N & HO SCALE - SUMMER 2024

Atlas Guaranteed Pre-Order Announcements

PRE-ORDER ANNOUNCEMENTS - SUMMER 2024

GUARANTEED PRE-ORDER DUE DATE: WEDNESDAY OCTOBER 9TH 2024

August 2024

Dear Model Railroader,

Atlas is celebrating the momentous occasion of our 100th Anniversary throughout 2024! Our year-long anniversary announcements continue with The Atlas 100th Anniversary Catalog, Volume 5. This edition of the All Scales Monthly Catalog (ASMC) is chock full of new announcements in N & HO scales. Stay tuned throughout the year for additional catalogs featuring all Atlas' offered scales!

The ASMC is the basis of the distinctive Atlas Guaranteed Pre-Order system. Before the Research & Development department gives the final go ahead for production, Atlas announces to its customers the products we are preparing to make. This announcement comes in the form of the ASMC that provides our customers with the opportunity to arrange a guaranteed pre-order if placed by the given deadline. If possible, Atlas will try to fill orders placed after the given "due date", but these can not be guaranteed.

The Atlas 100th Anniversary Catalog, Volume 5 edition includes announcements of prototypical N and HO locomotives including the N Master GP39-2 and VO-1000 (now with sound!) along with HO Master U28CGs and AEM 7s. We're also announcing plenty of prototype accurate rolling stock including N & HO scale 5800 Hoppers and Pulpwood Flat Cars and more.

While on the Atlas website, shop.atlasrr.com, be sure to peruse the "New Arrivals" pages to see what has recently arrived on Authorized Dealer shelves, or the In-Stock pages to see what is readily available from Atlas. Recently arrived and now available is Atlas' tried and true N scale True-Track, now with realistic gray roadbed! Take a look at the new roadbed color in the photos on the back cover of this catalog.

Need to do some track work? Atlas has all the pieces you need - from straights to switches and everything in between! Atlas can also help outfit you with a full layout package - check out shop.atlasrr.com for more information. We also offer a full line of instructional guides if you're looking to start fresh with a brand new layout! For a complete listing of our books, visit our website or inquire at your local hobby shop. For assistance finding an Atlas Authorized Dealer near you, use our handy Dealer locator at: <https://shop.atlasrr.com/storelocator.aspx>.

Don't miss out on all of the latest Atlas news, announcements, special offers and more. You can ensure that you receive the latest Atlas news delivered to your inbox by visiting shop.atlasrr.com and signing up for our email newsletter - *the Atlas Insider*.

Thank you for your interest and enthusiasm in the exceptional multi-scale product offerings produced by Atlas Model Railroad Company.

Happy Modeling,

Drew Postle
Atlas Sales Manager

PRE-ORDER ANNOUNCEMENTS - SPRING 2024

GUARANTEED PRE-ORDER DUE DATE: WEDNESDAY OCTOBER 9TH 2024

100 YEARS OF ATLAS HISTORY

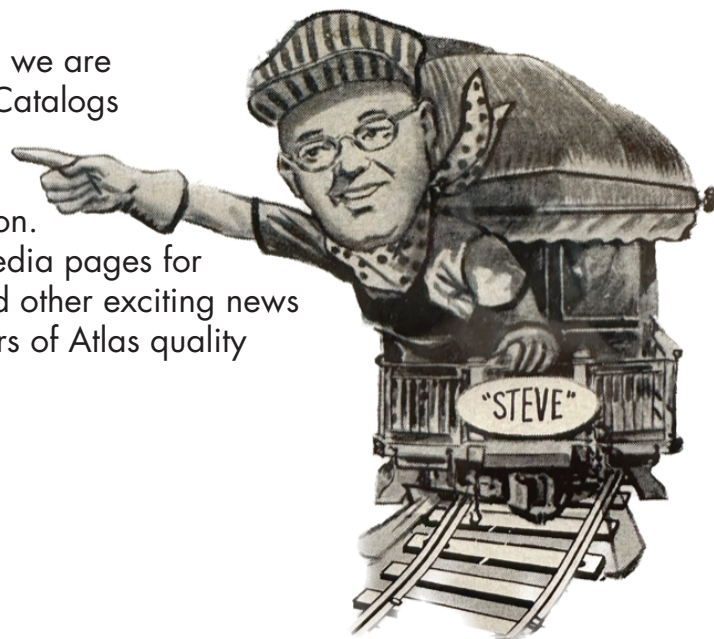

Atlas Tool Company was founded by Stephan Schaffan Sr. in 1924 as a general machine shop in a small garage at 330 Waverly Avenue in Newark, New Jersey. His son, Stephan Schaffan Jr. joined him in the business in 1933. As a frequent visitor to the local hobby shop, he would often ask the owner if there was anything he could do to earn some extra spending money. Tired of listening to his requests, the hobby-store owner threw some model railroad track parts his way and said, "Here, see if you can improve on this".

In those days, railroad modelers had to assemble and build everything from scratch. Steve Jr. created a "switch kit" which sold so well, that the entire family worked on them in the basement at night, while doing business as usual in the machine shop during the day.

Not long after, Steve Jr.'s accomplishments include engineering the stapling of rail to fiber track, inventing the first practical rail joiner and pre-assembled turnouts and flexible track—all of which helped to popularize model railroading and assisted in the creation of a mass-market hobby. As the business grew, their manufacturing needs went beyond what the small garage could provide, so in 1947 Steve and his father had the first factory built in Hillside, New Jersey at 413 Florence Avenue. On September 30th, 1949, Atlas Tool Company Inc. was officially incorporated as a New Jersey company.

Over time Atlas, has expanded their product line to include much more than just track. At your local hobby store you can pick up Atlas track, locomotives, freight cars, signals, lighting and more in HO, N, O and even Z scale.

To mark the 100th anniversary of Atlas, we are publishing special edition Anniversary Catalogs throughout 2024. This catalog, featuring HO & N scale products is Volume 3 of our Anniversary Collection. Stay tuned to our website and social media pages for future Anniversary Catalog releases and other exciting news that we have planned to mark 100 years of Atlas quality and innovation!

PRE-ORDER ANNOUNCEMENTS - SPRING 2024

GUARANTEED PRE-ORDER DUE DATE: WEDNESDAY OCTOBER 9TH 2024

ATLAS 100 YEAR ANNIVERSARY ENGINE

We recently announced ALP-45DP locomotives and Bombardier passenger car models decorated in special 100th anniversary paint schemes that celebrate our long history. What makes it even more memorable is that residents and visitors in the New Jersey area can now see an actual locomotive wearing the Atlas 100 anniversary scheme thanks to our partnership with NJ TRANSIT. NJ TRANSIT #4503 has been wrapped with our commemorative 100 anniversary artwork, and is now in service on select NJ Transit routes.

Note: The guaranteed pre-order period for these models has closed. However, we will continue to accept orders and will fulfill as many as possible but these can not be guaranteed.

Table with columns: ORDER IN PIECES, SILVER ITEM, ROAD NAME, ROAD #, COLOR, MSRP/UNIT. Includes 'ALL NEW PAINT SCHEMES' section and a 'TOTAL PIECES ORDERED' row.

The GP39-2 was offered by EMD as a fuel-efficient alternative to their very popular GP38-2 model. This efficiency resulted from the use of a turbo-charged 12-cylinder 645E3 diesel engine, as opposed to the non-turbocharged 16-cylinder prime mover in the GP38-2.

Features:

- Golden-white LEDs
• Painted safety rails
• Directional lighting
• Blackened metal wheels
• Scale Speed™ motor
• Ditch lights as appropriate by road name (all except D&H will have ditch lights)
• Factory-installed AccuMate® magnetic knuckle couplers
• Atlas Master® Gold version features ESU LokSound Decoder
• Atlas Master® Silver version is equipped with speaker for easy conversion to DCC sound

Now with Ditchlights!

Ditch lights as appropriate by road name (all except D&H will have ditch lights).

SILVER SOUND READY FEATURES (SILVER LOCOMOTIVES ONLY):

- Sound ready & equipped with speaker for easy conversion to DCC sound.
• E24 DCC Plug Equipped

In 1939, the Baldwin Locomotive Works introduced a standard line of production switchers featuring a cast frame, an end cab and low hood for improved visibility for the crew, and the option of either a 6- or 8-cylinder in-line diesel, which would deliver 660 or 1000 horsepower. These prime movers were based on a De La Vergne design, with vertical cylinders, low fuel pressure requirements, and spherical combustion chambers, a design which provided a broader power curve and could tolerate lower grade fuel than high-pressure fuel injector systems. The "VO-1000" generated 60,000 pounds of starting tractive effort, and 34,000 pounds continuous – values which were extremely useful for branchlines, yard work, and industrial switching such as in steel mills.

As early as February of 1940, Baldwin announced they would be manufacturing the 660 and 1000 horsepower switchers "for stock", as compared to producing to order. Even during wartime, this was a risky proposition, however such confidence paid off, as by the time production ended in 1946, Baldwin had produced nearly 550 1000 horsepower units, making the "VO-1000" one of the most popular naturally aspirated diesel switchers built – and rebuilt – over their long operational lifetimes.

TOTAL PIECES ORDERED					

In 2012, BNSF acquired close to 600 Gunderson 7538 High Capacity box cars. Four years later, TTX Corporation placed orders for a similar 7550 box car. At this time, they have over 4,000 cars in their fleet with more cars ordered. With a gross rail load capacity of 286,000, these cars can carry a wide variety of products such as paper and bulk items. While they look similar in appearance, the 7550 and 7538 have a few unique differences. The 7550 features "grid sides" and double plug doors. The 7538 has a single plug door and a unique door step, just below the left side of the door opening. With both companies operating large fleets, these cars are sure to be seen in large manifests, short lines and on sidings throughout North America.

Features:

- All New Tooling!
- Fine scale detail
- Metal wheelsets and axles
- Single or double plug door as per the prototype
- Roof with 3 Stanray X-panels and 3 diagonal center panels
- Separately applied etched metal crossover platform and coupler cut lever
- Crisp, accurate lettering and paint details
- Era: 2012 - Present

Pre-production samples shown below.

TOTAL PIECES ORDERED					

The 5800 cubic foot covered hopper evolved from the earlier 5701 for transporting bulk plastic pellets. Most of these were acquired by private companies including leasing companies, chemical companies, oil companies and plastics companies.

Features:

- Nine full-width panel body with ten weld seams
- Etched metal roof walks
- Ten 20" hatches and Pneumatic outlets (5800 Plastics)
- Transverse mounted air reservoir
- Continuous hatch and gravity outlets (5748 Grain)
- 100-Ton Roller Bearing Trucks
- AccuMate® couplers

AccuMate® couplers are made under license from AccuRail, Inc.

In the 1950s Pullman-Standard began offering new standard designs for their coal hoppers. One of these was the 70-ton three bay coal hopper with a rated volume of 2,750 cubic feet. The carbody had sixteen side posts and was available with and without heap shields. Later an 80-ton version was offered using the same length frame but having a taller body with a rated volume of 2,960 cubic feet. The cars were built from 1954-1960 (2750 cf) and 1964-1971 (2960 cf).

Features:

- Fifteen Panels
- Sixteen Side Posts
- Die-cast hopper and center sill construction
- Late 20th century prototype (New cars were built from 1954-1971)
- Optional heap shields
- Friction- or roller-bearing trucks
- Pullman-Standard Design
- Over 16,000 cars built

Pulpwood is not a specific type of wood, but actually tree limbs that are cut to a specified length, then turned into wood pulp and used in the paper industry. Early paper making had the trees near the paper plant. As timber resources were diminished, the need for transporting pulpwood began to rise. Railroads were seen as an efficient method of transporting pulpwood. Pulpwood in the Southeast and Northeast is generally cut into four-foot or less lengths and loaded onto "V-deck" bulkhead flat cars. The Atlas pulpwood flat is a reproduction of an early 1950s General Steel Castings "V-deck" design.

Features:

- Ready-to run
- Rugged die-cast chassis
- Stirrups
- Plastic deck + bulkheads
- Separate air reservoir
- Brake cylinder
- Triple valve
- Open or closed bulkheads to match the prototype
- Simulated detailed pulpwood load included

The Ford Taurus of 1996 was the third generation of what had become the best-selling car in America between 1992-1995. From its' initial release in 1986, the Taurus had been one of the most anticipated cars for Ford, as it was the first designed and manufactured according to statistical quality control processes and introduced effective aerodynamic styling that rapidly became a standard in the industry. By 1996, Ford engineers looked to make the car stand out even more from the competition, and a dramatic restyling was unveiled which featured rounded shapes everywhere – including an oval rear window, drooping front and rear contours, and an integrated control panel “bubble” – features which earned the pejorative nicknames “Submarine” or “Bubble” Taurus by the public. While the performance and handling was better than previous generations, the radical redesign (and higher cost) was more than the public could appreciate, and over 50% of sales in 1996 were to fleet owners. By 1997, The Taurus had lost the title of the best-selling car in America to the more conservatively styled Toyota Camry.

Features:

- Prototypically correct design
- Accurate paint schemes
- Officially licensed by Ford®
- Sold as sets of 2

TOTAL PIECES ORDERED					

The General Electric U28C locomotive, developed in 1966, provided a 300 horsepower increase over its predecessor, the U25C. Built on a larger frame than the U25C, the model also incorporated other improvements, such as new floating bolster trucks. A passenger-hauling variant, the U28CG, was produced for the Atchison, Topeka and Santa Fe Railway. These units were painted in the timeless red and silver Warbonnet paint scheme and put into service on the Texas Chief, replacing well aged F units. Upon being retired from freight service the U28CGs were repainted into the standard Santa Fe freight colors of blue and yellow. Early U30Cs were based on the U28C design and were visually identical to the Phase II U28C, of which this new model from Atlas represents.

Features:

- Etched metal grilles.
- Steam generator details on U28CG.
- Several cab, headlight and nose light variations to accurately match the prototype.
- Separately applied details parts.
- Factory equipped with metal knuckle couplers.
- DC and Sound versions available.

Atlas Master[™] Series Silver Additional Features:

- NMRA 21-pin plug for DCC (Decoder-ready)

TOTAL PIECES ORDERED					

In the mid-1970s Amtrak was looking for a suitable replacement for the famed GG1 electric locomotives which had been in service since the mid- 1930s. The approved design for what became the AEM-7 was from a Swedish company, ASEA, and was built starting in 1978 by EMD, utilizing original bodies by Budd, with the remaining components imported from Sweden. Amtrak's original order for 47 units was delivered between 1980 and 1982, with an additional seven in 1988. By the early 90's, a variant of this locomotive, the ALP-44, was produced for New Jersey Transit. All units have since been retired, but, like their GG1 predecessor, examples of both the AEM-7 and ALP-44 have been saved through donations to rail museums.

Over their years of service, Amtrak applied numerous paint schemes, and both Amtrak and NJT added ditchlights to their units, which are featured in this release. The alternate history PRR "heritage scheme" is an adaptation of the original pre-Lowey GG1 design from 1934, and is included as an homage to the history of electric locomotive power.

FEATURES:

- Operating pantographs
- Die-cast chassis
- Dual flywheels
- Operating head lights and marker lights which are directional
- Full cab interior with painted crew members
- Separately-applied wire grab irons
- Astounding roof detail
- Gold versions will be equipped with ESU sound

Silver Sound Ready

TOTAL PIECES ORDERED					

In 1947, REA ordered 500 of these all new steel express reefers from ACF, in an effort to handle express and parcel traffic. During the same time period, Atlantic Coast Line purchased 50. These cars were added to the front of passenger trains traveling coast-to-coast on all major railroads. These new steel express cars utilized welded construction and a new high speed truck design. They were able to carry both refrigerated loads as well as parcel loads due to their collapsible ice bunkers that were stored away when not in use.

Features:

- Welded sides
- 3/3 Improved Dreadnaught Ends
- Arched Roof
- Separate ladders and grabs
- Fully detailed underframe
- Steam, Air & Signal Hoses
- Cut Levers
- Equipped with AccuMate® Knuckle Couplers
- Trucks equipped with free-rolling metal wheels
- Accurate painting and lettering
- AccuMate® couplers are made under license from AccuRail, Inc.

The FMC 5347 boxcar was manufactured by the FMC Corporation, a company known for producing a variety of freight railcars, in the 1970s and 1980s. The "5347" in the name refers to the car's capacity in cubic feet, making it a larger boxcar compared to earlier FMC models such as the 5077 (also available from Atlas). These cars were very prominent during the "IPD" (incentive per diem) era. Many featured colorful paint schemes and logos, a welcome change from earlier eras when most boxcars were much plainer.

FMC was acquired by Greenbrier in 1985. Production at the Oregon plant continued under the name Gunderson.

Features:

- Single or Double Door where appropriate
- Multiple body styles
- Wire grabs
- Etched parts
- Plate C Box Car
- X-Panel Roof

Pulpwood is not a specific type of wood, but actually tree limbs that are cut to a specified length, then turned into wood pulp and used in the paper industry. Early paper making had the trees near the paper plant. As timber resources were diminished, the need for transporting pulpwood began to rise. Railroads were seen as an efficient method of transporting pulpwood. Pulpwood in the Southeast and Northeast is generally cut into four-foot or less lengths and loaded onto "V-deck" bulkhead flat cars. The Atlas pulpwood flat is a reproduction of an early 1950s General Steel Castings "V-deck" design.

Features:

- Ready-to run
- Rugged die-cast chassis
- Factory-applied grab irons
- Stirrups
- Plastic deck & bulkheads
- Separate air reservoir
- Brake cylinder
- Triple valve
- Open or closed bulkheads to match the prototype
- Simulated detailed pulpwood load included

The Ford Taurus of 1996 was the third generation of what had become the best-selling car in America between 1992-1995. From its' initial release in 1986, the Taurus had been one of the most anticipated cars for Ford, as it was the first designed and manufactured according to statistical quality control processes and introduced effective aerodynamic styling that rapidly became a standard in the industry. By 1996, Ford engineers looked to make the car stand out even more from the competition, and a dramatic restyling was unveiled which featured rounded shapes everywhere – including an oval rear window, drooping front and rear contours, and an integrated control panel “bubble” – features which earned the pejorative nicknames “Submarine” or “Bubble” Taurus by the public. While the performance and handling was better than previous generations, the radical redesign (and higher cost) was more than the public could appreciate, and over 50% of sales in 1996 were to fleet owners. By 1997, The Taurus had lost the title of the best-selling car in America to the more conservatively styled Toyota Camry.

Features:

- Prototypically correct design
- Accurate paint schemes
- Officially licensed by Ford®

Silver Frost Metallic

Put Your Trains on the Right Track!

With time tested, modeler approved Atlas HO & N scale track!

Whether you're finishing an existing layout, starting a new one, or just giving that trainset loop some extra pieces, Atlas has the 'right track' for you. The rugged plastic construction, nickel silver rail and U.S. prototype detail, assures longevity, maximum conductivity and accurate realism that guarantees your trains look good and keep running smoothly. Atlas track provides industry leading **quality** at unequalled **value**, and our **selection** is so large we have an entire catalog devoted to it. HO and N scale track, in a variety of rail sizes, is fully stocked and ready to ship to you and your favorite Atlas authorized dealer now. For more information, and the dealer nearest you, visit shop.atlasrr.com and request a catalog of your own. And remember...*You're on the right track...with Atlas!*

HO SCALE TRACK

HO True-Track®

Atlas HO True-Track® has true-to-life gray gravel roadbed, correctly angled roadbed shoulders and features Atlas Code 83 Snap-Track®.

HO Code 83

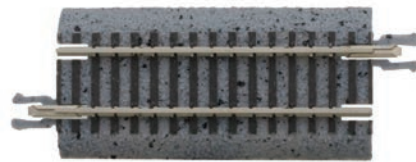

Atlas HO Code 83 track features prototypically-fine brown ties and nickel silver rail, and not only looks realistic but is incredibly reliable.

HO Code 100

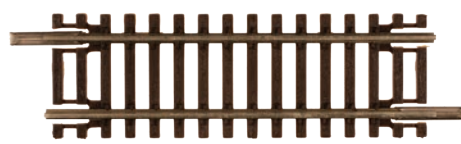

Atlas HO Code 100 track features black injection molded plastic ties and solid nickel silver rail, and is suitable for all skill levels.

N SCALE TRACK

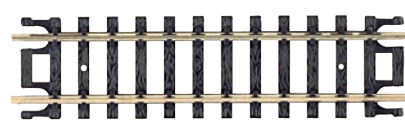

N True-Track®

Atlas N True-Track® features Code 65 rail & dark brown ties with prototypical spacing and is now improved with true-to-life gray gravel roadbed making it even more realistic!

N Code 55

Atlas N Code 55 track features simulated wood brown ties and smaller nickel silver rail, and is praised for its superior design and ease of use.

N Code 80

Atlas N Code 80 track features black ties and nickel silver rail, and is built to last for ultimate performance.

ATLAS SUPER-FLEX® TRACK

- Item #168 HO Code 100 Super Flex Track
- Item #500 HO Code 83 Super Flex Track
- Item #2000 N Code 55 Super Flex Track
- Item #2500 N Code 80 Super Flex Track

Invented and patented by Atlas founder Stephen J. Schaffan Jr., this innovative, finely engineered precision track is the first choice of experts who demand the best. Easy to install, Super-Flex Track® enhances the realism of your layout. Unlike other flexible track which can become inflexible and kink, Atlas' Super-Flex Track® can be formed and re-formed with ease to achieve the desired shape. This unique track can be shaped to form curves of any radius, is ideal for spiral easement curves and is easily manipulated to help you make your layout vision a reality.

**ATLAS
SUPER-FLEX® TRACK**
the original and still the best.
