Telephone: (312) 261-2606
Cable Address: CONMODELS

December 15th 1967

Dear Modeler:

The rapid growth of interest in "N" scale has prompted the publication of this catalog for your convenience and reference. We hope you will find it informative and useful in your pursuit of this wonderful hobby of model railroading.

For those of you who have never had "N" scale explained we shall try and give a brief introduction. The models in "N" scale are reduced exactly 1/160 of the actual item to be modeled. This may seem as an "odd" scale, but it began in European countries where the metric system is used and "N" works out to a perfect 2 mm to the foot scale. Since this reduces to a track gauge of nine millimeters it was nick-named "N" scale. In all major languages the word for "9" begins with an "N".

Today, all major brands: Con-Cor; Atlas; Revell; Rapido; and Aurora use the same gauge and same couplers so that any quantity of equipment is fully interchangeable with any of the other manufacturers trains. This means that your enjoyment is increased to the full extent of all the products manufactured by the various manufacturers.

We at Con-Cor are interested in producing as wide a line of "N" items as time will allow, and we refuse to compromise quality for a cheaply priced product. We believe that you, our customers, are more interested in quality and a wide variety at a few pennies more in price rather than a cheaply made, low variety product. Customers who buy and use our products know what we mean by this statement, those who have not tried our products as yet are in store for a pleasant surprise when they purchase our products.

At present we have many new products being readied for the market not listed in this catalog. Because of these listings to come later we will prepare an appendix to this catalog to be ready about March 1st 1968, which will be available for a stamped #10 envelope.

This past year our factories located in the United States; Japan; and Denmark have produced a total of 17 dies for "N" items. We will ready about 26 more for use in 1968. These items will provide our customers with a selection of over 450 "N" items by the end of 1968.

Because of the overwhelming demand for "N" products, many items are being sold out very rapidly and re-runs have to compete for production time along with further new items. So please be patient while we try and catch up, it is worth the wait for Con-Cor products.

Sincerely Yours,

James M. Conway
President

JMC/hs

READY TO RUN TRAIN SETS

Set Includes Lighted E-8 Diesel Locomotive, 2 Freight Cars, Caboose, 11 Sections Curved Track, Curved Terminal Section, Re-Railer Track and One Straight Track Section.

ALCO DIESEL RSC-2

This 1500 HP road switcher was first introduced in 1946. It was optionally available with six wheel trucks. Our model features the most popular choice of many railroads with the six wheel trucks and excellent detail. Plastic tires are on four of the wheels to assure better traction and more pulling power.

TRACKSIDE FIGURES

These finely detailed figures will bring actual "life" to any railroad. The figures are painted and are ready for use. They make excellent additions to yard station areas. With some skill, these can also be mounted into locomotives and cabooses. The civilian figures can most certainly be added to any part of your railroad including station areas, street scenes. All figures come packed in clear plastic boxes visible to your inspection.

ALL CARS PACKED IN CLEAR PLASTIC RE-USEABLE BOXES.

CON-COR "N" ROLLING STOCK

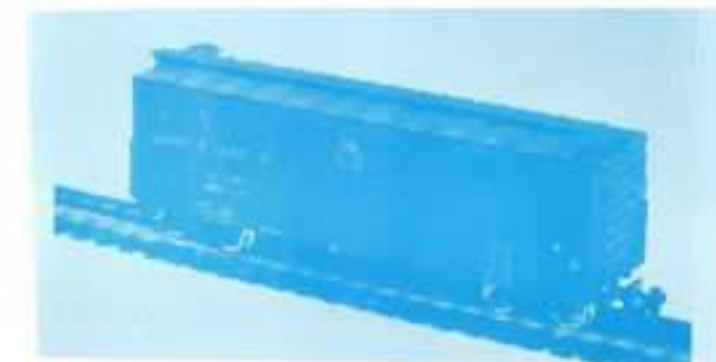

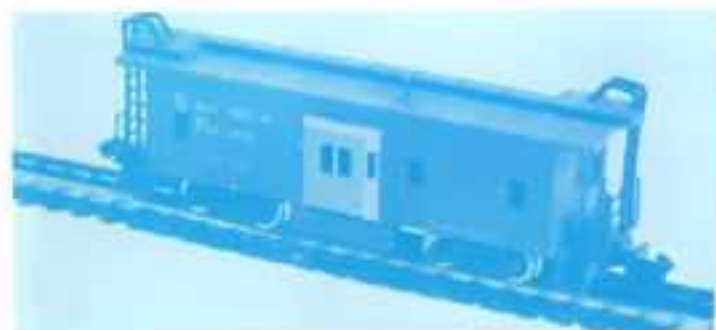

Illustrated on the following page and one half are a number of the Con-Cor "N" freight cars. These cars all feature a one piece moulded plastic superstructure with add-on details such as roof-walk, brake wheels, etc. They also feature a die-cast floor (with all the fine detail of course) for that low center of gravity needed for sure rolling qualities. The trucks and wheels are made of "Delrin", that magic material so famous for making "HO" cars roll as they never rolled before. Our low-profile wheel (the smallest in the industry) allows you to run on track as low as code 40.

The cars are all lettered and painted to match the actual cars as close as possible. The Con-Cor library has thousands of photos we are working from of the real thing, so you KNOW it is correct.

For a current listing of all cars and road-names available, see the Order Book enclosed with the catalog. Remember, not all items are available at all times, please be patient.

CON-COR "N" Scale Rolling STOCK

LOCOMOTIVES

All Con-Cor "N" locomotives feature one-piece injection-molded superstructures, using the most modern equipment. Our "PULMOT"™ drive system uses the latest in space-age technology including solid circuitry. *U.S., Japanese and other patents pending.

"N" SCALE KITS FROM

Passenger Station
B-640 Kit \$3.49

This passenger station kit was modeled after a Station found on the Pennsylvania System in the eastern United States. The model has molded red brick walls, green trim, white windows and a black roof . . . WOW.

Freight Station
B-641 Kit \$1.98

This model was also produced using plans of a small freight station found in Wisconsin. It is ideal for that small siding or factory site. Wood grain simulated to reproduce the weathering. A real winner.

Arch Bridge with Piers
B-661 Kit \$3.29

This bridge can be found in the book "Bridges and Buildings" by Kalmbach . . . some changes were made to mold in plastic, but all the detail is there, and of USA design, but you can find a use for several of these end to end.

Coal Loading Silo
B-662 Kit \$1.98

The factory found this little Danish coaling silo just too nice to resist modeling. Can be used to load engines, or ground mines to load coal cars. (Or how about a sand and gravel yard . . . or maybe it . . .)

MORE "N" COMING

ASSOCIATED HOBBY MANUFACTURERS INC.

"N" GAUGE

MICROMODEL TRAINS . . .
The Sensation of 1967

AHM has come up with a new line of "N" equipment of American prototype made by Lima of Italy. So far, they have delivered the F-7A locomotive and will be shipping shortly a line of freight cars. Coming are boxcars, hoppers, and tank cars at \$1.50 each and also a caboose at \$2.00.

Please consult with your favorite dealer to look over this items, and compare their quality with the others available.

All items in the line ARE HO SCALE, all items in the line feature design and construction details which give you a real jewel of an item both in scale likeness and operation. Any HO pack can be used. We recommend our PLUG-A-MATIC power Packs 70,000 & 70,100 MINITRAINS will fit right in your HO Layout. Add a Mining Scene, or a Lumber Scene or Construction Scene or Factory to part of your HO Standard Gauge layout. Narrow Gauge Trains form an important part of the history of railroading in the United States. They deserve to be included in your Lay-out.

For switches use our PLUG-A-MATIC Switch Controls 2535. Our Crossing 2111 makes it possible for you to combine both Standard and Narrow Gauge.

When two crossings are used, you automatically gain a 2" (5 cm) distance between the Standard Gauge tracks.

Our Cool Mine MINIKIT 5806 also lets you combine both Gauges. MINIKIT 5809 is a typical Narrow Gauge Engine House. Look for both in our MINIKIT line.

TRACKSIDE BUILDING KITS

The ATLAS buildings are actual reproduction of prototype buildings skillfully reproduced by craftsmen using prototype plans. Each building comes moulded in various colors to minimize painting. Excellent instructions make the building of the kits fun and easy. The kits come packed in polystyrene bags to assure you that all parts are there when you construct your building. Scenery is an important asset to any model railroad. ATLAS brings to you the finest in model railroad scenery through model kits especially made for N Gauge model railroading.

Revell/Rapido
 N Gauge MicroTRANS

**Small, tough,
 compact Railroad realism!
 Hit the Rails with
 Revell/Rapido N Gauge MicroTRANS!**

The biggest news in fifty years of model railroading! Tiny precise replicas of America's most famous trains, miniaturized by Revell/Rapido in the astounding space-saving N Gauge MicroTRANS! And the railroad cars you can hold in the palm of your hand are as incredibly engineered as the real thing! They've been tooled and detailed with a diamond cutter's precision, and they are diamond tough, durable miniatures for railroaders of every age!

Powerful MicroTRANS break-through the space barrier! The size puts highly detailed railroad realism within the reach of your hand. You can set up your MicroTRANS in a space as small as you, the "engineer" can spare. Get off the floor — set it up on a table — set it up wherever or whenever you want it! There's new fun, new fascination, new convenience waiting for you... get the railroads rolling again with Revell/Rapido N Gauge MicroTRANS!

Yard Iron Roundabout
 With Power Pack \$26.95
N-2001 Chicago & Northwestern
N-2002 Southern Pacific

Baldwin Diesel Freight Set, with Baldwin Diesel Locomotive, Box Car, Gondola, Caboose, ready to roll on exclusive railroad tempered MicroTRANS. Power Pack, Power Cable with Track Clips, Re-Railer and Manual included.

Without Power Pack \$19.95
N-2101 Chicago & Northwestern
N-2102 Southern Pacific

Old Thunder
 With Power Pack \$31.95
N-2040 Baltimore & Ohio
N-2041 Union Pacific

0-6-0 Steam Loco Freight Set, with 0-6-0 Steam Loco and Tender, Box Car, Hopper, Caboose, ready to roll on exclusive railroad tempered MicroTRANS. Power Pack, Power Cable with Track Clips, Re-Railer and Manual included.

Without Power Pack \$24.95
N-2140 Baltimore & Ohio
N-2141 Union Pacific

MRC CONTROLS

The last word in a model railroad is performance... and that's where MRC comes in strong! Whether you have spent months building a super scale, highly detailed HO layout, or just come home with a \$15 "N" scale train set, the level of performance you get will depend on the power pack you'll use.

For years, MRC has been the leader in model railroad power packs. The broad selection of units to suit your particular layout and price range and MRC's rugged, dependable industrial quality components and superior design, provide an excellent value in any model railroader. The last word in control, however, is MRC's ability to produce the ultimate in scale motion in your layout... your locos will crawl, in ball, couple without crashing and start smooth without stalling. Be sure you're getting all the performance that was built into your loco... tell your dealer that you want MRC... the power packs that provide enough power for now and even for future expansion.

GOLDEN THROTTLEPACK NO. 800H

Contains the advanced features to provide maximum performance — Extended range 320° Taper Wound Rheostat, Pulse-Full Power Switch, Circuit Protector, Overload Light, Fixed 12 volt D.C. for future expansion, 16 volt A.C. for accessories, Master On-Off Switch — 2 amps, enough to run 7 N trains. \$14.95

DUALPACK
NO. 1722

Deluxe dual unit, 2 complete independent Power Packs in one. Usable with common rail circuits. Features: 2 1/2 amp output, 2 taper wound speed controls, 2 overload lights, 2 resettable circuit protectors, 2 direction switches. Fixed D.C. for expansion, A.C. terminal for accessories, Master Pilot Light and On-Off switch. \$16.98

MODELPACK NO. 1322M

Power Pack with all the basic controls including taper wound speed control, direction switch, Circuit Breaker protected, Full 1 ampere power output, D.C. for trains, A.C. for accessories. "Underwriters Laboratories, Inc. Listed" and C.S.A. approved. \$6.98

TRAINPACK NO. 100H

There is a full 1 amp output in this fine train control. Contains complete controls for the beginner's N railroad. A Taper Wound Rheostat... A Vari-Power Level handle for speed control... Automatic Circuit Protector... Direction Control Switch... 16 volt A.C. for accessories. "Underwriters Laboratories, Inc. Listed" and C.S.A. approved. \$8.50

This is the end of our "N" catalog, but it is only the beginning of your "empire" in this fascinating hobby. Below we have shown the difference of an HO layout and the space required for the same layout in "N" scale. If you decide to plan a layout the same size as HO only using "N", then your empire has grown to be four times as large.

In the coming year you will see dozens of more "N" products, even new firms joining the ranks of the pioneers to provide you with even more enjoyment in this fine hobby.

GOOD LUCK

← HO gauge

An Arnold rapido layout built in N gauge requires only about a quarter of the area of a corresponding HO layout. The advantage is obvious.

*172 Bridge End Pier, pair	1.25
*072 Bridge Center Pier	.49

PECO N

9 mm

PECO STREAMLINE N-GAUGE FLEX-TRACK

Why settle for anything less than the best flex track available? PECO Streamline N-gauge flex track enables repeated flexing, bend it down to a 5" radius or greater, straighten it up again. PECO costs a little more, but gives us much more, both rails are truly flex-track and slide within the ties, so that the rail ends remain even or can easily be made even. PECO STREAMLINE N-gauge flex-track offers true HO realism in 9mm. PECO's long switches and long crossover are the ultimate in N-gauge track. Why settle for less than the best, when PECO costs no more?

N-Gauge Models:

SL3000 Nickel Silver N Flex-Track, 36"	\$1.39
N-100 Turn Railhead for above and other N track 25'	1.99
SL3103 Nickel Silver Rail Joints, 74 in bag	.69
SL3111 Nylon Insulating Rail Spacers, 12 in bag	.49
SL3800 Long Turnout, right	3.50
SL3801 Long Turnout, left	3.50

Complete Sets without Power Pack

Every train set is attractively packaged and contains the locom and cars shown plus the following: 2 3' straight tracks, 4 curved tracks, a re-railer, and two terminal clips as well as a connecting cable. A train set forms the corner stone of an Arnold Rapido layout. It contains everything necessary to begin operations. Only the power pack of your choice must be added.

0000 Track Layouts Manual \$ 2.99
 112 pages, 9" x 12" with track plan stencil

- Power Packs**
- 0700 .3 amp AC/DC UL approved Model \$ 6.99
 - 0706 Larger Model with pulse power and control lamps \$ 22.99

The unique Arnold rapido switches

- 0170 Manual Switches \$ 5.99 pr
 - 0171 Electric Switches \$ 5.99 pr
- Solenoids cannot burn out even if incorrectly wired. Power is in the track leg to which the switch does not point. Light sign-lighted control panels can be attached. Manual switches can be electrified. Switch machines can be placed above or below the

0517 \$ 2.50
 Bridge Assembly with Piers Length 16"

0518 \$.99
 20 Extra Piers, Small

- 0720 Directional Switch Controls \$ 2.50 pr
- 0796 Light Bulbs for above \$6 ea

With these controls a schematic control panel can be constructed.

0744 Track Contact Activator with 12' Cable. 2 for \$ 1.49

0790 Main Light Signal with red and green lamp. \$ 2.99

This contact is suitable for use on any straight track section on the layout.
Function and use: The wheels of a passing locomotive activate the solenoid of the attached item. This applies to switches 0171 or relays 0745. Examples for use are automatic setting of switches, shutting on and off of illuminations by the trains and automatic reverse loops.

- 0833 Steam Locomotive Shed \$11.95 (K)
- In this two stall shed locomotives up to a length can be accommodated. The four moving doors are hung on hinges. This is built in 19th century style and consists of 54 parts a beautifully detailed structure. One of 40 accessory kits. See the Main Catalog a dealer for the rest.

ORDERING INSTRUCTIONS

- 1.) Please see your local dealer first, he is your best source for model railroad parts and equipment and can answer your questions and solve your problems.
- 2.) If no local dealer is available, or your local dealer does not carry our products, you may order direct from us. Please follow the following:
 - A.) List your name and address clearly at the top of each page.
 - B.) Print your order clearly, and give both the stock number of the item and the name of the manufacturer. (Many of the manufacturers have similar stock numbers, so don't forget!)
 - C.) Remit the exact amount by check or money order, cash is not recommended to be sent. We pay the postage.
 - D.) If we can not fill part of your order, we will issue a credit slip which may be redeemed for a cash refund if you wish.
 - E.) We accept advance orders for new items, no deposit is required, but it is recommended.
 - F.) We can accept no responsibility for changes in prices or the availability of items in this catalog. Current prices used.

DEALERS:

We welcome dealer orders and are presently servicing hundreds of dealer accounts. Normal trade terms apply to all orders, merchandise shipped f.o.b. Chicago. but a liberal freight allowance is given on all orders. Open account can be established with suitable trade references. Why not try an order today, it could mean extra profits to get the quick dependable service we offer. Shipments via AIR to many areas at no extra charge. We are railroad experts.
