PRE-ORDER ANNOUNCEMENTS - SPRING 2024

GUARANTEED PRE-ORDER DUE DATE: WEDNESDAY JUNE 26TH 2024

May 2024

Dear Model Railroader,

Atlas is celebrating the momentous occasion of our 100th Anniversary throughout 2024! Our year-long anniversary announcements continue with The Atlas 100th Anniversary Catalog, Volume 3. This edition of the All Scales Monthly Catalog (ASMC) is chock full of new announcements in N & HO scales. Stay tuned throughout the year for additional catalogs featuring all Atlas' offered scales!

The ASMC is the basis of the distinctive Atlas Guaranteed Pre-Order system. Before the Research & Development department gives the final go ahead for production, Atlas announces to its customers the products we are preparing to make. This announcement comes in the form of the ASMC that provides our customers with the opportunity to arrange a guaranteed pre-order if placed by the given deadline. If possible, Atlas will try to fill orders placed after the given "due date", but these can not be guaranteed.

The Atlas 100th Anniversary Catalog, Volume 3 edition includes announcements of prototypical N and HO locomotives including the Dash 8, U33 and the GP38. We're also announcing plenty of prototype accurate rolling stock including N & HO scale 5660 Covered Hoppers and 17,360 Gallon Tank Cars. In HO, the highly sought after CNCF and 50' Postwar Single Door Box Cars return to the lineup! Don't miss new paint schemes and road numbers offered in N scale on the Trainman Beer Can Tank Cars and 50' Box Cars.

While on the Atlas website, shop.atlasrr.com, be sure to peruse the "New Arrivals" pages to see what has recently arrived on Authorized Dealer shelves, or the In-Stock pages to see what is readily available from Atlas. Recently arrived and now available is Atlas' tried and true N scale True-Track, now with realistic gray roadbed! Take a look at the new roadbed color in the photos on the back cover of this catalog.

Need to do some track work? Atlas has all the pieces you need - from straights to switches and everything in between! Atlas can also help outfit you with a full layout package - check out shop.atlasrr.com for more information. We also offer a full line of instructional guides if you're looking to start fresh with a brand new layout! For a complete listing of our books, visit our website or inquire at your local hobby shop. For assistance finding an Atlas Authorized Dealer near you, use our handy Dealer locator at: <https://shop.atlasrr.com/storelocator.aspx>.

Don't miss out on all of the latest Atlas news, announcements, special offers and more. You can ensure that you receive the latest Atlas news delivered to your inbox by visiting shop.atlasrr.com and signing up for our email newsletter - *the Atlas Insider*.

Thank you for your interest and enthusiasm in the exceptional multi-scale product offerings produced by Atlas Model Railroad Company.

Happy Modeling,

Drew Postle
Atlas Sales Manager

100 YEARS OF ATLAS HISTORY

Atlas Tool Company was founded by Stephan Schaffan Sr. in 1924 as a general machine shop in a small garage at 330 Waverly Avenue in Newark, New Jersey. His son, Stephan Schaffan Jr. joined him in the business in 1933. As a frequent visitor to the local hobby shop, he would often ask the owner if there was anything he could do to earn some extra spending money. Tired of listening to his requests, the hobby-store owner threw some model railroad track parts his way and said, "Here, see if you can improve on this".

In those days, railroad modelers had to assemble and build everything from scratch. Steve Jr. created a "switch kit" which sold so well, that the entire family worked on them in the basement at night, while doing business as usual in the machine shop during the day.

Not long after, Steve Jr.'s accomplishments include engineering the stapling of rail to fiber track, inventing the first practical rail joiner and pre-assembled turnouts and flexible track—all of which helped to popularize model railroading and assisted in the creation of a mass-market hobby. As the business grew, their manufacturing needs went beyond what the small garage could provide, so in 1947 Steve and his father had the first factory built in Hillside, New Jersey at 413 Florence Avenue. On September 30th, 1949, Atlas Tool Company Inc. was officially incorporated as a New Jersey company.

Over time Atlas, has expanded their product line to include much more than just track. At your local hobby store you can pick up Atlas track, locomotives, freight cars, signals, lighting and more in HO, N, O and even Z scale.

To mark the 100th anniversary of Atlas, we are publishing special edition Anniversary Catalogs throughout 2024. This catalog, featuring HO & N scale products is Volume 3 of our Anniversary Collection. Stay tuned to our website and social media pages for future Anniversary Catalog releases and other exciting news that we have planned to mark 100 years of Atlas quality and innovation!

PRE-ORDER ANNOUNCEMENTS - SPRING 2024

GUARANTEED PRE-ORDER DUE DATE: WEDNESDAY MARCH 13TH 2024

ATLAS 100 YEAR ANNIVERSARY ENGINE

We recently announced ALP-45DP locomotives and Bombardier passenger car models decorated in special 100th anniversary paint schemes that celebrate our long history. What makes it even more memorable is that residents and visitors in the New Jersey area can now see an actual locomotive wearing the Atlas 100 anniversary scheme thanks to our partnership with NJ TRANSIT. NJ TRANSIT #4503 has been wrapped with our commemorative 100 anniversary artwork, and is now in service on select NJ Transit routes.

Note: The guaranteed pre-order period for these models has closed. However, we will continue to accept orders and will fulfill as many as possible but these can not be guaranteed.

TOTAL PIECES ORDERED					

First built for Union Pacific in the late 1980s by General Electric, the DASH 8-40C diesel locomotives were identified by an enlarged exhaust stack and the mounting of the dynamic brake grids in a square-like unit behind the cab, which housed an enlarged equipment blower fan. These six-axle, 4,000 hp engines are still in service today in North America.

The 4,000hp Dash 8-40CW was produced by General Electric between 1989 and 1993 as a follow-up to the successful Dash 8-40C locomotive. The most distinguishing feature of this model was the introduction of GE's version of the wide-nose "North American Safety Cab." This style of cab would become a common sight on railroads across the country. Four major railroads purchased the Dash 8-40CW in fairly large quantities, including Conrail, CSX, Santa Fe and Union Pacific. Most of these units are still in regular mainline and heavy-haul freight service today. Due to various mergers, they can also be seen operating for new owners Norfolk Southern and BNSF.

Features:

- Separate coupler cut lever
- Directional lighting
- Golden white LEDs
- Painted safety rails
- Blackened metal wheels
- Dual flywheel equipped 5-pole skewed armature motor with a low friction mechanism
- Factory-installed AccuMate® magnetic knuckle couplers

Auto Train

Seaboard Coast Line*

Seaboard Coast Line* (Bicentennial)

About Seaboard Coast Line 1776:

SCL 1776 was the nation's first Bicentennial unit, being built in June 1971. It was actually the second SCL U36B numbered 1776. The first was delivered in standard black and yellow paint. When later production unit 1803 was chosen to receive the special commemorative scheme, the original 1776 was renumbered as 1813. The "new" 1776 went on to be one of the more famous bicentennial models, and it started the trend of railroads large and small repainting units in honor of the nation's 200th birthday celebration in 1976.

The horsepower race was in full swing by the late 1960s when GE introduced the 3,300hp, four-axle U33B locomotive. 137 units were produced between September 1967 and August 1970 when production ended. GE upped the horsepower ante in 1970 with the introduction of the 3,600hp U36B which was produced between May 1970 and December 1974. Both models were externally identical, and internally they were both powered by the same GE FDL-16 cylinder four-stroke engine. The horsepower increase was achieved through adjustments to the fuel rack settings and other internal component changes. One key spotting feature of both models was the built-out radiator “wings” on the long hood.

Atlas’ U33B and U36B model is being offered in both an early and late phase. The early phase model includes flushmounted radiator screens and air intake screens on the long hood. In addition, there is a built-out area on the top of the front and rear pilots. Late phase models include corrugated radiator and air intake screens, with a flat pilot face. An optional separate electrical equipment box is included on the left side walkway behind the cab per the prototype. AAR-B or Blomberg trucks are used when appropriate.

Features:

- All New Tooling
- Factory-installed AccuMate® magnetic knuckle couplers
- Blackened metal wheels
- Scale Speed™ motor
- Accurate painting and lettering
- Optional separate electrical equipment box will be included on the left side walkway behind the cab per the prototype
- AAR-B or Blomberg trucks will be used when appropriate
- Atlas Master® Silver version is Sound Ready and equipped with speaker for easy conversion to DCC sound

The 5660 Pressure Differential (PD) Covered Hopper was introduced in 1999 by Thrall Industries, as the most advanced design in the evolution of Pressure Differential Covered Hopper, a special breed within the covered hopper family. Production still continues today under the TrinityRail brand, following Trinity's purchase of Thrall, with nearly 4,000 examples already built.

Features:

- Ready to run
- Injection molded plastic
- Fine scale detail
- Separately applied wire grab irons/wire cut levers
- Etched metal roofwalks
- Crisp painting/printing

TOTAL PIECES ORDERED					

In the late 1960's, there was demand for a smaller, versatile tank car that could fit onto smaller sidings and spurs. Aptly nicknamed, "Shorty" or "Beer Can" for its diminutive size, the car is based off of an ACF® design. At the time, larger tank cars were being ordered, but there was enough demand for a smaller tank car that could meet the needs of shippers with smaller sidings and weight limits on tracks. Usually these tank cars saw service hauling corn syrup, oils, and other heavy liquids.

Features:

- Ladder detail
- Dome detail
- Accurate painting and printing
- Ready-to-run
- AccuMate® couplers

TOTAL PIECES ORDERED					

At the end of World War II, railroads ordered large numbers of 50' AAR boxcars with a standard design that was first widely used in the late 1940s. This design was based on the original 1937 AAR design but was modified in the post-war era to include: improved dreadnaught end and diagonal panel roofs with standard or overhanging design. These 50' boxcars were a common sight on American railroads well into the 1970s and 1980s.

Features:

- Diagonal panel roof
- Improved Dreadnaught ends
- 9' Youngstown Door
- 50-Ton friction bearing trucks w/ Accumate® couplers
- Crisp painting and printing

Atlas Track Planning Software

Atlas is proud to offer Atlas Track Planning Software to help you design your dream layout. This software allows you to create & customize a layout, view it as a 3D model and then generate a shopping list to make your dream layout a reality.

Note - this software works on Windows OS only.

Features:

- Choose from a wide variety of Atlas track lines and create your dream layout.
- Model flex-track routes in an easy, intuitive and realistic way
- Arrange your layout on multiple levels with different heights and grades
- Easily draw figures to create train stations, houses, industries, roads & infrastructure
- Use the 3D tool to bring your layout to life
- Measure distances and track section lengths
- Export, Print or Share your layout with your friends
- View and print a list of the Atlas track pieces you need to begin building your layout
- Layout libraries will be available with future library updates

Atlas Track Planning Software 3-D viewer

Your Model Train Empire?

ried and true layout track plans in N & HO scale.
accessories to build the layout of your choice.

No Matter the Scale, No Matter the Space - Atlas Has the Layout For You!

N CODE 80: N-7 TWICE AROUND VIA "UP & OVER"

From Book #6: *Introduction to N Scale Model Railroading*

Minimum Table Size Required: 32" x 45"

Products Required: Straight sections, radius sections, turnouts, a crossing, bumpers, insulated joiners and terminal joiners, necessary electrical components

If you enjoy watching a long train work its way up and down the grades of a long winding main line, the N7 is the layout for you. On this layout, yard tracks are available for breaking up and storing long trains, and a passing track with two industry spurs is available to provide additional operating diversions.

N SCALE CODE 55: N-504 PLATTSBURG PRETZEL

From web site: shop.atlasrr.com **Minimum Table Size Required:** 2' x 5'

Products Required: Straight & radius sections, turnouts, a crossing, terminal joiners, bumper and a selector

Take an ordinary oval track, twist one end and you have one of the most popular track plan elements: the Figure 8. The Plattsburg Pretzel is a Figure 8, keeping operation interesting by making the train appear to reverse its direction as it proceeds. This layout also adds interest by adding a spur for more train enjoyment.

HO CODE 83/100: HO-7 THE JUNIOR PRETZEL

From Book #9: *Beginner's Guide to HO Model Railroading*

Minimum Table Size Required: 6' x 8'

Products Required: Straight sections, radius sections, Snap-Switches, rerailers, terminal sections, a crossing, bumpers, rail joiners and the necessary electrical components

Since it is built on an extended platform, there are many possibilities with the HO-7; such as longer runs, longer trains and more realistic operations.

TT-3 MARTIN'S CREEK & SOUTHERN

From Book #15: *Blueprints for 10 True-Track® Layouts*

Minimum Table Size Required: 4' x 8'

Products Required: Straight sections, radius sections, Snap-Switches, bumpers, insulated joiners and terminal joiners, a Selector, necessary electrical components

The Martin's Creek & Southern adds a passing siding and a dogleg to the basic oval, increasing interest and slightly lengthening the main line run. The spurs on the inside of the oval, along with the one in the dogleg, add switching locations.

TOTAL PIECES ORDERED					

First built for Union Pacific in the late 1980's by General Electric, the DASH 8-40C diesel locomotives were identified by an enlarged exhaust stack and the mounting of the dynamic brake grids in a square-like unit behind the cab, which housed an enlarged equipment blower fan. These six-axle, 4,000 hp engines are still in service today in North America.

The 4,000hp Dash 8-40CW was produced by General Electric between 1989 and 1993 as a follow-up to the successful Dash 8-40C locomotive. The most distinguishing feature of this model was the introduction of GE's version of the wide-nose "North American Safety Cab." This style of cab would become a common sight on railroads across the country. Four major railroads purchased the Dash 8-40CW in fairly large quantities, including Conrail, CSX, Santa Fe and Union Pacific. Most of these units are still in regular mainline and heavy-haul freight service today. Due to various mergers, they can also be seen operating for new owners Norfolk Southern and BNSF.

Features:

- Ditch lights
- Number boards, sand fill hatch, and marker lights where appropriate by railroad (8-40CW only)
- Realistic die-cast underframe
- Highly detailed coupler cut bars
- Multiple unit hoses and trainline hoses
- Five-pole skewed armature motor with dual flywheels for optimum performance at all speeds
- Separately-installed scale windshield wipers, metal grab irons and fine scale handrails
- Directional lighting
- Painted crew members
- Snowplow and piping on trucks
- Recommended minimum radius: 22"

Silver Sound Ready™

Wired speaker and enclosure included for easy conversion to sound.

*****Silver Sound Ready™**

Atlas Silver Sound Ready models are equipped with a speaker for easy conversion to sound with the addition of a decoder. If you need assistance with the upgrade of a Sound Ready model, please contact Atlas Customer Service at 908-687-0880 or csdept@atlasrr.com

Upgraded Features for both Silver & Gold

- Metal Couplers
- Improved headlight/ditchlight color and brightness
- Independently controlled lit number boards
- Independently controlled lit marker lights (for appropriate road names)
- Improved windshield glazing
- Etched metal windshield wipers
- New cab side without sunshade mount track (for appropriate road names)

Atlas Master™ Series Silver Additional Features:

- NMRA 21-pin plug for DCC (Decoder-ready)

Atlas Master™ Series Gold Additional Features:

- Supports all DCC-programming modes
- Flexible mapping of function keys F0 to F31 .
- Follows all NMRA DCC standards and recommended practices.

ESU LokSound Functionality Features:

- Over 20 sound effects are available, including engine start-up and shutdown, prime mover sounds through all eight notches, bell, air horn, air compressor, dynamic brakes and more.
- There are 16 user-selectable horns, 2 user-selectable bells, and 2 user-selectable synchronized brake squeals.
- Manual & Automatic Notching modes with the ability to change modes "on the fly" are provided for true realism.

*CSX Licensed Product

TOTAL PIECES ORDERED					

The Dash 2 locomotive series, unveiled by EMD in 1972, featured significant changes, such as a solid-state, modular electrical control system and improved engine components designed to increase traction and reduce exhaust emissions. A reliable work-horse, the GP38-2 remains one of the most successful locomotives ever built. Most are still in service today.

FEATURES:

- NMRA 21-pin plug for DCC
- The same drive as our basic Master Series™, in an affordable locomotive
- Five-pole skewed armature motor with dual flywheels
- Separately applied hand rails and end railings
- Locating dimples for grab irons
- True scale dimensions with accurate details
- Realistic die-cast underframes
- Equipped with AccuMate® Couplers
- As with our Master Series™ GP-38, this model features either a 2,600 or 3,600 gallon fuel tank, depending on the prototype.

Silver
Sound Ready™

Wired speaker and enclosure included for easy conversion to sound.

***Silver Sound Ready™

Atlas Silver Sound Ready models are equipped with a speaker for easy conversion to sound with the addition of a decoder. If you need assistance with the upgrade of a Sound Ready model, please contact Atlas Customer Service at 908-687-0880 or csdept@atlasrr.com

Silver Sound Ready

- Atlas Silver Sound Ready models are equipped with a speaker for easy conversion to sound with the addition of a decoder.

DCC OPERATION FEATURES:

- Supports all DCC-programming modes
- Flexible mapping of function keys F0 to F28.
- A total of six DCC function outputs are available
- Follows all NMRA DCC standards and recommended practices.

†Paint Scheme correct for models of a similar prototype.

ANALOG (DC) OPERATION FEATURES:

- The LokSound Select Dual-Mode decoder allows your Atlas Gold Series locomotive to be used on DC as well as on DCC layouts.
- Please note that the Atlas Quantum Engineer will NOT operate an Atlas Gold Series locomotive equipped with a LokSound Select decoder on an analog (DC) layout. However, the sound and lighting functions of the LokSound Select decoder in the Atlas Gold Series locomotive can be controlled by an easy-to-use basic DCC system
- Also note that on a DC-powered layout, a DCC and sound equipped locomotive (such as the Atlas Gold Series GP38-2) CANNOT be consisted with another locomotive that does not also have both DCC and sound. (This statement does NOT apply to DCC-equipped locomotives operating on a DCC layout.)

SOUND FUNCTIONALITY FEATURES (Gold Models with ESU "Essential Sound"):

- 4 function outputs with brightness control by CV
- 14, 28, 128 speed steps
- Dual mode DC and DCC
- 4 air horns changeable by CVs
- 2 bells changeable by CVs
- Full 8-notch prime mover sounds
- Compressor
- Dynamic brake

†Paint Scheme correct for models of a similar prototype.

The 5660 Pressure Differential (PD) Covered Hopper was introduced in 1999 by Thrall Industries, as the most advanced design in the evolution of Pressure Differential Covered Hopper, a special breed within the covered hopper family. Production still continues today under the TrinityRail brand, following Trinity's purchase of Thrall, with nearly 4,000 examples already built.

Features:

- Ready to run
- Injection molded plastic
- Fine scale detail
- Separately applied wire grab irons/wire cut levers
- Etched metal roofwalks
- Crisp painting/printing

Our high quality, ready-to-run HO scale tank car is modeled after American Car and Foundry's insulated general service tank car designed primarily for transporting chlorine.

Features:

- Brake rigging molded separately
- Scale handrails
- Metal safety bars, tank fittings and safety placards
- AccuMate® couplers
- Screw-attached 100-ton roller-bearing trucks for added reliability
- Accurate painting and lettering
- Brake wheel chain

Nearly 1,500 Mexican built CNCF 5000 Boxcars were ordered by U.S. railroads in the late 1970s as part of the "IPD" incentive per diem boxcar boom. This was the peak of U.S. modern freight car production, however it wasn't just limited to the U.S. builders as multiple U.S. railroads opted to purchase the 70-ton 50-foot boxcar from the Mexican freight car builder CNCF. Thousands more CNCF 5000 boxcars would be built for Mexico's national railways in the 1980s as well. These 5000 cubic foot boxcars still roam the rails of U.S., Canada, and Mexico to this day. The CNCF 5000 has many unique spotting features from the triangular supports above the door post, to the wrapped end sheets and the sharp notches in the sill near the stirrups. This iconic boxcar is a must have for any model railroader focused between the late 1970s and present day.

Features:

- Ready-to-run
- Full under body detail with brake rigging
- Separately applied wire grabs
- Detailed end ladders and brake gear
- Accurate painting and printing
- Blackened metal wheels
- Metal Couplers

Multiple Variations Include:

- 2 body styles: Early with bolts, late welded body (2 side slides)
- 2 end slide styles: standard 3 sheet Dreadnaught end, Bifurcated "X" pattern end
- 5 Door styles: Youngstown, Youngstown w/pick lever, Modified Youngstown, Superior and ICG shop Door.

**CSX Licensed Product*

At the end of World War II, railroads ordered large numbers of 50' AAR boxcars with a standard design that was first widely used in the late 1940s. This design was based on the original 1937 AAR design but was modified in the post-war era to include: improved dreadnaught end and diagonal panel roofs with standard or overhanging design. These 50' boxcars were a common sight on American railroads well into the 1970s and 1980s.

Features:

- Details such as separately applied ladders and grab irons
- Three different side sill styles - straight, tabbed and fishbelly
- 8' & 9' Superior or Youngstown doors
- Fully detailed underframe
- Free rolling trucks with metal wheelsets
- Accurate printing and prototypical paint schemes
