8-40BW locomotives would look in the classy yellow and blue bonnet schemes previously adorned by Santa Fe F7 locomotives after the formation of Amtrak. These Atlas Collector Series locomotives would make a great discussion piece and interesting addition to any Santa Fe enthusiast collection.

HO Scale Burlington Northern Bicentennial Master 6-Bay Cylindrical Covered Hopper

MSRP: \$42.95

The Burlington Northern Railroad was large contributor to the U.S. railroads Bicentennial celebrations. Burlington Northern rostered 3 locomotives and 1 caboose in Bicentennial paint schemes. Although unlike some other railroads they opted to not paint any revenue freight equipment in a bicentennial paint scheme. The Burlington Northern formed in 1970 and inherited a 50-car series of 6-bay cylindrical covered hopper from the Great Northern. These Great Northern Hoppers were repainted into BN colors during the summer of 1975. This Atlas Collectors' Series model represent an alternate history scenario were one of these former Great Northern hoppers were repainted into a bicentennial scheme for the 1976 celebrations.

Burlington Northern Bicentennial #443045
Item #20 007 232

SOUND-EQUIPPED****

DASH 8-32BHW/40BW

Amtrak California

Amtrak® Phase V
Officially licensed by Amtrak®

BNSF (Wabtec Rebuild)

RJ Corman

Built in the late 1980s by GE, the DASH 8-40B diesel locomotives were identified by their dynamic brake gear located along the roof line between the cab and engine compartment, with ventilation provided by large roof-top grilles. These four-axle, high horsepower engines are still in service today in North America.

By the early 1990s the North American Cab had begun to replace the "standard" cab on regular production GE 4 and 6-axle locomotives. The only order for 4-axle Dash 8-40Bs with this new cab came from Santa Fe, and thus the Dash 8-40BW model was unique to that road. A total of 83 units total were built and many are still in service today for BNSF.

In 1991 Amtrak, faced with a motive power shortage, turned to GE for an order of 20 Dash 8-32BHW locomotives. This unique model was basically a Dash 8-32B locomotive equipped with a North American Cab and built on the longer Dash 8-40BW frame. Some additional modifications for passenger service were included. A total of 20 units were built and they are still in Amtrak service today.

Features:

- Realistic die-cast underframe
- Standard cab or gull wing cab as per the prototype (HO DASH 8-40BW/8-32BHW only)
- Five-pole skewed armature motor with dual flywheels for optimum performance at all speeds
- Directional lighting
- Factory-equipped with AccuMate® knuckle couplers
- Painted crew figures
- Separately-installed scale windshield wipers, metal grab irons and fine scale handrails
- Highly detailed coupler cut bars
- Multiple unit hoses and trainline hoses
- Snowplow, Shock absorbers, Piping on trucks

Atlas Master® Series Silver Additional Features:

- NMRA 21-pin plug for DCC (Decoder-ready)

Atlas Master Series Gold Features:

- ESU LokSound decoder, supporting all DCC programming modes.
- Flexible mapping of function keys F0 to F31.
- Follows all NMRA DCC standards and recommended practices.
- Over 20 sound effects are available, including engine start-up and shutdown, prime mover sounds through all eight notches, bell, air horn, air compressor and more.

**Silver
Sound Ready™**

Wired speaker and enclosure included for easy conversion to sound.

The 36' reefer is a highly detailed model of the car that was a mainstay in the meatpacking industry during the steam era. Based upon cars built by the General American Car Company for the Cudahy Packing Co. in 1925, the 36' wood reefer is representative of the thousands of cars that transported meat, dairy, beer and food products well into the 1960's.

Features:

- Accurate painting and lettering
- Separately-applied grab irons, ladders and stirrups
- Two different hatch styles - road name specific
- Truss rods appropriate per road name
- Separately-applied door hardware
- Opening hatches and doors
- Die-cast chassis
- Detailed braking system
- 40-ton Bettendorf-style trucks
- AccuMate® couplers

AccuMate® couplers are made under license from AccuRail, Inc

Introduced in 1961 by ACF® to haul sand, clay, salt, grain and bulk plastics, the Cylindrical Hopper was the first commercially successful tank-type covered hopper car design. A few of the more than 4,000 cars of this type built through 1966 can still be seen in service today across the United States.

Features:

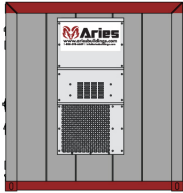

- See-through roof walks
- Blackened metal wheels
- Free-rolling 100-ton trucks
- Detailed brake gear
- AccuMate® couplers
- Fine painting and printing

AccuMate® couplers are made under license from AccuRail, Inc

To fulfill the need for portable, on demand office space at construction sites, railroad yards and many other places, companies began offering purpose-built and/or converted shipping containers for rent. These containers were fitted with office interiors, entrance/exit doors, lighting as well as air conditioning and other creature comforts. They are very versatile and are seen virtually everywhere.

This new Atlas model replicates a typical 40-foot version of the purpose-built office container.

Features:

- All New Tooling
- Accurate Doorway, Window and Light Fixture detail
- Separately applied parts include air conditioner units and electrical equipment
- Crisp Painting and Decoration

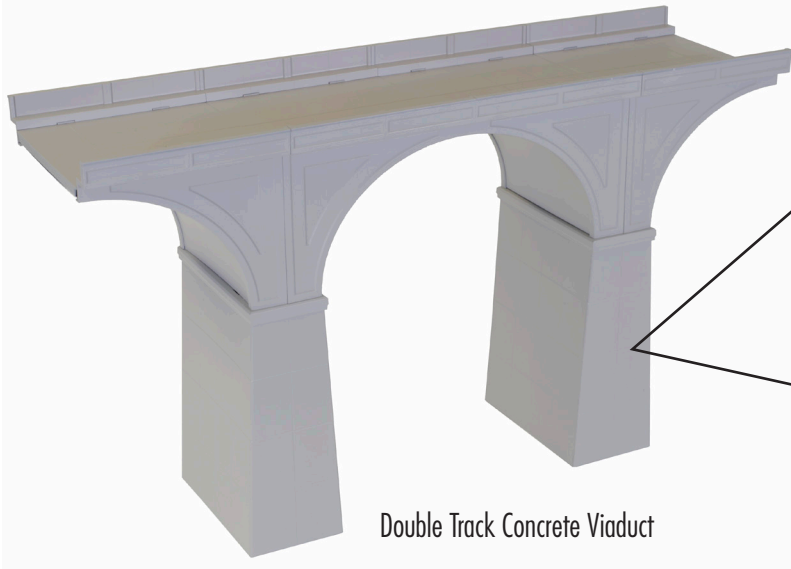

Prototype "Mobile Mini" mobile office container

TOTAL PIECES ORDERED			

Throughout the history of railroad structural engineering, the viaduct has long been a favored way to cross steep valleys or wide rivers. Consisting of a series of elevated arches or piers supporting a long flat roadbed between two points of roughly the same elevation, classic viaducts were impressive structures made of stone or reinforced concrete construction. Although taking more time to build than a wooden, iron, or steel open frame bridge, masonry viaducts could safely span greater distances and handle greater loading with less maintenance over their lifetimes. Indeed, the longest stone masonry viaduct railroad bridge in the world (at 3820 feet) is the famous Rockville Bridge across the Susquehanna River, which was built in 1902 by the PRR and is still in use with Norfolk Southern. Other stone masonry viaducts still in use include the Santa Ana River Viaduct on the UP and the Starucca Viaduct on the NYS&W.

The Atlas Viaduct will be available in three different surfaces – Concrete, Cut Stone, and Rough Stone – and in single and double-track widths.

Features:

- Available in single track or double track widths
- Kit contains single arch and two half-arch ends – combine kits for longer applications
- Can be used w/o pier units for lower heights such as in urban settings
- Concrete double track viaduct also suitable for O scale single track applications
- Length - 18"
- Width – overall (Single) = 3 1/4", (Double) = 5 1/4"
- Width – btw. walkways (Single) = 2 1/8", (Double) = 4 1/8"
- Height (w/ piers) – to deck = 9 5/8", to top of railings = 10 3/8"
- Height (w/o piers) – to deck = 3 1/2", to top of railings = 4 1/4"

Single Track Concrete Viaduct

Atlas' Modern Square Lighting series replicates the distinctive minimalist design commonly used since the 1980s for both decorative sidewalk, platform, and functional security lighting. Available in black or bronze color and offering a choice of warm or cool white LEDs, these lights include appropriate resistors for use with a range of input voltage (commonly between 6-18 Volts DC). Available in economical 3-packs.

Features:

- Modern cubic design
- Two different heights available, suitable for both sidewalk or larger area lighting
- Single, double, and 4 arm versions, with square pole and base
- Wall mounted version – perfect for customizing your buildings!
- Choice of warm or cool white LED
- All necessary resistors included for installation
- Choice of colors (Black or Bronze)

ATLAS Z SCALE LAYOUT LIGHTING

Commonly used on both residential main roads and highways, Atlas' new streetlights provide a timeless design suitable for use from the 1960's through today. With a choice of LED providing a warm glow seen with incandescent bulbs, or a more modern cool white "daylight" bulb, these lights can be used in various eras, and include appropriate resistors for use with a range of input voltage (commonly between 6-18 Volts DC).

Features:

- Classic "whip" design for streetlights – single and dual arm versions for single lane or multiple lane roads
- Parking Lot design perfect for industrial area lighting
- Choice of warm or cool white LED for era-appropriate illumination
- All necessary resistors included for installation
