

for 70 years

Gebr. FALLER GmbH

## **BIG IN SMALL THINGS SINCE 1946**

True to our brand claim, we've been in the market for 70 years. In our new, completely revised catalogue you can find everything that makes model-making so fascinating: exciting themes and buildings in H0, N and Z scales that have made the FALLER brand a byword for model houses, landscape building materials for your imagination and creativity, and the unique world of car systems and fairs. Pure technology and emotion in more than 500 pages with a new design and look & feel - with loads of useful tips from our experts.

Thank you for your loyalty. Have fun browsing!

U. M. Ral Horst Neidhard and the FALLER team.

Our Hexenloch mill (Art. 130388) is a real classic and has been in our product range continuously since 1982. Here it is in all its beauty in the Black Forest model railway in Hausach.

# LOOKING BACK TO THE FUTURE

Inventor fever was as prevalent then as now! **The story of our success started 70 years ago.** What began in a small workshop in tiny, tranquil Gütenbach still fascinates whole generations after 70 years: a world of technology and emotion, imagination and creativity.

It should be products that stimulate the imagination and make handiwork and play an authentic experience! Hermann Faller (1915 – 1992) We stand by these guiding principles of past and present. Today, Gebr. FALLER GmbH sets the benchmark for miniaturisation in building model-making and also offers today's model-makers the best in innovative capability. Made in Germany, of course! You'll be excited to know what's coming along in the years ahead.

Entrepreneurs and Inventors: The brothers Edwin (I.) and Hermann Faller.

## On our anniversary

#### A book for all collectors and fans

Come our anniversary in September 2016, Delius Klasing Verlag is publishing an opulent, fully featured illustrated book by Ulrich Biene. Its 184 pages and some 200 colour photos are dedicated to the history of the company and the different milestones and priorities of the Gütenbach traditional company from 1946 until today. The book is available in book stores and from model-railway specialists.

ISBN: 978-3-667-10694-0

#### **New Generation**

### Car System Digital

Our latest innovation is definitively for frequent travellers who love individual road traffic with its many possibilities on the model railroad. The model railway season hits off with a conversion kit that makes it possible to control and integrate analogue vehicles digitally. For all traditionalists: don't worry! The analogue system will continue and be developed further

#### Individualization and project business

### 3D printing and model layout contruction

We have developed extensive expertise in 3D printing over the years and produce top-quality prototypes for our own product range or small series for other companies.

We also produce customised model systems for private individuals and under contract to industry as specials in our own System Construction Department.

Please get in touch at → *vertrieb@faller.de* if you are interested. We will be glad to send you an individual offer for our services.

#### Service 24/7

We offer a comprehensive range of products and service for the world of model-making. And of course it's all online at our own website or on social media around the clock, 24 hours a day, 7 days a week – with loads of background information on products, exclusive tips and many current innovations.

You can also register to receive the FALLER newsletter.

For more information:

# MODEL-MAKING IN PERFECTION

Each model railway system is unique and comes from the creativity, the passion and the countless hours of work of its builder. We would like to present three exhibitions which set standards thanks to their bold designs, technical innovations and spectacular dimensions. Get inspired!

#### The Hans-Peter Porsche TraumWerk

Experience in the Berchtesgaden Region.

With its 400 square metre model railway system, legendary old-timers and a huge collection of rare toys has been exciting its guests since June 2015. At Anger/Aufham in the Berchtesgaden region of Upper Bavaria, Hans-Peter Porsche, grandson of the legendary company-founder Dr Ferdinand Porsche has realised his long-cherished dream. Visitors can experience his unique collection spread over an area of some 55,000 square metres. The building stands out for its modern architecture. The key style element of the building is its layout in the form of a figure eight, recalling the classic shape of model railways and race tracks.

Taken from real life. Snow-clad mountain landscapes, deep gorges and bustling marketplaces: with its detailed replicas of different landscape regions of Southern Germany, Austria and Switzerland, the model railway system is one of the attractions of the TraumWerk.

Up to 40 of the total 180 trains are always under way on some 3 kilometres of track. Realistically crafted scenes in miniature format (1:87), plus background displays using modern projection techniques breath life into the system and delight visitors. Definitely worth a visit!

#### Hans-Peter Porsche TraumWerk

Zum Traumwerk 1 83454 Anger-Aufham info@hanspeterporsche.com

#### **Exhibition opening hours:**

Tuesday to Sunday (closed Monday) Doors open from 9:30 am – 4:30 pm **Restaurant and parking area:** 9 am – 5:30 pm

## Schwarzwald Modell Bahn Hausach

#### **Black Forest Model Railway**

Experience the FALLER Digital Car System in action

It has been possible to admire the Black Forest in 1:87 scale since 2003. The star of the system is the actual Black Forest Railway that has been operating between the cities of Offenburg and Constance on Lake Constance since 1873. Track sections of the famous Black Forest Railway, as well as towns and countryside, have been painstakingly constructed. In fact, with its 400 square metres and 1.3 kilometres of track, the system is Europe's largest model railway display based on a real example.

Between 40 and 50 trains run on the system itself. There are summer festivals, shepherds with dogs, hikers on tiny benches, people working in their gardens, barriers closing and signal lights flashing. The whole display is completed with 50,000 fir trees, 12,000 fruit and deciduous trees, authentic bridges and other accurate replicas along this unique mountain railway.

As the first major model railway layout, the Black Forest Railway uses the Digital Car System from FALLER for its road traffic. Following on from a smaller test installation, all road traffic has recently been controlled in this way and amazes visitors with its accurate siting of vehicles, the user-friendliness of the software, and the direct effect it has on the traffic situation. Do stop by if you can.

#### FALLER Miniature Worlds Model Making Exhibition

Kreuzstraße 9 78148 Gütenbach info@faller.de

#### **Opening hours**

Wednesday to Friday 10 am-5 pm Saturday 10 am-3 pm Open throughout the year. Except on German public holidays. Admission free!

#### **FALLER Miniaturwelten**

Fantasy and creativity! Technology and emotion!

Visit FALLER's miniature worlds! We are the right destination on a trip to the Black Forest for the entire family and all model making fans: an exhibition on more than 300 sq.m. with fascinating show installations, exciting theme worlds, historic toys, and model exhibits. With open workshop, build-it-yourself corner, information on the history of the company and its production, cafeteria, shop, and many other surprises.

#### Exposition – On discovery tour!

Plunge into FALLER's fascinating miniature worlds, and travel through time by hearing about the company's history. Just drop in and admire genuine rarities, current models, and all highlights in FALLER's range of products. Also experience how our products are conceived, developed, and manufactured. All young visitors can even take their first steps in the adventure of model making.

#### Open workshop – Model making from close up!

Experience the atmosphere of our show-workshop revealing all details relevant to the building of inspiring model installations, and exchange views with our specialists. Sumptuous alpine surroundings, sleepy coastal landscapes, colourful funfair areas, and Car System installations with breathtaking traffic. We stage for you whole landscapes full of live and fascinating architecture!

#### Shop and cafeteria – Look, rummage, stroll about!

For those who do not like to come back home emptyhanded, our shop offers plenty of opportunities to rummage about in its comprehensive selection of FALLER articles. Be prepared to contemplate an entire spectrum of exciting miniature worlds gathered within one single building. Discover innumerable details, then enjoy a pleasant break in our cafeteria with self-service.

The building regrettably is of difficult access to disabled people. Visitors with mobility impairment are thus kindly requested to announce their coming by calling us on +49 (0)7723 651-114

# OUR BRANDS

We don't stop at railways! With our innovative products and strong brands, we concentrate on what we do best: passionate model-making and providing top service for our customers.

At Gebr. FALLER GmbH, you'll find a varied assortment of top-quality and well-established collections from the entire plastic model-making spectrum – model-making without borders. Dive into the model worlds of subjects, types and scales.

### WALTHERS

#### Walthers - Go west!

The product range from WALTHERS is the right address for anyone basing their system on America. You can obtain the huge range from America's no. 1 on the model-railway scene from your European FALLER dealer immediately.

WM. K. WALTHERS, Inc. has specialised in the production of top-quality model railway layouts in different scales and has been inspiring hobbyists throughout the entire world since 1932. With its CORNERSTONE and SCENEMASTER brands, it offers the world's largest selection of North American building construction kits and accessories in H0 and N scales. It's definitely worth a look because many kits are also suitable for European layouts. With its WALTHERSTRAINLINE, WALTHERSMAINLINE and WALTHERSPROTO product lines, WALTHERS also has rolling stock based on American models to suit every need and budget.

#### Vallejo - It gets colourful!

FALLER has been selling the colours of Spanish manufacturer VALLEJO since 2015. VALLEJO has since become one of the best-known and most popular brands in model-making. A wide range of varied products awaits you for all applications in model-making.

VALLEJO colours are water-based acrylics suitable for application using a brush or airbrush, depending on the product area. The colour palette is enormous, as are the multitude of accessories and useful tools focused on the business of colour. A series of patination products is available specially for model railways. There is a colour to suit virtually all plastic construction kits, especially buildings. You can find a summary of the product range on pages 488/489.

#### Pola G – 1: 22.5 That's why it's so fascinating.

Many hobbyists prefer larger gauges and are fascinated by a garden layout. FALLER also has suitable accessories for them. With Pola G, we have been manufacturing a range in 1:22.5 scale in the Black Forest for lovers of garden railways for a long time. The models and accessories are top quality, hard-wearing, very strongly made and are ideal for outside use. No question! And of course they can also be used inside if you prefer the indoor versions.

For more information, go to • www.pola-g.de

## Top collections available – worth a browse!

A complete overview of current product ranges and more information can be found on page 513 and at www.faller.de – updated continuously with the product innovations from all brands.

All products are available from your FALLER dealer.

### **TOMYTEC**

#### Tomytec - N in Focus

Japanese manufacturer TOMYTEC is the N scale track specialist and produces rolling stock, track and accessories for the model-making sector. Commuter passenger trains, Shinkansen high-speed trains from the Greater Tokyo area and the very well-known TOMIX track cleaning vehicles are highlights of its product range. These are joined by building kits based on Japanese models and the "Bus System" series of products.

Other top innovations include European bus models such as the Mercedes Benz Citaro bus with an interchangeable chassis in different colours and liveries. A motorised chassis ready to install is available for converting the buses simply and quickly into mobile models, and can be used with other TOMYTEC bus models.

#### evergreen - material for your ideas

With its unique selection of polystyrol elements, "evergreen« appeals to ambitious creatives in the areas of model-making, architecture and design. The enormous variety of shapes and structures from this American traditional manufacturer opens up endless design possibilities, from simple detailing to the complete construction of your own models. "evergreen« products guarantee the highest level of accuracy and stability, combine outstandingly well with the most diverse materials and impress with the quick and easy way the material can be used. Set your ideas free!

HO RAILWAY STATIONS, RAILWAY BUILDINGS

## »Weisenbach« Bavarian station

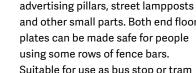

Three-storey station building on a rectangular base with adjoining roofed platform and the suitable platform decoration. Interesting visual elements are the eaves moulding with ancon frieze at the low pitched hipped roof as well as the semicircular arched windows and entrances on the ground floor.

**Epoch I** • New Item 2016 • 420 × 185 × 190 mm

### 120207 Halt

and other small parts. Both end floor plates can be made safe for people using some rows of fence bars. Suitable for use as bus stop or tram stop.

shelter with bench, newspaper stand,

## »Horrem« Station

New standards for the station building on your model railway installation! Faithful reproduction of the original »Green Station« built in Kerpen-Horrem in North Rhine-Westphalia on the regional express line connecting Cologne and Aachen.

That lighthouse project of DB Station&Service AG is the first station to be built to combine holistically the three aspects environment, energy and climate. While the clear structure and the reserved tone of the slate building leave the trains the privilege of being the real stars, the large-area glazed facade and roof provide transparency and ideal daylight penetration for the travellers present in the central hall without any supporting pillar and its waiting area.

The photo-voltaic installation making use of solar energy as well as the grassing of the roof surfaces of varying overhanging length round off that successful ecological model.

Seats, modern lampposts and train destination indicators also form part of the kit.

**Epoch VI** • 448 × 195 × 110 mm

The »Green Station« in Kerpen Horrem is the first climate-neutral station in Germany and was festively inaugurated in the summer of 2014. The second »Green Station« will be put into operation in the Lutheran town of Wittenberg.

The base structure of the original is composed of  $5 \times 5$  m modules that can be enlarged depending on the spatial requirements. The open facades featuring a proportion of glass of 52% ensure high transparency and thus good orientation for travellers, while in the winter months solar energy is used to heat other zones.

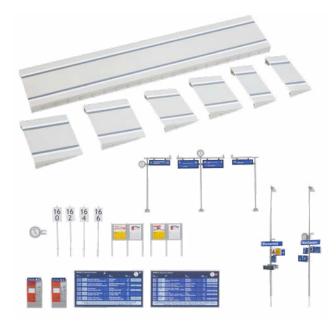

The large roof offers plenty of shadow during the summer as well as space for the photo-voltaic installation and the transformation of

solar radiation into thermal energy. Along with the material properties of the structure a geothermic installation with bores down to some 100 metres deep in the earth forms the physical "core" of the "Green Station".

The clear structure and high transparency within the building makes the orientation easier for travellers who change trains or look for a train about to leave, while an open central waiting lounge provides a pleasant stay in the entrance hall. All entrance halls of the project are intended to offer the travellers a modern innovative principle of building that combines ecological motivation and comfort for customers.

## Modern platform plate with accessories

Two platform base plates with printed safety line and covering pavement. For the platform ends ramps with three different slopes are provided. The kit includes modern decoration elements such as train destination indicators, ticket slot machines, lamps, signs and information panels. The width of the platform can be chosen variably according to useful rated break points built into the part. Halt set consisting of a roofed waiting shelter with bench, newspaper stand, advertising pillars, street lampposts and other small parts. Both end floor plates can be made safe for people using some rows of fence bars. Suitable for use as bus stop or tram stop.

**Epoch V** • 180 × 70 × 12 mm (2x) • 65 × 70 × 12 mm (2x) • 51 × 70 × 12 mm (2x) • 35 × 70 × 12 mm (2x)

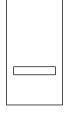

## »Wittenberg« Station

One-storey station building with travel agency, waiting lounge and service facilities in the Lutheran town of Wittenberg, designed according to the original drawings by DB Station&Service AG. Functionality, living quality and appearance of the building are still enhanced by a pioneering package of measures: while roofs covered with grass, large glazed areas and building materials of vegetable origin such as slate and bricks determine the overall impression, geothermics, photo voltaic technology and infiltration utilities provided for rainwater allow to operate the original building with a most climate-friendly vision.

After the completion of the »Kerpen-Horrem« station building that was granted several awards already, it is the second environmentally friendly high-tech complex of the pilot project »Green Station«. The original with a surface area of 695 m² will be completed at the end of 2016 – just in time before the 500th Anniversary of the Reformation movement initiated in the Lutheran town of Wittenberg.

Epoch VI • New Item 2016 • Patinated model • 465 × 195 × 110 mm

## **Know-how**

#### Glass facades:

When glueing glass some issues have to be mastered, the task requiring good preparation to produce great results. Please use Art. 170490 Super Expert adhesive.

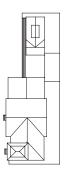

Cautiously remove beforehand any residues of burrs using a sharp knife or a file. When glueing basically use as little adhesive as possible. Take the adhesive's capillary effect into account. On window frames or sliding doors first place the glass plate and then fix it from behind with a tiny point of glue.

Moreover, to avoid fingerprints it is advisable to wear white thin cotton gloves (when handling instant adhesive, too). Then there are no obstacles to achieving a good result.

## »Volgelsheim« Station

Original replica of the train station located in the Alsace region, but can be used worldwide due to its construction.

Large-volume building in sand stone construction with floor-level entrance and exit doors and laterally adjoining waiting room. The colour scheme of the wall structure is represented true to life with an elaborate printing technique. The separate side building in the same colour scheme serves as a sanitary building.

**Epoch I** - Patinated model - 595 × 217 × 216 mm

## The gem among railway stations in Alsace-Lorraine

Volgelsheim is now one of the last fully preserved railway stations in the Alsace. The Prussian style construction shows typical features of the former railway station buildings. The keep-style clock tower with four roof slopes is abutted staircase-style by two additional buildings: a two-story station building which housed the station master's quarters in the upper floor, and a single-story annex used as an office. The WC building with the lamp storage room is detached. Today the Volgelsheim railway station houses various collections and interesting exhibits about »Alsatian Railway« and is the starting point of excursions by historical steam locomotives and carriages with open platforms.

#### More information:

• www.touristenbahn-elsass.del

## »Bonn« Station

Many accessories which realistically enliven the appearance of the station such as: route indicators, loudspeakers, clocks, wastepaper bins, train-formation indication boards, benches, timetable boards, illuminated kiosk, luggage lockers, ticket offices and various advertising signs. Particularly interesting effects result by illuminating the centre reception building.

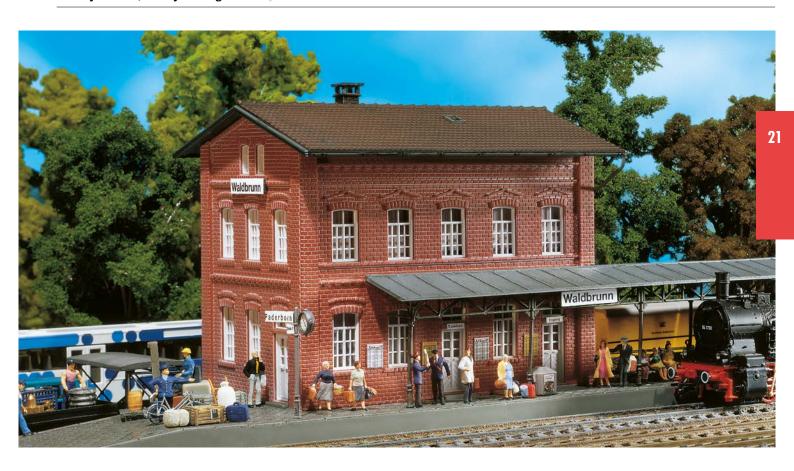

The kiosk and ticket office here can also be illuminated. The intermediate and corner buildings can also be illuminated. Setting up this large model is significantly simplified by the fact that the five building complexes are individually assembled and are then only arranged to form the complete model.

**Epoch I** • 700 × 160 × 130 mm

A classic urban station with richly decorated facades, spacious entrance hall and many decorative accessories for the interior and around the building.

**Epoch I** • 446 × 160 × 130 mm

## »Waldbrunn« Station

Typical provincial-town brick station, with roofed platform in cast iron construction. For extension the platforms art. 120204 are suitable.

Epoch I • Patinated model • 240 × 125 × 135 mm

#### 120204

## 2 Covered platforms

Its cast-iron construction harmonizes with station »Waldbrunn« (art. 110099). Clock and train target indicator. It can be extended to fit requirements.

Epoch I - Patinated model - $358 \times 55 \times 62 \text{ mm } (2 \text{ x})$ 

151004 **Engine drivers** 

## »Güglingen« Station

Attached freight station, covered waiting room and separate utility building.

**Epoch I** • Railway station: 308 × 140 × 142 mm • Sanitary building: 151 × 77 × 75 mm

#### 110124

## »Öhringen« Station

Traditional railway building in the style of Öhringen central station. Well-balanced design language and front arrangement of the three-storey building through use of storey cornices, pilaster and rows of even windows.

**Epoch II** • Patinated model •  $335 \times 112 \times 180 \text{ mm}$ 

#### 110097

## »Blumenfeld« Wayside stop

with built-on goods shed.

**Epoch II** • 250 × 140 × 120 mm

## »Schwarzburg« Station

The railway station »Schwarzburg« built around 1900 is the attraction of any model instalaltion. With halftimber construction, open, roofed shelter platform, richly structured hip roof and attached goods shed. With many carefully designed details - thus, the waiting room is completely equipped, the doors can be opened and many beautiful accessories for the building are contained in the construction kit.

**Epoch I** • 550 × 185 × 230 mm

## »Neustadt/Weinstraße« Railway station

Original reproduction of the city railway station built around the turn of the century, with detailed, abundant interior furnishings, opening portal doors, decoration parts and interesting internal lighting effects (not enclosed).

Assembling the model is considerably simplified in that the various blocks of the building aisles are separately assembled and then joined to form the entire building.

**Epoch I** • 900 × 284 × 280 mm

150701

151086 **Tourists** 

Sitting people

Sitting persons I

## »Neustadt/Weinstraße« Platform bridge

Faithful reproduction of the original footbridge built in Neustadt, to go with FALLER station »Neustadt/Weinstraße« (art. 110111). Present-day steel and glass construction with two covered stairways, bridge spanning two tracks and two annexed elevator towers (without function). The width of both rising and descending flights of stairs annexed to the bridge can be modified according to a module to match any type of track. Several units can be built side by side. Suitable for catenary operation. Without platforms. Can be used with any type of FALLER platform.

**Epoch VI** • 320 × 240 × 126 mm • Clearance: 83 mm • Width of stairs: 28 mm

#### 120111

## »Neustadt« Overhead signal tower

Covering 3 tracks. Fully equipped signal tower room. The original is located in Neustadt/Weinstraße. Catenary operation possible.

Matching the train station »Neustadt« (art. 110111).

**Epoch II** • Patinated model • 280 × 168 × 210 mm •

Clearance: 80 mm (without track)

## HALTS AND COUNTRY RAILWAY STATIONS

Boarding and getting off. Halts or simple stations are increasingly used on secondary lines, on single tracks and in rural areas. These items are ideal when constructing a layout with limited space and several planned access points. **You'll find matching accessories from page 476.** 

#### 110091

### »Hintertupfingen« Wayside stop

with glass-roofed vestibule and station clock; especially suitable for small layouts and branch lines.

**Epoch II** • 121 × 78 × 49 mm

#### 110092

### »Zindelstein« Wayside stop

A typical country station.

**Epoch II** • 202 × 102 × 75 mm

#### 110086

### »Steinbach« Wayside station

You can use this small, roofed shelter with benches and two flanking rooms as station for smaller villages or as protection against bad weather for travellers on the open road. Of course, you can also use it as bus or tram shelter.

**Epoch II** • Patinated model • 118 × 51 × 51 mm

#### 110084

## »Tschäppel« Wayside station

Laser-cut model of rural »Tschäppel« halt with bench and curved half-hipped roof designed in accordance with the original located in the Swiss valley of Emmental. Walls and timber work of the model are made of real wood.

Epoch I • Lasercut model • 62 × 38,5 × 56 mm

## »Litzirüti« Station

Progress and transport - For Grisons a point of honour! Limited once-only edition according to the original model of the more than centenary Litzirüti station built on the Arosa line in the style of a three storey chalet, with masonry plinth, balcony and adjoining goods shed.

This model certainly owes its high recognition value to the inscription on the facade and to the perfect connection of the shed roof above the extension on the side.

#### Chur-Arosa railway line

The Chur-Arosa line, also called the Arosa Railway, is a Swiss one-metre wide narrow-gauge line. It was built in 1914 to connect Chur, the principal place in the canton of Grisons, with the health resort of Arosa. It has been integrated into the net of the Rhaetian Railway RhB since 1942. The former company name is still used today as a synonym for the railway line.

(Source: Wikipedia)

## »Murtal« Timber storage shed

For the treatment of engines. Closed wooden hut with irregular planking and adjoining shed for the dry storage of kindling. All lateral walls of the model are made of real timber.

**Epoch I** • New Item 2016 • Lasercut model • 102 × 92 × 81 mm

#### 120245

## »Langwies« Goods shed

Buildings of the Arosa line. Laser-cut model of the goods shed at »Langwies« station with a stone pedestal, an asymmetric double pitch roof and characteristic ornamental verge boards. The model's lateral walls are to a large extent made of real timber.

**Epoch II** • New Item 2016 • Lasercut model • 154 × 60 × 62 mm

### Covered platform

with accessories. Platform extension with track lowering. For all track types. Illumination with strip light bar (art. 180654).

**Epoch II** • 295 × 72 × 64 mm

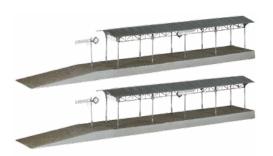

#### 120192

### **Platform**

Covered platform with 2 extension pieces. For all track types. Illumination with strip light bar (art. 180654).

**Epoch I** • 454 × 48 × 67 mm

#### 120204

### 2 Covered platforms

Its cast-iron construction harmonizes with station "Waldbrunn" (art. 110099). Clock and train target indicator. It can be extended to fit requirements.

**Epoch I** • Patinated model • 358 × 55 × 62 mm (2 x)

#### 120191

### **Platforms**

2 pieces, suitable for the railway stations »Bonn« (art. 110113) and »Mittelstadt« (art. 110115) and for the train shed (art. 120180). For all track types. Can be illuminated with 1 light bar of art. 180659.

**Epoch I** • 417 × 48 × 52/68 mm

#### 120203

### Platform extension

Without roofing, for extension of platform (art. 120191), with roofed platform exit. For all track types.

**Epoch I** • 418 × 48 × 67 mm

## Platform with drive

With the built-in drive mechanism, the figures on the platform are able to move about. 6 figures and drive mechanism (12-16 V, AC voltage) are included. Extendable with platform art. 120201 (without drive mechanism). Suitable for Märklin C-rail and all other rail types. Illumination with strip light strip (art. 180654).

## 120181

### **Platform**

Covered platform with passenger exit. For all track types. Illumination with light bar (art. 180654).

**Epoch I** • 338 × 92 × 84 mm

#### 120201

### **Platform**

Can be combined with platform art. 120200. Can be used for Märklin track C and all other track types. Illumination with light bar art. 180654.

**Epoch I •** 375 × 76 × 74 mm

## ICE platform

modern design, with a glazed waiting room, benches, waste paper baskets and information boards.

Optionally extendable. Can be illuminated with light bar (art. 180654).

**Epoch V** • 634 × 94 × 63 mm

#### 120188

### Platform with kiosk

Glass covered platform with kiosk, benches, advertising boards etc. 2 platform extension pieces.

Can be illuminated with 1 light bar (art. 180659). For all track types.

**Epoch III** • 487 × 53 × 75 mm

#### 120187

### **Platform**

Same model as art. 120188, but without decorative accents. Illuminate with 1 batten light fitting (art. 180659).

**Epoch III •**  $487 \times 53 \times 75 \text{ mm}$ 

#### 120206

### Platforms/Base plates

Platform set allowing any possible combination, with base plates, loading platforms and stairs suitable for the design of a railway platform and the placing of a station or a halt.

**Epoch I** • 145 x 120 x 10 mm (3 x) • 80 x 40 x 10 mm (3 x)

120205

Flexible platform edges Epoch V • 1440 × 8 × 13 mm

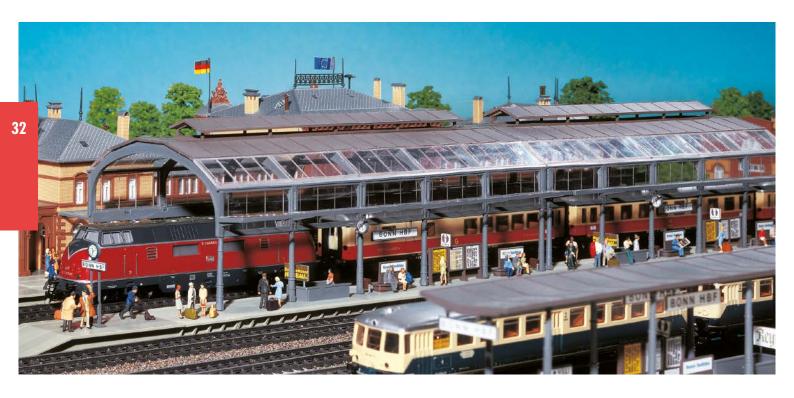

180609

**Modern lifts Epoch V** • 52 × 31 × 122 mm • 52 × 31 × 37 mm

180654

**2 LED bar spotlights, warm white** Total length: each 180 mm

## Train shed

According to the style and size, the FALLER models art. 110113 and art. 110115 can be recommended. Steam and catenary operation possible. Passage width can be varied so that the covered platform can be run through double-track with all standard track systems.

The roof is only clipped on and can be removed if necessary. Can be illuminated with 1 light bar (art. 180659).

**Epoch I** • 417 × 178 × 122 mm

#### 180664

## Thermit welding

Use our LED set to dramatically illuminate the seamless joining of rail bonds using thermit welding.

**Epoch IV** 

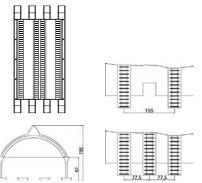

#### 120233

## Train target indicator

The swivelling indicator panels pointed the attention to the incoming or outgoing trains. With matching benches. In Germany this old design was popularly called »supple-jack«.

**Epoch II** • 13 × 6 × 35 mm

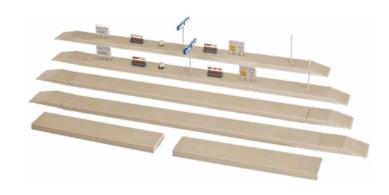

## Covered platform

Sophisticated, spacious covered platform. Passage width suitable for 3-track traffic with C track and all other track types. Catenary operation possible. Can be constructed in tandem or side by side multiple times. Can be illuminated with light bar (art. 180654).

**Epoch I** •  $564 \times 270 \times 195 \text{ mm}$  • Clearance: 82 mm • Platform width: 37,5 mm • Space between centre of tracks: 77,5 mm

#### 120197

### Platform extension

Without roofing, for extension of the platforms of covered platform (art. 120199). For all track types.

**Epoch I** • 486 × 38 × 67 mm

#### 120186

### Platform decorations

The package contains various billboards, timetables, benches, waste baskets, clocks and train target indicators. To go with the covered platform (art. 120199).

**Epoch V** 

## Train washing system

For the depot station and repair shop! That mechanical train and tram washing system ensuring the outside cleaning of your rail vehicles saves the washing with scrubbing brush and water hose. During the passage some columns perform the prewashing and rinse while various lateral stationary pairs of rolls ensure the cleaning. The framework structure supplied allows installation in the outdoors. Model without function.

**Epoch V** • New Item 2016 • 516 × 63 × 77 mm

#### 120114

## »Dahlhausen« Signal tower

Miniature of a Prussian switch tower on stilts with corrugated sheet covering and inner furnishings from the collection of the Bochum Railway Museum. The stilt construction reduces the amount of space required to a minimum.

**Epoch II** • Lasercut model • 125 × 48 × 105 mm • Clearance: 80 mm (without track)

#### 120118

#### Signal tower interior equipment

For furnishing signal-tower rooms with typical devices.

Epoch I

# Overhead signal tower

A structure spanning two tracks. Catenary operation is possible.

**Epoch III** • 179 × 168 × 160 mm • Clearance: 88 mm (without track)

# »Konstanz« Overhead signal tower

This signal tower was built in 1886 in the area of the Constance railway station. The original installation on stilts above a transit rails as well as panorama glazing are due to the fact that a good view of the rail system for the entire station area had to be ensured. Today, the original signal tower in its original colours is located in Blumberg in the area of the »Sauschwänzle-Museumsbahn«. This signal tower is versatile and space-saving as it is installed across a rail.

## Covered footbridge

with open staircases and covered, closed overhead walkway. Can be assembled in various shapes. Up to 4 rails spanning.

**Epoch II** • 273 × 195 × 138 mm • Clearance: 94 mm

#### 120178

## Foot bridge

Crossing with two staircases for double-tracks. There are various options in building the staircases.

**Epoch II** • 233 × 177 × 83 mm •

Clearance: 70 mm

#### 120179

## Foot bridge

Spans up to four tracks.

**Epoch III** • 264 × 188 × 118 mm •

Clearance: 95 mm

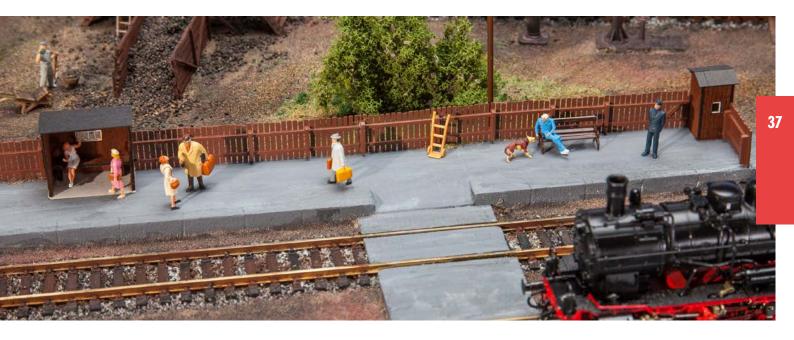

#### 120487

## Steel bridge

2-rail, with support columns. Suitable for C-rail and all other rail types.

**Epoch II** • 358 × 134 × 97 mm

# Stop building with platform doors

Access only with a valid ticket! Platform barrier consisting of lattice fencing, small waiting shelters for the passengers and a roofed booth for a railway employee. Both timber elements of the model are manufactured by the laser-cut process.

**Epoch I** • Lasercut model • Shelter: 14 × 14 × 25 mm • Stop: 30 × 20 × 28 mm • Fence: 329 × 15 mm

#### 120240

# Modern bus shelter with platform

Modern stations in glass optic with destination display, ticket counter, information boards, platform lights (without function), as well as a flexible platform edge.

#### Epoch V -

Shelter: 34 × 18 × 32 mm • Stop: 34 × 34 × 32 mm •

Flexible platform edge:  $360 \times 8 \times 13 \text{ mm}$ 

#### 120226

## Rail route sign set

signs and information boards for railway traffic.

Epoch II

## Signal man house

in clinker construction, matching the clinker railway buildings. Material mix of coloured plastic, wood, and special cardboard parts.

**Epoch II** • Patinated model • Lasercut model • 70 × 68 × 65 mm

#### 120130

## Gatekeeper's lodge

with shed attached on one side and board cladding of the top storey.

**Epoch II** •  $100 \times 92 \times 84 \text{ mm}$ 

#### 120211

## Trackside buildings/Equipment shed

Tools and work equipment can be kept in the sheds. Is also ideal for use as a railway linesman's house.

Epoch I • Patinated model •

39 × 41 × 45 mm • 29 × 34 × 45 mm • 23 × 26 × 28 mm

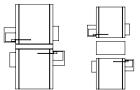

# Railway gate with drive parts

Modern level crossing with printed gates, warning lightings and St. Andrews crosses. Includes the driving parts allowing to retrofit the kit with two servos.

Suitable for FALLER Car System!

**Epoch V** • New Item 2016 • Movable model • Single-track: 295 × 210 × 43 mm • Double-track: 371 × 210 × 43 mm

#### 120243

## Unprotected level crossing

Set intended for the design of the area between the tracks. Covering flush with the road using a plank, a concrete filler block or a rhomboid metal insert, all supplied. Suitable for all kinds of H0 tracks (also C-M-K) and Car System.

**Epoch III** • New Item 2016 • 113 × 14 mm (3 x)

#### 120170

## Field track crossing

with gatekeeper's house and movable barriers. For all straight or curved model tracks.

#### 180630

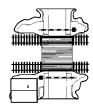

## 2 Andrews crosses with warning lights

for unprotected level crossings, 12-16 V, AC/DC voltage. Switching printed circuit included.

Epoch III

# Level-crossing with gatekeeper's house

This level-crossing is fitted with an electric drive that realistically opens and closes the gates slowly and silently. Can be used in single or multi-track operation on all straight track types (12-16 V, AC voltage, 60 mA).

**Epoch II** • incl. motor • Single-track: 220 × 173 × 75 mm • Double-track: 220 × 255 × 75 mm

#### 120173

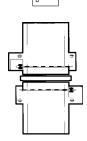

## Guarded level crossing

Level-crossing with gatekeeper's house, for all straight and curved model tracks.

**Epoch II** • 150 × 145 × 32 mm

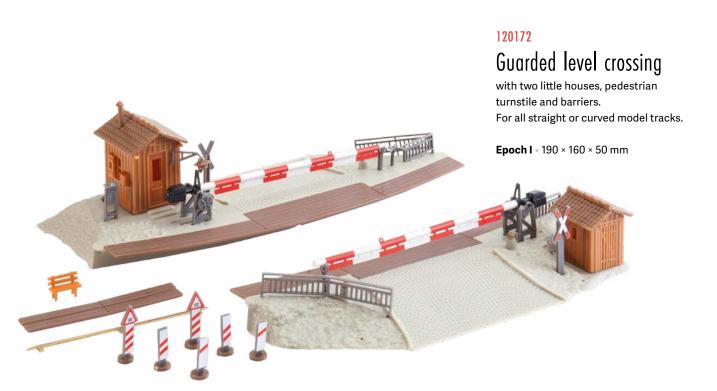

# Protected level-crossing

This microprocessor-controlled level-crossing is equipped with 4 flashing St. Andrews crosses, 2 gates over the entire width of the road and a gatekeeper's lodge. Function is triggered through a sensor, digital input is also possible. Suitable for all types of track and several juxtaposed tracks.

Can also be used in the Car System for right-hand and left-hand traffic, on one or two lanes. Stopping places have to be bought separately. 12-16 V AC/DC.

**Epoch III** • incl. motor • Level crossing: 310 × 210 × 44 mm • Railway lodge: 72 × 65 × 59 mm • Depth: 34 mm

Makeshift control center

Our makeshift control center model is based on a discarded blunderbuss. The kit includes two different foundations: a brick-lined architrave block and a timber scaffolding manufactured with modern laser cut technology.

**Epoch II** • Patinated model • Lasercut model • 159 × 48 × 73 mm

#### 120215

## **Electronic Signal Tower ESTW**

Present-day version of the tower controlling the position of signals, points and track locks through electronic channels. It is gradually taking the place of mechanical signal towers.

Clinker-built construction with the associated antenna masts ensuring the transmission of signals, and a decoration sheet.

**Epoch VI** • Patinated model • Signal tower:  $119 \times 40 \times 38$  mm • Radio mast:  $10 \times 10 \times 233$  mm

#### 120216

## **Electronic Signal Tower ESTW**

Design identical with that of model art. 120215. The decoration sheet additionally contains multicolour graffiti.

#### Epoch VI -

Signal tower: 119  $\times$  40  $\times$  38 mm  $\circ$  Radio mast: 10  $\times$  10  $\times$  233 mm

## Electronic signal towers ESTW

are gradually replacing conventional mechanical signal towers. These are railway installations in which points, signals, track locks and other moving devices are positioned by means of electric actuators. Signals are exclusively light signals. Outdoor devices are placed at a maximum distance of 6.5 km. High antenna mast transmit the commands.

## »Mittelstadt« Signal tower

This half-timbered building has an outside staircase and interior details on the second floor.

**Epoch I •** 83 × 62 × 101 mm

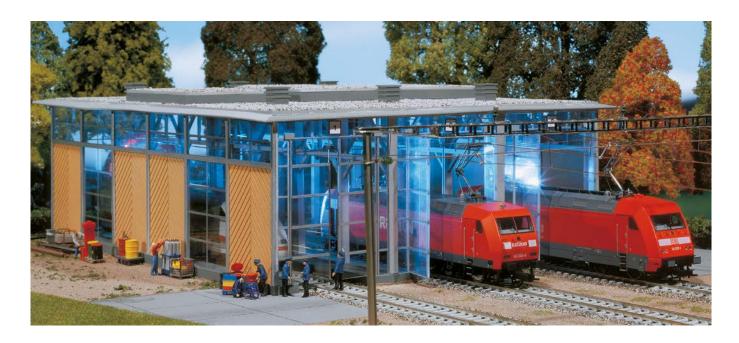

#### 120121

## Signal tower

Brickwork construction, slating and half-timbered construction in the upper region of the signal tower.

**Epoch III** • 130 × 80 × 120 mm

#### 12021/

# Electric engine shed, three tracks

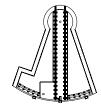

open, transparent glass construction, with three stalls, suitable for engines up to 310 mm length over buffers. The doors can slowly open and close by building in a drive unit (art. 180624, 12-16 V AC/DC voltage). Mechanical parts attached. Suitable for use with a traverser and all sorts of tracks. Catenary operation possible. Several models can be juxtaposed.

**Epoch VI** • Patinated model • Movable model • 360 × 251 × 118 mm • Door width: 53 mm • Clearance of doors: 80 mm • Space between centre of tracks: 77,5 mm

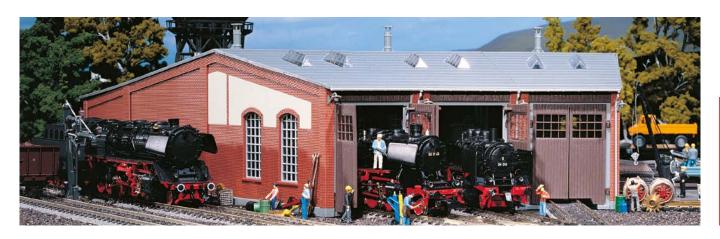

# Segment turntable with servo

Small turntable with a branch angle up to 37.5 degrees for saving space when using locomotives for example in narrow end stations. The combination of plastic and natural material brings together mechanical precision with an appealing look: The track pieces and platform for hand operation are made from real wood. Rail sections with a length of 171.5 mm as well as a powerful servo are included with the track switch. Connection is through servo control, item 180725. Also suitable for Märklin neutral conductors.

**Epoch II** • New Item 2016 • incl. motor • 179 × 154 × 17,5 mm • Depth: 53 mm

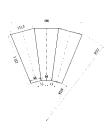

### 3-Stall roundhouse

This annex can be used separately or for the roundhouse. In the event of a direct entry via the turntable, engines with a length of 290 mm over buffers can be housed in the first stall and engines up to the length over buffers of 220 mm can be put in the other two stalls.

**Epoch I** • Movable model • 340 × 420 × 120 mm

#### 120177

# 3-Stall engine roundhouse (long type)

As a separate engine house or together with round-house art. 120176. For engines with up to 290 mm length over buffers. The most common turntables of Märklin, Fleischmann and Roco can be used. Junction track angle: 15°. Only every second exit of the turntable can be used with 7.5°.

Epoch I • Movable model • 324 × 440 × 120 mm

#### 120229

### Trackside accessories

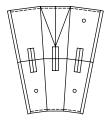

Because of love for the details. Various decorative elements around the track area, such as electric train pre-heating equipment for the temperature control of locomotives and wagons, loading gauges, cable pull guides for point machines, hectometre stones, two manufactured buffer stops made by means of a laser cut process (standard and industrial), as well as a signal telephone with small shelter-house.

**Epoch II** • Patinated model • Lasercut model

# Roundhouse with drive components

Three-platform, expandable engine shed with 7.5 degree partitioning with ridge turrets and large side and rear windows for the locomotives in your collection with up to 290 mm overall length. Servo drive components for all gates, as well as numerous accessories such as spindle lifting jacks, engineer waiting shelter and transformer station are included in the kit.

**Epoch II** • Patinated model • Engine shed:  $378 \times 322 \times 125$  mm • Engineer waiting hall:  $41 \times 38 \times 38$  mm • Transformer station:  $51,5 \times 34 \times 38$  mm • Spindle lifting jack:  $88 \times 20 \times 40$  mm (2 x)

#### 120278

## Spindle lifting jacks

Lifting jacks with supports for the maintenance and repair of rail vehicles at the wagon depot. Optionally equipped for the illustration of the operation with a motor or with a hand-operated crank (non-functional model).

**Epoch II** • 88 × 20 × 40 mm (2 x)

## Locomotive shed/ engine workshop

Space for vehicles up to 250 mm length over buffers. The chimney of the workshop outbuilding is ready for using a smoke generator (Seuthe no. 7). A particularly important feature of this model is the pass-through option, as both end walls feature large doors. The modular construction allows for variable configurations. Multiple buildings may also be constructed side by side.

**Epoch I** • 266 × 150 × 275 mm • Gate overhead clearance: 68 mm

#### 120165

### Two-stall engine shed

bricks-and-mortar-built, with 2 shelters for locomotives up to 270 mm length over buffer. The gates are automatically closed by the arriving locomotives and again opened when departing. Catenary operation possible.

**Epoch I** • 365 × 195 × 130 mm • Track centre clearance: 80 mm

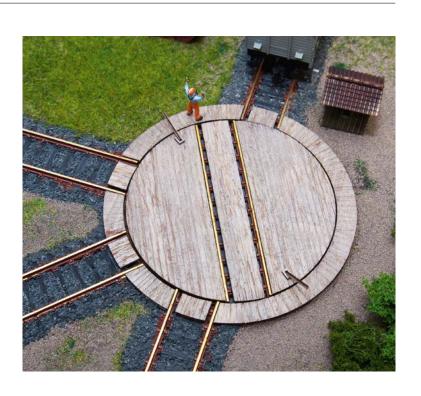

# Small wagon turntable with servo drive

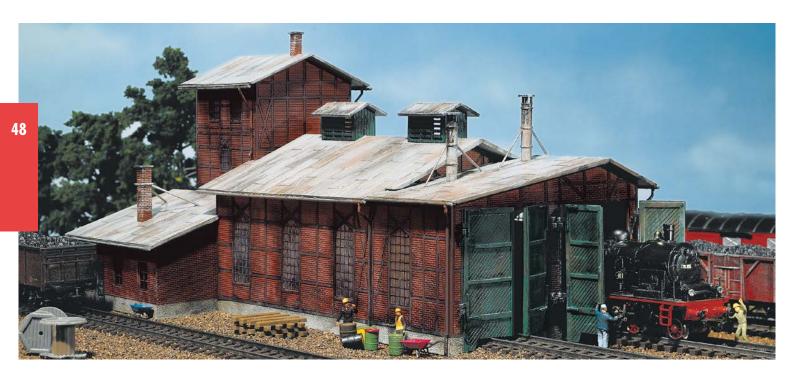

Laser-cut model of a manually operated turntable with wooden casing and two exits for the distribution of wagons at small depots or factory installations with freight service. It is driven by the included servomechanism. The building kit also contains inserts for Märklin K tracks, 2-conductor rails and the tracks H0m and H0e.

Required track length: 90 mm. Use our new servo (art. 180725) as the

**Epoch II** • Lasercut model • incl. motor • ø 110 × 24 mm

## Engine house, 2 stalls

with 2 shelters for locomotives up to 190 mm length over buffer. The gates can be opened and closed manually.

**Epoch II** • 305 × 164 × 138 mm • Space between centre of tracks: 63 mm • Clearance of doors: 65 mm

#### 120235

## DB-administration building

Two-story federal railway administration building in clinker construction, outside wall, bike stand with bikes and floor plate with parking areas.

Epoch I • Patinated model • 238 × 139 × 135 mm

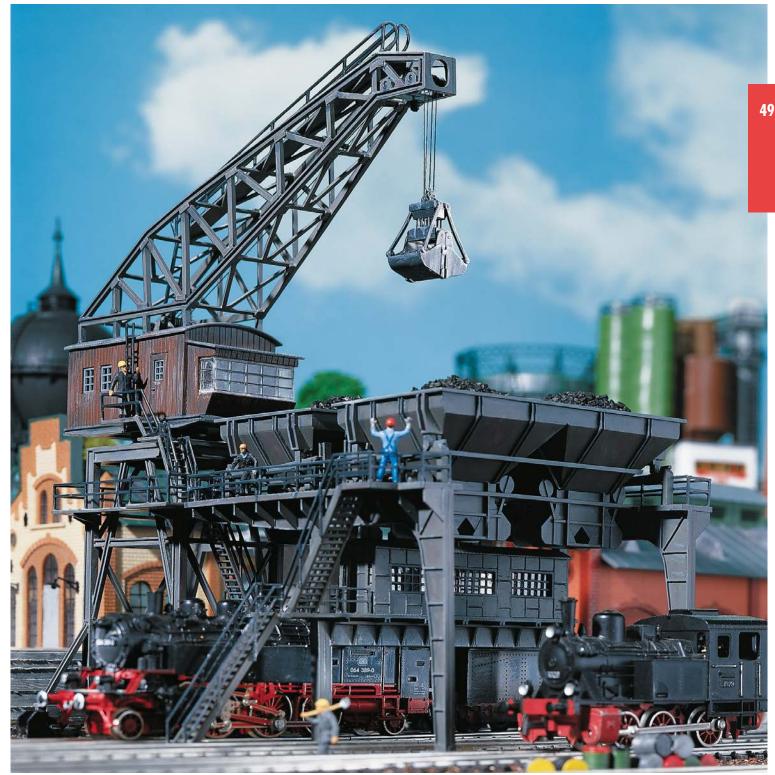

#### 120139

# Compressor house, pipe blow frame, poker stand

The construction kit contains a compressor house with attachments and accessories, a stationary pipe-blasting frame and a coal rake rack with the respective hand apparatus for cleaning and removing slag from the steam engine.

**Epoch II** • Compressor housing:  $90 \times 75 \times 70$  mm • Pipe blasting frame and coal rake rack:  $70 \times 35 \times 50$  mm

# Coaling station

Prototypical coaling facility complete with concrete blockhouse, two coal conveyors (170 mm each), gantry crane and a bag of »coal« as realistic decor.

The crane cabin and boom can be turned by 360° with the FALLER motor (art. 180629, not included). The crane can be manually moved along the 340 mm mock track. The design of the concrete blockhouse complies with the Deutsche Bahn uniform concrete blockhouse. The gantry crane is also sold separately (art. 120162).

**Epoch II**  $\circ$  340  $\times$  274  $\times$  245 mm  $\circ$  Movable model  $\circ$  Clearance: 66,5 mm  $\circ$  Gate frame overhead clearance: 73,5 mm  $\circ$  Parallel track clearance for overhead hopper: 67,4 mm

## Gantry crane

The large gantry crane fits in all areas in which cranes are used: ports, industry, railways etc. The crane can be equipped with a load hook, spade lug or logging tongs. With the FALLER motor (art. 180629, not included) the driver's cabin can be turned 360° with the arm. The crane can be manually moved on the 340 mm long track dummy. The crane is identical to the crane in coaling station kit (art. 120148). **Epoch II** • 340 × 58 × 245 mm • Movable model • Gate frame overhead clearance: 74 mm

#### 120164

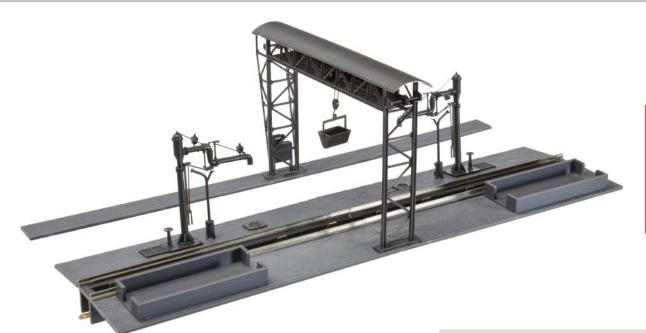

## Gantry crane

This very typical railway model can not only be used in depots, but wherever something has to be lifted and loaded.

A gantry crane can be built with the parts of this construction kit which spans over two or three tracks.

**Epoch I** • 137 × 30 × 100 mm • Clearance: 80 mm

# Cinder removing facility with gantry crane

Kit includes a gantry crane, 2 heated swivel water spouts (DB NW 200), 2 slag hoppers, 1 ground plate (344 mm) with slag pit, rolling slag carriage, and bucket. Above the slag pit the ground plate is provided with two driving rails. It can be connected to all types of tracks, even those with middle conductor, except Märklin's C track.

**Epoch II** • 344 × 147 × 102 mm • Parallel track distance: 67 mm

#### 120127

### Gantry crane

Timber construction as it is sometimes still used at small railway stations.

**Epoch I** • 130 × 56 × 106 mm • Clearance: 70 mm

#### 120137

## 2 Swivel water spouts

These delicate swivel water spouts with rotary upper parts feature an external heating system. 2 gully grates are also included.

**Epoch II** • 78 × 15 × 70 mm (2 x)

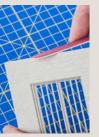

#### Glueing properly:

There is nothing to it. However, a few details should be observed when building models and glueing small parts to achieve good results.

First accurately separate the parts to be assembled from the injected feed system. It is best to use the special side cutter (art. 170688). Properly hold the cutter and pinch off with the straight side against the part. Cautiously remove any residues of burrs using a sharp modeller's knife (art. 170867) or an abrasive file (art. 170689). When glueing, basically use as little adhesive as is really required. Less often is more.

For rather large areas, roofs for instance, we recommend our EXPERT adhesive (art. 170492). For spot glueing, for small and filigree parts requiring short drying time, please use the SUPER EXPERT adhesive (art. 170490).

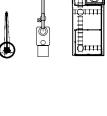

## Small Bw-set with servo drive

Bw-set consisting of movable loading crane, two heatable, hinged water standpipe cranes with flexible end flanges and water outlets, as well as small-scale coal handling with coal trams and stationary, movable crane. The modelling kit contains drive components for all three motors, as well as a servo. Simultaneous operation of the models possible with the addition of a servo.

Epoch II - Patinated model - incl. motor - Coal handling: 207 × 80 × 110 mm - Loading crane: Ø 26 × 83 mm -Water crane:  $78 \times 15 \times 70 \text{ mm}$  (2 x)

#### 120232

#### Steam crane

Lasercut model of a slewing crane according to a historic model used for the shunting as well as the loading and unloading of goods wagons. Versatile use on tracks in railway repair shops or for the handling of freight in industry or harbour scenes. Includes the driving parts allowing to retrofit the kit with a servo, and a set of rails as well.

Depth: 42 mm

#### 120129

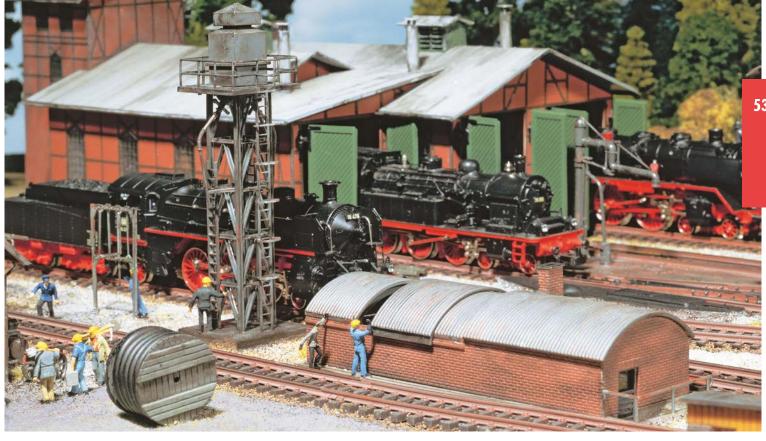

## Loading crane

This small, rotating loading crane can be installed wherever goods must be handled. Without raising or lowering function.

**Epoch I** • Ø 26 × 83 mm

## Sand house

A model set for the steam depot. Sanding tower with high-level tank (like art. 120138), sand house with slidable roof for loading and a bag of »sand« for realistic decoration.

**Epoch II** • Sand house: 155 × 55 × 32 mm • Sand tower: 37 × 37 × 134 mm

#### 120138

## Sanding tower

Faithful reproduction of a filigree steel structure, with vertical storage container. To build interesting combinations with another sanding tower, a bridge gangway is part of the kit (as 120146).

**Epoch II** • 37 × 37 × 134 mm

#### 120141

### Trackside accessories

Cable drums, buffers, telephone cabins, sleeper stacks, water spout, etc.

**Epoch II** 

# Handling facility with servo drive

The model depicts the dismantling of a steam locomotive. Combustion residue is directly removed in a tram in the culm pit and the tub is subsequently hoisted upward with an inclined lift, tipped out and emptied into a waiting slag car. The kit is equipped with drive components, as well as a servo for the hoisting and lowering movements of the slag tram.

Epoch II - Patinated model - incl. motor - 171 × 100 × 151 mm

#### 120284

## Double sanding tower

Two steel towers linked with each other through a platform and featuring cross girders and ladders to ensure the filling of engines with brake sand.

**Epoch II** • New Item 2016 • 105 × 38 × 135 mm

#### 120220

### Coal lift

Lift for loading steam engines with coal in the service area. Motor frame attached. Without function.

Epoch I • Patinated model • 90 × 40 × 132 mm

## Small coaling station

With manually movable loading crane and tender. For small service areas.

**Epoch I** • 210 × 80 × 130 mm

#### 120147

## Coaling station

in the old style with manually pivoting crane and two coal tubs (German: »Hunten«).

**Epoch I** • 207 × 80 × 110 mm

#### 120222

## Small coal handling system

Laser-cut model of simple coal handling and loading platform as a supplement to the provisions of the small and secondary railways. Using ladders with the help of wicker baskets, the fuel material is tipped by hand into the tender. The coal is included in the kit accessories.

Epoch II - Lasercut model -

Barn:  $58 \times 27 \times 18$  mm • Loading platform:  $86 \times 19 \times 35$  mm

#### 120136

## 2 Inspection pits

each 172 mm long, with rails moulded on (same as base plate of art. 120149).

**Epoch II** • 172 × 57 × 16 mm

## Goods wagons

Discarded. Two covered goods wagons installed by each other, without wheel set, to be used as sheds. Side walls made of stained real timber.

**Epoch III** • New Item 2016 • Lasercut model •  $94 \times 68 \times 39 \text{ mm}$ 

#### 120133

## Engine drivers' cabin, 2 linemen

Alongside the railway line there are many types of shelters for the linemen.

In the waiting shelters for the engine drivers the locomotive personnel is waiting for the servicing of the locomotives.

**Epoch II** • Engineer waiting hall:  $32 \times 29 \times 37$  mm • Trackside shanties:  $27 \times 34 \times 29$  mm (2 x)

#### 120140

### 3 Trackside shanties

Tools for the maintenance of road beds are stored in them.

**Epoch I** •  $70 \times 52 \times 47$  mm •  $47 \times 39 \times 47$  mm •  $30 \times 28 \times 30$  mm

180916 2 Trolleys und 2 mining carts for H0e Epoch I

180617 4 transport boxes and 4 cable rolls Epoch II • Lasercut model

**180612 60 Palettes Epoch III** • 14 × 9 × 2 mm

## »Haltingen« Water tower

A beautiful old water tower with spherical container and filigree steel girder construction. Shack as entrance to the pumping station, well cover and vent pipes are included.

Constructed in 1908, the prototype with its 500 m<sup>3</sup> container stands at Haltingen near the Swiss border.

**Epoch II** • Ø 99 • H: 235 mm • 89 × 47 × 41 mm

## »Bielefeld« Water tower

Water tower from Bielefeld with masonry entrance area, clinker tower and spherical water holder. Such water towers are not only used in the service area, but also for the water supply of towns.

**Epoch II** • 91 × 90 × 245 mm

# Diesel fuel facility

The filigree oil spout with jib and operator's stand is used, in this service area, to tank up diesel engines and steam engines powered by diesel fuel. The facility consists of 2 flat-bottom diesel tanks and an upright fuel oil tank. Several tanks can be juxtaposed by using the stairs, catwalk and railings included.

**Epoch III** • 220 × 110 × 105 mm

#### 120145

## Diesel oil facility

The petrol station with 2 fuel tanks is intended for model layouts on which diesel locomotives also run.

**Epoch III** • 105 × 35 × 65 mm

#### 120196

# German railways service station

Modern standard railway service station with oil tank, pump, switchgear, floor section and service building. For versatile use on railway premises.

**Epoch V** • 201 × 94 × 39 mm

# Loading hall with end platform

Spacious industrial hall with stone pedestal, rendered facade and lateral roofed loading platforms. The storage areas outdoors can be enlarged using a flat yard supplied with an access ramp.

Epoch III - New Item 2016 -

Warehouse:  $240 \times 160 \times 120$  mm  $\bullet$  End-loading ramp:  $315 \times 176 \times 17$  mm

### Goods shed

Wooden construction, with sliding gates and foundation made of natural stone masonry.

**Epoch II** • Patinated model • 205 × 162 × 102 mm

#### 180588

## Freight load

Wooden cases, sacks, barrels, machines and sack barrow – a plentiful variety for many purposes.

**Epoch IV** 

## Goods shed

Clinker-built construction, masonry plinth and loading platforms.

**Epoch I** • Patinated model • 259 × 143 × 87 mm

#### 120152

## Store shed

with built-on loading crane and canopy. To be used on railway premises or, e.g., as a repair materials store.

**Epoch I** • 222 × 140 × 71 mm

#### 120154

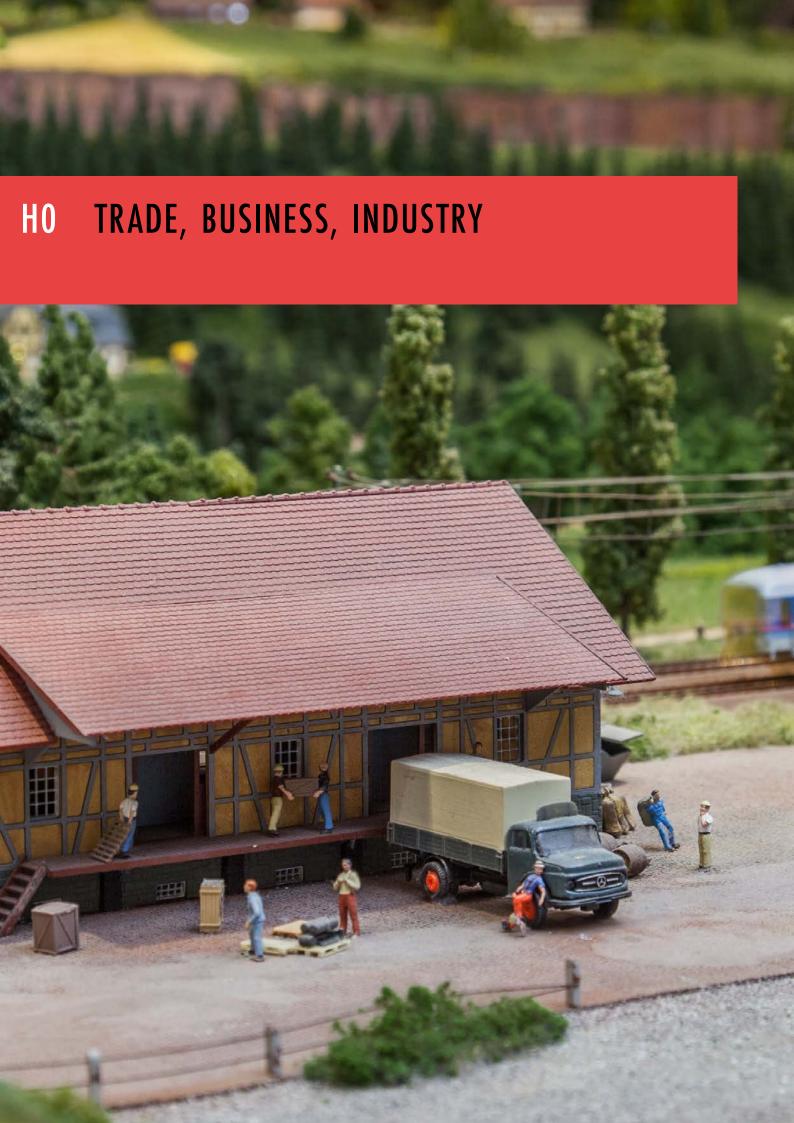

## Goods depot

as it can be found in the country with wooden lagging, loading rack and canopy.

**Epoch I** • 209 × 82 × 90 mm

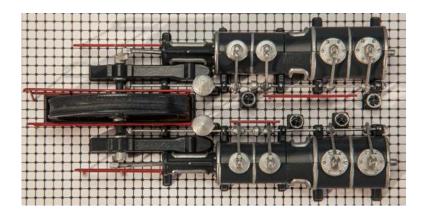

## Steam engine

Equipment for industrial models. 600 HP for the lovers of steam power, this is the output of that horizontal triple expansion steam engine in tandem operation similar to the original to be seen in the Municipal Steam Engine Museum of Werdau. The rope flywheel can be driven by FALLER direct-current motor (art. 180723).

**Epoch I** • New Item 2016 • Movable model • 150 × 78 × 36 mm • Depth: 31 mm

#### Dampfmaschinenmuseum Werdau Art, history and technical monument in a historical ambience

The Municipal Steam Engine Museum of Werdau is one of the oldest buildings in that town. It was erected in 1781 by Friedrich August Baumgarten, the great-grandfather of the future inventor of the first navigable airship, Georg Baumgarten. The museum's appeals are temporary special exhibitions and particular events. Highlights are special events such as the IFA - the vintage car rally on the first weekend of May, the garden railway rally in June, the museum garden festivity with night drive of the garden railway in August, the big vapour day on the first Sunday in October, and Father Christmas' workshop on the third Advent Sunday. More infos for interested people: • www.museum-werdau.de

#### 180629 (HO, TT, N)

## Synchronous hobby motor

12-16 V, AC voltage, 60 mA. Choice of 15 or 4 rpm. Reversible for clockwise- and counter-clockwise rotation. This robust, long-lasting motor can be used for various purposes, e.g. wave swinger, conveyor, gantry crane, railway gate, wind-, water or saw mills, feed pump, etc. Detailed instructions are included.

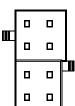

## Dairy with silos

Full churn! Modern fresh milk dairy comprised of a two storey demonstration facility with storage and administration rooms and loading platform at the rear, one-storey selling room and one small and two large tanks made of stainless steel for the outdoor intermediate storage or maturation of the raw milk delivered.

Combined production works and attraction world: the main glazed facade allows the visitors of that show-dairy to watch the bottling and labelling lines from a short distance. The kit includes some parts to drive three belt conveyors when using FALLER modeller's synchronous motor art. 180629. From the cow to the shop counter: people are then able to sniff, taste and buy the specialities produced in

the adjacent large selling room fitted with cooling shelves, that room being accessible via small outdoor stairs.

**Epoch V** • New Item 2016 • Movable model • Building:  $270 \times 180 \times 108$  mm • Double silo:  $132 \times 50 \times 150$  mm

Roadside assistance employees

## »Edeka« Local mini market

A modern style construction with a wide glass frontage and complete shop-fitted interior. The model can be illuminated very effectively using the micro-bulb (art. 180671), and the sign on the roof can be rotated using the FALLER motor (art. 180629) - (art. 180671 and art. 180629 are not included). Several models can becombined, thereby creating several variations for different uses.

Epoch IV - Movable model - 221 x 204 x 105 mm

## Supermarket ALDI South/North

Typical building of an ALDI branch in southern and northern Germany with delivery area, wide entrance area and various shopping carriages. Deco South and North.

**Epoch V** • 266 × 184 × 86 mm

## Modern fire station

Be heart and soul. Signal-red fire station similar to the original built in Oberndorf on the Neckar, comprised of a two-storey front building with administrative and social rooms as well as an adjacent hall with four parking spaces for fire engines, and for use as workshop or washing hall.

A striking administrative wing: in that horizontal bloc with roofed terrace and modern strips of windows, the glazed building corner with folded concrete stairs at the entrance to the radio control station creates an animated play of light and shade.

A transparent vehicle hall: in the second flat-roof construction where the heavy fire engines turn out and return everyday, the glazed multiple-leave folding doors without transom let daylight generously penetrate into the halls. Openings of gates on the

front and rear sides allow the use of FALLER Car System.

Do you fear any lack of space? Your operational vehicles will find more space in the appliance hall Art. 130161, suggested as a complement.

Epoch V - New Item 2016 -Vehicle hall: 261 x 135 x 64,5 mm • Administration building: 208 x 135 x 76 mm

## Appliance hall

A vehicle or storage hall of versatile use with two parking spaces and glazed folding doors nearly as high as the hall on the front, to be built open or closed. A clear-layout building. A vehicle or storage hall of versatile use with two parking spaces and glazed folding doors nearly as high as the hall on the front, to be built open or closed.

**Epoch V** • New Item 2016 • 145 × 140 × 64 mm

#### 161306

## Car System Digital 3.0 MAN TGS TLF »Fire engine« (HERPA)

The vehicle is equipped with full digital technology incl. vehicle location and the individual functions can be controlled directly when in operation (only for the overall system). With front headlight, rear lights, brake lights and turn signals. Multi-stage driving possible. The acceleration and braking pattern, as well as the acceleration rates are set by the factory. However, they can be adjusted individually.

# Fire brigade engine house

That massive fire-engine house offers shelter to fire-fighting vehicles and appliances, but can also be used as repair shop. The facade made of natural stones clearly contrasts with three red folding gates with semi-circular arch frame. Another gate at the rear also allows the passage through the building.

**Epoch II** • New Item 2016 • 172 × 148 × 108 mm

#### 130336

## Country style fire department

with mobile door and hose drying tower. Material mix of coloured plastic, wood, and special cardboard parts.

### 130989

## Fire station

Office building with control station, three-stall flat-roof garage annex with movable rolling shutter doors, two separate garages and highrise hose-drying and observation tower. All buildings can be used separately.

**Epoch III** • 441 × 210 × 390 mm

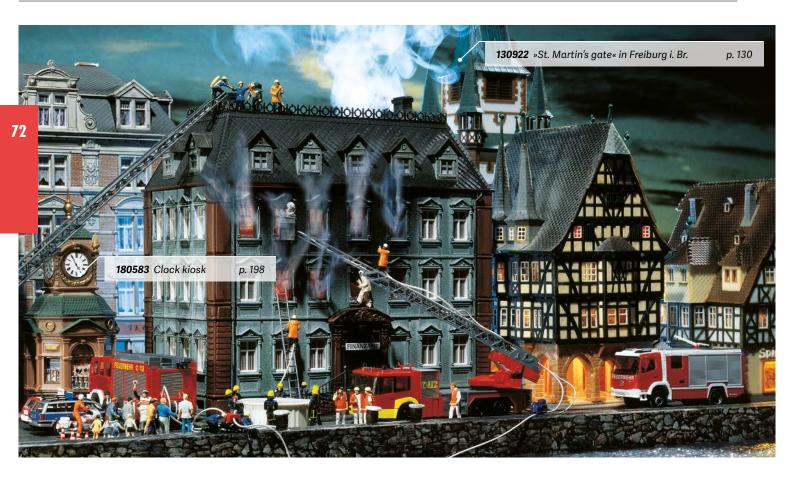

### 130268

### Rural fire station

With 2 opening doors, roof siren, hose drying tower and scaffolding.

**Epoch I** • 130 × 100 × 141 mm

# Burning tax office

The special of this kit: weathered, blackened smoke facade; incl. special smoke generator, (16 V, alternating current) creates thick smoke emerging from the windows; miniature light effects - burning flames (16 V, alternating current) for a glow of fire full of effects and smoke oil to refill the smoke generator.

Epoch I • Patinated model • 195 × 133 × 185 mm

#### 130429

### »Zur Sonne« Burnt-down restaurant

Burned out, grimy, sooty inn. Without smoke generator, without flashing light. With smoke generator set (art. 180690, 16 V, AC voltage) and miniature light effects, flickering fire (art. 180696, 16 V, AC voltage) as an upgrade.

**Epoch III** • Patinated model • 136 × 119 × 119 mm

## »Das Blaue Haus« Café

According to the original located in Oberstaufen in Allgäu. Welcome to the cosy café »Das Blaue Haus« (The Blue House). The white of doors, windows and their frames as well as the underside view of the roof pleasantly contrast with the blue facade of the brick building featuring two storeys plus an attic and shingle lining. The terrace to which the customers access by means of outside stairs and the rear canopy are manufactured by the laser-cut process. Tables and chairs for the service also form part of the kit.

**Epoch IV** • 190 × 180 × 160 mm

### 130933

### Post office

Three-storey building with wide entrance stair, entrance doors to be opened and parcel loading ramp annexed on the rear side.

**Epoch I** • 190 × 195 × 215 mm

### An initiation into patinating.

Approach patinating with highly diluted water colours and one drop of dish washing agent. You may try out any colour mixture. Benefit of plastic: it is washable, thus you may repeat the process as often as you want until you achieve the desired result. It is best to carry out the procedure on the moulded piece with runners and sprue, before assembling the model. More infos on p. 485

# High rack warehouse

Innovative logistics! Multiple-aisle high-bay warehouse block for the fully automated handling of goods under optimum use of space. Stock receipt and stock issue are carried out through loading platforms and gates provided along the blue steel building featuring trapezoidal corrugations, daylight lighting strips and outside stairs in the front. To extend the storage surface area several models can be juxtaposed or built side by side.

### 130186

# Shredder

Sorted, separated, shredded. Facility allowing to crush and tear to pieces any metal-containing scrap using rotor mills. Various band conveyors and containers contribute to the different process steps of waste treatment, such as for example the pre-sorting, sifting, material separation, exhaust air treatment, compaction or crushing.

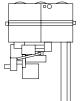

# Large stone breaking works

Large stone breaking works with two rows of tower silos and enclosed reprocessing plant. Usually, the dedusting equipment for the whole works is also situated in this tower. Among the facility's main tasks is vanning dump material for sorting it into various grain-sizes.

Afterwards, the dump material is stored in the different silo departments using conveyor belts for the transport. A rotary dryer allows the drying of fine-grain sand. An elevator transports the dry sand back to the top of the facility after the drying. The staff reaches the different departments via various platforms, footbridges and stairs.

For loading and mixing different grain-sizes, e.g. for road construction, a conveyor belt transports the stones to the stone breaking works' feeding tower (art. 130171). Furthermore, two routes below the silos allow trucks to directly load stones.

**Epoch III** • 195 × 565 × 345 mm

### Jaw crusher with conveyor belt

Add some crushed stones! Our model of a primary crusher features two conveyor belts allowing for separate, temporary storage of gravel of different grain-sizes. Dump trucks transport the blast off stones to the crushers' chute. The jaw crusher then crushes and mills the stones.

Afterwards, a conveyor belt transports the material directly into the stone breaking works (art. 130170). At the same time, the swing conveyor belt distributes the different grain-sizes onto stockpiles so that wheel loaders can load the gravel on trucks. The kit also includes the necessary drive parts for swinging the conveyor belt so that you can easily attach a servo (art. 180726).

**Epoch III** • Movable model • 190 × 180 × 62 mm • Depth: 22,5 mm

150910

**Quarry workers** 

151072

Miners

#### **Gravel heap**

Do not only stockpile! It's more than only gravel.

To get a nicely shaped heap of gravel, use either a cone made of cardboard (cut out a circle, cut up a radius, and fold to assemble) or, better still, shape a base using rigid polystyrene. Then apply plenty of the brown Colorfix-Color glue (art. 170660) on the entire surface and spread the suitable ballast or gravel granules. Repeat the procedure several times until you get the desired result. Finished.

### 130172

### Truck scale with office

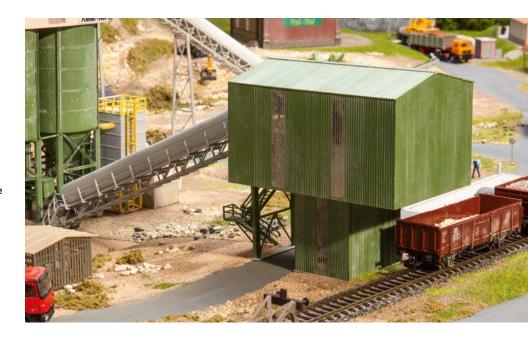

Say goodbye to weight problems with our truck scale! The model features a concrete foundation and a small, attached office with a flat lean-to-roof. You can use it anytime you need to check a vehicle's tare and filling weight, e.g. at stone breaking works, landfills or other industrial facilities. The model is made of a mixture of plastics and special cardboard.

**Epoch III** • Patinated model • Lasercut model • Office:  $120 \times 60 \times 38$  mm • Weighing machine:  $165 \times 45 \times 1$  mm

# Feeding tower for stone breaking works

Stone breaking works' feeding tower for loading trucks and freight cars. First, a charging program calculates the different grain-sizes for mixing the needed construction materials for structural and civil engineering. Then a conveyor belt transports the gravel, which has been stored in storage silos and stockpiles, to the transfer station. Daylight enters the small industrial facility through floor-to-ceiling windows in the wall made of trapezoidal sheet metal. Finally the fed trucks drive to the scale (art. 130172).

**Epoch III** • 380 × 96,5 × 145 mm

#### 130945

### »Marienschacht« Mine-headgear

With the conveyor system consisting of the shaft shed with headgear and the winch house with its own steam energy winch supply, your layout gets a new, visual highlight. The dumping mechanism on the side of the shaft shed enables the simulation of a railway loading process. With the FALLER motor (art. 180629, not included) both large cable sheaves in the headgear can be set into motion.

For realistic decoration of the surroundings the FALLER coals (art. 170723) are required.

### »Fortuna« Mine

Coalmine headgear with mine shaft and double headframe with 2 giant wheels in the headgear, powered by FALLER motor (art. 180629, 12-16 V, AC voltage). Motor not included. The winch house with utility shed and built-on oil storage tank are also included.

**Epoch II** • Movable model • Patinated model • 520 × 200 × 310 mm

#### 130470

### Old coal mine

Imitation-wood coal mine with several loading and unloading facilities.

**Epoch II** • Patinated model • 420 × 370 × 190 mm

### 130961

### Old stone-crushing plant

Timber construction with one-track passage for wagon loading (without function).

**Epoch II** •  $200 \times 175 \times 152 \text{ mm}$  • Clearance: 61 mm

# Coal/fuel handling

Small business with roofed loading ramp, in which various fuels and coal are available in smaller and larger amounts. Using the separately standing coal bunker the coal is loaded onto transport means via loading crane. Various loading goods and coal are included.

### 120254

### Coal bunkers

Large volume side rooms of the shed made of wood, in which various coal types or other bulk goods material can be stored. Ideal for the railway-related small trade branch or in-harbour handling. A bag with coal is included.

Epoch II - Patinated model - 189 × 100 × 31 mm

# Silo with conveyor

To store bulk goods! Large tower silo in a green tone with a practicable loading area to allow transshipment on tip trucks, and a belt conveyor protected by a cap.

**Epoch III** • 281 × 58 × 192 mm

### 120260

### Dual silo

Two cylindrical large capacity tower silos for storing and handling bulk goods. Pipes carry the goods. Accessible via outside ladder and walkway with railing.

**Epoch IV** • 150 × 130 × 200 mm

### Gantry crane

The ideal derrick for loading and unloading work in the harbour, in the railway area, in the industrial branch etc. The top part of the crane can be rotated manually by 360° (engine cannot be retrofitted). The crane bridge can be manually moved on the included rail mock-up. The crane is optionally equipped with a single crane hook, a heavy double hook, gripper shovel or wood grippers. The package also contains a coal bunker, in which various coal types and other bulk materials can be stored. This way, a beautiful scene can be built.

**Epoch III** • Gantry crane: 230 × 201 × 250 mm •

Coal bunkers: 189 × 100 × 31 mm •

Clearance width: 125 mm • Clearance: 80 mm

#### 130228

### Industrial mill

Industrial corn mill consisting of tall main building, side annex and silo area. Goods are transferred via filler neck on the covered access ramp of the light-coloured brick building. Accessories also include pallets and sacks of flour.

**Epoch III** • Patinated model • 205 × 158 × 190 mm

Everybody knows the bar, sausage, tobacco and candy shops as they used to be in every city district.

**Epoch III** • 70 × 40 × 50 mm

### Cement works

with office building, storage silos and passage for truck loading.

**Epoch IV** • Patinated model • 207 × 90 × 225 mm

### Transformer station

With insulators, transformers, power lines, etc.

**Epoch III** • 388 × 140 × 122 mm

#### 130947

### Wooden hut

A wooden worker's shanty with gangplank, veranda, shutters and tarred cardboard roof. Versatile use on construction sites, in the station area or industrial sites.

**Epoch II** • Patinated model • 111 × 72 × 53 mm

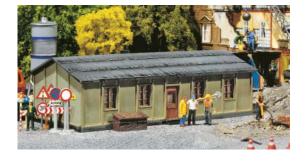

### 120251

### Store shed

wooden shed with flat roof, opened and closed shelters to accomodate vehicles and utensils. Multiple uses. Several models can be juxtaposed.

**Epoch II** • Patinated model • 188 × 92 × 44 mm

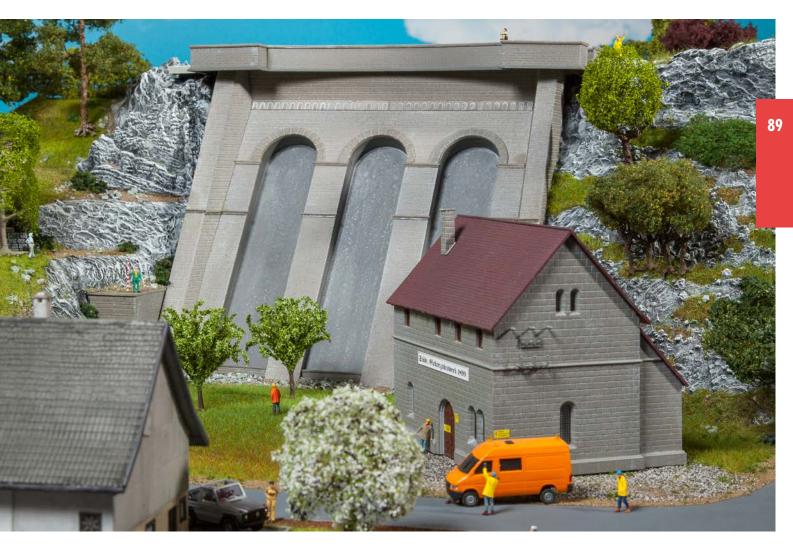

#### 120252

### Barracks

Building labour barracks with tarred cardboard roof as can be seen on various building sites, also used in small scale antiquated enterprises in the 50s. Several models can be juxtaposed.

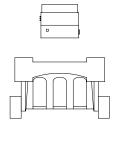

**Epoch III** • Patinated model • 150 × 72 × 52 mm

# Power station with dam

Historic electricity generating plant from the beginnings of the electrification. The massive two storey stone building featuring semicircular arched windows and a side-aisle-like adjoining extension borrowing from sacred buildings all reflect the early enthusiasm for technology. The kit includes insulators and two pylons. The damming structure allowing the production of electricity consists of a buttressed wall provided with an overhanging practicable top course. You will find further matching power poles (Art. 180928) in our assortment of small parts.

**Epoch II** • Patinated model • Retaining wall:  $377 \times 235 \times 265$  mm • Building:  $150 \times 126 \times 142$  mm

### Telegraph poles

20 pieces. »Cables« for wiring are included (without any electrical function).

**Epoch II** 

#### Electricity from hydraulic power

A century-old tradition. While in former times the energy of water was directly used mechanically, in watermills for instance - hydraulic power is used today to transform the existing energy into electricity by means of generators. The physical basic principle when using hydraulic power is the conversion of kinetic energy (water flow) and potential energy (i.e. the difference of level at a retaining dam) into usable energy. Turbines are used to this end. Basically we distinguish between run-of-river power stations and water-retaining power stations. The former use the natural flow of rivers and rivulets. The latter make use of an artificial lake. Hydraulic power has been substantially contributing to the supply of electricity for many decades now.

# Electrical substation with power poles

Rural tower substation with small square base and wood siding at the gable, plain tile roof and lateral insulators to connect the aerial wires. Two pylons also form part of the kit.

**Epoch II** • 44 × 41 × 107 mm

#### 120236

Service station personnel

# ARAL filling station

Present-day filling station comprised of a large covered petrol-pump area with a fully fitted-up shop and a separate service area for cleaning/air/water. Provided with typical equipment and decoration parts. Best lighting of shop room and covered area using the LEDs of art. 180648.

It is possible to have Car System vehicles (cars, buses, lorries) drive through the filling station by purchasing the technical elements in accordance.

**Epoch VI** •  $357 \times 195 \times 90 \text{ mm}$ 

### 130486

### ARAL tank farm

Small ARAL tank complex with two horizontal and three upright tanks, accessible via stairs and walkways. Pipes transport goods. With filling station and a small wooden hut.

#### Epoch V -

Building:  $63 \times 23 \times 28 \text{ mm}$  Booth:  $43 \times 27 \times 30 \text{ mm}$  Tank, flat:  $150 \times 107 \times 56 \text{ mm}$  Tank, upright:  $51,5 \times 43 \times 105 \text{ mm}$  (2 x) Tank:  $68 \times 50 \times 57 \text{ mm}$ 

### Shop's interior equipment

Package contains various equipment pieces such as shelves of different types and sizes, decoration signs and various small devices allowing to furnish shopping centres or small shops. Room lighting by means of LEDs (5 pieces) included. Multiple uses.

**Epoch IV** 

### 130485

### ARAL tank farm

ARAL fuel depot complex encompassing 3 cylindrical fuel tanks with different capacities, partly connected via stairways and platforms. Transport options via the pipe system. With office container for control technology.

**Epoch V** • Doublesilo: 285 × 130 × 170 mm • Tank: 134 × 128 × 105 mm • Booth: 86 × 40 × 32 mm

# Pallet factory

From raw material to a finished wooden pallet. Aged model of a crate and pallet factory with production hall, warehouse and administration offices, as well as ramps and sliding gates on the front and rear sides of the building. Accumulating wood shavings are stored in a small silo on the side after they are suctioned off by a suction system. The accessories naturally include crates and pallets, as well as stacks of boards, tippers and much more.

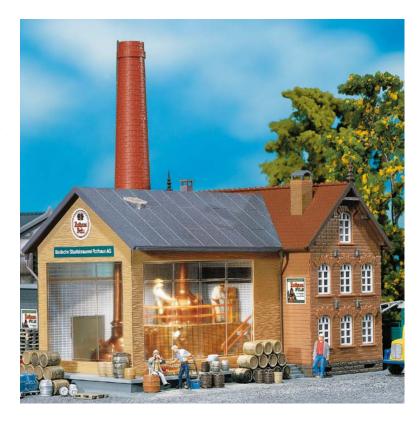

**Epoch II** • Patinated model • 404 × 140 × 185 mm

### 130960

### **Brewery**

With polished copper boiler in the brewing house. Interesting lighting effects when illuminated. The smoke stack can be fitted with a smoke generator.

**Epoch II** • 176 × 165 × 180 mm

### Fitter's shop

For steely men. A locksmith's shop which gives you an insight into the workings of the workshop. Demonstrating the mastery of metal, a drive hammer, frame saw, bellow and bench grinder do the locksmith's bidding whilst coal is glowing in the hearth. The workshop's detailed equipment includes a workbench, anvil, tools, trolleys and much more. It has a forged fence from house production.

**Epoch III** • Patinated model • incl. motor • 200 × 160 × 88 mm

#### 180455

### Workshop furnishings

Only for professionals! Small train of machines consisting of various wood and metal working machines such as ribbon saw, circular saw, routing machine, disk sander, surfacing machine, thicknessing machine, and turning lathe. A tool outfit on a wall rounds the set off.

Epoch III

#### 180623

### Smoke stack

Up in the air. Make this artificially aged model of a smoke stack with a massive square foundation your layout's clearly visible hallmark. The model features an iron ladder attached to the chimney and guard rings preventing masonry misalignment.

**Epoch I** • Patinated model • 60 × 57 × 335 mm

# Monastery brewery Building of a monastery brewery with central br

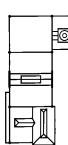

Building of a monastery brewery with central brewing and machine house and two lateral industrial extensions designed in conformity with a historical original structure located in Waldkirch/Black Forest. A loading platform and a chimney erected at the rear complement the rendered brick building ornamented with stepped gable, battlements, and corner turrets. Interior furnishing is possible using four copper-coloured mash boilers supplied. Limited edition: 1,000 pieces.

**Epoch III** • New Item 2016 • 390 × 200 × 325 mm

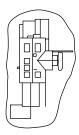

Small, one-storey brick building with segmented arches and arched mouldings, which serves as a workshop building for a mason and sculptor.

# Sawmill

Sawmill from the Black Forest. The water wheel is driven by a (12-16 V, AC voltage) motor included in the package. A board and timber assortment is contained in the package.

The log storage place can be greatly extended by purchasing the article Nos. 180589 and 130288 in addition.

**Epoch II** • incl. motor • 345 × 200 × 145 mm

### 180498

### Timber storage sheds

For lumber piles and implements. Two shelters built staggered, with a draining floor, allowing the storage of lumber piles and implements. Floor plate and various piles of boards are also supplied.

**Epoch I** • New Item 2016 • 100 × 70 × 53 mm

# Beet dump with storage shed

Harvest time! Small, stationary band conveyor installation to be used during the sugar beet campaign. To ensure transport to the sugar mill the beets supplied are directly loaded from the lifter, from the trailer or out of the pile into the goods wagon via an ascending conveyor. The equipment of that loading line includes a wooden shed with rolling gate and a glazed gable end.

**Epoch III** • New Item 2016 • Storage shed: 172 × 95 × 74 mm • Turnip shipping: 190 × 63 × 67 mm

#### 130191

### Carpentry

Patinated carpentry shop with rear cuttings bin. The covered awning allows a view of details inside the workshop with circular saw, trolley and numerous stacks of boards whilst the roof truss and a stairway are being worked on.

**Epoch III** • Patinated model • 176 × 120 × 80 mm

Castle mill

Click-clack! Two-storey water mill with angle ashlars and door and window jambs consisting of dressed natural stones laid bare of rendering as well as an annexed half-timbered outbuilding on eaves side with ground floor of visible stones. The model can be built so as to have an overshot or undershot water wheel on gable side, thus leaving the design of the flow of water to the modeller's discretion. Some worn out millstones are used to embellish the front facade and complemented by all sorts of farming implements. The water wheel can optionally be driven by FALLER motors, art. 180723 or art. 180629 (not supplied).

#### 180620

### Agricultural accessories

Detailed accessory set with parts from various trades and agriculture, including workshop tools from metalworking shops, woodworking shops and dairy, home slaughtering and grain processing. All sorts of moulds, tubs, workbenches, and more.

**Epoch III** 

# »Nordex« Wind generator

with motor (12-16 V, AC voltage) and 3 propeller rotor. The original is located on the Black Forest overpass in the southern part of the Black Forest and was installed in 1996.

Note: Can be built in 2 versions: with a girder or concrete pole (parts are included).

**Epoch V** • incl. motor • 80 × 80 × 360 mm • Depth: 40 mm • Sail dia: 220 mm

#### 130233

### Windmill

consists of the mill and the living quarters. Its wings are powered by an electric motor (12-16 V, AC voltage).

**Epoch I** • incl. motor • 98 × 88 × 135 mm

#### 130253

### Garden center

With dwelling house, 3 glass greenhouses, 2 hotbeds, straw mats and accessories. To be extended by art. 130213.

**Epoch II** • Hotbed:  $90 \times 21 \times 10$  mm (2 x) • Greenhouse 1:  $110 \times 68 \times 67$  mm • Greenhouse 2:  $71 \times 42 \times 63$  mm (2 x) • Residential house:  $108 \times 90 \times 110$  mm

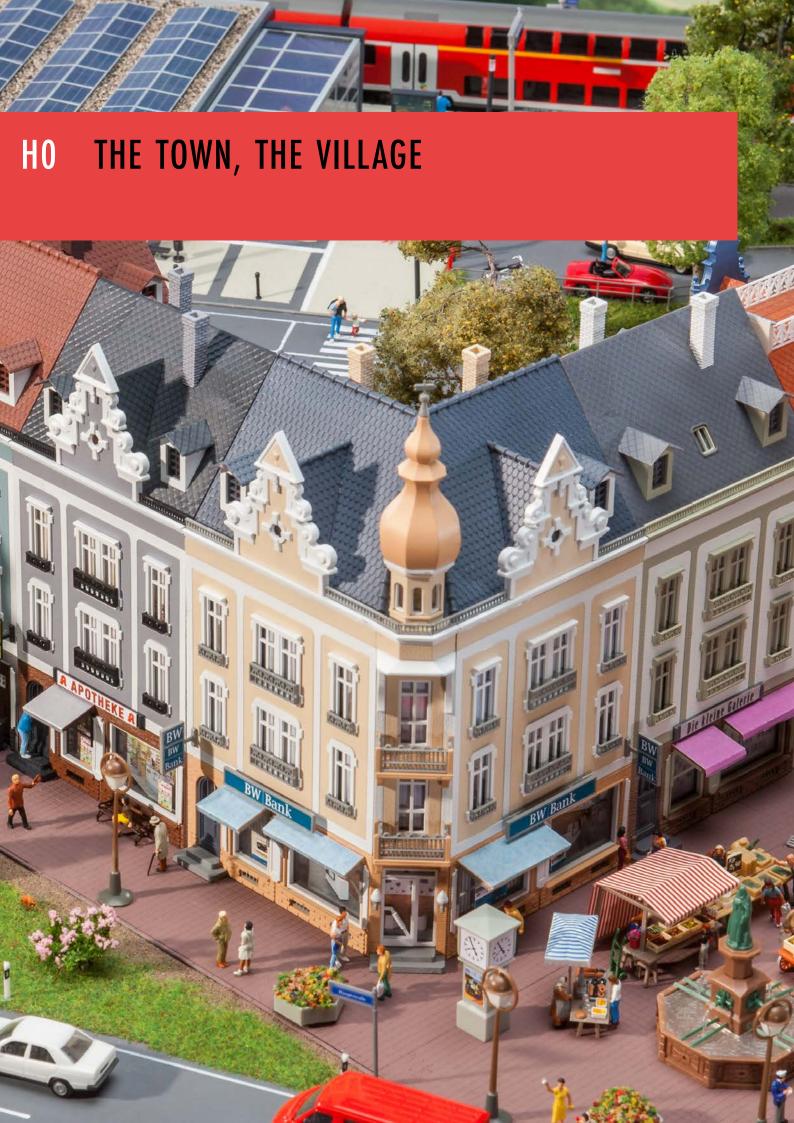

#### 130213

### Small garden center

With 2 glass greenhouses, 3 hotbeds, straw mats and accessories.

**Epoch II** • Greenhouse 1:  $92 \times 47 \times 58$  mm • Greenhouse 2:  $71 \times 42 \times 63$  mm

## Television tower

Similar to the well-known television tower located in Alexanderplatz in Berlin. A model of impressive height with glazed spherical dome, red-white pole and a red-blinking beacon at the top.

**Epoch III** • 150 × 150 × 1200 mm

### 180424

### Berlin Wall

Fall of the Wall, 25th anniversary! Our patinated model includes 32 segments of the Berlin Wall, symbol of Germany's division and peaceful reunification. 16 of the segments display artistic themes of the open-air art mile »East Side Gallery« using large-sized digital print. The kit also features holes hacked by so-called wall woodpeckers. Information on the artist initiative: www.eastsidegallery-berlin.de

Epoch IV • Patinated model • 220 × 24 × 43 mm

# Prefabricated High-Rise P2 Basic Kit

Those buildings made from prefabricated slabs were typical for the German Democratic Republic and built until the end of the 1960s. Our modular model is based on the most common type of prefabricated high-rise blocks. The P in the type description stands for parallel because the supporting walls were arranged parallel to the outer walls. The cipher 2 indicates the number of staircases. The basic kit includes the foundation with the doorways sticking out half a story, three stories with balconies on the rearward side, jamb walls, and flat roof. You can also modify the model and use it as a relief in your layout's background. Please note: If you want more stories so that your "Plattenbau", as the german's call it, will reach the usual height between 5 and 11 stories, you can purchase our additional set "Prefabricated High-Rise P2 Supplement" (art. 130802). Each of these sets includes two more stories for the so called Type P2.

**Epoch III** • 305 × 155 × 125 mm

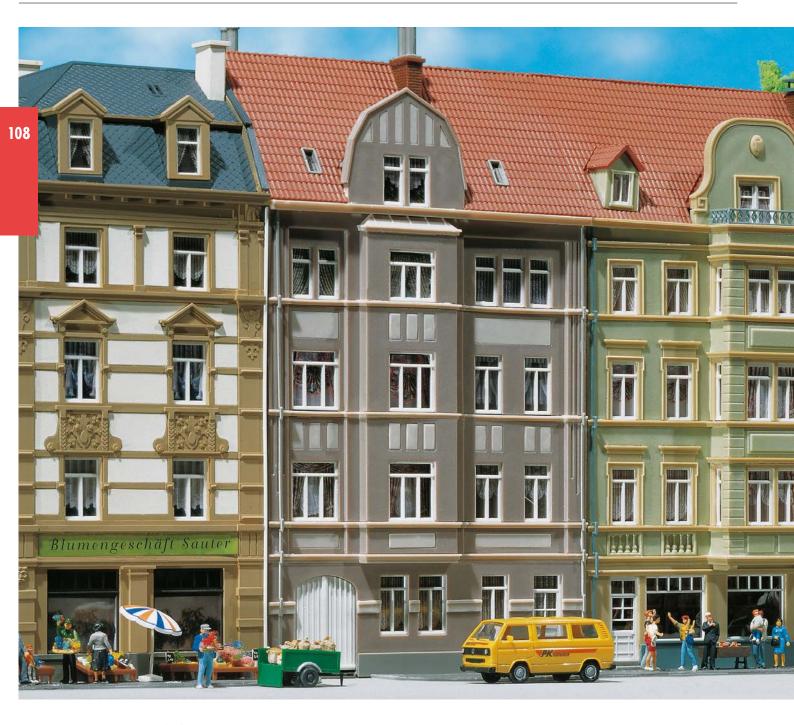

### 130802

# Prefabricated High-Rise P2 Supplement

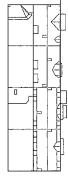

Industrial housing meets modular design. The set includes two additional stories (slabs and balconies, windows, decorative screen) for prefabricated high-rise houses of the type P2. Please note: This kit is an addition to our item »Prefabricated High-Rise P2 Basic Kit« (art. 130801). Therefore foundation and roof are not included in the additional kit.

# »Goethestraße« Row of town houses

The houses of this four-part row of buildings were built around 1929 and have an ornate stucco facade with Art Nouveau. The row of buildings consists of two four- and two three-storey buildings and is variable in its build-up.

These buildings can be used to create »boulevards« as well as typical backyard settings in the city or on the railway line. Beautiful boulevard in the front – in the back typical backyard setting.

Whoever travels by train in Germany is familiar - along the intra-urban lines - with this picture: the typical backyard setting along the railway lines. Important scenery for model railroaders which should not be missing on any

layout. The rear facades are in a brick-and-mortar style as they could be found almost everywhere in Germany (see the small picture).

**Epoch I** • 500 × 180 × 245 mm

# »Goethestraße 62« Town corner house

4-storey model with dormer windows and stucco decoration. On the ground floor there is a retail store. Compatible with the models of the »Goethestraße« (art. 130915).

**Epoch I** • 119 × 98 × 217 mm

### 130906

# »Goethestraße 63« Town corner house

Four-storey house with dormer windows and stuccowork.

**Epoch I** • 122 × 112 × 217 mm

### 130918

### »Goethestraße 88« Town end house

Four-storey terrace-end house with balconies, oriel, copper roof and roof terrace. There is a shop on the ground floor. The house can be variable in height, as the floors are put on top of each other separately. Compatible with the models of the »Goethestraße« (art. 130915).

**Epoch I** • 164 × 148 × 270 mm

# Town house with pub

Multistorey house with a fully equipped pub on the ground floor.

**Epoch II** • Patinated model • 135 × 125 × 200 mm

# Alfredo's pizzeria

Renovated townhouse in the style of the fifties with two bay windows at the front. On the ground floor there is a pizzeria with interior lighting and authentic decor.

**Epoch II** • Patinated model • 145 × 127 × 203 mm

### 130448

# »Allianz« + »Tea & Spices« Town house

town house with an Allianz insurance office and a Tea + Spices shop on the ground floor.

**Epoch I** • Patinated model • 125 × 183 × 203 mm

### Paradise bar

Art Niveau building with extensive window ornamentation on the front facade. Various back yard buildings. Advertisements for either a bar or a »House of Sheer Delight« are also included.

**Epoch II** • Patinated model •  $125 \times 183 \times 208 \text{ mm}$ 

### »Belaria« Cinema

Multistorey town house with an old cinema on the ground floor.

Wide entrance and decoration parts.

**Epoch III** • Patinated model • 145 × 175 × 200 mm

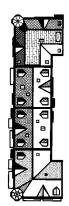

### 130451

# »Dold« Town butcher's shop

Classic butcher's shop of the 50s with complete interior equipment, accomodated in a multistorey town house.

**Epoch VI** • Patinated model • 145 × 126 × 201 mm

# »Beethovenstraße« Row of downtown structures

An urban scene full of life! That row of four buildings consisting of two corner houses and two terrace houses offers plenty of possible variations and combinations. The ground floor of each building provides space for shops and businesses. The upper storeys house typical urban dwelling units. Both terrace houses can also be built by halves.

**Epoch III** • Total dimensions:  $452 \times 118 \times 200$  mm • Corner house 1:  $118 \times 118 \times 200$  mm • Corner house 2:  $118 \times 117 \times 200$  mm • Driveway:  $47 \times 5 \times 43$  mm (2 x) • Terrace house 1:  $85 \times 104 \times 176$  mm • Terrace house 2:  $85 \times 96 \times 176$  mm

### »Beethovenstraße« 2 Row houses

A new style! Renovated terrace houses with baking shop and a small art gallery on the ground floor. Each attic features two small dormer windows. Both terrace houses are the perfect complement to »Beethovenstraße« row of town houses, Art. 130701, and can also be built by halves.

**Epoch III** • Total dimensions:  $170 \times 104 \times 176$  mm • Terrace house 1:  $85 \times 96 \times 176$  mm • Terrace house 2:  $85 \times 104 \times 176$  mm

### 130703

### »Beethovenstraße« 2 Town houses

Integral renovation! Corner house and terrace house in Beethoven Street have been given a new paint. Next to the telecommunications shop there is a restaurant offering regional cuisine. On the upper storeys there are students' lodgings. It is also possible to built the terrace house by halves.

**Epoch III** • Total dimensions:  $202 \times 118 \times 200 \text{ mm}$  •

Corner house: 117 × 118 × 200 mm • Driveway: 47 × 3 × 43 mm •

Terrace house: 85 × 104 × 176 mm

# Village church

The windows backed with sacred motifs can be lit effectively. Onion-domes and pointed domes and tower cross and tower point are available for selection.

**Epoch I** • 240 × 129 × 340 mm

### 130239

# Small town church

two-coloured clinker-built construction, with colourful windows, slender spire, large stone bas-relief on the rear side and various etched parts for decoration. Typical construction as can be seen in the new Federal States, but also in Northern Germany.

Epoch II - Patinated model - 200 × 118 × 270 mm

# City house with passage

The entrances of the different stores are located in the continuous passageway.

**Epoch III** • 108 × 108 × 165 mm

# Old city Café

A cosy cafe is located on the floor level of the multi-story city house.

**Epoch III** • 116 × 130 × 150 mm

### 130497

# Village residential house

Multi-story residential house with side-gabled roof.

**Epoch III** • 78 × 115 × 146 mm

130498

# »Sport Meder« City house

Sports items of all kind are offered in this retail store.

**Epoch III** • 80 × 75 × 175 mm

# 2 Village houses with painters scaffold

One of the houses is surrounded by scaffolding and is being painted. Scaffolding parts are included.

**Epoch V** • 140 × 117 × 165 mm • 105 × 124 × 165 mm

### 130495

# 2 Village houses with bay

A bakery is located in one of the differently coloured houses.

**Epoch V** • 62 × 103 × 142 mm • 62 × 110 × 152 mm

### 130496

# 2 Village houses

A store selling biological items is located in the corner building of the two houses.

**Epoch III** •  $68 \times 91 \times 146 \text{ mm}$  •  $75 \times 118 \times 150 \text{ mm}$ 

### 130499

# »Niederes Tor« City house

with a wide entrance arch and pedestrian arcade along the side. Adequate for single lane Car System truck/bus and car traffic.

**Epoch III** • 150 × 90 × 175 mm • Clearance: 60 mm

# Town hall

Two-story, renovated small town townhouse with corner arcade and dark timber framing in the upper floor.

**Epoch III** • 145 × 145 × 160 mm

# »Fahrinsland« Driving school

Dwelling house with roofed entrance and fitted-up winter garden laterally adjoining and extending over four storeys.

**Epoch IV** • 115 × 107 × 152 mm

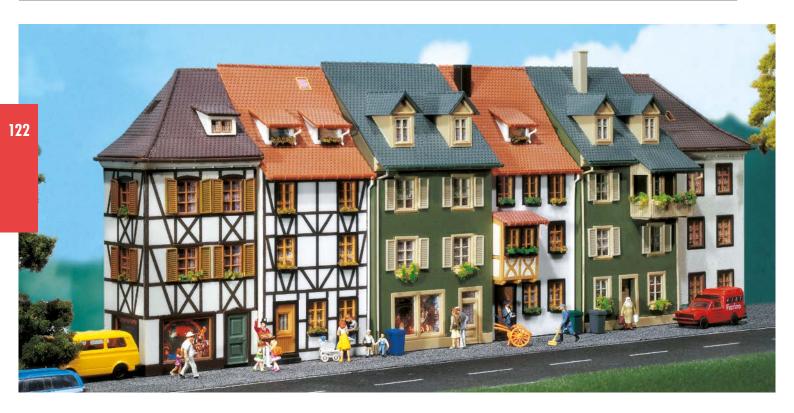

### 130414

# 2 Town houses

Two triple storey houses in different colours.

**Epoch II** •  $75 \times 112 \times 145 \text{ mm}$  •  $68 \times 91 \times 134 \text{ mm}$ 

# 6 Relief houses

Inexpensive and space-saving rows of houses can be erected along the model rear walls with these half-built corner and dwelling houses.

The rows of houses can be extended with art. 130431 and 134032.

### 130431

### 2 Relief houses

For the building of two half-built background models.

**Epoch II** • Terrace house 1:  $75 \times 65 \times 150$  mm • Terrace house 2:  $75 \times 53 \times 142$  mm

### 130432

### 2 Relief houses

For the building of two half-built background models.

**Epoch II** • Terrace house 1:  $61 \times 57 \times 150$  mm • Terrace house 2:  $61 \times 47 \times 142$  mm

# Town house under demolition

Kit consists of the remains of facades and a gable with half-torn wallpaper, remains of the ceilings and internal walls, a rubble heap, temporary fence, excavator (Wiking Model) and a single-axle trailer. In addition this kit includes old radiators, wash basins, and even an old bathtub.

### 130456

# Town house under renovation

This 2-storey town house is being completely renovated.

**Epoch I** • Patinated model • 170 × 136 × 170 mm

# Town hall with school

School and town hall building with two-storeys and an attic featuring a half-hipped roof, tile covering and two extensions of different height with present-day plate roof. The ground floor of that brick building with masonry window lintels is of a colour that contrasts with both upper storeys featuring shingle siding. The kit includes roof windows for optional use.

# Ice-cream parlour

One or two balls? Small ice-cream parlour with roofed terrace and an inviting glazed facade in the entrance area. You will create a pleasant ambience with the advertising pennants, sunshades, bicycle stands and furniture for the outdoor area, which are all supplied.

**Epoch V** • New Item 2016 • 150 × 84 × 69 mm

### 130489

# Butchery/Bakery

For anybody with good taste. Butcher's and baker's as furnished shops inside a two-storey residential building. The large shop windows provide a view of product display and a snack at the bar table below the vinecovered pergola invites you to make a brief stop.

Accessories also include bicycles and matching bicycle racks.

**Epoch IV** • 190 × 125 × 125 mm

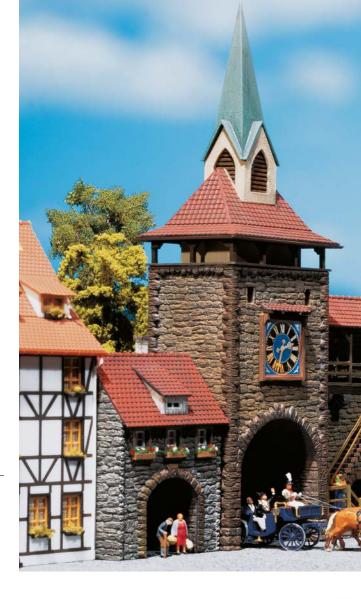

# Old-Town wall set

Collective package with »Od-Town walls« elements. The set contains the following elements:

- · Old-Town wall with annexed half-timbered house
- · Old-Town wall with stairway
- · Old-Town wall with battlements
- Two Old-Town peel towers
- · Old-Town city gate with annexed house, both buildings with passages.

This low-priced basic package permits ideal combinations to be created. The configuration options are versatile and can be further varied by using parts from our old-town wall concept such as art. 130402-130404.

Epoch I • Old-Town gate: 79 × 58 × 251 mm • Old-Town wall timbered house: 153 × 75 × 125 mm • Old-Town wall with stairway: 153 × 48 × 125 mm • Old-Town wall - defence tower 45°: 60 × 45 × 125 mm • Old-Town wall defence tower 90°: 40 × 40 × 125 mm • Old-Town wall: 153 × 37 × 125 mm • Old-Town wall - piece: 43 × 24 × 106 mm • Attached house: 62 × 48 × 94 mm

#### 130403

# 2 Old-Town peel towers

To be used as ends or for linking old town brick elements. Each with defence towers, one with 45° and one with 90°. The 90° defence tower can be either built as an angled or straight-lined intermediate tower element. The respective parts are included.

Old-Town wall - defence tower 45°: 60 × 45 × 125 mm • Old-Town wall defence tower 90°: 40 × 40 × 125 mm

### Old-Town wall

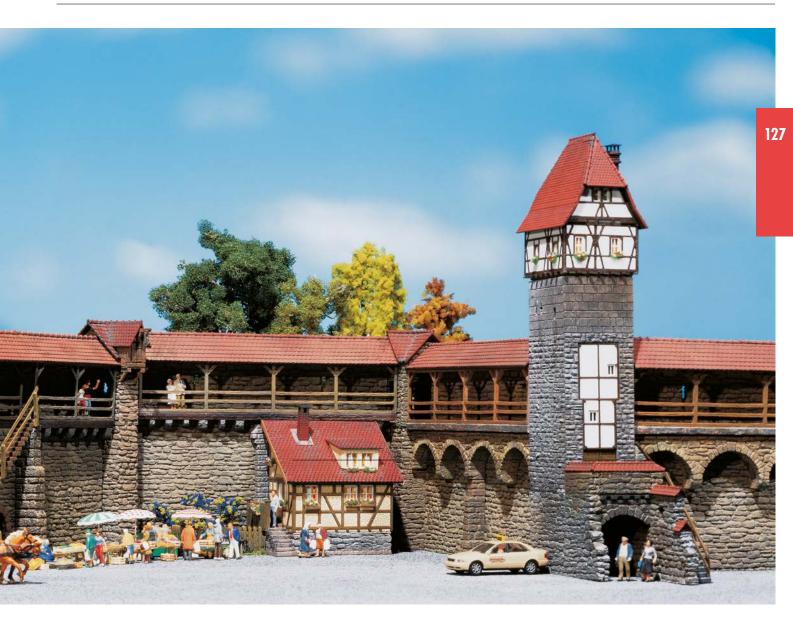

To be used for wall extension. It can also be used together with peel towers and for extension of art. 130401, old-town wall set.

**Epoch I** • Old-Town wall: 153 × 37 × 125 mm • Old-Town wall - piece: 43 × 24 × 106 mm

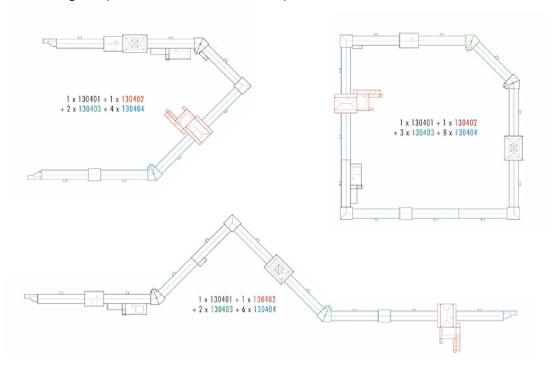

### Some ground plan variations»Old-Town wall concept«

# City gate with gatehouse

City gate with built-on house on one side and a piece of old city wall on the other. Ideal addition to the city wall programme. Suitable for passing Car System vehicles through. The archway has a height of 62 mm at its peak. The passage width is 52.5 mm up to a height of approx. 39 mm, then the archway begins.

**Epoch I** • Patinated model • 175 × 55 × 250 mm

### 130500

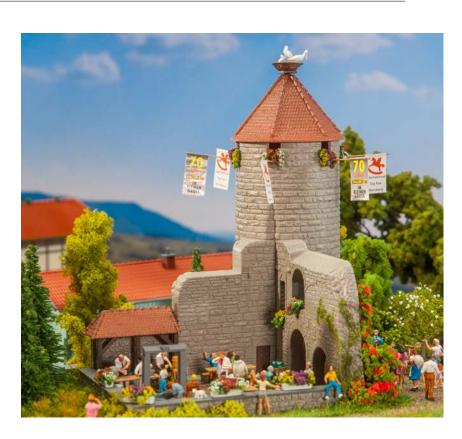

# »Lahr« Stork tower

Re-edition in new colours of the medieval ruin of the circular tower at Lahr moated castle with adjacent wall sections.

That lowland castle was built about 1220 by the Lords of Geroldseck and is now the landmark of the town of Lahr.

•

**Epoch I** • New Item 2016 • 171 × 154 × 170 mm

# Old-Town tower house

Integrated stairway and a small town house of half-timbered construction. As a stand-alone unit or together with art. 130401-130404.

**Epoch I** • 100 × 52 × 215 mm

### 130400

# Historical town gate

A medieval background. Faithful reproduction of the Swords Tower in Rothenburg on the Tauber with adjacent town wall, wooden stairs and parapet walk of the fortification. The imposing Swords Tower with the picturesque bay-windows completes the re-edition of the old town wall collection Art. 130401 to 130404.

**Epoch I** • New Item 2016 • 227 × 114 × 385 mm • Clearance: 40-60 mm • Clearance width: 40 mm

# »St. Martin's gate« in Freiburg i. Br.

An impressive model which dominates the townscape with almost twice the height of the houses without ruining the romantic effect in the process.

In the adjoining building which separated from the tower can also be used in a row of town houses, there is the front entrance of a modern fast food restaurant in the alley. Through the salient hallway the actual tower stairs are reached via a spiral

staircase. In a subsequent construction phase the top of the tower was amended with four little roofed corner towers.

**Epoch IV** • 112 × 78 × 390 mm

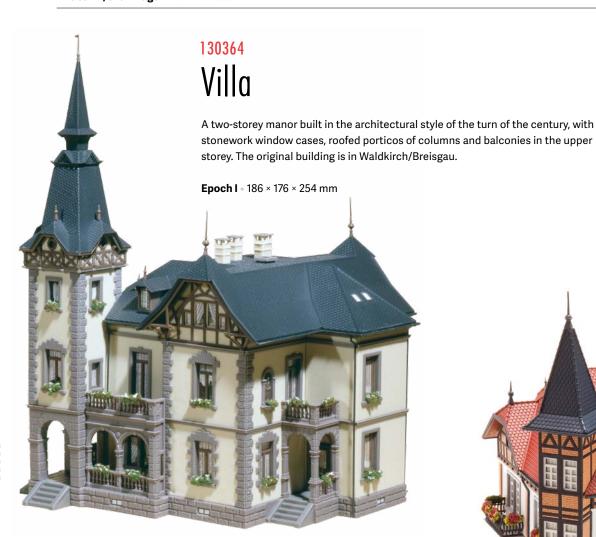

#### Freiburg's Town gates

St. Martin's Gate (also called Norsingen Gate in the Middle Ages) in the Kaiser-Joseph-Strasse is, compared with the Swabian Gate, the older of the two preserved gate-towers from the medieval fortification of Freiburg i. Br.

Formerly there were five gate-towers that were linked with one another through a town wall. Today only two of the former five gate-towers built in the 12th and 13th century have been preserved.

In the course of the centuries St. Martin's Gate has been rebuilt several times, and also served occasionally as a prison. In 1900 that town gate was renovated. Its height was increased from 22 to 60 metres and the style chosen was that of the 15th century. On the interior side there is a plate intended to remind of the burning of witches in the Middle Ages. (Source: Wikipedia)

# City villa

in the construction style of the turn of the century, newly renovated, with bay add-on and side balconies.

**Epoch II** • 125 × 130 × 190 mm

### 130427

# »Allmannsdorf« Town hall

The original building stands at Allmannsdorf near Constance (Lake of Constance).

**Epoch II** • 175 × 160 × 230 mm

# »Falkeneck« Hunter's lodge

This kit gives the modeller the chance to build a hunter's lodge into his layout, complete with a wooden drawbridge over a water course or a moat.

**Epoch I** • 188 × 134 × 225 mm

### 130245

### »Lichtenstein« Castle

Well-known model on the Swabian Mountains.

A 40 mm high mountain is included in the construction kit as a platform. High above the Honau valley in the Swabian Mountains the impressive Castle Lichtenstein can be found which is well-known and became famous primarily through Wilhelm Hauff's story "Lichtenstein". Reasonably priced and easy-to-build model requiring little space. Particularly suitable for the background.

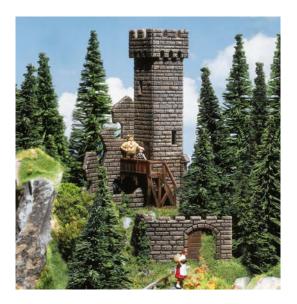

**Epoch I** • 243 × 143 × 172 mm

# Castle-ruin

Aged model of a fortified castle irregularly falling into decay, with donjon built on a square base, the high entrance of which can be accessed by the provided stairs. Daylight penetrates through windows and loopholes. Benches all around the construction and in the tower open to visitors invite the ramblers to enjoy the view at such airy heights.

### 130285

### Castle tower ruins

from the age of chivalry; the well preserved tower is used as an observation tower. Reasonably priced and easy-to-build model requiring little space. Particularly suitable for the background.

**Epoch I** • 145 × 87 × 133 mm

### 130291

### Castle observation tower

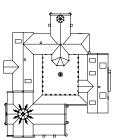

which should be located outside of a town with its built-on kiosk as a place for excursions. Reasonably priced and easy-to-build model requiring little space. Particularly suitable for the background.

**Epoch I** • 115 × 62 × 135 mm

# »Bebenhausen« Monastery

With a throbbing heart! Monastery, school, castle, exile seat or State Parliament – Bebenhausen Monastery looks back on an eventful history over the centuries. Limited Premium model built according to the present-day extension of the medieval Cistercian abbey located in Schönbuch in the Swabian Jura.

The entire estate has developed around a late Gothic monastery with fountain hall following the arrangement of the most varied seclusion buildings, the ochre and limpid white stone masonry of which is dissolved again and again into a thin structure through high tracery windows. The vigorous pithiness and visual impact of that most diversified building and roof landscape result in particular from the monastic church with its richly ornamented central steeple erected above the intersection of the nave and the transept, which belongs to the masterpieces of late Gothic architecture and stonework art.

The kit includes some parts allowing to drive the bell using a servo. A second stone garret storey crowns the former summer refectory of the monks that was later changed into the banqueting-hall in the south wing of the monastery. The spiritual life and the liturgy of that time are besides reflected in the various two storey seclusion buildings such as the capitular hall, study rooms, dormitories, library and kitchen.

**Epoch I** • New Item 2016 • incl. motor • 604 × 517 × 374 mm

150924 Cistercian monks New Item 2016

### Mountain chapel

With finely worked wrought iron gates.

**Epoch II •** 71 × 71 × 66 mm

### Boathouse

It can be positioned on all open waters; a boat is included.

**Epoch III** • 85 × 64 × 52 mm

### 130269

### Village inn

The surroundings are provided with a pergola, a bandstand, tables and chairs.

**Epoch II** • 145 × 145 × 96 mm

### 130314

### »The Crown« Inn

Small inn with adjacent beer garden.

**Epoch III** •  $167 \times 105 \times 100 \ mm$ 

#### 130286

### »Rosel« Guesthouse

Featuring many balconies.

**Epoch III** • 100 × 87 × 77 mm

## Mountain chalet

with very low roof and balcony.

**Epoch III** • 127 × 93 × 55 mm

### 130277

### Half-timbered chalet

Chalet with canopy and small adjoining structures.

**Epoch I** • 115 × 87 × 59 mm

### Log cabin

A log cabin with axe, saw and wheel barrow which absolutely should be positioned in the forest.

**Epoch II** • 73 × 52 × 43 mm

#### 130293

## Forest log cabin

in the style of a log cabin; a tool shed is built-on.

**Epoch II** • 83 × 78 × 40 mm

#### 130288

### Lumber yard

with logs, rafters, boards and wood laths.

**Epoch I** • 130 × 86 × 56 mm

#### 130294

### Log barn

can be used as an adjoining building to the estate or barnyards.

**Epoch I** • 106 × 63 × 55 mm

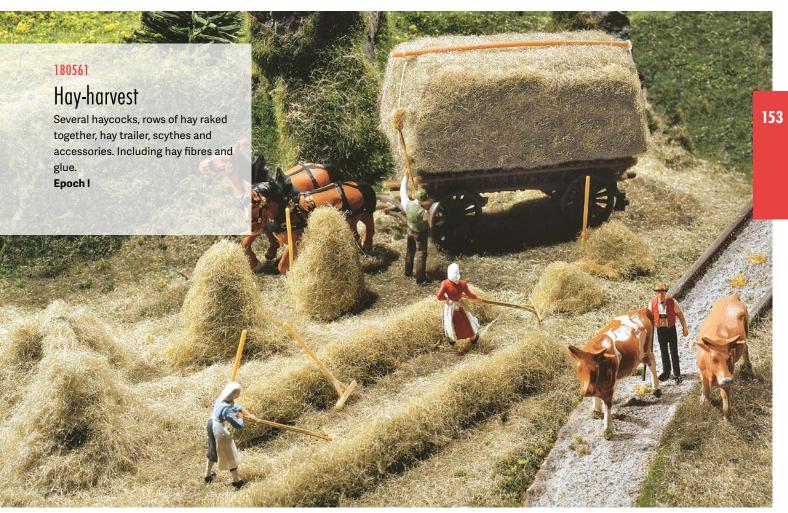

#### 130185

### Woodshed

Small timber shed with hipped roof, can be built enclosed or open, at choice. Versatile use, for instance as shed for farming implements or fodder point. Notable ageing effect on walls and roof.

**Epoch I** • Patinated model •  $80 \times 63 \times 46$  mm

### 2 Haylofts

Built in wood, as seen in fields and hillsides throughout the alpine countryside.

**Epoch II** • 75 × 65 × 50 mm (2 x)

#### 130290

### Hunter's lookout tower

A feed stand, a fountain and 3 fir trees are included.

#### Epoch I •

Hunter's lookout tower: 68 × 67 × 81 mm  $\circ$  Feed stand and fountain: 44 × 41 × 40 mm

### 2 Small kiosks

The advertising signs and the magazines are included in the construction kit.

**Epoch III** • Kiosk:  $70 \times 40 \times 50$  mm • Mushroom shaped kiosk:  $50 \times 50 \times 60$  mm

#### 130212

### Newspaper stand

with refreshments and sweets. Decal sheets included.

**Epoch III** • 80 × 77 × 48 mm

#### 180587

### 2 Bus stop shelters

Timber construction as frequently found in small towns and villages.

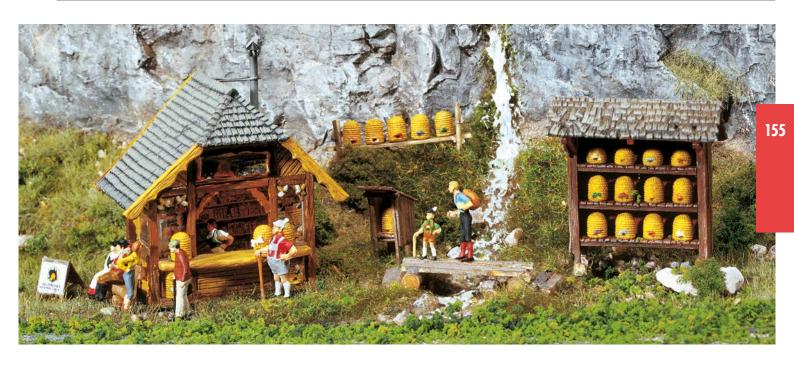

#### 180370

### Shelter

Pleasant wait! Our laser cut model of the small roofed bus shelter at Upper Franconian »Gräfenbergbahn's« flag stop »Weißenohe« features characteristic elements like the square layout, half-timbered construction and spire roof.

**Epoch III** • Lasercut model • 49 × 49 × 56 mm

## Beekeeping

Stall for the street sale of honey and schnapps. A roofed beehouse with straw-plaited beehive (without bees) and free-standing beehives are included in the package.

**Epoch II** • 60 × 41 × 62 mm • 44 × 32 × 47 mm

#### 180385

### 2 Beekeeper's trailers

Two wooden bee carriages like those used by the itinerant apiarist who moves to different areas with his beehives depending on the places where the yield is better in the course of the flowering time. The colonies are stacked up one on top of another and store their honey in so-called sliding frames that are taken out from the rear for maintenance or the harvest, thus forming the modern beehives.

Epoch III - Patinated model -92 × 46 × 43 mm • 70 × 37 × 37 mm

150919 At the apiarist's

153042 Going shopping

## Forester's lodge

Two-storey hunting lodge on a stone pedestal, featuring green shingle siding that perfectly fits into the surrounding wood. The particularities of the model include the third gable, the roofing consisting of two different kinds of tiles and the exposed antlers used as facade decoration above the entrance. The loo and cellar trap door are located at the rear. Some roofing tiles can optionally be replaced with glass slates included in the kit.

Epoch III • Patinated model • 138 × 120 × 110 mm

#### 180449

### »In the countryside« Decorative kit

Set of small parts for the arrangement of rural scenes, with small rustic toilet, kennel, workbench, cheese table, and many others more. Notable ageing effect on walls and roof. **Epoch I** 

### »Texel« Small cottage

Patinated model of a one-storey modest dwelling house, featuring a facade with wood laths, gable windows, and a tiled roof. The lateral entrance is protected by means of a windscreen.

**Epoch I** • Patinated model • 106,5 × 82 × 62 mm

#### 130602

### »Vlieland« Small cottage

Patinated model of a one-storey modest dwelling house, featuring a rendered facade, gable windows, and a slate roof.

**Epoch I** • Patinated model •  $106,5 \times 64 \times 62$  mm

#### 130603

## »Ballum« Small cottage

Model of a one-storey modest dwelling house, featuring a rendered facade, gable windows, and a slate roof. Colours pleasantly set off the window sills, plinths and building edges.

**Epoch I** • 106,5 × 64 × 62 mm

### Half-timbered house

Rural architectural style with brickwork basement and stairs to the entrance area.

**Epoch II** • Patinated model • 165 × 102 × 118 mm

#### 130259

### Half-timbered two-family house

Easy to build for beginners; with decoration parts.

**Epoch III** • 140 × 106 × 126 mm

#### 130270

### Rural half-timbered house

with roofed entries and with dormer windows.

**Epoch II** • 145 × 103 × 89 mm

#### 130280

### House with stork's nest

Typical country house with an outer staircase up to the living quarters on the first floor and a stork's nest on the ridge of the roof. A real stork's nest with »inhabitants«, a rare sight in nature nowadays, here as a pleasant detail.

**Epoch I** • 117 × 115 × 104 mm

## »Feneberg« Rural supermarket

On the first floor of this one-an-a-half-story building, there is a »Feneberg« supermarket, a chain that you often find in the German region »Allgäu«. The supermarket has a half-hipped roof, shingle sidings and an ornamental frieze lining the transition between floors.

**Epoch IV** • Patinated model • 200 × 121 × 115 mm

#### 130517

### Cheese dairy

Let the cheese wheels roll! Our rural grower's traditional cheese dairy features a small shop for regional delicacies on the first floor. The light and cozy one-and-a-half-story building has a hipped roof, shingle sidings and a modern outside chimney. On the upper floor you can hang cheesecloths over a bar for drying. On the outside, oversized milk cans and an old cheese kettle make for a great advertisement visible for miles around.

**Epoch III** • 167 × 121 × 99 mm

## Old farmhouse

From the popular farmhouse series. Single-roof farmhouse with two storeys and an attic, transverse division and masonry plinth. The half-timbered upper floor of that dwelling and farm building is lined with shingles on the weather side. A hut with baking oven and an adjoining shed at the rear extend the useful area. The parts supplied include a calvary and a small fence.

**Epoch I** • New Item 2016 • Patinated model •  $190 \times 140 \times 145 \text{ mm}$ 

#### 180381

### Dunghill with crane

Small stationary crane with gripping pliers for hay or dung as well as servo driving parts to rotate it to the right and to the left. The matching dung-pit is also supplied.

**Epoch II** • New Item 2016 • Patinated model • Movable model • Crane:  $30 \times 100 \times 80$  mm • Manure heap:  $56 \times 23 \times 27$  mm

#### 180386

### Liquid manure carriage

Natural fertilizer. Two-axle manure carriage with an old wooden cask with iron hoops to spray liquid manure on meadows and fields. Such carriage was pulled by a team of horses or oxen.

Epoch I - New Item 2016

## Barn with access to upper floor

A symbol of rural life. Detached two-storey barn with third gable and different kinds of tiles. Boards on the facade, brickwork walls, Eternit slabs, rendering and a half-timbered upper floor to the gable end give that spacious farm building with lateral protection roof its original character. The drive to the ground floor and the upper access to the hayloft are closed by massive two-wing barn-doors. The kit includes a walkway ensuring the access to the upper storey.

**Epoch I** • New Item 2016 • Patinated model • 155 × 150 × 130 mm

#### 180396

### Small toilet with servo

Small rustic toilet made of wooden planks with lean-to roof, ground plate and driving parts allowing to move the door by using a servo. Dog kennel also supplied in the same tone as well as a figure.

Epoch I • New Item 2016 • Patinated model • incl. motor • Toilet house: 31 × 30 × 32 mm • Kennel: 18,5 × 15 × 13 mm • Depth: 27,5 mm

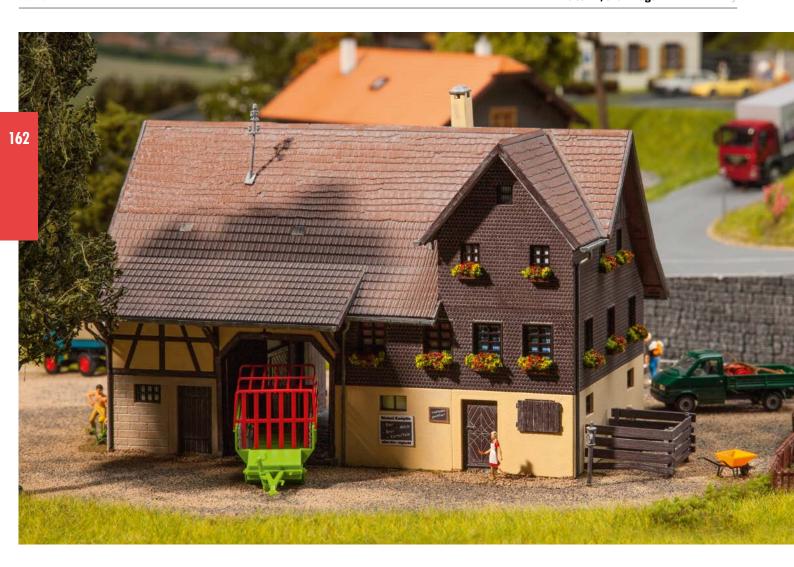

### Well and spring protections

Functional buildings for the catchment of springs. Set comprised of a small masonry building with crow-step gable and another spring protection with wall ornaments in the manner of the antiquity.

Epoch II - New Item 2016 -51 × 51,5 × 33,5 mm • 79 × 12 × 42 mm

## Organic farm

Our diversified, traditional, German farm building comes equipped with gates on front and backside. Open the gates and display the fascinating interior of the barn.

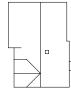

A third gable enlarges the shingle clad living quarters. The barn side features a half-timbered gable above a masoned foundation. An outside staircase leads up to the entrance on the rear side. Additionally, the roof can be tiled with two different kinds of tiles.

Light enters the otherwise dark barn through single glass tiles. The kit also includes a basement hatch, a close for a dung heap, a slurry pump and various flower-boxes.

**Epoch III** • Patinated model • 177 × 142 × 125 mm

### **Know-how**

Following the trend of our time today's agronomist offers his products from organic growing methods on the organic farm (art. 130548). Being an integrated house the organic farm combines housing aisle, stables and barn under a one-piece roof. Many matching accessories such as an exterior cellar exit, the enclosure for a dunghill, a liquid manure pump, and plenty of flower tubs are included in the kit.

#### Step by step:

Different building blocks form the housing aisle of the organic farm. All components have been patinated at our works already.

Separate shell of building:

The stable and barn aisle forms a building block of its own, ...

... that is then glued to the housing aisle.

Carpenter's work:

The whole is then complemented with roof girders, roof and flight of stairs.

Pretty in the detail:

Flower boxes and »foamed plastic flowers« provide some additional patches of colour.

Faster than expected!

Ready - to be built into the installation or diorama.

#### 130538

## Day labourer building

Dwelling stable with two storeys and roof floor, which testifies to the modest housing conditions of former day-labourers. The many repairs carried out in the house are visible when merely looking at the irregular scratch roofing and the obsolete Eternit slabs lining the facade of that building with double-pitch roof aligned parallel to the street, and provided with outside toilet.

Epoch I • Patinated model • 138 × 121 × 120 mm

## Farm

Model consists of: half-timbered residential building, sheep stable, barn, pigsty with attached paling, accessories such as doghouse, dung cart, stork's nest on the roof etc. The elements can also be built individually.

**Epoch I** • 225 × 325 × 120 mm

## Biogas plant

Perfect closed loop recycling management! This plant ferments biomass to valuable regenerative energy: i.e. biogas. The kit includes an open bunker silo that you can also use with Car System tractors and an airtight sealed silo covered with a tarpaulin that is weighed down with tires and sandbags. Together with the block heat and power plant, the two fermenters form the plant's heart. The model fermenters feature outside pipes and a ladder.

 $\textbf{Epoch VI} \bullet \text{Bunker silo: } 264 \times 74 \times 26 \text{ mm (2 x)} \bullet \text{Fermenter: } \emptyset \text{ } 128 \times 83 \text{ mm (2 x)} \bullet \text{Building: } 205 \times 70 \times 59 \text{ mm}$ 

#### 180599

### Dog house with servo drive

Fenced dog house with hedge for the four-legged friend. The kit includes a servo, which can be operated with the item »Servo control« (art. 180725) or similar controls. Return to the refuge or let the dog remain outside – it is all controlled by you.

## **BLACK FOREST**

Home advantage! A first-rate model layout is bound to have some highlights. Experience the picturesque landscape of the Black Forest with its characteristic kits, fir-trees, and most varied scenes.

#### 130366

## Black Forest farmyard

A dream model of a Black Forest farm which will ideally find its place in the valleys, meadow and forest landscapes in the background of your model installation. Equipped with many typically lovingly designed accessories. Everyone would recognize them - the Black Forest farms with their large shingled roofs, their lovingly designed balconies and galleries, the laterally annexed dairy for cooling the fresh milk churns, the dunghill in front of the stables and the small house annexed on the rear side to bring fodder and silage in and leading to the loft and granary. Such farms are widely scattered throughout the Black Forest landscape.

**Epoch I** • 270 × 240 × 165 mm

#### 130387

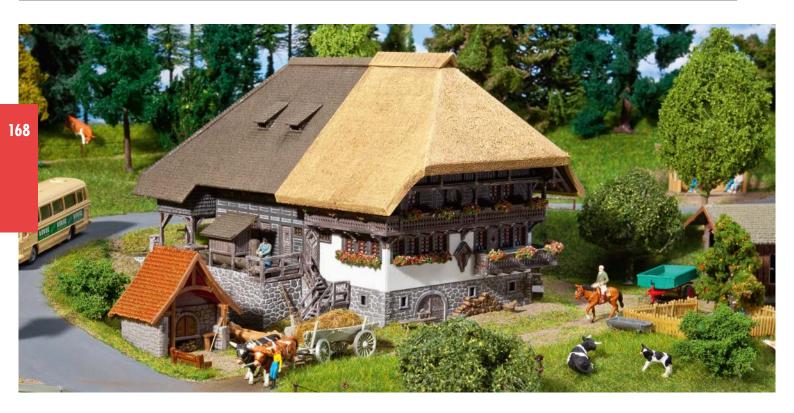

### Small Black Forest house

With timber framing, shingle roof and a side-mounted water-wheel which can be driven by retrofitting an electric motor (art. 180629, 12-16 V, AC voltage).

**Epoch III** • Movable model • 155 × 125 × 123 mm

167

## Black Forest Farm with straw roof

Daily life of centuries past! Magnificent Black Forest farm, which unifies a broad-projecting hipped roof house – roofed half with straw and half with shingles, stable and barn. One white plastered storey rises from the stonewalled cellar level of natural stone and includes balconies with greenery, a milk house on the side with a well, which leads to a staircase and entrance ramp to the barn. Next to the stable, there is a manure pile. Scythes, ladders, and diverse small accessories are included in this elaborately aged model.

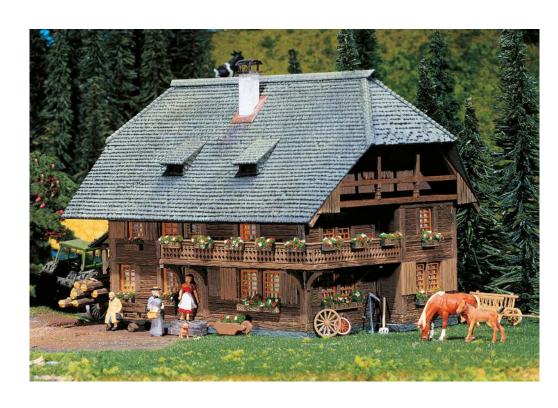

**Epoch I** • Patinated model • 230 × 220 × 145 mm

#### 130367

### Black Forest house

A small, typical Black Forest house perfectly suited for meadow and forest scenery.

**Epoch I** • 165 × 110 x 113 mm

Regio → Black Forest

130323

## Material cable-way

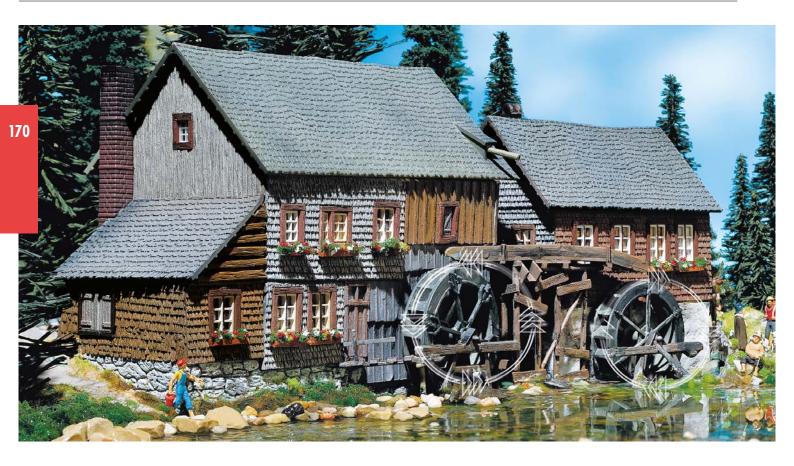

Alpine shuttle! Small single-track cable-car with two different transport gondolas for various usages in inaccessible mountain regions.

While goods are transported in open crates with slats (accessories include milk cans), the covered trolley is suitable for transporting a person. The material cable car serves to access mountain farms or provides mountain athletes a shuttle to high altitudes. The mountain and valley stations in open design construction are panelled with wood and their roof components are aged. Drive motor and controls are located in the shingle-roofed

mountain hut with an addition on the back, benches for resting, wood burning stove and a fireplace.

**Epoch II** • Patinated model • incl. motor • Mountain station:  $83 \times 58 \times 52$  mm • Valley station:  $50 \times 42 \times 42$  mm • Distance from mountain and valley station: max. 1000 mm • Inclination: max.  $25^\circ$ 

■HO Regio • Black Forest

### 130388

## »Hexenloch« Mill

The original mill, surrounded by a romantic landscape, was built in 1825 and has been in operation ever since.

The two waterwheels of the original mill are driven by water falling onto the wheels from above, the two wheels turning in opposite directions. The model has a motor (12-16 V, AC voltage), which also moves the log frame saw up and down. With terrain part.

**Epoch I** • incl. motor • 310 × 130 × 115 mm

#### 130225

### Water mill with pump

with "overshot" water wheel, meaning it is powered from the top.

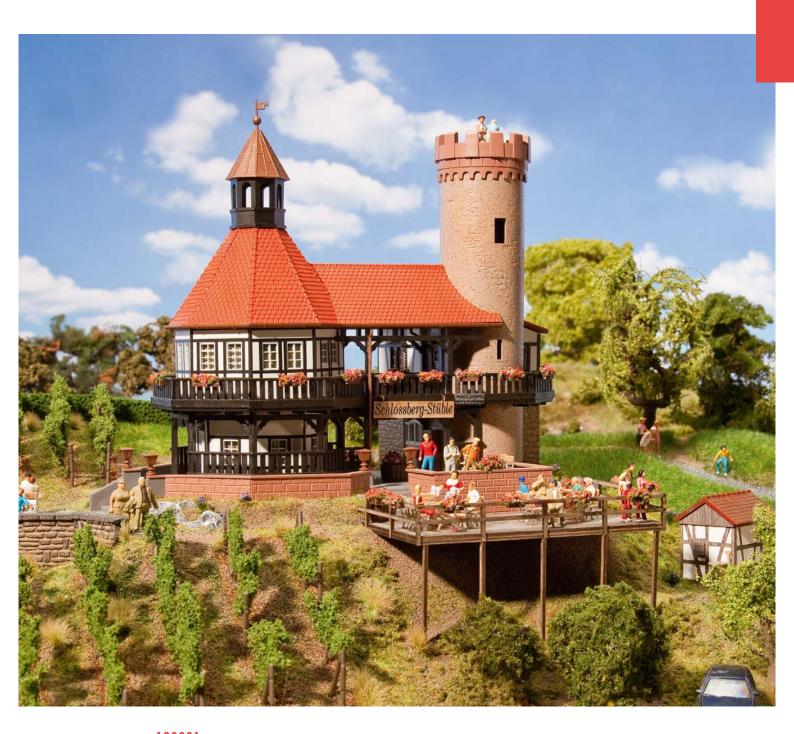

This mill can be operated with real water. The construction set contains a special electric pump (12-16 V, AC voltage) and a bottom part. The pump is built into the mountain piece; it transports the water from the basin into the water channel. From there, the water flows back over the mill wheel, powers it, and runs back into the basin at the bottom.

## LAKE OF CONSTANCE

Why travel so far? The beauty of the Swabian Sea has plenty of facets, the isles, sleepy old towns, ferryboats and sailing yachts, bathing beaches, organic viticulture and orchards.

130391

# Schlossberg Inn

This beautiful and luxuriously formed model can be placed ideally on a hill. The terrace and the tower base are made out of wood and glazed accordingly. Small parts for the installation are included.

## The »Sonne« inn

A typical rural inn with a nicely formed terrace and a small summerhouse with tables and chairs.

**Epoch I** • 180 × 155 × 115 mm

#### 180445

### Mountain bikes

Modern bicycles (mountain bikes) for designing many small scenes in a variety of models.

Epoch V

#### 130513

### Boats and pedaloes

This kit contains: 1 rowing boat, 1 sailboat, 2 rubber dinghies, 2 pedal boats and 2 canoes for the arrangement of beach segments and water scenes.

**Epoch IV** 

### Quay wall

Sheet pile walls with concrete covering and various bitts to fasten the ships. Ideal for building inland harbours and sea ports.

**Epoch II** • Patinated model • 518 × 16 × 37 mm

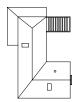

Regio → Lake Constance

### 130908

# Vineyard with garden restaurant

Vineyard in a nice semi-timbered optic. This is a typical regional model that consists of many small parts, garden tables and chairs, as well as other decorative elements (material for flowers and climbing plants), and has a lot to offer. Also suitable as a hotel.

**Epoch III** • 240 × 170 × 152 mm

#### 130329

## »Moser Chalet« Alpine hut

Two-storey wooden construction with large sunbathing terrace at the front and brickwork foundation, fitted with tables, benches, fountain and solar panels on the roof. Offers ramblers and skiers an advantageous possibility of having a meal and passing the night.

Epoch IV • Patinated model • 182 × 130 × 120 mm

151064 Trekkers

15106

Waiters and waitresses

154009

4 Chamois + 6 Ibexes

Regio → The Alps

130555

## »Kübler« Coppery

Modern digital printing! Two-storey house in rural alpine style with cooper's shop. The facades and window jambs are ornamented with paintings, the accentuation of the facade with bushhammered angle ashlars and wall blocks on the ground floor as well as the shaping of a back corner of the building with column arcades.

**Epoch I** • 150 × 130 × 110 mm

### Paintings in fresco technique

That old handicraft decorates many houses, in particular in the Alpine zone. The elaborate compositions are like open picture-books that serve as exterior decorations and are called ,Outdoor paintings' in common speech. Their stories reveal many details on the former house-owners. They tell of names and trades, of hopes and fears, and often reflect a certain piety.

**Regio** → The Alps

#### 180391

# Suspended bridge

Laser-cut model of a small suspension bridge with a walkway covered with planks, and handrails. It spans fairly deep gorges or allows to cross bodies of water.

The bridge built can be of various length. A wire cable is included in the package.

**Epoch IV** • Lasercut model • 300 × 30 × 27 mm

### 130554

### Alpine farm

Two-storey dwelling house built in rural alpine style and offering plenty of diversity. While the ground floor features white rendering, the upper storey is of sumptuous timber construction. The shingles of the slight-slope roof covering are weighted with stones to protect them from being blown off by the wind. A large balcony runs all around the upper storey, with a smaller one being provided on the gable. The kit includes gable decoration, chimneys, and a wayside cross.

**Epoch I** • 179 × 156 × 115 mm

# Summit cross with mountain peak

Tall wooden summit cross as can often be seen in the mountains. The rock forming the mountain peak and 2 figures are included. The current line of miniature figures offers ramblers and mountaineers.

Epoch I - Patinated model - 175 × 117 × 120 mm

#### 180548

# Rambling itinerary accessories

The package contains a shelter hut for ramblers, footpath signs, a wooden bridge, footbridges, an information panel – essential protection and orienteering elements for the rambler.

**Epoch II** • Patinated model • 42 × 32 × 28 mm • 39 × 18 × 13 mm • 120 × 18 × 13 mm • 106 × 46 × 19/53 mm

#### 180390

# 2 Dams for stream

Two weirs in different sizes supply water for a mill, water meadows or simply allow for some angling delight along a stream. Slide, railing and stonework a combination of laser cut and die cast materials.

**Epoch I** • Lasercut model • 120 × 60 × 50 mm • 60 × 30 × 12 mm

#### 180436

# Avalanche barrier

Snow barriers. Supporting structures in Alpine areas for stabilisation of layers of snow. The kit includes 10 snow bridges as a set. You can use these to protect your miniature population from avalanches.

**Epoch III** • Patinated model • 31 × 24 × 36 mm (10 x)

**■HO** Regio → The Alps

#### 130326

# Mountain rescue cabin

Where the mountain rescue workers start their alpine rescue missions. The two-storey mountain rescue cabin combines a solid stone plinth storey with a traditional log plan construction upstairs. The typical timber notches, masonry door and windows surrounding emphasise the solid outside of the cabin.

**Epoch III** • Patinated model •  $165 \times 96 \times 90 \text{ mm}$ 

#### 130382

# Haystack

Laser cut model of a roofed barn with masoned foundation and shingle roof for stacking hay. A raised floor divides the haystack into two stories.

**Epoch I** • Patinated model • Lasercut model • 92 × 82 × 73 mm

#### 130292

# Refuge

Enjoy the view! Such closed off mountain huts offer walkers, hikers and climbers shelter during thunderstorms. They can also be used as whistle stop or accommodation on the mountain. Our artificially aged model features wood-paneled walls, a shingle roof and a flagstaff.

**Epoch III** • Patinated model • 87 × 60 × 66 mm

# »Gentian« Pharmacy

Dwelling built in the alpine style. Accomodates the »Gentian« chemist's shop on the ground floor. Decoration and equipment parts included.

**Epoch IV** • 150 × 130 × 112 mm

#### 130331

# Sports outfitters/ Paragliding school

This dwelling built in the alpine style accomodates a sports outfitters' shop and a paragliding school.

**Epoch IV** • Patinated model • 177 × 155 × 127 mm

#### 130547

# Livestock shelter

Modern commodious pasture shelter for livestock. The model's outside walls are made from real wood and the vertical boards are laser cut. We chose a special cardboard as material for the window tarpaulin. Framing construction, roof and the ample fence surrounding the shelter are made of plastics.

**Epoch V** • Lasercut model • 115 × 98 × 45 mm

# NORTH SEA AND BALTIC SEA

On the shore! Every region has its peculiarities. Well known on that coast are light houses, harbour structures, ships, houses with reeds-thatch roofs, and the most varied windmills.

#### 131010

# »Hörnum« Lighthouse

The model used is the »Hörnum« lighthouse built in 1907 on the island of Sylt from over 600 cast-iron jacket plates screwed to each other. Slim red/white tower equipped with sea navigation lamp (blinking beacon) flashing at regular intervals (12-16 V, AC voltage).

Until 1930 it was used as a school for the children on Sylt. Today the ground floor serves as Registry Office.

**Epoch I** • incl. motor • 69 × 65 × 335 mm

#### 130383

## Windmill

Frisian construction, with masonry basement, wide gallery and windmill on top. The canvas-covered sails are operated by the motor supplied (12-16 V, AC voltage).

Epoch I • Patinated model • incl. motor • 180 × 180 × 320 mm

#### 130250

# Dwelling house with reeds-thatch roof

One-family house, classic clinker-built construction of northern Germany with reed-thatch covering the roof and over the dormers and matching flowers boxes and fencing.

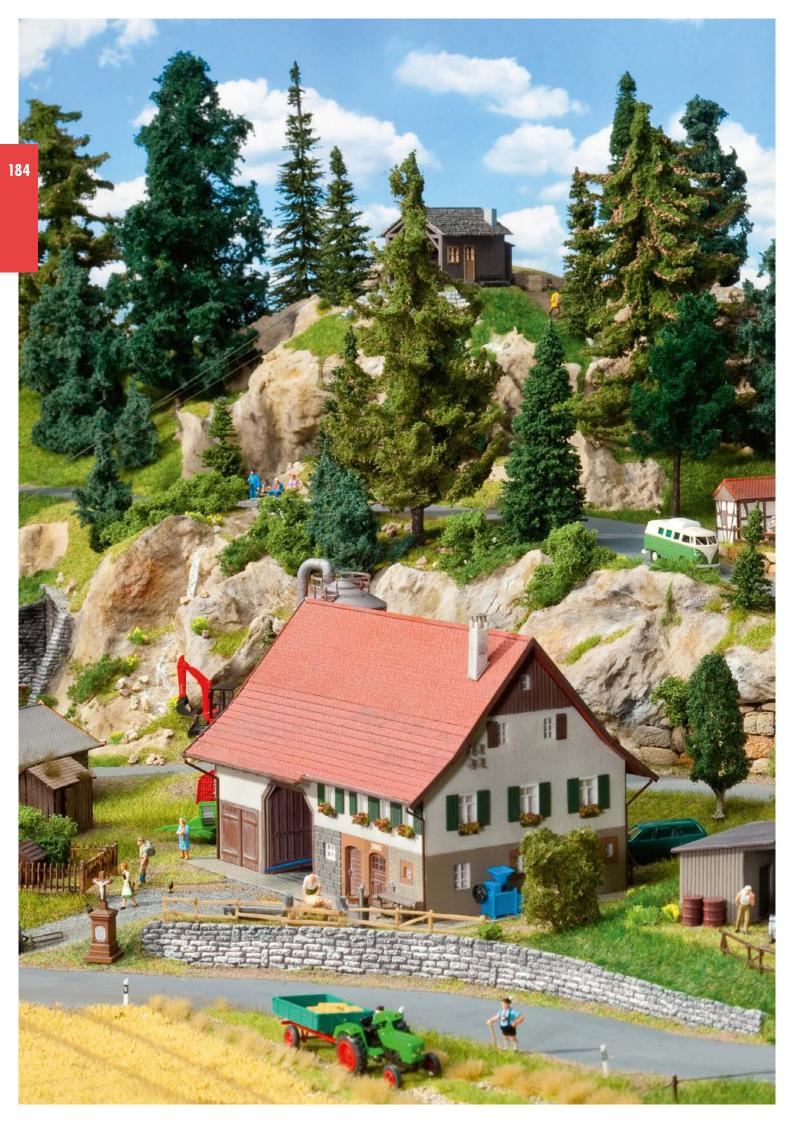

#### 130310

# Northern German two-family house

Clinker-type construction, with winter garden annexes.

**Epoch III** • 160 × 125 × 110 mm

# EVERYTHING FOR THE FARM

Except country air! Many models and scenes tell of the love for countryside and animals. Whether you use small or large stables, silos and diverse sheds. You can create small marvellous paradises full of life.

#### 130520

# Breeding farm

consisting of a modern residential house, extensive stables for cattle farming and horse keeping, which can be suitably equipped by purchasing stable interior furnishing (item 130525). The wide sliding doors on both sides of the stable can be opened and closed by installing a door drive unit (item 180624, not included). The stabling allows the Car System vehicles (e.g. item 161536 + 161552) to pass through.

**Epoch V** • Patinated model • Movable model • Residential house:  $127 \times 126 \times 88$  mm • Stables:  $265 \times 146 \times 93$  mm • Stable door:  $40 \times 50$  mm

#### 130526

# Mangers

various mangers for outdoor use intended for sheep, goats, cows, cattle, and horses.

**Epoch V** • Patinated model • 34,5 × 37 × 33,5 mm (2 x) • 31 × 19,5 × 24,5 mm (2 x)

#### 161536

## MF Tractor

with trailer (WIKING) **Epoch V**  ■H0 Farm

#### 130522

## Stables

Spacious present-day stable building for cattle or horse keeping, which can be furnished by purchasing the stable interior equipment (art. 130525). The broad sliding gates on both sides of the building can be made to open and close by mounting the door drive unit (art. 180624, not included). The stable lends itself to the through traffic of Car System vehicles (art. 161536 + art. 161552). Can be used as autonomous building or to supplement art. 130520.

**Epoch V** • Patinated model • Movable model • 265 × 146 × 93 mm

#### 130525

# Stable interior equipment

especially suited for fitting up the stables of art. 130520 + 130522. Also contains hay racks with skewed rungs to feed the cows as well as various partitions for the horses' stalls. Includes bright interior lighting.

Epoch V • Patinated model

#### 130523

# Hay bale store with workshop

Roofed storage shed for the dry storage of hay and straw bales, open fitted-up workshop and garage (doors can be opened). Hay bales and other typical accessories of a workshop are included. Such a building should not be missing on any farm.

**Epoch III** • Patinated model • 188 × 92 × 45 mm

# Implement shed

of open covered construction to place or park agricultural equipment and vehicles. Versatile use.

#### 180621

# Silo

Round tower silo in a corrugated iron look for feed and grain storage. With outer pipe, ladder and railings.

**Epoch III** • Patinated model • 52 × 41,5 × 123 mm

#### 130530

# Feed silos

2 tower silos with metal frame for dry outdoor storage of animal food, e.g. for pig-breeding, poultry farming, etc.

**Epoch V** • 27 × 24 × 65 mm (2 x)

4 roofed looseboxes, fully fitted up, with outdoor fenced pastures at the rear. Note: By purchasing 2 packages the stables can be assembled to form a self-contained building featuring an open central gangway.

**Epoch IV** • 234 × 119 × 71 mm

#### 130328

# Henhouse with free range pen

for the backyard decoration in residential or village area. Consisting of a henhouse, feeding and water troughs, pigeonry, starling nest box, vegetation area with pond and wire mesh fence (without animals).

You can find matching animals in the figurine programme.

**Epoch II** • Patinated model • 171 × 70 × 59 mm

18041

# Wire mesh fence with wood poles

Also adequate to extend the fence of the henhouse (art. 130328).

Epoch III - Total length: 340 mm

#### 180434

# Fence systems for stalls and open stable farm

plug-in system for up to 3- or 4-level fencing

**Epoch V** • Total length: 2000 mm (2 × 1000 mm)

#### 180430

# Paddock fence I

Three-row design, with wooden posts and gate. Best suited for pastures of horses and other animals.

**Epoch II** • Total length: 876 mm

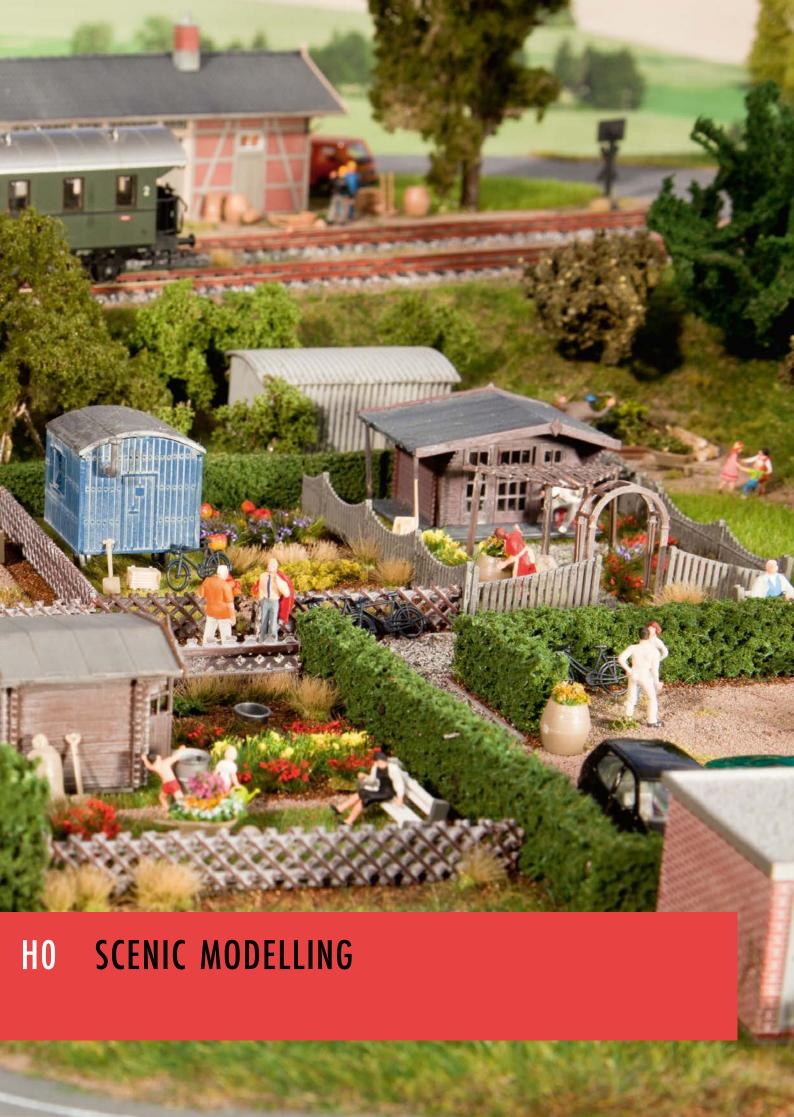

#### 180431

# Paddock fence II

Two-row design, with posts and gate. Best suited for cattle pastures.

**Epoch II** • Total length: 876 mm

# IN THE GARDEN

Small part perspectives! It's always the small things that complement, decorate or improve the overall impression. In this way every model layout will get the certain something through tiny decoration elements.

#### 180542

# Swimming pool and utility shed

The perfect equipment for the garden with pool, utility shed with imprint and flower boxes, matching plant tubs and garden barbecues in masonry.

**Epoch III** • Patinated model •

Pool:  $80 \times 44 \times 26$  mm • Summer house:  $60 \times 53 \times 32$  mm

# Garden design elements

consisting of various brown creeper trellis, rose-tree arch, pergolas that are partly fitted with etched-wire filigree lattices, and plant tubs.

**Epoch IV** 

#### 180607

## Sauna inside barrel

A bit of well-deserved relaxation. A sauna drum on its side with a compact size and timber peg substructure lets you sweat yourself to health virtually anywhere. The rear flue tube and the tensioning straps lending additional stability to the drum are made from steel. Enter into the laser cut drum with pitched roof through a glass door.

Epoch VI • Lasercut model • 51 × 36 × 49 mm

180902

2 Garden grills

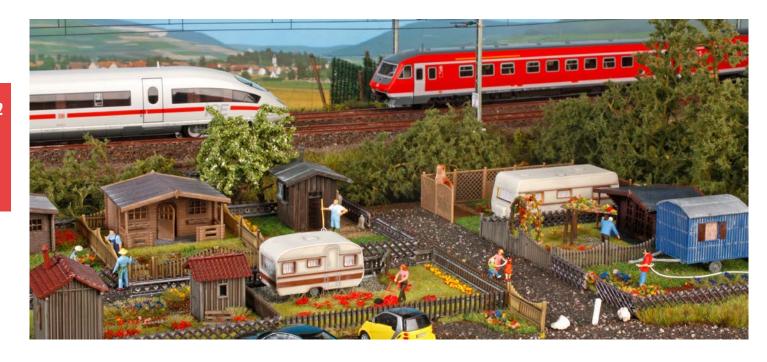

180937

2 Hammocks with support

180910

Sun umbrellas, tables, benches

# **ALLOTMENTS**

Allotment gardens which can be constructed separately or expanded to become a large settlement. Quite common near railways or rivers.

## Allotments with contractor's trailer

**Epoch III** • Patinated model • 105 × 74 × 40 mm

#### 180491

## Allotments with summer house

**Epoch III** • Patinated model • 105 × 74 × 32 mm

#### 180492

# **Allotments** with small garden house

**Epoch III** • Patinated model • 105 × 74 × 32 mm

#### 180493

# **Allotments** with large garden house

**Epoch III** • Patinated model • 105 × 74 × 36 mm

#### 130208

# 3 Summer-houses

Timber construction. Versatile in their use.

**Epoch IV** • 36 × 36 × 32 mm • 54 × 49 × 32 mm • 60 × 53 × 32 mm

# FASCINATING BALLOONING

get in and waft into the air. The hot air balloon will take you closer to heaven. Burners and gas bottles provide lift for balloon cover and woven wicker basket. An RGB LED simulates a gas flame. From above you can let your eyes wander across the model landscape and look for the right spot to land.

# ARAL 131001 Hot C

#### 131004

# Hot air balloon

A bit nearer to the sky. The basket made of woven osier and the red envelope with the cross of the Swiss flag will enlarge the theme of your installation in the vertical direction. Can be retrofitted by adding the minilight effect fire flicker Art. 180695.

**Epoch IV** • New Item 2016 • ø 170 × 228 mm

# Hot air balloon with gas flame

An RGB LED simulates a gas flame.

#### 180575

# Barbecue site

**Epoch III** • 78 × 54 × 48 mm

#### 180577

# Adventure playground

with tables and benches, litterbins, swings, seesaws, climbing structure, adventure hut, sand pit, giant stride and a wooden train.

**Epoch III** 

#### 180576

# Playground equipment

With swing, slide, etc.

**Epoch III** 

#### 180443

12 Park benches

in different colours.

**Epoch III** 

# Beer garden

As you would wish to find it. With tables, chairs, entrance sign, parasols, counter, lighted lamp festoon (180 mm) and various accessories.

**Epoch III** • 54 × 54 × 50 mm

#### 180663

# Light chain with paper lanterns

2 light chaines with 5 lampions each. 16 V alternating current voltage (AC). 2 × max. 250 mm

180438 7 Tables and 48 Chairs

180439 24 Garden chairs and 6 Tables

180441 20 Benches

180442 4 Tables and 24 Chairs

180444 40 Beer benches and 20 Tables

180440 8 Sunshades

# Clock kiosk

Replica of a pre-war structure in Frankfurt on the Main. 4 large clock faces. Served as a newsstand.

**Epoch I** • 52 × 52 × 128 mm

#### 180581

#### Fountain

With figure, 4 jets and »water« surface.

**Epoch I** • 43 × 43 × 56 mm

#### 130232

# Ornamental fountain

An attractive centre of interest for a village square or a town circus. The fountain can operate with water pumped through by pump (art. 180627) when a water tank is placed below the fountain. When no water is used the bottom should be covered with lake plastic sheet (art. 170191) for realistic decoration.

**Epoch III** • Movable model • 101 × 100 × 64 mm

#### 180585

#### Town accessories

Telephone booths, advertising pillars, letterboxes, hoardings, clocks, flower pots, bus shelters, benches, waste paper baskets, cigarette vending machines – with these accessories, in part several pieces of individual items available, the town or village looks real.

**Epoch IV** 

# Market stands and carts

A selection of characteristic items of a farmer's market, incl. a hot dog stand. A particularly charming »Market Day« can take place in the midst of old town houses.

Epoch II

#### 180614

# Flower and cheese stand

Pleasant flower and cheese stands, made to look exactly the same as at many weekly markets across the countryside. A variety of design elements are included.

**Epoch V** • 32,5 × 36 × 31 mm (2 x)

#### 180615

# Liquor and fruit stand

No market day would be the same without fruit and vegetable stands. A variety of small parts provide enough possibilities to ideally decorate the scene.

**Epoch V** • 32,5 × 36 × 31 mm (2 x)

180932 Old-clothes container Epoch IV

## Modern lifts

Two steel- and glass construction lift towers of different heights.

Tall: use as outer lift on multi-storey buildings or pedestrian bridges.

Low: use as ground-level lift access above underground car parks or along platforms, or as a visible shaft atop a flat roof.

**Epoch V** • 52 × 31 × 37 mm • 52 × 31 × 122 mm

#### 180606

# Modern shopping cart roofing

These roofings are located in front of every modern store and supermarket, directly connected to the building or throughout the parking lot. The ideal supplementation to the matching building models.

**Epoch V** • 60 × 52 × 54 mm

#### 180584

# 2 Bicycles stands with bikes

Kit includes two racks and 16 bikes. Adds realism to any scene.

**Epoch II** •  $65 \times 30 \times 27 \text{ mm}$  •  $63 \times 25 \times 26 \text{ mm}$ 

#### 180608

# »Kiddie Rides« Rocking automats

Exciting chases on motorcycles, large scale operations with the fire fighters or shooting across the sea in a speedboat. Just insert a coin and your adventure starts with one of our five swinging kiddie rides. The kit also includes an off-road vehicle and of course a loco.

#### **Epoch IV**

# »City Compact« halts

The package contains the models of a covered and opened bus stop originally developed and implemented by Team Tejbrant as well as two bicycle stands with bikes.

**Epoch VI** • Bicycle stand:  $60 \times 26 \times 11$  mm (2 x) • Closed halt:  $94 \times 35 \times 32$  mm • Open halt:  $90 \times 41 \times 32$  mm

#### 180549

# Building site decoration

From the concrete mixer through the scaffolding with safety net up to the rubble containers. **Epoch III** 

#### 180601

# Plaster silo and building-site trailer

Mobile silo, printed bags of plaster piled on pallets and a building-site trailer for workers and utensils.

**Epoch IV** • Construction trailer:  $61 \times 31 \times 37$  mm • Silo:  $24 \times 24 \times 64$  mm

#### 180544

# Roof equipment set

The set contains etched snow fences, solar collector elements, radio antennas, parabolic antennas, stainless-steel chimney parts, etc. **Epoch V** 

# 2 Industrial silos

For versatile use in the industrial, commercial, or agricultural area.

**Epoch IV** • 66 × 42 × 130 mm

#### 180589

#### Lumber assortment

Logs, rafters, boards, wood stacks, splinter wood – whether railway or HGV cargo, wood yards for joiners' workshops or sawmills – this extensive assortment of lumber is suitable for a variety of uses on any layout.

#### 180588

# Freight load

Wooden cases, sacks, barrels, machines and sack barrow – a plentiful variety for many purposes.

**Epoch IV** 

#### 180604

# Shop interior equipment

The ideal equipment devices for small businesses, consisting of mitre saws, planing machines, belt saw, table drilling machines, industrial shelves, fire extinguisher etc.

**Epoch III** 

# »Wall«

# Noise protection wall

Noise protection in a green robe! Modular noise protection elements for the construction of public streets and railway lines, which in the original, unfold their complete protective effect after they have been filled with dirt and by means of greening – these show themselves to be close to nature.

**Epoch VI** • 370 × 3 × 42 mm

#### 180420

# »Concrete«

# Noise protection wall

Relaxing peace for residents due to less traffic noise! Modular noise protection elements made of a concrete construction for set-up next to public streets and railway tracks.

**Epoch VI** • 370 × 3 × 42 mm

#### 180422

# $\mathsf{wWood}$

# Noise protection wall

Natural noise protection! Modular noise protection elements made of wood for the construction of public streets and railway tracks. Model with supports and base made in a steel and concrete look.

**Epoch VI** •  $370 \times 4 \times 42 \text{ mm}$ 

# Motor cargo barge

for inland navigation on model installations. Covered loading hatches and wheel house. Not buoyant. Flat bottom.

**Epoch III** • 280 × 60 × 67 mm

# River cargo boat with dwelling cabin

Covered loading hatches, wheel house and annexed dwelling cabin. Not buoyant. Flat bottom.

**Epoch III** •  $360 \times 60 \times 67 \text{ mm}$ 

#### 161460

131006

# House boat

Motorised house boat

**Epoch IV** • Movable model • 164 × 53 × 46 mm

**Epoch III** • 164 × 53 × 46 mm (2 x)

# Arched bridge

564 mm long, complete with 3 straight track beds each 188 mm and 18 pieces of concrete piers. The concrete piers item 120538 are compatible with this. Catenary operation possible. Particularly suitable for Märklin track C and all other track types. Can be extended with items 120474, 120475 and 120476.

**Epoch II** • 564 × 76 × 109 mm • Clearance: 46 mm • Track-bed height: 60 mm • Platform bed width: 72 mm

#### 120541

# Deck arch bridge

355 mm long, complete with 2 straight track beds. The supporting structure can be assembled in two different ways. Can be used for all model tracks except Märklin track C. Track bed elevation: 117 mm, diminishable to 91 mm.

**Epoch II** •  $355 \times 65 \times 130$  mm • Clearance: 105 mm

#### 120534

# Girder bridge

180 mm long. The bridge can be built above or below the track bed. Can be used as girder bridge for art. 120536.
Can be used for all model tracks except Märklin track C.

**Epoch II** • 180 × 65 × 57 mm

#### 120538

## Concrete piers

18 pcs., each 7 mm. For art. 120482, 120534, 120536 and 120541.

**Epoch II** • 75 × 30 × 7 mm (18 x)

# Arch bridge

360 mm long, complete with 2 straight track beds and 6 concrete piers each 7 mm. The bridge (art. 120534) is compatible with this bridge as a girder bridge. Can be used for all model tracks except Märklin track C.

**Epoch II** • 360 × 65 × 120 mm

**Epoch III** • 376 × 77 × 138 mm • Clearance: 45 mm • Platform bed width: 72 mm

#### 120496

# Fishbellied bridge

472 mm long, compl. with 2 straight 188 mm track beds and 2 bridge heads. Can be used for all model tracks.

**Epoch II** • Patinated model • 472 × 87 × 82 mm

# Road bridge

Modern concrete road bridge to be used as a flyover spanning a railway, road or river. The bridge is ready for use with the Car System. Lay the wire (not included), apply the roadway sheeting and the fun begins.

**Epoch V** • 420 × 123 × 118 mm • Clearance: 112 mm

#### 120533

# Stone arch bridge

Several bridges can be attached to one another.

Can be used for all model tracks except Märklin track C.

**Epoch I** •  $355 \times 64 \times 120$  mm • Clearance: 103 mm

#### 120498

# Stone arch bridge

Small, stonewalled natural stones, arched bridge with laser cut paths on the side and iron handrail. The model kit contains a sub-structure of wooden planks and is therefore, suitable for use as a railway bridge for Märklin C-tracks.

**Epoch I** • Patinated model • Lasercut model • 185 × 64 × 85 mm • Clearance: 52 mm • Clearance width: 50 mm

Old, thatched, arch bridge with timber bearing structure beneath a saddleback roof thatched with shingles. The two towpaths to the left and right of the channel lead through vaults lining the masoned defensive dikes. The superstructure's bearing structure and the handrails are made of real wood using laser cut technology.

**Epoch II** • Patinated model • Lasercut model • 370 × 83 × 110 mm

#### 120209

# Roofed pedestrian bridge

Slender stone pier bridge with roofed wooden framework, to be used as cycle track and footpath. Walkway, parapet and roof framework are made of real timber. Several models can be built in a row.

**Epoch II** • New Item 2016 • Lasercut model • 160 × 32 × 68 mm

#### 180391

# Suspended bridge

Laser-cut model of a small suspension bridge with a walkway covered with planks, and handrails. It spans fairly deep gorges or allows to cross bodies of water. The bridge built can be of various length. A wire cable is included in the package.

**Epoch IV** • Lasercut model •  $300 \times 30 \times 27 \text{ mm}$ 

# Bietschtal bridge

Original reproduction of the Bietsch valley Viaduct. This impressive structure is located on the route Kandersteg-Zermatt (CH) on the southern ramp of the Lötschberg Tunnel between Goppenstein and Brig. Railway traffic on two tracks. Usable for all model tracks.

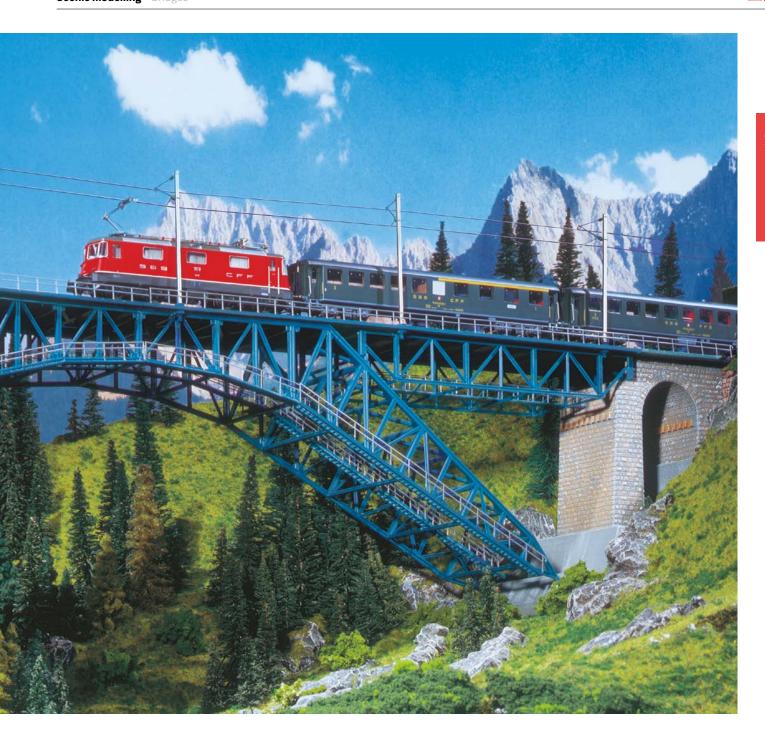

**Epoch II** •  $1100 \times 115 \times 255$  mm • Clearance: 150 mm

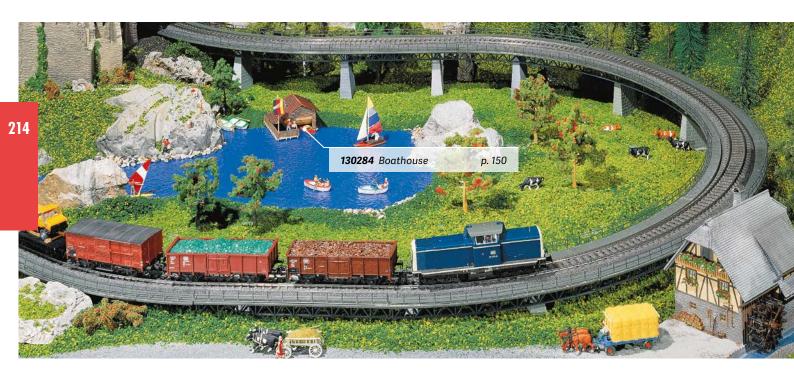

Different views of the imposing structure of the original Bietschtal viaduct Photo credits: wikipedia.de, Hansueli Krapf

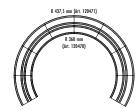

# Up and over bridge set

This set contains: 4 straight and 8 curved track-beds, 2 piers each of 15, 25, 35, 45, 55 and 65 mm height, 4 piers 75 mm, 6 pier tops 8 mm in order to adjust the height to fit the FALLER-bridges, and connecting tongues for the track-beds. The track-beds are suitable for model- and c-tracks. To extend either side of the ramp, additional piers (art. 120473), straight track-beds (art. 120474) and curved track-beds (art. 120476) are available. to be used for building a parallel circle (R 437.5 mm) for up and over bridge set (art. 120470).

**Epoch I** • Track, curved: R = 437,5 mm, 30° • Track, straight: 188 × 71 mm

#### 120470

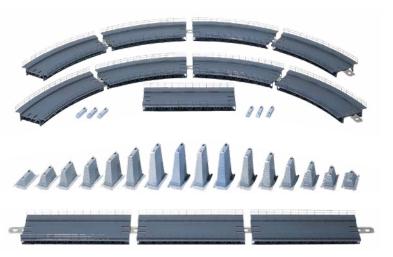

# Up and over bridge set

This set contains: 4 straight and 8 curved track-beds, 2 piers each of 15, 25, 35, 45, 55 and 65 mm height, 4 piers 75 mm, 6 pier tops 8 mm in order to adjust the height to fit the FALLER-bridges, and connecting tongues for the track-beds.

The track-beds are suitable for model- and c-tracks. To extend either side of the ramp, additional piers (art. 120473), straight track-beds (art. 120474) and curved track-beds (art. 120475) are available.

Clearance height: 66 mm resp. 81 mm with extension pieces. R=360 mm

**Epoch I** • Track, curved: R = 360 mm, 30° • Track, straight: 188 × 71 mm

# Bridge parapet set

with two base piers.

**Epoch II** • 168 × 60 × 142 mm (2 x)

#### 120477

# Top section of stone viaduct

straight, with 2 curves, 1 road bed (188 mm) with guardrail. Several top parts can be strung together.

Epoch I • 188 × 71 mm • Track-bed height: 65 mm

#### 120478

# Top section of stone viaduct

curved, with 2 curves, 1 track bed with guardrail, 30°, middle radius 360 mm. Several top parts can be strung together.

Epoch I • R = 360 mm • Track-bed height: 65 mm

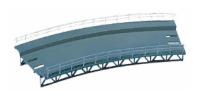

## 120474

# Track bed

Classic model! »Modern station with passenger hall flooded with light. The restaurant section can be furnished with the tables and benches supplied to give the building a very natural atmosphere.« (Text from the original catalogue). This model follows the original that was at that time Goch Station located on the lower course of the Rhine.
First launch: 1966

**Epoch III •** New Item 2016 • 529 × 158 × 158 mm

INCLUDED
Reprint FALLER magazine

# GENUINE CLASSIC MODELS!

Classic Models are issued in a high-quality retro packaging that includes a reprint of the relevant FALLER magazine of that time. Kits B-111 and B-271 today enjoy a cult status among fans as they marked the entry of the most varied aspects of innovative architecture into model making.

It is Hermann Faller, one of the two FALLER company founders, who discovered the »Villa in Tessin« during a sojourn in Switzerland in the fifties. Inspired by the then most modern building comprised of two parts featuring a common access in the middle through the terrace, Hermann Faller had a replica of that villa built in the Black Forest that was to become the residence of the family.

The classic series will continue in 2017.

# MODELS OF THE MONTH

12 x a year! Month after month new special models or re-editions are launched in small quantities at an unbeatable price. It's worth being fast.

#### 191701

# »Lützen« station

**Epoch I** • 136 × 117 × 265 mm

# Feedstuffs shop

Multistorey animal food works with two roofed loading platforms and a detached double silo with large capacity for storing and handling the products. It is filled using pipework.

**Epoch III** • 195 × 124 × 270 mm • 150 × 130 × 200 mm

## 190247

# »Chronopost« Logistics center

The closed building block features a graveled flat roof and 19 roller shutters for incoming and outgoing goods. Light enters the building through skylights and the framing ribbon glazing.

**Epoch III** • 376 × 200 × 91 mm

## 190600

# Brickworks

Multi-piece model includes the main building with combustion chambers, kiln and stack plus oast house for brick blanks. Includes rail lines and numerous decorations such as hand- and wheel barrow, wagons, ladders, stacks of bricks, and more.

**Epoch I** •  $330 \times 250 \times 306 \text{ mm}$ 

#### SPECIAL MODELS ITALY

#### 190620

# »Collenibbio« Station

Plaster-look railway station with wide doors leading to the platform.

**Epoch I** • 204 × 103 × 120 mm

#### 190621

# »Collenibbio« Railway buildings

Extension of article 190620.

**Epoch I** • 145 × 88 × 72 mm

#### **SPECIAL MODELS SWEDEN**

# Red cottage

With white window frames.

**Epoch I** • 130 × 85 × 71 mm

# »Koppartrans« Service Station

Service station with shop, fuel pumps, workshop and car wash.

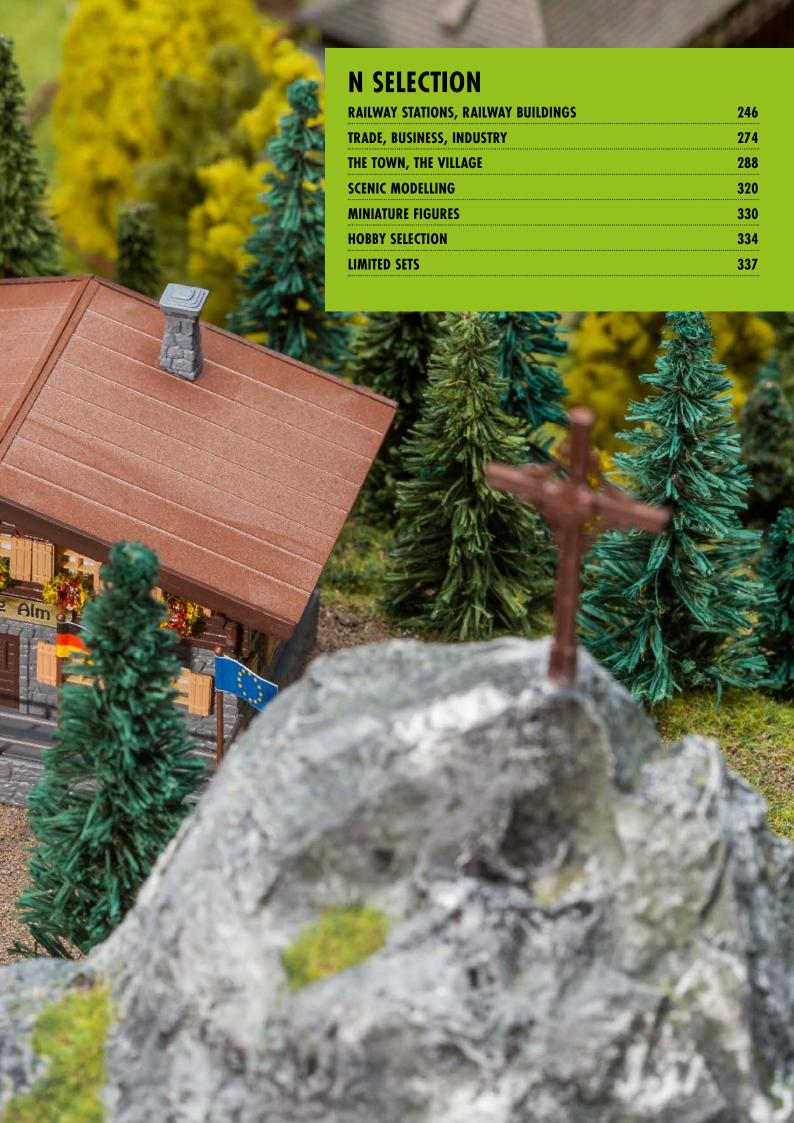

**Epoch II** • Petrol station:  $192 \times 141 \times 64$  mm • Repair shed:  $85 \times 65 \times 39$  mm

## 212121

# »Langwies« Station

Several railway station buildings of timber construction and same ground plan, in part mirror-inverted, have been set up along the Chur-Arosa line of the Rhaetian Railway. Those buildings that were erected nearly 90 years ago remarkably match the landscape.

Their distinctive features are the place names and maxims carved in wood and set off in white colour. During

the summer those buildings are additionally embellished with dozens of geraniums set in flower boxes.

**Epoch II** • New Item 2016 • Lasercut model • 116 × 63 × 65 mm

#### 212120

# »Stugl-Stuls« Station with restrooms

Filigree laser-cut models designed according to the originals that are the station building and passenger toilet forming part of the station area of Stugl-Stuls classified as a historical monument. That station located on the Albula line, a UNESCO World Heritage Site, was put into operation in 1903 and is now classified as a historical monument.

**Epoch I** • Lasercut model • Railway station: 106 × 62 × 45 mm • Toilet house: 26 × 27 × 21 mm

# »Güglingen« Station

Attached freight station, covered waiting room and separate utility building.

**Epoch I** • Standard farm:  $165 \times 78 \times 78$  mm • Sanitary building:  $73 \times 30 \times 35$  mm

# Small town station »Sonnenbuehl« Classic provincial town railway station with mounted freight shed and loading ramp. Ideal model for beginners to the railway station area. Epoch II - 135 × 78 × 60 mm

# 212106

# »Hochdorf« Station

Classic station in rural areas with covered platform and adjoining goods shed.
Platforms art. 222124 and art. 222125 can be used.

**Epoch II** • 250 × 120 × 88 mm

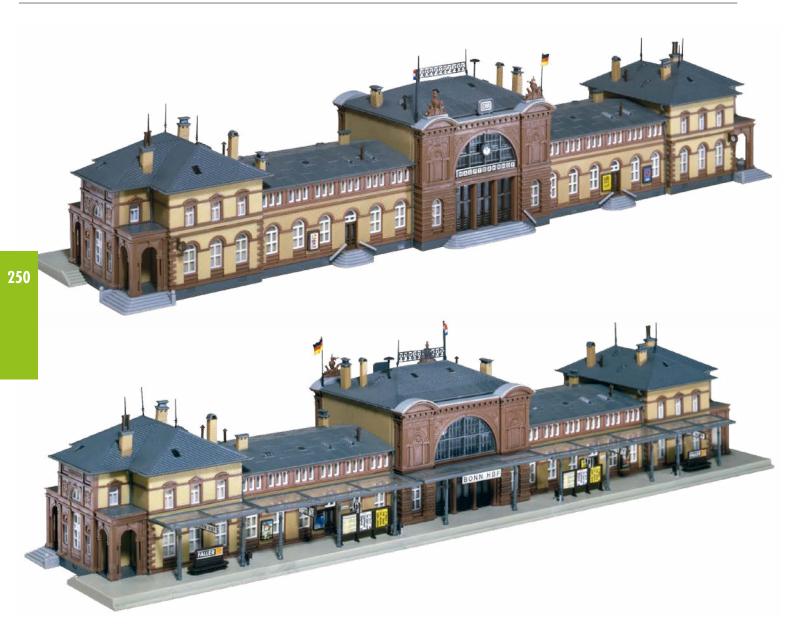

# 212104

# »Reichenbach« Station

A typical small station with attached freight shed.

**Epoch II** • 163 × 71 × 72 mm

# »Bonn« Station

A construction dating back from the Wilhelminian period, in a neo-classical style with a world famous name. For 100 years the star of many "large railway stations". Now, as a model it represents the star of the FALLER railway station concept. The beautiful richness of design which was partially reproduced from the original, the excellent reproduction of the many details captured by the remarkable delicate engravings and the variety of accessories make this construction kit the star model of every layout.

The railway station »Bonn« already has a grand format with approx. 500 mm length.

With the various models from the railway station concept »Bonn«, interesting railway station complexes can be built with the glass covered structure (art. 222128) and the platform (art. 222119). Because of the combination alternatives of the individual models the options range from a small suburban railway station to a grand main station.

**Epoch I** • 504 × 127 × 110 mm

# »Schwarzburg« Station

The railway station »Schwarzburg« built around 1900 is the attraction of any model layout. Half-timber construction, open, roofed shelter platform, richly structured hip roof and attached goods shed.

**Epoch I** • 310 × 107 × 120 mm

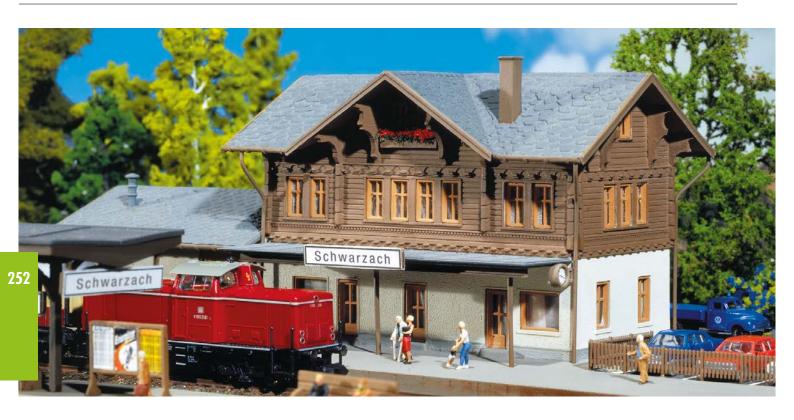

### »Karlsberg« Station

Urban railway station with white painted brick walls, sandstone, side facade and window borders, two corner buildings and centre section with a roofed entrance. Glazed platform roofing. The train shed (art. 222128) can be added.

**Epoch II** • 295 × 129 × 80 mm

## »Schwarzach« Station

with annexed goods shed and platform roofing.

**Epoch II** • 251 × 120 × 74 mm

### 222124

### **Platform**

with decoration parts. Several platforms can be built in a row.

**Epoch I** • 584 × 37 × 41 mm

155301

Train crew

Steam locomotive personnel Epoche III

155006

Passers-by III

### ICE platform

modern design, with glazed waiting room, benches, paper baskets and information boards.

**Epoch V** • 500 × 53 × 35 mm

#### 222119

### 3 Platforms

One open platform and 2 with glazed roofing. Many small parts such as benches and boards are included.

**Epoch III** • 167 × 29 × 33 mm (3 x)

#### 222125

### **Platform**

Roofed, partly without roofing, with inclined ascents. Several units can be built in tandem.

**Epoch II** • 581 × 37 × 40 mm

#### 222126

### 2 Platforms

with decoration parts. Several platforms can be built in a row.

**Epoch I** • Patinated model •  $363 \times 40 \times 37$  mm (2 x)

#### 222164

### **Platform**

covered, with passengers' exit, access ramps and accessories.

Epoch I • Patinated model • 258 × 52 × 44 mm

## Station hall

Glass-roofed station hall. This structure can be extended in both length and width.

**Epoch I** • 365 × 220 × 85 mm

### 222128

### Station hall

The glass covered structure is suitable for double track. Several platforms can be installed in tandem or side by side if so desired. An appropriate platform is art. 222119.

**Epoch II** • 168 × 108 × 90 mm

# Footbridge

Massive footbridge with lateral masonry. Flights of stairs and walkway are covered and ornamented with elaborate steel decorative elements.

**Epoch I** • New Item 2016 • Patinated model • 270 × 140 × 86 mm

### 222153

### »Radolfzell« Platform bridge

Aged model of the historical platform bridge in Radolfzell near Lake Constance. Stairwells and superstructure of the riveted steel construction, which covers two platforms, are covered by a roof.

**Epoch II** • Patinated model • 145 × 135 × 75 mm • Clearance width: 50 mm • Clearance: 40 mm

### 222151

### Footbridge

The staircases on both sides can be arranged in various ways.

**Epoch III** • 215 × 120 × 80 mm • Clearance width: 130 mm -Clearance: 60 mm

### Signal man house

in clinker construction, matching the clinker railway buildings. Material mix of coloured plastic, wood, and special cardboard parts.

**Epoch II** • Patinated model • Lasercut model •  $42 \times 40 \times 39 \text{ mm}$ 

#### 222155

### Gatekeeper's lodge

with shed attached on one side and board cladding on the top storey.

**Epoch II** • 64 × 54 × 44 mm

#### 222178

### Trackside decoration

The parts of this set can be used at many positions along the railway line.

2 Waiting shelters for flag stops, 2 workers' shanties, 4 huts and 10 trackside telephones.

**Epoch III** 

#### 212105

### Stop

in the architectural style of a branch line – with a small roofed loading ramp.

**Epoch II** • 89 × 60 × 42 mm

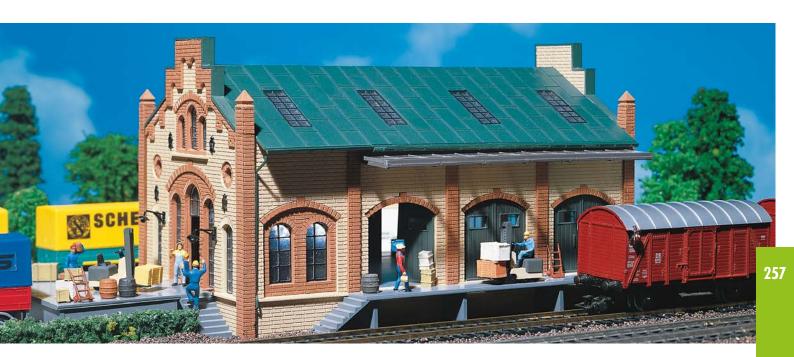

#### 222193

### Freight shed

made of wood, with loading ramp and lateral ramp for vehicles

**Epoch II** • 115 × 52 × 44 mm

# Freight shed

with a free loading platform, 6 movable building doors and accessories.

Several buildings can be built in tandem or side by side.

**Epoch I** • 173 × 82 × 73 mm

### Freight house

With loading ramps on either side and many additional details including cable drums, stacks of ties, telephone, buffers, crates and sacks.

**Epoch I** • 130 × 55 × 52 mm

### Freight depot with crane

Freight depot with roofed ramps on both sides and movable gates. A large, turnable crane is located on the end of the loading ramp.

**Epoch II** • Patinated model • Movable model • 182 × 98 × 65 mm

#### 222177

### 3 Trackside shanties

Tools for the maintenance of road beds are stored in them.

**Epoch II** • Patinated model •  $34 \times 24 \times 24$  mm •  $40 \times 35 \times 22$  mm •  $40 \times 35 \times 22$  mm

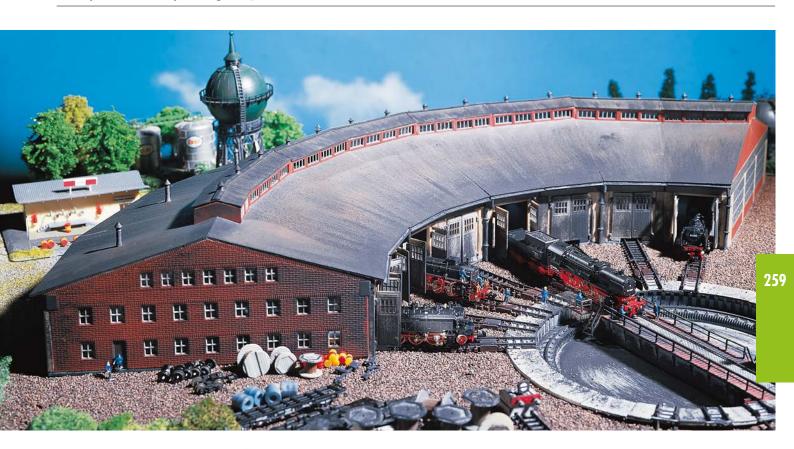

#### 272909

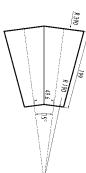

### Spindle lifting jacks

Lifting jacks with supports for the maintenance and repair of rail vehicles at the wagon depot. Equipped for the illustration of the operation with a motor. Non-functional model.

**Epoch II** • New Item 2016 • 48,5 × 11 × 22 mm (2 x)

# 2-Stall roundhouse

Individual kits can be combined to build a larger structure. Clearance of gates: 40 mm. Interior for engines up to 180 mm length over buffers. Fan arch of tracks 15°. Lighting by means of 2 bayonet sockets MS 4 (equals Märklin 60.000).

**Epoch I** • 206 × 199 × 96 mm

# Depot set engine shed

A FALLER highlight in new design. Set comprised of a three-stall engine house in half timbered building style with water tower at the rear. For engines up to 162 mm length over buffers, gate height 36 mm, spacing of tracks from centre to centre 37 mm. Set also includes two floor jacks with supports, a locomotive tube cleaner and a loading gauge.

**Epoch II** • New Item 2016 • 227 × 126 × 95 mm

#### 222116

### Engine house

From the steam train era, 2 stalls and working doors (spring mechanism). For engines up to 135 mm length over buffers. Several sheds can be placed side by side.

**Epoch I** • 188 × 111 × 68 mm

# Two-stall engine shed

With two stalls for engines up to 138 mm length over buffers.

**Epoch II** • 215 × 105 × 95 mm •

Gate height: 36 mm • Distance between centres: 37 mm

#### 222141

### One stall engine shed

for one engine. The length of this structure can be shortened. Length over buffers: 155 mm

**Epoch I** • Patinated model • 175 × 52 × 62 mm

#### 222108

### »Branch line engine shed with block post« Set

Partly aged secondary line set consisting of a half-timbered engine shed, a brick block signal post with outside stairs, and a water spout with fencing for a heap of coal.

Epoch II - Patinated model -Engine shed: 90 × 61 × 62 mm • Signal box: 66 × 45 × 65 mm • Coal bunker: 45 × 45 × 11 mm • Water crane: 40 × 8 × 30 mm

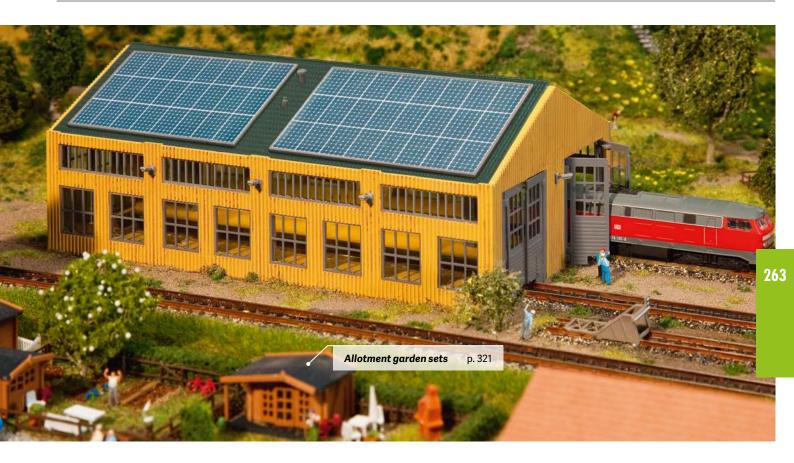

#### 222167

### »Oberharmersbach« Railcar depot

Laser-cut model of a railcar shelter with an annexed building on one side, designed according to an original located in the Black Forest. The roofed yard of that timber construction can be used for instance as a bus shelter or for events such as the Sunday morning meeting to have a Railcar Shed Drink together.

**Epoch II** • Lasercut model • 106 × 72 × 43 mm

# Contemporary engine shed

Two-stall engine depot in a contemporary design with rooftop solar cell. The moving doors of the rectangular shed can be opened and closed by entering and exiting locomotives through use of the servo (art. 180726) and servo control (art. 180725). The kit contains parts for optional decorating with closed end wall or passage.

**Epoch V** • Patinated model • Movable model • 191 × 110 × 76 mm

### 222114 (N, Z)

# Small wagon turntable with servo drive

Laser-cut model of a manually operated turntable with wooden casing and two exits for the distribution of wagons at small depots or factory installations with freight service. It is driven by the included servomechanism.

The building kit also contains inserts for the tracks H0f and Z.
Required track length: 50 mm.
Use our new servo (art. 180725) as the

**Epoch II** • Lasercut model • incl. motor •  $\emptyset$  63 × 35 mm

### Overhead signal tower

A structure spanning two tracks. Catenary operation possible. Clearance: 43 mm (without track).

**Epoch III** • 123 × 110 × 94 mm

### 222160

# »Brügge« Overhead signal box

Gantry signal box spanning three tracks. It will enhance any station approach.

**Epoch II** • Patinated model • 123 × 85 × 95 mm • Clearance: 44 mm

#### 222158

### Signal tower

This small signal tower has an outer staircase and 3 control desks on the first floor. Its architectural style matches the signal towers on level crossings (art. 222170 and art. 222171).

**Epoch II** • 64 × 38 × 64 mm

#### 222161

### »Mittelstadt« Signal tower

This half-timbered building has an outside staircase and interior details on the second floor.

**Epoch I** • Patinated model • 57 × 38 × 59 mm

### 222162

### »Dahlhausen« Signal tower

Miniature of a Prussian switch tower on stilts with corrugated sheet covering from the collection of the Bochum Railway Museum. The stilt construction reduces the amount of space required to a minimum.

**Epoch II** • Lasercut model •  $73 \times 27 \times 58$  mm

# Gated railway crossing

equipped with 4 flashing St. Andrews crosses, 2 gates over the entire width of the road and a gatekeeper's lodge. Function triggered through a sensor, digital input also possible. Suitable for all types of track. Can be used in the Car System for right-hand and left-hand traffic, on two lanes. (Stopping places, art. 161675, not included) 12-16 V AC/DC voltage.

**Epoch III** • incl. motor • Level crossing: 210 × 190 × 90 mm • 64 × 54 × 44 mm

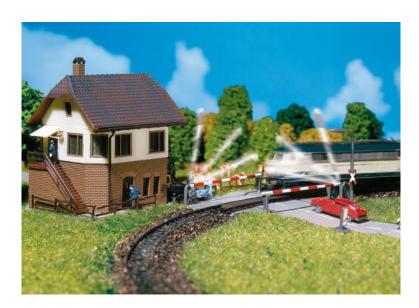

#### 222170

# Level crossing with signal tower

The railway crossing is fitted with electric drive, which noiselessly and realistically slowly opens and closes the gates.

The crossing can be installed on single and multiple track straights and bends of all track types. (12-16 V, AC voltage, 60 mA)

#### 222172

### Field track crossing

with gatekeeper's house and movable barriers.

**Epoch I** • 70 × 65 × 27 mm

### Level crossing with signal tower

This crossing can be built into single- and multi-track straights or curves of all track types. Both barriers (dummies) can be replaced by four warning lights (dummies).

#### 222175

# 2 Warning crosses with flashing lights

for unprotected level-crossings. Switching printed circuit included. 12-16 V AC/DC voltage.

With gatekeeper's shack. For straight and curved tracks of all makes.

**Epoch II** •  $143 \times 98 \times 42 \text{ mm}$ 

#### 222174

### Level crossing

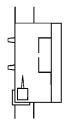

with gatekeeper's lodge. For incorporation into one-track or multi-track routes. Without drive.

Epoch II • 204 × 134 × 46 mm

267

# Coal spill platform with driving components

Stone-walled spill coal handling with an elevated storage level in order to use with landscape formations. From the remote corners of the bunker the coal is pushed within the reach of the coaling crane by means of trams or directly carried by means of delivery chutes to the locomotive tender. The kit includes small components in order to effectively operate the crane cab with a servo.

**Epoch II** • Patinated model • 255 × 108 × 62 mm

Timber construction as it is sometimes still used at small railway stations.

**Epoch I** • 86 × 40 × 72 mm

#### 222199

### Gantry crane

This very typical railway model can not only be used in the depot. A gantry crane can be built with the parts of this construction kit, which spans over two or three tracks.

**Epoch I** • 85 × 17 × 58 mm • Clearance: 45 mm

### Gantry crane

The large gantry crane can be fitted with a clamshell grab, hook or log grab, and is thus suitable for operation in the most varied working areas. Cabin and jib can be adjusted manually. Clearance under the gantry 43 mm. Crane can be moved manually on its own 190 mm track.

**Epoch II** • 188 × 40 × 141 mm

#### 222176

### Loading crane with freight

Loading crane slewing by hand. Without lifting or lowering function. Various types of loads are included.

**Epoch I** • 50 × 14 × 38 mm

### 222200

### Small portal crane

for handling goods from street to railway or railway to ships. Top of crane can be rotated manually.

**Epoch II** • Movable model • 188 × 57 × 109 mm

### Coaling station

With manually movable loading crane and tender. For small service areas.

Epoch I - Patinated model -119 × 44 × 66 mm

### 222138

rotary upper parts feature external heating equipment. Gully grates are also included.

**Epoch II** • 41 × 11 × 34 mm (4 x)

#### 222147

### 2 Inspection pits

with 2 rails moulded on.

**Epoch II** • Patinated model • 209 × 51 × 8 mm (2 x)

### Sand house

A model set for the steam depot. Sanding tower with high-level tank. Sand house with slidable roof for loading and a bag of "sand" for realistic decoration.

**Epoch II** • Sand house:  $86 \times 30 \times 18$  mm • Sand tower:  $24 \times 24 \times 78$  mm

### 2 Sanding towers

Alongside the engine shed tracks. Two steel towers linked with each other through a platform and featuring cross girders and ladders to ensure the filling of engines with brake sand. Dry gritting sand reaches both silos through a rising pipe and is poured via swivelling delivery booms.

**Epoch II** • New Item 2016 • 64 × 24 × 79 mm

#### 222194

### Oil tank

Surface supply tank with petrol pump and filling hose. Now, every small company can provide its vehicles with diesel oil.

**Epoch III** • Patinated model • 52 × 24 × 23 mm

### 222131

### 2 Oil storage tanks

2 oil storage tanks with ladderway and catwalk. Stickers of various oil companies are included.

**Epoch III** • 130 × 85 × 50 mm

### »Bielefeld« Water tower

Water tower from Bielefeld with masonry entrance area, clinker tower and spherical water holder.

**Epoch II** • Patinated model • 51 × 49 × 133 mm

#### 222143

### »Haltingen« Water tower

with spherical tank and filigree steel girder construction. Shack as entrance to the pumping station, well cover and vent pipes included.

**Epoch II** • ø 65 × 38 mm • H: 150 mm

#### 222145

### »Süssenbrunn« Water tower

A very attractive structure made from original plans.

**Epoch II** • Patinated model • 58 × 58 × 135 mm

#### 222150

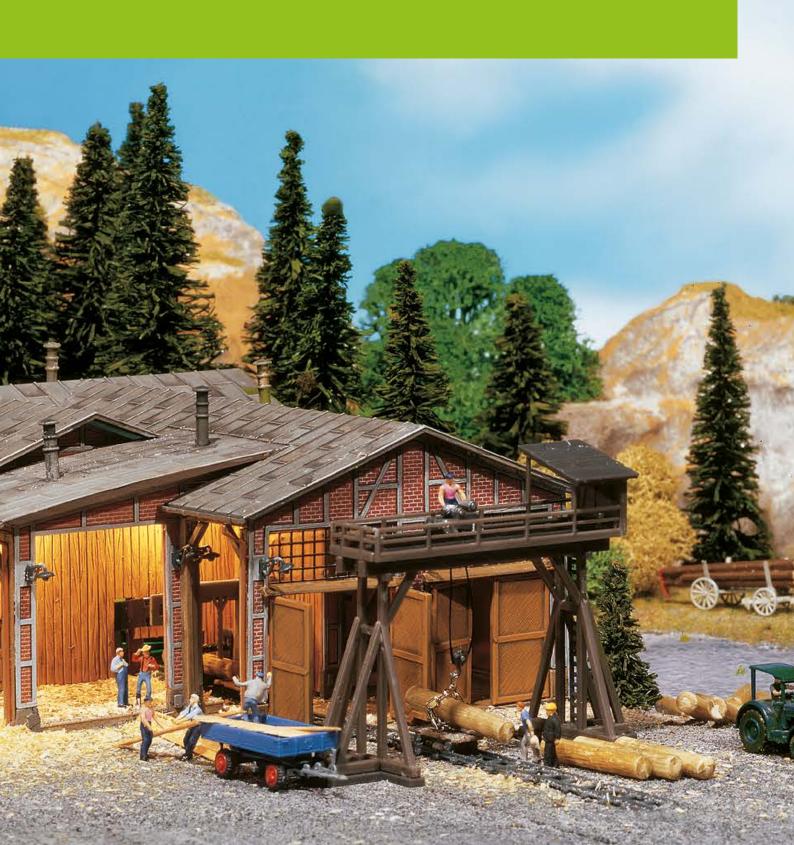

### Water tower

Water tower with some decoration parts typical of railway line areas, such as: axles, piles of sleepers, corrugated-sheet huts, water spout, switch lever, and bumper.

**Epoch I** • 75 × 70 × 90 mm

# N RAILWAY STATIONS, RAILWAY BUILDINGS

# »Schmidt« Shoe factory

Large shoe works accommodated in a two-storey brick building featuring facing gables, pilaster strips and small arched friezes to optically structure the storeys as well as two one storey annexed outbuildings with shed roofs.

**Epoch I** • 184 × 229 × 90 mm

155344

**Factory personnel** 

155315

**Construction workers** 

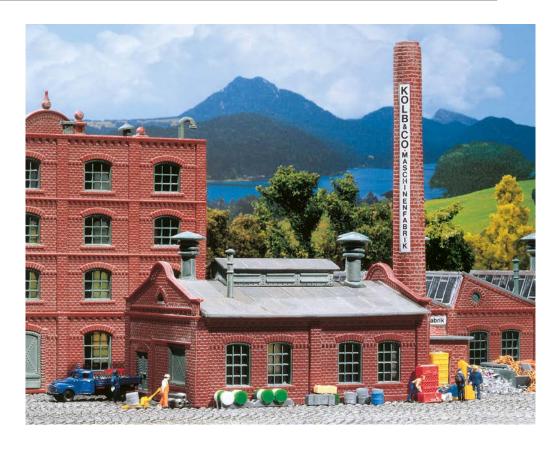

155345

**Employees** 

### Boiler house

With factory chimney; it gives the finishing touch to buildings art. 222201 and art. 222203.

**Epoch II** • Patinated model • 126 × 74 × 135 mm

#### 222203

### 2 Factory halls

Two production halls with North light roof – to go with the main factory building (art. 222201). Extensions to be added.

**Epoch II** • Patinated model • 92 × 68 × 50 mm (2 x)

#### 222201

### Machine factory »Kolb & Co.«

A typical factory in highly detailed brickwork. By using several kits this building can be extended in height and length.

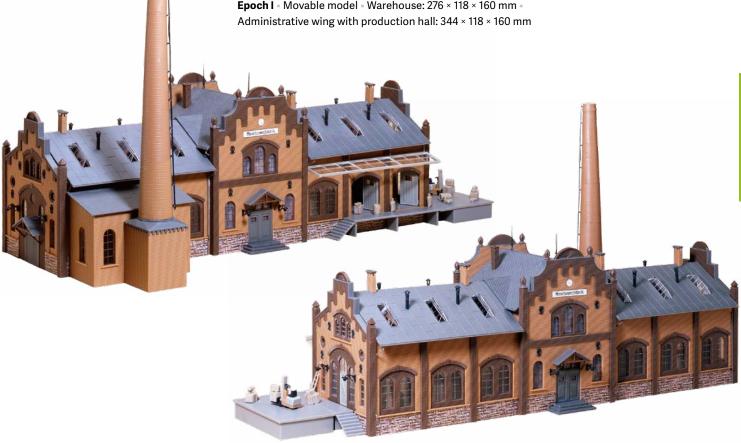

**Epoch II** • Patinated model • 94 × 81 × 124 mm

# Iron foundry

The three sections can either be built together or separately. Covered loading ramp, overhead gondola transport system (motor art. 180629 not included, 12-16 V, AC voltage). The chimney-stack can be fitted with a smoke generator.

#### 232247

### Wood plant

Wood-working company with large sawing hall that can be entered through the large hall doors on the rail passageway. With adjoining firehouse, suction unit and loading crane. Various wood stacks are included.

#### Epoch III •

Building: 220 × 148 × 140 mm • Gantry crane: 86 × 40 × 72 mm 277

### Sawmill

With a built-on sawdust tower, small railroad crane and typical decoration parts. The sawmill can be driven by FALLER motor (art. 180629, 12-16 V, AC voltage). Motor not included.

#### 222181

### Sawmill

Sawmill with large wood storage area, exhaust and loading ramp.

**Epoch III** • Patinated model • 170 × 100 × 150 mm

### 222187

### Wooden hut

With verandah, shutters and tar covered roof. Use on construction sites, in the station area or industrial sites.

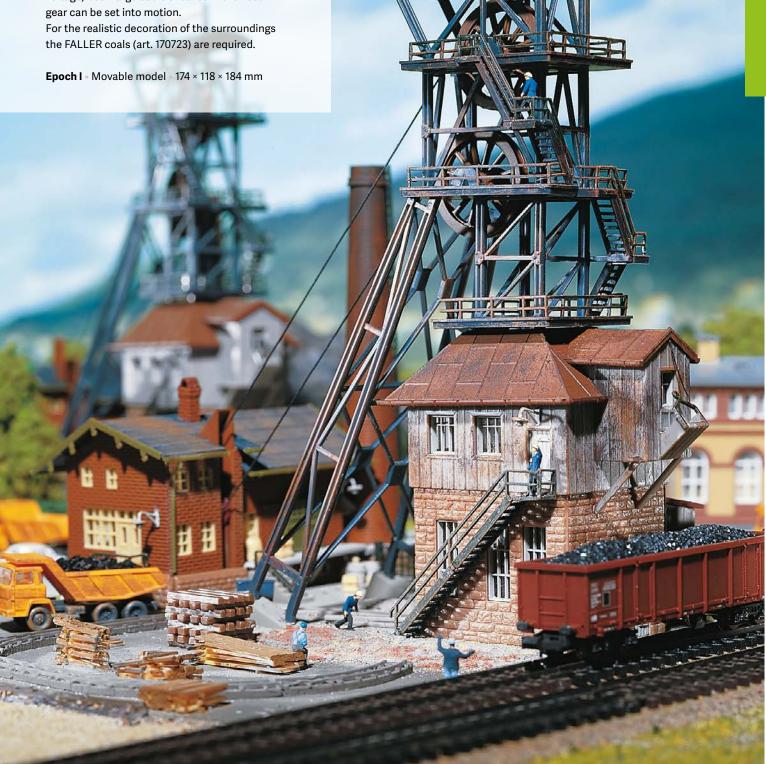

**Epoch II** • 62 × 40 × 30 mm

### »Königsgrube« Hauling plant

The conveyor system consists of the shaft shed with headgear and the winch house with its own steam energy winch supply. The dumping mechanism on the side of the shaft shed enables the simulation of a railway loading process.

With the FALLER motor (art. 180629, 12-16 V, AC voltage) both large cable sheaves in the headgear can be set into motion.

### Old coal mine

Model of a coal mine in wood construction with various loading and unloading options.

**Epoch II** • Patinated model • 200 × 185 × 106 mm

#### 222197

### Old stone crushing plant

Timber construction stone crushing plant.

**Epoch II** • Patinated model • 115 × 98 × 100 mm

### 222206

### Old gravel plant

In wood construction with various bulk dumping devices for loading vehicles or wagons.

**Epoch II** • Patinated model • 141 × 95 × 95 mm

## 2 Grain silos

Storing & distributing. Two firmly joined silos with catwalk, outside ladders and various pipes for the loading and unloading of bulk goods.

**Epoch IV** • New Item 2016 • 83 × 83 × 110 mm

#### 222207

### 3 Industrial silos

For versatile use in the industrial, commercial, or agricultural area.

**Epoch IV** • 22 × 34 × 107 mm (2 x) • 22 × 34 × 94 mm (1 x)

#### 222215

### Plaster silos

No more carrying sacks. 2 Silos for prefabricated construction materials with the manufacturer Knauf's label on it.

**Epoch IV** • 13 × 14 × 35 mm (2 x)

# »Nordex« Wind generator

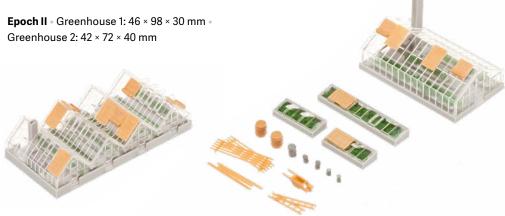

With motor (12-16 V, AC voltage) and three-propeller rotor.

**Epoch IV** • incl. motor •  $80 \times 80 \times 262$  mm • Depth: 40 mm • Sail dia: 220 mm

#### 232225

### Small market garden

With 2 hothouses and 3 hotbeds.

### 232245

### Pharmacy and bakery

Typical rural town houses with retail shops.

Ideally suited for the construction of a provincial town.

**Epoch III** •  $80 \times 70 \times 60 \text{ mm}$  (2 x)

# Fire brigade engine house

That massive fire-engine house offers shelter to fire-fighting vehicles and appliances, but can also be used as repair shop. The facade made of natural stones clearly contrasts with three red folding gates with semi-circular arch frame. Another gate at the rear also allows the passage through the building.

**Epoch II** • New Item 2016 • 101 × 82 × 60 mm

#### 222208

### Country style fire department

with mobile door and hose drying tower. Material mix of coloured plastic, wood, and special cardboard parts.

**Epoch III** • Lasercut model •  $78 \times 66 \times 84 \text{ mm}$ 

Firemen

## Service station

With sales room, pay desk and service bay. The pumps are covered by an overall roof. Decoration strips for several oil companies are included.

**Epoch IV** • 110 × 93 × 35 mm

#### 232219

### BP petrol station

in the architectural style of the fifties – with rounded petrol pump roofing, cashier's office.

**Epoch III** • Patinated model • 105 × 77 × 35 mm

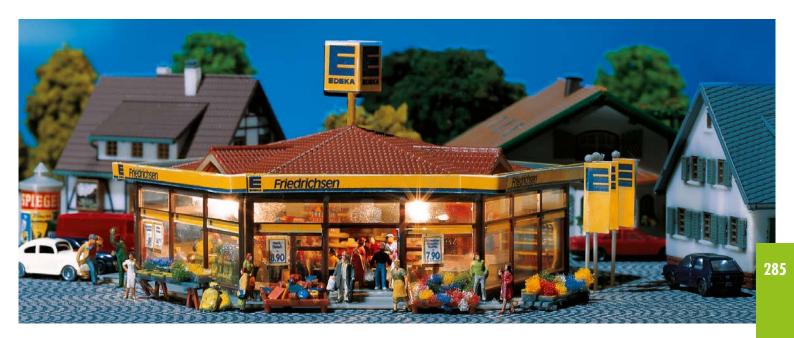

#### 232342

### Second-hand car dealer

Floor plate with fencing elements, tents, advertising banners and an office shack to design a second-hand car dealer's shop on a corner plot of land. Including VW 1600 model.

**Epoch III** • New Item 2016 • 127 × 100 × 35 mm

## »Edeka« Local mini market

A modern style construction with a wide glass frontage and complete shop-fitted interior. The model can be very effectively illuminated using the microbulb (art. 180671, not included). Several models can be combined, thereby creating several variations for different uses.

**Epoch IV** • 120 × 113 × 58 mm

#### 232204

### ALDI Supermarket south/north

ALDI branch in Southern or Northern Germany, with delivery area, wide entrance area and decoration sheet for South and North.

155317

Filling station personnel

155326 Out shopping

## »DHL« Logistic centre

Modern DHL cargo hall equipped with 19 rolling gates on the loading ramps and at the side of the office wing. Can be constructed one after the other or side by side.

**Epoch V** - 222,5 × 122 × 76 mm

#### 162007

### Car System Start-Set Lorry MB SK »Dachser«

Package contents:

- MB SK truck »Dachser« (WIKING)

# Old-town wall set

Set of old-town wall including a fortification tower rendered in white and featuring angle ashlars, narrow windows and a pointed roof along with three adjacent elements allowing the construction of an old-town wall with a flight of stairs and a roofed parapet walk on brackets.

Epoch I • New Item 2016 •

Old-Town wall with stairway: 88 × 25,5 × 67 mm •

Old-Town wall - defence tower 45°: 32 × 25 × 71,5 mm •

Old-Town wall defence tower 90°: 23 × 23 × 71,5 mm •

Old-Town wall: 88 × 23 × 67 mm (2 x) •

Old-Town wall - piece:  $24 \times 13 \times 59$  mm (2 x) • Tower:  $55 \times 50 \times 190$  mm

#### 232351

### Old-Town wall

To be used for wall extension. It can also be used together with peel towers 232352.

**Epoch I** • Old-Town wall:  $85 \times 20 \times 69 \text{ mm}$  • Old-Town wall - piece:  $24 \times 13 \times 59 \text{ mm}$ 

#### 232353

## Old-town wall with stairs

Add-on set for the popular town wall module (Art. 232351, Art. 232352), with stone stairs to reach the roofed parapet walk of the fortification. (Kit does not include displayed peel towers.)

**Epoch I** •  $88 \times 19 \times 68 \text{ mm}$ 

# Old city gate

An interesting combination of buildings for the romantic part of the old town.

**Epoch I** • 100 × 45 × 170 mm

232352

# 2 Old-Town peel towers

can be used as ends or for linking old town brick elements. Each with defence towers, one with 45° and one with 90°. The 90° defence tower can be either built as an angled or straight-lined intermediate tower element. Respective parts are included.

#### Epoch I •

Old-Town wall defence tower 90°: 22 × 21 × 69 mm • Old-Town wall - defence tower 45°: 33 × 25 × 69 mm

#### 232374

### »Schwabentor« Town house

with a wide entrance arch and pedestrian arcade along the side.

**Epoch II** • 86 × 53 × 90 mm

232354

# Old-town tower

Old-town tower built on a square base, with passage for traffic and overhanging crown made of real timber under a four-sided pointed roof.

**Epoch I** • New Item 2016 •  $50 \times 50 \times 211 \text{ mm}$  • Gate overhead clearance: 30 mm

## »Franken« Tudor house

This model has an extraordinary beautiful roof which is subdivided by many dormer windows and a loggia in an old-fashioned style.

**Epoch I** • 84 × 65 × 100 mm

#### 232270

# St. Martin's gate in Freiburg (Breisgau)

The adjoining building can also be used without the tower in a row of town houses. In the passageway of this building the front entrance of a modern fast-food restaurant can be created with the components of this kit. The dial of both clocks can be illuminated from the tower.

**Epoch IV** •  $81 \times 57 \times 270 \ mm$ 

#### 232282

# ${\it ``Rothenburg} {\it ``Inn}$

A cosy inn with a pergola.

**Epoch I** • 117 × 83 × 100 mm

# 6 Relief houses

Inexpensive and space-saving rows of houses can be erected along the model rear walls with these half-built corner and dwelling houses.

**Epoch II** • 89 × 28 × 90 mm • 89 × 32 × 90 mm • 45 × 28 × 92 mm • 45 × 32 × 92 mm • 45 × 28 × 82 mm • 45 × 28 × 82 mm

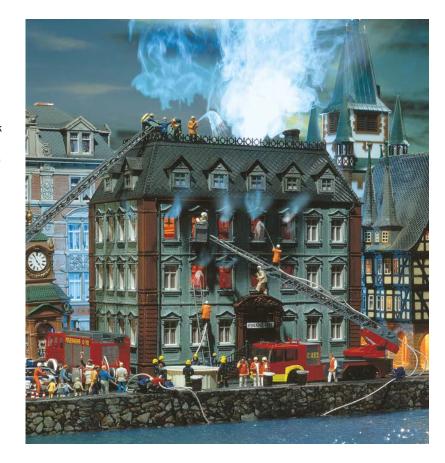

#### 232300

# Burning tax office

This kit has the following special features: weathered facades blackened by smoke, special smoke generator (16 V, AC voltage) producing thick smoke escaping out of the windows, set of flashing lights (16 V, AC voltage) ensuring the vivid red glare, and smoke oil to refill the generator.

**Epoch I** • Patinated model • 101 × 67 × 100 mm

**292** 

# Row of town houses

Row of attractive town houses with two corner houses and one terrace house.

**Epoch II** • 284 × 127 × 141 mm

#### 232312

### 2 Town houses

Aged set with two urban, four-storey row-houses incl. side firewalls and dormers. Diversified details on the courtyard and street side are created by the differently designed floor levels of the historical facades, richly decorated window sills, iron balconies, a shop front and lettering, roof railings and much more.

**Epoch I** • Patinated model •  $92 \times 86 \times 134$  mm (2 x)

## 2 Town houses

The apartment house and the grocer's shop have extremely detailed facades and have been expertly weathered.

**Epoch II** • Patinated model • 101 × 88 × 128 mm (2 x)

#### 232311

# 2 Town houses

Classic town block of flats. Consisting of 2 buildings which ideally complement the current town design.

**Epoch II** • Patinated model • Townhouse 1: 82 × 82 × 126 mm • Townhouse 2: 82 × 78 × 126 mm

#### 232262

# Corner house with adjoining annexe

Consists of 2 buildings. There is a drug store on the ground floor of the corner house.

**Epoch II** • Patinated model • Townhouse: 82 × 78 × 127 mm • Corner house: 97 × 97 × 122 mm

#### 232334

# Old town house with bar

Three-story residential house featuring brick facade and characteristic crow-stepped roof. The first floor houses a cozy bar that also offers outdoor seats towards the garden side.

**Epoch II** • Patinated model • 111 × 67 × 128 mm

### 232305

# Urban post office

Artificially aged corner house with post office on the ground floor.

**Epoch II** • 127 × 100 × 115 mm

#### 232335

# Old town house with cigar shop

Three-story residential house featuring brick facade and characteristic Dutch Gable. The first floor houses a cigar shop. On the building's backside, there are a small yard and a two-story oriel window.

**Epoch II** • Patinated model • 111 × 67 × 132 mm

#### 232264

## »Harmonie« Old town cinema

with wide entrance, advertisements, and cinema sign.

**Epoch II** • Patinated model •  $100 \times 88 \times 150 \text{ mm}$ 

# »Beethovenstraße« Row of downtown structures

An urban scene full of life! That row of four buildings consisting of two corner houses and two terrace houses offers plenty of possible variations and combinations. The ground floor of each building provides space for shops and businesses. The upper storeys house typical urban dwelling units. Both terrace houses can also be built by halves.

**Epoch III** • Corner house 1:  $75 \times 75 \times 123$  mm • Corner house 2:  $75 \times 75 \times 123$  mm • Driveway:  $32 \times 3 \times 27$  mm (2 x) • Terrace house 1:  $65 \times 58 \times 118$  mm • Terrace house 2:  $65 \times 58 \times 118$  mm

#### 232386

# »Beethovenstraße« 2 Row houses

A new style! Renovated terrace houses with baking shop and a small art gallery on the ground floor. Each attic features two small dormer windows. Both terrace houses are the perfect complement to »Beethovenstraße« row of town houses, art. 232385, and can also be built by halves.

**Epoch III** • Terrace house 1:  $65 \times 58 \times 118$  mm • Terrace house 2:  $65 \times 58 \times 118$  mm

#### 232387

## »Beethovenstraße« 2 Town houses

Corner house and terrace house in Beethoven Street have been given a new paint. Next to the telecommunications shop there is a restaurant offering regional cuisine.

On the upper storeys there are students' lodgings. It is also possible to built the terrace house by halves.

**Epoch III** • Corner house:  $75 \times 75 \times 123$  mm • Driveway:  $32 \times 3 \times 27$  mm • Terrace house:  $65 \times 58 \times 118$  mm

# »Sport Meder« Town house

Sports items of all kind are offered in this retail store.

**Epoch V** • 45 × 60 × 100 mm

#### 232332

# Old city café

A cosy cafe is located on the floor level of the multi-story city house.

**Epoch V** • 78 × 68 × 85 mm

#### 232331

# Town house with painting scaffold

Old town building with scaffolding on the front. The rear of the building features a half-timber upper floor and a small ground floor annex.

**Epoch V** • 52 × 63 × 83 mm

## Townhall

Three-storey small-town city hall with third gable, arcade passageway and lateral balcony with access stairs under a lean-to roof. A floor plate, a small bell lantern and a fountain are also part of that model featuring a gable wall with digital printing.

**Epoch II** • New Item 2016 • 107 × 112 × 102 mm

#### 232213

# Administrative building

Imposing two-storey administrative building with brick facade and a sumptuous front featuring pilasters, ornamental reliefs and porticos at the corners of the lower part.

Epoch I - New Item 2016 - Patinated model -100 × 96 × 96 mm

#### 232298

## Villa

Two-storey manor-house built in the style of the turn of the century, with roofed entrance and roof terrace.

**Epoch I** • 165 × 145 × 150 mm

# »Lindau« Old city hall

Re-edition! The Old City Hall in Lindau was erected in 1436. Our model features the magnificently painted northern and southern facade depicting the city's history. High-quality digital print makes the depictions come to life. Other details are the roofed perron, enunciator oriel window and the characteristic Dutch gable.

**Epoch I** • 111 × 115 × 139 mm

#### 232316

# Lindau »Mangturm« Tower

Our model of Lindau's »Mangturm« tower features the original painting since the renovation in 1979. The five-story lighthouse was erected as defensive tower at the harbor entrance around 1200 on the southernmost end of the city's fortifications. But at the same time it also served as landmark for mariners. Our model features all characteristics of the original: square layout, projecting upper floor, and roof with colorfully glazed tiles. The tower is named after the mangles in the nearby cloth halls.

# Church with pointed roof

Idyllic village church with small gable roof and a steeple on one side with square lantern and slender spire.

**Epoch I** • New Item 2016 • 128 × 115 × 170 mm

#### 232244

# Village church

with onion-domed steeple and surrounding wall.

**Epoch III** • 110 × 60 × 158 mm

#### 232242

## Moated castle

The base of this romantic castle contains a moat surrounding the entire complex; the moat can be filled with water. The ground area of the moat is  $255 \times 130$  mm.

**Epoch I** • 255 × 130 × 135 mm

# Butchery/Bakery

For anybody with good taste. Butcher's and baker's as furnished shops inside a two-storey residential building. The large shop windows provide a view of product display and a snack at the bar table below the vine-covered pergola invites you to make a brief stop.

Accessories also include bicycles and matching bicycle racks.

**Epoch III** • 114 × 73 × 76 mm

#### 232327

# »Tiziano« Ice-cream parlour

For the hot days! Model of a small ice-cream parlour accommodated in a one-storey building with flat double-pitch roof. The colourful motifs digitally printed on the facades give that meeting-place a merry animated atmosphere. The spacious entrance area can be given an open character by using flap gates. Accessories include fencing elements as well as inviting tables and chairs.

**Epoch IV** •  $90.5 \times 61.5 \times 33 \text{ mm}$ 

#### 23221

# Timbered house with garage

Complete with window boxes, roof gable and red tiled roof, and a fence in front garden.

**Epoch III** • 73 × 72 × 55 mm

272903

8 Bicycles

272905

Tables, chairs, sunshades

272901

2 Barbecue grills

# Two-story corner building

Living round the corner! This two-story apartment building features a corner layout, colored window frames, a half-hipped roof and dormers. It fits our model "Two-story home" (art. 232329).

**Epoch III** • 144 × 75 × 83 mm

#### 232328

# Two-storey home with shutters

House and home. Two-storey, free-standing residential house with shutters, crested roof and dormers.

**Epoch III** • 96,5 × 75 × 82 mm

#### 232329

# Two-storey home

Your own four walls. Two-storey, free-standing single family dwelling with colourful window edging, crested roof and dormers.

**Epoch III •**  $75 \times 73 \times 84 \text{ mm}$ 

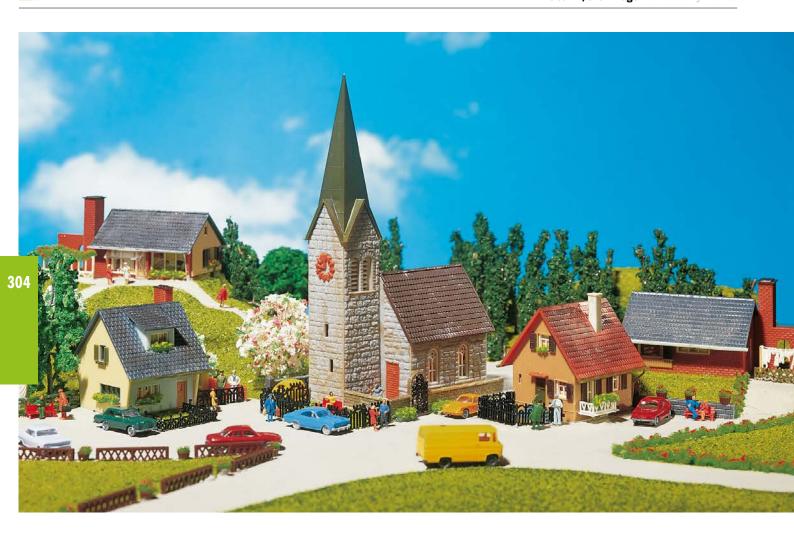

#### 232304

# 2 Apartment buildings

in 4 level construction with outside balconies and in different colour versions.

**Epoch III** • 111 × 69 × 83 mm (2 x)

# Village set

It consists of a church and three residential houses and is particularly suitable for an initial set of structures.

**Epoch III** • One-family house 1:  $96 \times 60 \times 42$  mm • One-family house 2:  $83 \times 58 \times 52$  mm • One-family house 3:  $77 \times 50 \times 52$  mm • Church:  $81 \times 52 \times 147$  mm

# 2 Houses under construction

in various phases of construction.

**Epoch III** • House 1: 72 × 54 × 48 mm • House 2: 62 × 57 × 49 mm

#### 232226

# 2 One-family houses

Two detached houses with garage.

**Epoch III** • Patinated model •  $110 \times 57 \times 54$  mm (2 x)

#### 232222

# 2 Suburban homes

with roofed, built-on tool shed.

**Epoch III** • 78 × 75 × 42 mm (2 x)

#### 232340

# Rural half-timbered house

with roofed entries and dormer windows.

**Epoch II** • Patinated model • 77 × 57 × 50 mm

## Detached house

with red design elements on walls, terrace ground plate and decoration parts. Easy to build, even for beginners.

**Epoch VI** • 59 × 63 × 50 mm

#### 232321

## Detached house

with grey design elements on walls, terrace ground plate and decoration parts. Easy to build, even for beginners.

**Epoch VI** • 59 × 63 × 50 mm

#### 232322

# Detached house

with yellow design elements on walls, terrace ground plate and decoration parts. Easy to build, even for beginners.

**Epoch VI** • 59 × 63 × 50 mm

#### 232323

# Detached house

with wine-red design elements on walls, annexed winter garden, terrace ground plate, roofed terrace and etched-metal railing. Easy to build, even for beginners.

**Epoch VI** • 64 × 63 × 50 mm

# »Texel« Small cottage

Patinated model of a one-storey modest dwelling house, featuring a facade with wood laths, gable windows, and a tiled roof. The lateral entrance is protected by means of a windscreen.

**Epoch I** • New Item 2016 • Patinated model • 81 × 51 × 41 mm

#### 232347

# »Vlieland« Small cottage

Patinated model of a one-storey modest dwelling house, featuring a rendered facade, gable windows, and a slate roof.

**Epoch I** • New Item 2016 • Patinated model •  $81 \times 41 \times 41$  mm

#### 232348

# »Ballum« Small cottage

Model of a one-storey modest dwelling house, featuring a rendered facade, gable windows, and a slate roof. Colours pleasantly set off the window sills, plinths and building edges.

**Epoch I**  $\circ$  New Item 2016  $\circ$  Patinated model  $\circ$  81  $\times$  41  $\times$  41 mm

#### 232250

### Windmill

The blades of this model can be realistically moved by installing the motor (art. 180629, 12-16 V, AC voltage). The installation of the motor can only be carried out simultaneously with the assembly of the construction kit. Motor not included.

**Epoch II** • Movable model • 83 × 65 × 134 mm

# Farm

The original was located in Obernfeld near Duderstadt (Lower Saxony). The model consists of: half-timbered residential building, sheep stable, barn, pigsty with attached paling, accessories such as doghouse, dung cart, stork's nest on the roof etc. The elements can also be built individually.

**Epoch I** • 125 × 180 × 66 mm

272905 Tables, chairs, sunshades Epoch II

272906 40 Boxes Epoch I

272907 20 Barrels and 36 sacks Epoch I

# »Kürnbach« Farmhouse

Reproduction manufactured by the laser-cut process of the original two-storey Kürnbach house dating back to 1664 with an aged shingle roof. That rural architecture from the museum village located in Upper Suabia harmoniously combines the beauty and function of that building with curved framework braces, while the small window openings fitted with shutters provide well-balanced proportions and keep the precious stove heat within the house. The adjoining shed with its slate roof can be used in a variety of ways.

**Epoch I** • Patinated model • 132 × 59,5 × 62 mm

#### 23237

# Agricultural building with accessories

Partly rendered half-timbered barn with annexed pigsty and a lot of agricultural accessories such as small toilet, kennel, various carriages, fencing, calvary and many others more.

**Epoch I** • New Item 2016 • Barn: 125 × 57 × 53 mm • Garden 1: 45 × 35 × 8 mm • Garden 2: 35 × 15 × 8 mm

# Agricultural holding

Life on summery mountain pastures. The set displays a modern, agricultural scene with livestock husbandry in great detail. It includes spacious stables, a large vehicle shelter, a bunker silo, two fodder silos, and the farmer's residential house.

**Epoch V** • Residential house:  $95 \times 98 \times 47$  mm • Feed silo:  $27 \times 15 \times 50$  mm • Stables:  $187 \times 103 \times 64$  mm • Implement shed:  $187 \times 84 \times 55$  mm • Bunker silo:  $141 \times 45 \times 14$  mm

#### 232359

# Small baking house with accessories

Fresh tastes better! In former times, such small and simple baking houses were situated in rural regions or on farms. The kit also includes a wine press, a stack of boards and two handcarts.

**Epoch I** • Patinated model • 33 × 32 × 30 mm

# Fodder silos

Double silo with exterior pipes and steel frame for storing fodder.

**Epoch V** • 27 × 15 × 50 mm

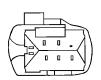

# Black Forest farmyard

A dream model of a Black Forest farmyard which finds its ideal place anywhere in the valleys, meadowland and woodland in the background of your model. Its outfit comprises many typical and lovingly designed accessories.

**Epoch I** • Patinated model • 148 × 153 × 90 mm

#### 232256

# Black Forest house

A small, typical Black Forest house perfectly suited for meadow and forest scenery.

**Epoch I** • 91 × 57 × 57 mm

# Goods- and passenger ropeway

Material and passenger cableway including mountain and valley station, with driving motor and control system in a handy set. That small single-track shuttle cableway with enclosed cabin is used for goods transport or passenger traffic at altitude. While the valley station manufactured by the laser-cut process is made of real timber and features a lean-to roof of special cardboard, the mountain station consists of a massive alpine hut with terrace and masonry foundation. Accessories include fencing elements and a summit cross.

**Epoch II** • Valley station:  $50 \times 45 \times 40$  mm • Mountain station:  $98 \times 63 \times 55$  mm • Distance from mountain and valley station: max. 1000 mm • Inclination: max.  $20^{\circ}$  • Depth: 10 mm

# Lodge with raised hide

composed of hunting cabin, hunter's stand, toilet cubicles, food trough, wheelbarrow, bridge and wayside cross.

**Epoch II** • Patinated model •  $40 \times 27 \times 24$  mm

#### 232368

# Hay barn and granary

In an authentic and very rustic timber construction as common on meadows and slopes in the Alps and foothills of the Alps. Blend of materials in wood and speciality cardboard parts. The wooden parts also feature coloured varnish.

**Epoch I** • Lasercut model •  $30 \times 35 \times 31 \text{ mm} \cdot 34 \times 35 \times 34 \text{ mm}$ 

#### 272531

# 4 Hay barns with scenic details for the forest

Hay barns should never be missing in an actual Alpine countryside, where a raised hide, a crib, a water trough as well as various wooden fences in the nearby forest are a matter of course.

**Epoch II** • 42 × 38 × 27 mm (4 x)

#### 272561

### Hay-harvest

The package contains everything you need for haymaking: several haycocks, rows of hay raked together, hay trailer, scythes and accessories. Including hay fibres and glue.

**Epoch IV** • Patinated model

# Hay and straw bale storage

Small, open barn (Laser-cut) as shelter for two ladder trucks. Silo and straw bails are included in the accessories.

**Epoch I** • Patinated model • Lasercut model • 69 × 45 × 26 mm

272900 36 Hay bales

#### 272562

## Silo- and straw bales

32 straw bales and silo hay stacks as produced during haymaking and straw harvesting.

Epoch IV • Patinated model

#### 232358

# Forester's Lodge

One-storey forestry service estate with timber-facing side canopy and deeply pulled down saddle-back roof adorns a surrounding forest district. The accessories include wagon wheels, ladders, logs and boards.

**Epoch I** • Patinated model • 120 × 83 × 53 mm

# »Alpenblick« Mountain inn

A stately building for an Alpine setting.

**Epoch II** • 180 × 167 × 83 mm

232232

# Alpine farm

Pretty farmer's house with a bell on the roof.

**Epoch II** • 131 × 125 × 92 mm

#### 232239

# »St. Bernhard« Chapel

with a small bell tower.

**Epoch II** • Patinated model •  $53 \times 35 \times 66$  mm

# »Sils-Maria« Chapel

(Switzerland). It has a stonecovered roof. Freely swinging, clearly visible bell.

**Epoch I** • 79 × 62 × 64 mm

#### 232234

# »Edelweiß« Boarding-house

With extravagantly printed typical paintings on several sides and an open-air terrace on the first floor. Tables and benches are included.

**Epoch II** • 82 × 82 × 58 mm

# Mountain rescue chalet

Where the mountain rescue workers start their alpine rescue missions. The two-storey mountain rescue cabin combines a solid stone plinth storey with a traditional log plan construction upstairs. The typical timber notches, masonry door and windows surrounding emphasise the solid outside of the cabin.

**Epoch III** • New Item 2016 • Patinated model • 90 × 52 × 50 mm

#### 232237

### »Enzian« House

Small chalet in idyllic surroundings.

**Epoch II** • 65 × 64 × 48 mm

#### 232235

# »Edelweiß« Boarding-house

The destination of many tourists who enjoy hiking and come from the lowlands.

**Epoch II** • 95 × 85 × 50 mm

# »Moser-Hütte« Alpine hut

Two-story, timbered alpine hut with summit cross and large, attached sun terrace at the front and brickwork foundation, fitted with tables, benches and solar panels on the roof. Offers ramblers and skiers an advantageous possibility of having a meal and passing the night.

**Epoch IV** •  $98 \times 69 \times 68 \text{ mm}$ 

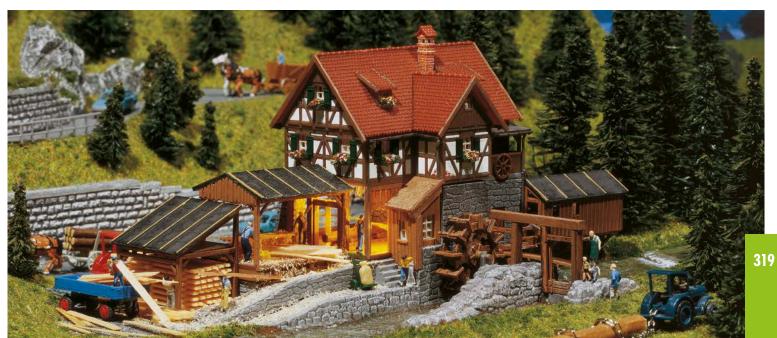

#### 232233

#### Barn

Stables, hay for the winter, farming tools.

**Epoch II** • 178 x 124 x 64 mm

# Sawmill

Sawmill from the Black Forest. The motor (art. 180629, 12-16 V, AC voltage, not included) can be used for driving the water-wheel, the visible saw-frame being audibly moved up and down at the same time.

**Epoch II** • Patinated model • Movable model • 171 × 118 × 83 mm

#### 272530

# Lumber yard

A board and timber assortment is contained in the package.

**Epoch II** •  $72 \times 48 \times 30 \text{ mm}$ 

#### 232373

# Timber storage sheds

For lumber piles and implements. Sheds, shelters and a draining floor allowing the storage of lumber piles and implements. Various piles of boards are also supplied.

Epoch I • New Item 2016 • Patinated model •

37 × 32 × 26 mm • 30 × 24 × 30 mm • 42 × 10 × 20 mm • 40 × 15 × 22 mm

# Allotment garden set 1

Set with 3 different allotment gardens with sheds, each separately fenced in. Features include tables and chairs, outdoor grills, barrels, garden tools and bicycles plus landscape sections with different plantings.

**Epoch IV** • 74 × 52 × 21 mm (3 x)

#### 272551

**Epoch III** 

#### 272574

#### Fountain

With figure, 4 jets and »water« surface.

**Epoch I** • 26 × 26 × 30 mm

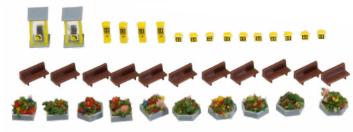

#### 272573

### Town decoration

Telephone booths, advertising pillars, letterboxes, hoardings, clocks, flower pots, flags, bus shelters, benches. 67 pieces. Ideal for the realistic creation of towns and villages.

Epoch III

### 2 Bicycles stands with bikes

Kit includes two racks and 16 bikes. Adds realism to any scene.

**Epoch III** • Bicycle stand 1:  $38 \times 18 \times 14$  mm • Bicycle stand 2:  $33 \times 15 \times 16$  mm

#### 272543

### »City Compact« Stops

The package contains the models of a covered and opened bus stop originally developed and implemented by Team Tejbrant as well as two bicycle stands with bikes.

**Epoch VI** • Bicycle stand:  $32 \times 14 \times 6$  mm (2 x) • Closed halt:  $49 \times 22 \times 18$  mm • Open halt:  $51 \times 19 \times 18$  mm

#### 272534

### 2 Bus stop shelters

Timber construction as frequently seen in small towns and villages.

**Epoch III** • Stop 1:  $35 \times 19 \times 20$  mm • Stop 2:  $41 \times 13 \times 22$  mm

### Set of traffic signs

Europe international (1977 – 1985) Contents: rub-on sheet, rub-on stylus, moulded traffic signs.

**Epoch IV** 

#### 272453

### Streetlamp set

56 street light dummies in 4 different designs. Do not light up. **Epoch IV** 

#### 272540

### Set of sidewalk tiles

Both pavement tiles can be split as required. 26 flexible kerbstone sections are included.

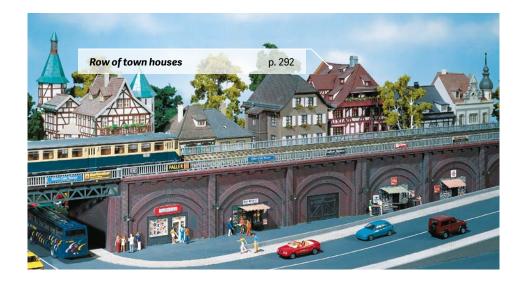

Tile dimensions: each  $60 \times 87 \text{ mm}$ Kerbstones: 1660 mm

Epoch III

### Arcades with shops

which are built into the wall arches.

**Epoch II** - 204 × 5 × 47 mm (2 x)

#### 272568

### Adventure playground

with tables and benches, litterbins, swings, seesaws, climbing structure, adventure hut, sand pit, giant stride and a wooden train.

**Epoch III** • Patinated model

#### 272537

### Assorted goods

An assortment of casks, barrels, wooden cases and planks.

**Epoch III** 

272906 40 Boxes Epoch I

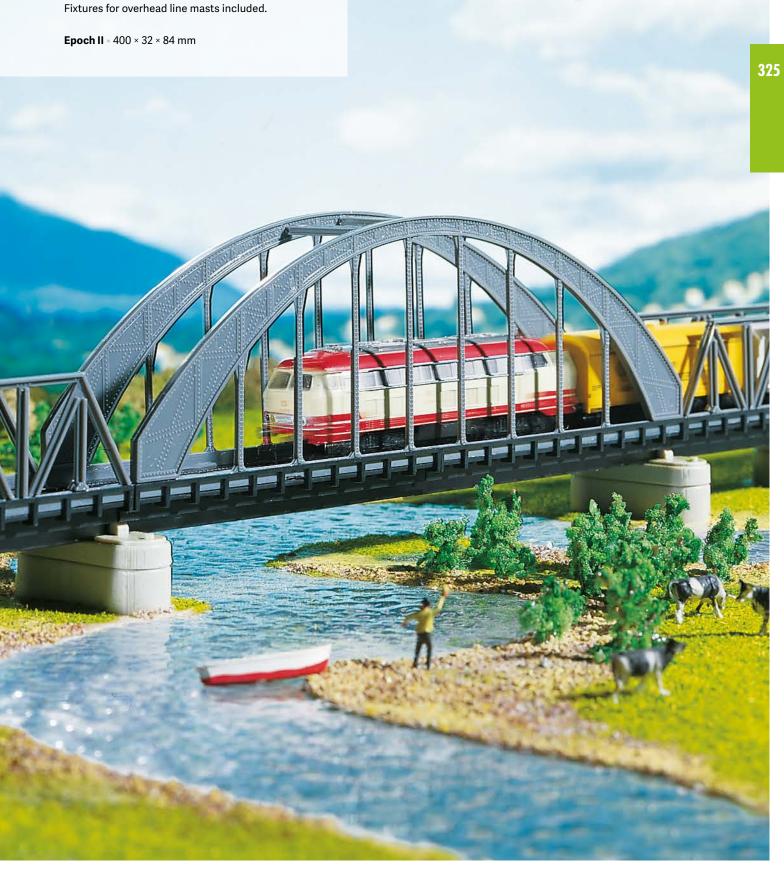

272907 20 Barrels and 36 sacks Epoch I

Scenic modelling • Bridges

#### 222583

### Arch bridge

with 2 girder bridges and piers (like art. 222548) 4 × 10 and 4 × 5 mm. The 3 elements of the bridge can also be used individually. Double-track construction possible, 1 x art. 222540 additionally required.

### 2 Straight viaducts

2 viaducts with track beds, each 100 mm and 6 piers each 38 mm. Clearance height with piers 57 mm. Viaducts can be used individually. Fixtures for overhead line masts included.

**Epoch I** • 200 × 32 × 75 mm

### 2 Curved viaducts

curved, 2 viaducts with track beds, each 45° (can be shortened to 30°), middle radius 193 mm. 6 piers each 38 mm. Clearance height with piers 57 mm. Viaducts can be used individually. Fixtures for overhead line masts included.

**Epoch I •** R: 193 mm

#### 222550

### Bridge abutment set

2 basic piers, 1 centre support, 2 straight track beds, 100 mm each. The basic piers of art. 222550 can also be used for art. 222581, 222583, 222585, 222586.

**Epoch II** • 260 × 43 × 36 mm

222578

2 Box girder bridges
with annexed walkways, two brickwork bridge parapets and one central pier.

**Epoch III** • Patinated model • 418 × 53 × 82 mm

#### 222581

### Steel arch bridge

Clearance without piers 57 mm. Additional piers (as art. 222548) 4  $\times$  10 and 4  $\times$  5 mm. Bridge can be built in two designs. Double track also possible, add 1 x art. 222540 to this end. Mounting plates for catenary masts are included.

**Epoch I** • 400 × 32 × 105 mm

#### 222548

### Set of concrete bridge piers

16-pieces, can be used as bridge piers and to extend the piers (art. 222547).

**Epoch I** • 43 × 14 × 5 mm (8 x) • 43 × 14 × 10 mm (8 x)

### Arched bridge

Length 300 mm, complete with three straight track beds 100 mm each and 16 concrete pier parts. Concrete piers (art. 222548) to go with them. Catenary operation is possible. Mounting plates for catenary masts are included.

**Epoch II** • 300 × 53 × 82 mm • Clearance: 31 mm • Track-bed height: 39 mm

With the driveway system, consisting of straight and curved (2 radius) track beds and matching columns, driveways can be built individually, parallel tracks are also possible.

The flap-insertion connection of the driveway party is extremely stable, it can even be reinforced with glue.

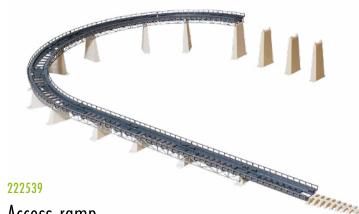

#### 222547

### Set of piers

With flexible initial wedge, 11 piers from 5 to 55 mm (in 5 mm steps) and 4 piers 60 mm high.

Epoch I

#### Access ramp

Consisting of 4 straight and 4 curved track-beds (R1=193 mm), mounting plates for catenary masts, a pier set consisting of 4 piers (each 60 mm), 11 piers 5 – 55 mm (with 5 mm intervals) and a flexible tapered riser. To extend the ramp use track-beds art. 222540, 222542 or 222543. Clearance is 56 mm

Suitable for all track types.

**Epoch I** 

#### 22254

### 4 Track beds, straight

4 track beds, each 100 mm, with trelliswork.

**Epoch I** • 100 × 32 mm (4 x)

#### 222542

### 4 Track beds, curved

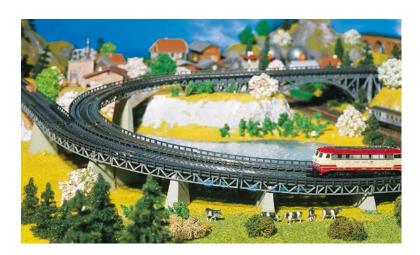

4 track beds with trelliswork, R1, 45°, can be altered to 30° by means of kink. Compatible with all track brands. **Epoch I** 

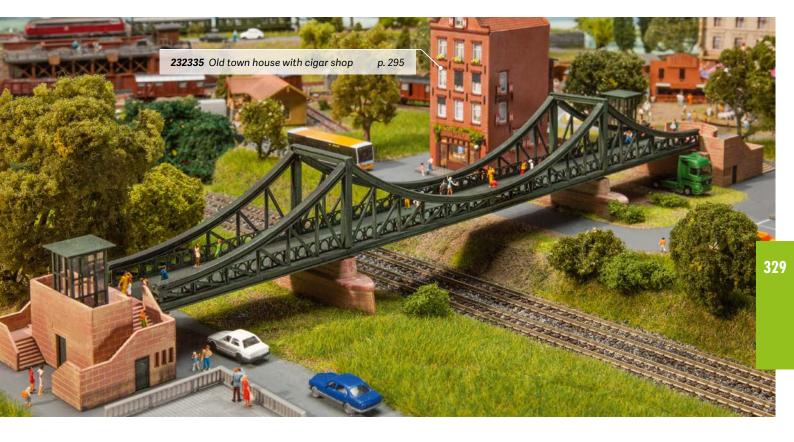

#### 222543

### 6 Track beds, curved

6 track beds with trelliswork, R 2, 30°. Compatible with all track brands.

Epoch I

# Pedestrian overpass »Der Eiserne Steg«

Make one of Frankfurt's best-known sights part of your layout. The pedestrian overpass »Eiserner Steg« was built in 1869 and ever since has been an important landmark of Frankfurt's »Main« shores panorama. The three-bay suspension bridge is made of riveted steel framework and features lithic river and land piers and two generous perrons with elevators. Instead of the bridge's railroad you can also use your own model railroad.

Epoch I • Patinated model • 497 × 87 × 75 mm

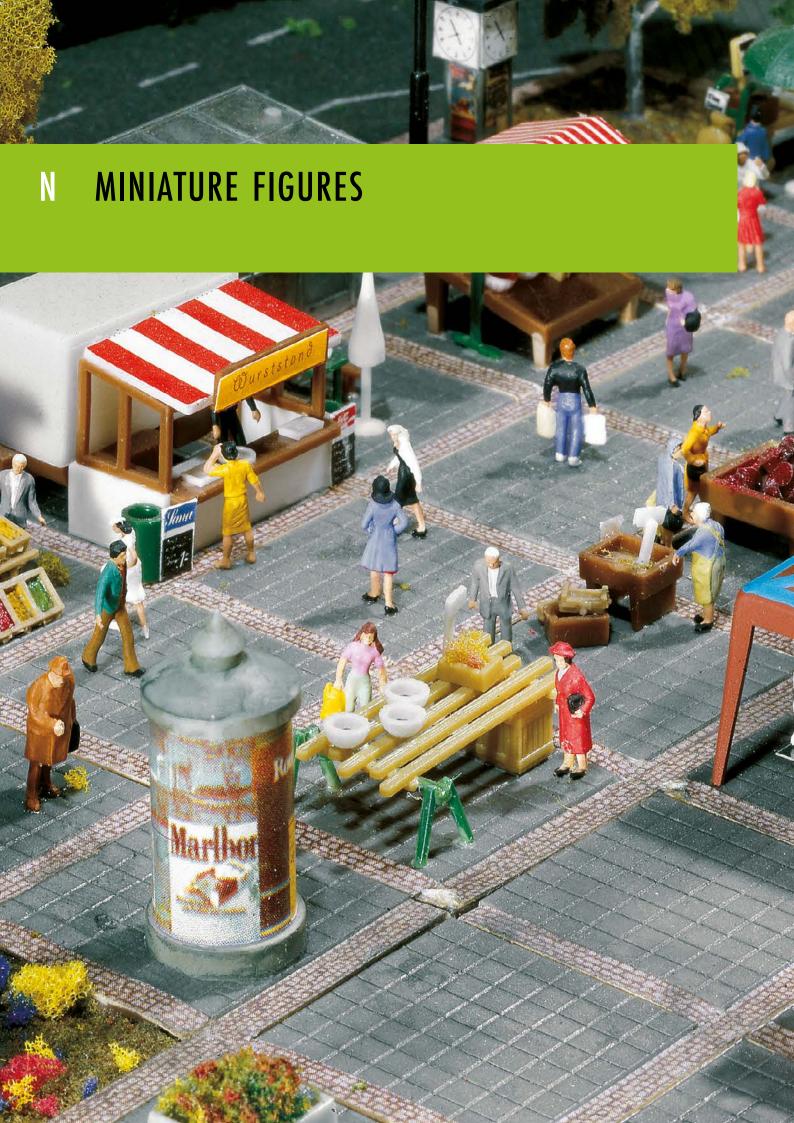

#### 222574

### Roofed pedestrian bridge

Slender stone pier bridge with roofed wooden framework, to be used as cycle track and footpath. Walkway, parapet and roof framework are made of real timber. Several models can be built in a row.

Epoch I - Lasercut model - 89 × 20 × 40 mm

## LIMITED SETS

Punctually at the start of each model-making saison various promotional sets are supplied to the trade. They are composed of several building models that thematically match each other and are in some cases not available separately.

#### 239001

### »Mühlheim« Railway station set

Comprehensive! Multiple-piece set comprised of a rural station with annexed goods shed, a platform and the matching protected level crossing with accessories ensuring the safe crossing of the tracks.

**Epoch II** • New Item 2016 • Railway station:  $135 \times 78 \times 60$  mm • Level crossing:  $143 \times 98 \times 42$  mm • Platform:  $581 \times 36 \times 37$  mm

#### 239002

### Railway Maintenance Services

Coal, water, sand and slag! 4-piece engine depot set comprised of a one-stall engine shed, a small coaling station with swivelling loading crane, a water tower and the necessary inspection pit with matching gantry crane.

**Epoch II** • New Item 2016 • Slag handling facility:  $209 \times 85 \times 57$  mm • Coal handling:  $119 \times 44 \times 66$  mm • Engine shed:  $175 \times 52 \times 62$  mm • Water tower:  $58 \times 58 \times 135$  mm

## »Hüinghausen« Station

A monument! Laser-cut model of the station building in »Herscheid-Hüinghausen« put into operation in 1915, with a characteristic hipped roof à la Mansard and an adjoining half-timbered goods shed. The station area forms today the operating central point of the museum line »Sauerland Local Railway«.

**Epoch I** • New Item 2016 • Lasercut model • 103 × 67 × 54 mm

Railway personnel

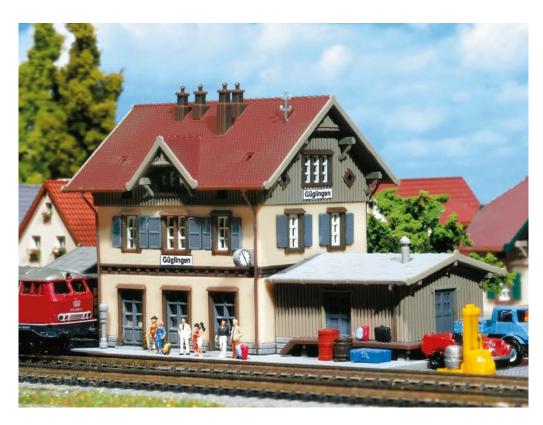

158021

Sitting persons

### »Güglingen« Station

Typical standard railway station with annexed goods shed.

**Epoch I** • 119 × 56 × 60 mm

#### 282706

### »Blumendorf« Wayside station

Can also be placed along curved track. (Curve 8520, 8521 and 8530).

**Epoch II** • 104 × 70 × 43 mm • R: 195 – 220 mm

#### 282740

### Goods shed

with loading and unloading ramp and wide hall doors. Several sheds can be built one behind the other.

**Epoch I** • 133 × 63 × 56 mm

# Platform roofing

Glass covered structure for double-track traffic, 167 mm long. Suitable for catenery and steam operation. The structure can be assembled in tandem or side by side multiple times. Platforms (art. 282718) can be added.

**Epoch II** • 167 × 94 × 52 mm

#### 282718

### 3 Platforms

2 glass-covered platforms and 1 open platform, each 167 mm, with decorative parts.

**Epoch III** • 167 × 32 × 30 mm (3 x)

#### 222114 (N, Z)

# Small wagon turntable with servo drive

Laser-cut model of a manually operated turntable with wooden casing and two exits for the distribution of wagons at small depots or factory installations with freight service. It is driven by the included servomechanism. The building kit also contains inserts for the tracks H0f and Z. Required track length: 50 mm. Use our new servo (art. 180725) as the drive.

**Epoch II** • Lasercut model • incl. motor • ø 63 × 35 mm

#### 282733

### Engine repair shed

This model can be used within and outside of the depot, e.g. as a locomotive shed, track engine repair shed, blacksmith etc. Doors on the front and back so trains can pass through. The module layout allows for a variable extension of the building and the construction of several models side by side.

**Epoch I** • 118 × 83 × 123 mm

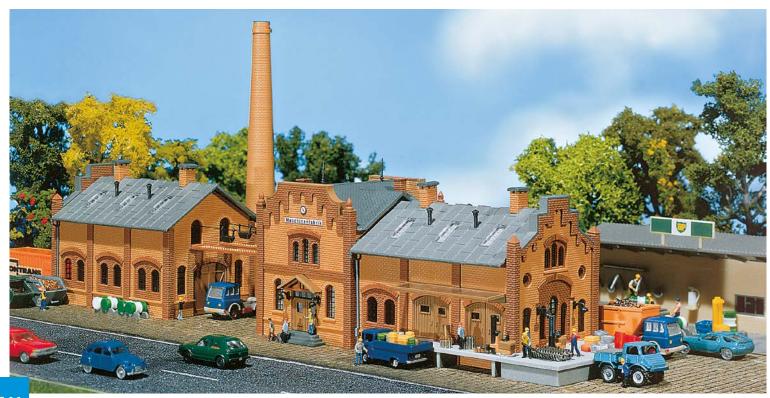

#### 282717

### Signal tower

This half-timbered building has an outside staircase.

**Epoch II** •  $40 \times 28 \times 42 \text{ mm}$ 

Trade, business, industry

282741

# Engineering works

Impressive building complex with administrative wing, production hall and storehouse with covered loading platform.

**Epoch I** • 245 × 85 × 110 mm

#### 282747

### ARAL Tank farm

High octane! Large ARAL tank farm including one service building with loading platform for trucks and railways, filling plant, pipe system, various barrels and a number of standing and lying cylindrical kettles partly accessible via stairways and footbridges.

**Epoch V** • Building:  $150 \times 90 \times 38$  mm • Tank:  $50 \times 50 \times 28$  mm • Tank, upright:  $130 \times 85 \times 53$  mm (2 x)

344

**Epoch II** • One-family house 1:  $58 \times 40 \times 39$  mm • One-family house 2:  $48 \times 41 \times 38$  mm • Inn:  $56 \times 45 \times 42$  mm • Church:  $110 \times 60 \times 158$  mm

### Development house

With plastering and half-timbered construction.

**Epoch III** • 48 × 41 × 38 mm

### Development house

Clinker and half-timbered construction.

**Epoch III** • 48 × 41 × 38 mm

158052 Passers-by

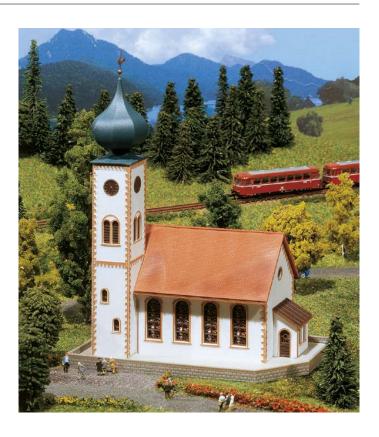

158004 Passers-by II

### Village church

Various church-tower roofs are included in the package.

**Epoch III** • 110 × 60 × 158 mm

#### 282760

### Half-timbered house

also easy to build for beginners.

**Epoch III** • 58 × 40 × 39 mm

#### 282762

### Development house with garage

also easy to build for beginners.

**Epoch III** • 58 × 40 × 39 mm

#### 282791

### Park accessories

This kit is perfect for decorating a small village or making up a village green.

**Epoch III** 

### Provincial houses

Two dwelling town houses, with three storeys, double pitch roof and dormer windows. They can also optionally (as shown) be built by halves to form a splendid row of buildings in the background of your installation.

**Epoch II** • New Item 2016 • Lasercut model • Townhouse 1:  $27 \times 24 \times 64$  mm • Townhouse 2:  $27 \times 18 \times 59$  mm • Townhouse 3:  $28 \times 18 \times 65$  mm • Townhouse 4:  $28 \times 18 \times 59$  mm

#### 282780

### Town house

Large city ambience. Four-storey dwelling house with fire walls and double pitch roof. The welcome variegation of the facade is ensured by decorative weather mouldings and the coloured frames of the windows.

**Epoch II** • New Item 2016 • Lasercut model •  $58 \times 43 \times 68$  mm

#### 272410

### Wooden picket fence

Stained laser-cut fence consisting of four picket fencing segments (86 mm each) and two gate segments (36 mm each), which creates a harmonious connection between the house and the garden.

**Epoch I** • Lasercut model • Fence:  $86 \times 0.5 \times 7.8$  mm (4 x) • Gate :  $36 \times 0.5 \times 7.8$  mm (2 x)

#### 282840

### Garden fence

Epoch I • Parts: 14 • Total length: 434 mm

#### 282841

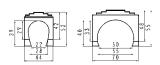

### Fencing

Epoch I • Parts: 8 • Total length: 560 mm

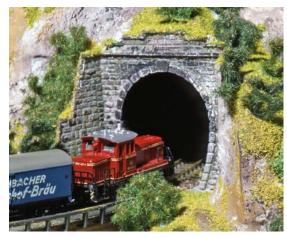

### Set of tunnel portals

2 double-track and 2 single-track tunnel portals, suitable for both steam and catenary operation. Additional wall parts for installation.

Epoch I

#### 282909

#### Pier set

22 piece set with 2  $\times$  10, 15, 20, 25, 30 and 10  $\times$  40 mm.

**Epoch I** 

#### 282901

### 4 Track beds

4 track beds, each of 110 mm.

Epoch I

#### 282905

### 4 Track beds

4 track beds, 30°.

**Epoch I** • 2 x R 195 mm • 2 x R 225 mm

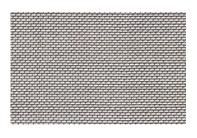

#### 282960

### Tunnel tube Pros

(flexible) incl. 2 mounting aids for mounting in one-track and two-track tunnel portals. Portals are not included.

**Epoch I** • 120 × 120 × 2 mm

#### 282942

# Decorative sheet »Natural cut stone«

220 × 60 × 4 mm

### Steel girder bridge

With 8 piers ( $4 \times 5$  mm and  $4 \times 10$  mm), 2 variations possible.

**Epoch I** • 220 × 25 × 47 mm • Clearance without piers: 32 mm

#### 282924

### Stone arch bridge

220 mm. Track bed elevation can be reduced from 81 mm to 41 mm.

**Epoch I** • 220 × 25 × 88 mm • Clearance height: 70 mm / 30 mm

# HO FAIR

# »Star Drive« Dodgem cars

Make way! Two-column cars with optimized guiding, old cars, cashbox carriage and decoration elements true to the original »Star Drive« of Fa. Josef Barth from Kaiserslautern. Digital printing model with PVC roof. A direct-current motor is supplied.

**Epoch V** • New Item 2016 • incl. motor • 385 × 195 × 113 mm • Matching figures: 153006

#### 140424

### »Crazy Clown« Attraction

Yellow bow tie, striped jacket, plenty of make-up and a red nose – discover your inner clown with the carny Alfons Tröger's racy, hully gully style merry-goround.

Once the model's drive disc lifts into a sloping position, the crazy clown's movement becomes an exciting roller coaster adventure.

Colorful spectacle with painted resin figure and intricate digitally printed themes. The kit includes the drive mechanism and a control unit.

**Epoch V** • incl. motor • 105 × 96 × 63 mm •

Ticket booth: 26 × 20 × 38 mm • Matching figures: 153051, 153052

TIMES ■ HO Fair > Rides

140420

## »FUN-Schiff« Ride

Europe's most popular swing. Welcome aboard the first mass production fair model of a large swinging ship.

The lighted swing with complete drive mechanism (motor & control) swings up high while its decorations rouse feelings of ocean holidays. This FUN-Ship is driven by a very silent, powerful direct-current motor fitted with metal gear. Its control system can be activated using keys or a digital center unit. After that a very realistic programme will run fully automatically.

Power supply via 16 V, AC voltage. Get in, have fun and enjoy the view.

The owner of the original »FUN-Schiff« is the company Schneider.

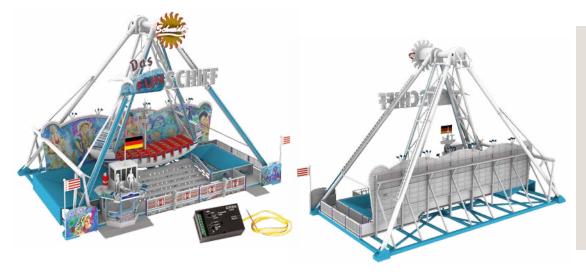

**Epoch V** • incl. motor • 285 × 183 × 210 mm • Matching figures: 153051, 153003, 153006

# »Super-Wave-Swinger« Roundabout

Anniversary model of a wave swinger with new decoration and modern digital control system. The functions of that chair-o-planes such as acceleration, hydraulics and tilting top as well as the decoration with nostalgic paintings are inspired by the original »Kreuznach Wave Swinger« of showmen Nickel GbR from Frankenthal.

Lifting and lowering of the column as well as rotation and tilting of the roof are ensured by two motors (16 V AC or digital voltage) located within a decorative enclosure that can also be hidden behind a movable background wall with digital printing, if desired. A platform and a small paybox form part of the kit.

Leisurely enjoy the large view of your funfair. The FALLER team wish you a pleasant flight!

**Epoch V** • New Item 2016 • incl. motor • 288 × 200 × 155 mm

#### 140345

### »Super-Wave-Swinger« Trailer

Digital printing model of the showman's luggage trailer intended for the »Super-Wave-Swinger« of showmen Nickel GbR. To go with the attraction art. 140344.

**Epoch V** • New Item 2016 • 135 × 29 × 48 mm

**KIRMES** 

#### 140315

### Chairoplane

For the fairground area of your layout. 12 seats, coloured roof segments, indirectly illuminated girder supports, including drive motor (12-16 V, AC voltage).

**Epoch II** • incl. motor • ø 152 × 125 mm • Matching figures: 153051

#### 140316

### Children's merry-go-round

Undoubtedly the classic among vintage merrygo-rounds. Roof with elaborate mirrors, complete with driving motor (12-16 V, AC voltage).

**Epoch IV** • incl. motor • ø 121 × 90 mm • Matching figures: 153051

#### 140329

### Children's Merry-go-round

In the classic style of old funfair attractions. With various vehicles, motorbikes, horses and tigers. Complete with driving motor (12-16 V, AC voltage).

**Epoch III** • incl. motor • Ø 125 × 115 mm • Matching figures: 153050, 153051, 153052

**★** KIRMES **■**H0 Fair → Rides

140426

## »Octopussy« Roundabout

The five separate cars arranged on the five movable carrying arms rotate around their own axis, the carrying arms move up and down in a varying manner, the whole bogie goes through an inclination – all this is controlled according to the original by complex driving and control equipment (12-16 V, AC voltage). Realistic flow of operations, detailed construction and design implemented to perfection.

A special attraction to any enthusiastic fairgoer.

**Epoch IV** • incl. motor • 250 × 260 × 142 mm • Matching figures: 153051, 153052

Fairground Set of figures II

Fairground Set of figures III

# County Fair Set with Polyp

The tentacle spectacular »Polyp« turns with its dancing octopus arms happily in a circle and transforms any area into happy festival grounds. Surrounded by the booths »Cylinder Toss» and »Corncobs«, as well as a restroom-facility wagon and various barriers, this is the ideal atmosphere set for all enthusiastic county fair beginners, families and carnival fans.

**Epoch V** • incl. motor • Polyp: 230 × 145 × 100 mm • »Corn on the cob« funfair booth: 60 × 40 × 102 mm • Toilet wagon:  $88 \times 41 \times 44$  mm  $\circ$  Ball toss booth:  $64 \times 39 \times 49$  mm  $\circ$  Total length of fence:  $240 \times 23$  mm  $\circ$ Matching figures: 153052, 153006

#### 140423

# »Mouse Town« Fun house

Swarming and bustling. In 2016 you will be able to visit a variegated house full of travelling rodents following the tradition of legendary mouse circuses. The buoyant facade of the model »Mouse Town« gaily continues inside: the visitors to that fun house discover an animal show intended for children with a great number of mice that bustle about in a miniature town with small huts and castles, climbing ropes and branches. Digital printing model with a resin figure inspired by the original of Johanna Brambach from Nuremberg.

Epoch IV - New Item 2016 -120 × 72 × 85 mm • Matching figures: 153003, 153006 TIMES ■ HO Fair > Rides

# 140428

# »Salto Mortale« Attraction

Faithful reproduction of the attraction built by Dutch manufacturer Mondial. After visitors have gotten on, the powerful supporting beam rises, then rotates, which causes the gondola arms arranged in a garland to rotate in the opposite direction, while their rows of seats additionally overturn several times. Fitted with two motors, control unit for the program sequence and lighting elements. Ready for connection to operate on 16 V AC voltage.

**Epoch V** • incl. motor •  $257 \times 254 \times 167$  mm • Matching figures: 153051, 153052

# »Wild Mouse« Roundabout

Original vehicle installation of Messrs. Mack in Waldkirch, now in the possession of the showmen Eberhard & Göbel in Hamburg. An anniversary model of the special class. It is fully operational with drive motor (12-16 V, AC voltage) for vertical transport of four cars. As a result of their dead weight, the coloured cars then move along the winding path at increasing speed down through the "Cat's Mouth" to the boarding and disembarking station. Abundant lighting and complex decorative styling make this model a unique attraction on any fairground installation.

#### 140416

# Transportable headlight

Very versatile, large transportable LED spotlight for a perfect illumination of the Traber show or other attractions on the funfair.

**Epoch V** • 31 × 20 × 36 mm

# »Power Tower« Fairground operator

Original fairground model of Maurer & Söhne, Munich. Fully operative model, approx. height 700 mm, with special drive motor (12-16 V, AC/DC), electronic control sequence, complex background, lighting poles and cashbox. This gives you the big kick, for persons with strong nerves only. Moving up to a dizzy height, then moving down to the floor before stopping at free fall. This model follows the original.

**Epoch V**  $\circ$  incl. motor  $\circ$  215  $\times$  250  $\times$  685 mm  $\circ$  Matching figures: 153051

# »Jupiter« Ferris wheel

Original fair vehicle from Nauta-Bussink, in the possession of the fair operator Barth-Kipp in Bonn. This vehicle features completely new dimensions: 36 coloured illuminated cars, overall height 520 mm, "Jupiter« lettering; paybox and front supporting pillars can be illuminated effectively. With drive motor (16 V, AC voltage). For illumination of all cars, the "Jupiter« lettering and the front supporting pillars, the Ferriswheel lamp set (art. 140471) is required. This set of lamps can be retrofitted.

**Epoch IV** • incl. motor • 280 × 220 × 520 mm •

Matching figures: 153052

# Ferris-wheel lamp set

Light set, matches »Jupiter« big wheel (Item no. 140470). Lights all 36 gondolas, the Jupiter lettering and the front support struts. Select from ten chaser light programs. The product includes one power supply (5V, direct current). Also suitable for subsequent installation. **Epoch IV** 

# Ferris wheel

This model is a must in every amusement park. The FALLER motor (art. 180629, 12-16 V, AC voltage) is used for driving the model.

One ferris wheel lighting set (art. 180635) and two replacement bulb sets (art. 180636) are required for complete lighting of all gondolas.

**Epoch II** • Movable model • 215 × 199 × 326 mm • Matching figures: 153052

#### 180635

# Lighting set for ferris wheel

10 bulbs in 5 colours, 2 clear bulbs (12-16 V, DC, 30 mA each). Contact strips and wiring. This lighting set provides sufficient lights for every second gondola and the entrance. To illuminate all gondolas 1  $\times$  180635 and 2  $\times$  180636 are required.

#### 180636

# Replacement bulbs

For illumination of the ferris wheel (art. 140312), 5 coloured and 1 clear bulb.

# 180647 (HO, TT, N, Z)

# 5 LEDs, white

with enamelled copper wires.
Ready for connection to 12-16 V,
AC/DC voltage. Pressure-sensitive.
To illuminate buildings, rooms,
means of advertising, outdoor
installations, etc.
In AC voltage mode you need
rectifier (art. 180633) for flickerfree operation.

## 180648 (HO, TT, N, Z)

# 2 LED bar spotlights, white

with 5 LEDs each. Ready for connection to 12-16 V, AC/DC voltage. The connections using enamelled copper wires on both sides allow to divide or shorten the bars one time.

In AC voltage mode you need rectifier (art. 180633) for flicker-free operation.

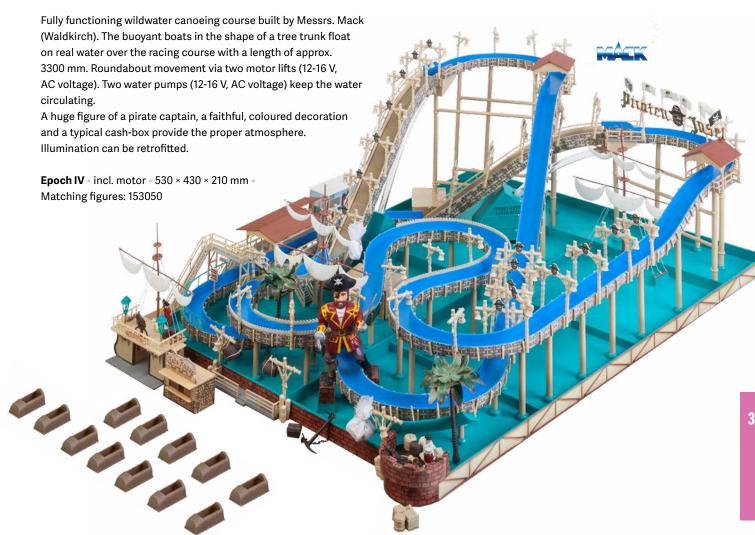

# 180649 (HO, TT, N, Z)

# LED light festoon

30 LEDs, in different colours. Ready for connection to 12-16 V, AC/DC. Length: approx. 250 mm. The connections using enamelled copper wires on both sides allow to divide or shorten the festoon one time. Perfect to illuminate funfair stands, ships, beer gardens, etc. In AC voltage mode you need rectifier (art. 180633) for flicker-free operation.

# »Pirate island« Wildwater canoeing course

#### (HO, N)

180671 white 180674 green

180672 red 180676 blue

180673 yellow

# Micro-cable bulb

The FALLER micro cable bulbs (12-16 V, AC/DC, 35 mA) are suitable for the ideal lighting of all fairground booths and rides.

#### Special lighting effects

Various LED items or the simple micro-bulbs are available from our product range for hobbyists to illuminate models and for special effects. The LED light strips and minilights especially are perfect when setting the scene for our fair models.

## 153006

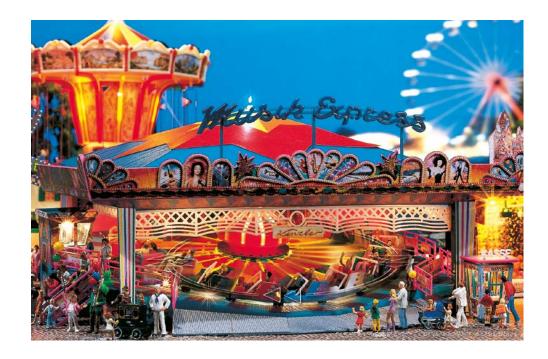

# Fairgoers

Content: 36 pieces

# »Musik Express« Roundabout

Enter the roundabout and the ride will start at breakneck speed with 20 coloured gondolas. Complete with motor (12-16 V, AC voltage) and lighting.

Epoch IV • incl. motor • 208 × 199 × 93 mm • Matching figures: 153051

#### 140439

# »Flipper« Roundabout

Complete with drive motor (12-16 V, AC voltage), gorgeously coloured background scenery and cashbox. Attractive lighting possible by adding micro-cable bulbs 180671 at a later time.

**Epoch IV** • incl. motor • 260 × 225 × 140 mm • Matching figures: 153052

## 140477

# Carnival Machines

First right, then left, then forward, backward, and down! The amusing claw crane and 14 more carnival machines challenge your skills. You can either position them on the counter or use the stands.

**Epoch IV** • 65,5 × 50 × 38 mm • Matching figures: 153006, 153003

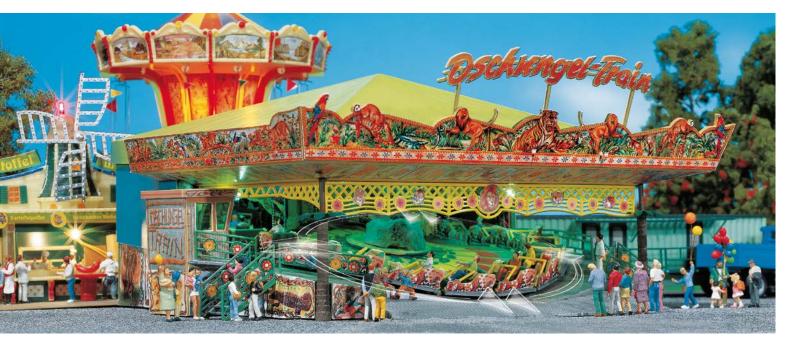

# »Jungle train« Roundabout

The 20 colourful cars speed around in a circle, forward and backwards. Complete with drive motor (12-16 V, AC voltage) and true to original décor.

**Epoch IV** • incl. motor • 208 × 199 × 93 mm • Matching figures: 153051

## 140461

# »Break Dance No.1« Roundabout

16 colourful gondolas on 4 rotary tables spin around wildly in a circle. With cashbox and gorgeous background decorations. Complete with motor (12-16 V, AC voltage). With the addition of art. 180647 + 180671 interesting lighting can be achieved.

**Epoch IV** • incl. motor • Carousel:  $250 \times 240 \times 136$  mm • Ticket booth:  $32 \times 32 \times 37$  mm (2 x) • Matching figures: 153051

# Swingboats with motor

A model with 5 swingboats and colourful decorative pictures. Fully functional with drive element, which enables each individual swingboat to swing in its own rhythm. Equipped with light blinking mechanism. There is a micro bulb (art. 180671) included to operate the blinking unit. With motor (12-16 V, AC voltage).

**Epoch II** • incl. motor • 184 × 98 × 104 mm • Matching figures: 153050

#### 140358

# Fairground barriers and signs

Barriers together with information and advertising banners as well as fairground signs.

Epoch V • Total length: 720 mm

## 180499

# Maypole

Festive central point in the village. Splendid may pole painted in traditional white-blue colours, ornamented with corporation arms and digital paintings on colourful tablets with scenes of the village life, trades and crafts.

**Epoch II** • New Item 2016 • 237 × 35 × 20 mm

# 2 Mobile sales units

Here ice-cream and pancakes are offered. The sales booths can be also used at weekly markets and in the town.

**Epoch V** • Ice booth:  $50 \times 40 \times 43$  mm • Crêpes booth:  $43 \times 43 \times 45$  mm

#### 140444

# »XXL French Fries« Fairground booth

Extra long French fries of XXL size are the moneymaker here. This French fry booth can also be used on weekly markets and in town.

**Epoch V** • 52 × 75 × 61 mm

**■**H0

#### 140445

# »Sea Fish« Fairground booth

Here, you get all kinds of seafood fresh on your plate. This fish booth can also be used on weekly markets and for street events.

**Epoch V** • 126 × 60 × 75 mm

## 140322

# »Roundabout bar« Refreshment kiosk

Beverages of all kinds are offered here. Complete with high tables, stools and decorative material. Can be used on fairgrounds or at street festivals.

**Epoch IV** • 155 × 83 × 74 mm

## 140464

# 2 Fairground booths

Original showmen's booths »Hot-Dog-Man« and »Power-Ball« throwing booth.

**Epoch V** • »Hot-Dog-Man« funfair booth:  $67 \times 43 \times 96$  mm • »Power-Ball« throwing booth:  $64 \times 40 \times 59$  mm

# 2 Fairground booths

At the candy booth »Dolce Diavolo« there are quite a lot of »devilishly good« sweeties. At his booth the clown offers multi-coloured balloons.

**Epoch V** • Candy booth: 112 × 47 × 60 mm • Balloon stand: 33 × 35 × 46 mm

#### 140446

# 2 Fairground booths

Original showmen's booths »Ducky Pond« and »Fishing Game«.

**Epoch IV** • Carnival booth 1:  $93 \times 46 \times 63$  mm • Carnival booth 2:  $100 \times 44 \times 68$  mm

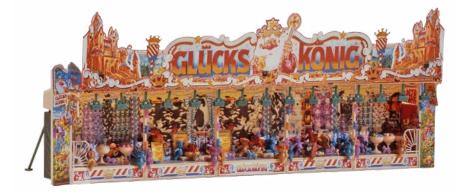

#### 140320

# Midway booths

With the included front decorative pictures and the accessories and decorative elements for the interior design, both stalls can be built as a shooting gallery and a booth with »All kinds of sweets«. The stalls can be illuminated with the micro-bulbs from art. 180671-180676.

**Epoch III** • Shooting gallery:  $96 \times 32 \times 67$  mm • Candy booth:  $96 \times 32 \times 77$  mm

#### 140452

# »Glückskönig« Ticket booth

»Every pick is a winner. Who hasn't tried; who wants to go again?«. Everyone can try their luck here. With many decorative elements and accessories.

**Epoch IV** • 253 × 55 × 75 mm

# Set of funfair caravans I

A comeback of FALLER car models. Set of funfair caravans comprised of a three-axle stanchion trailer with container body and a caravan with rounded roof, five oriels, a side veranda with awning and small upward stairs. Each one with underfloor roller hold and forked draw-bar.

**Epoch IV** • New Item 2016 • Stake car: 180 × 33 × 43 mm • Caravan: 181 × 70 × 58 mm

#### 14048

# Set of funfair caravans II

Everything you need. Set of funfair caravans comprised of a showman's luggage trailer and a caravan with side veranda and two separate entrances with small upward stairs. Each one with rounded roof, underfloor roller hold and forked draw-bar.

**Epoch IV** • New Item 2016 • Baggage car: 195 × 30 × 44 mm • Caravan: 181 × 50 × 60 mm

#### 140482

# Set of funfair caravans III

Let's go to the next destination. Set of funfair caravans comprised of a three-axle stanchion trailer and a worker caravan with roofed veranda and stairs. Each one with underfloor roller hold and forked draw-bar.

**Epoch IV** • New Item 2016 • Stake car: 180 × 33 × 43 mm • Caravan: 181 × 44 × 38 mm

#### 140483

# Set of caravans

My home is my castle. Two models of caravan of different length from the 1970s, one with rounded and one with box-type body.

**Epoch IV** • New Item 2016 • Caravan 1: 89 × 26 × 28 mm • Caravan 2: 56 × 23 × 27 mm

# N FAIR

# Ferris wheel

For driving the model, you need the FALLER motor (art. 180629, 12-16 V, AC voltage). All of the 24 gondolas can be illuminated with the set of bulbs (art. 242313) for the Ferris wheel.

**Epoch II** • Movable model • 210 × 129 × 220 mm

#### 242313

# Ferris wheel's bulb set

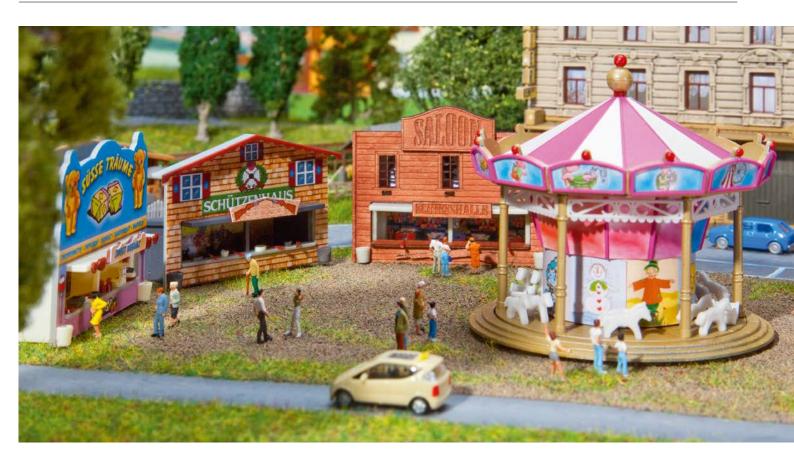

Set of contact parts, 24 bulbs in five colours, complete with suitable lighting transformer (2.6 V, DC voltage). This permits full illumination of the Ferris wheel.

## 242314

# Replacement bulbs

These bulbs are specific to the Ferris wheel (art. 242312). Ten bulbs in five colours (2.6 V, DC voltage).

# Funfair Set

Motley miniature county fair dispels boredom in town with motorised pony carousel for the little ones, two shooting galleries and a booth selling sweet treats.

**Epoch IV** • incl. motor • Carousel:  $\emptyset$  69 × 65 mm • Shooting gallery laser-cut:  $55,5 \times 25 \times 45$  mm • Shooting gallery:  $59 \times 25 \times 38,5$  mm • Candy booth:  $53 \times 25 \times 42,5$  mm

## 242320

# 2 Funfair stalls

2 fairground stands. Can be illuminated using the micro-bulb (art. 180671).

**Epoch III** • 53 × 18 × 43 mm (2 x)

#### 242321

# 2 Market stalls

Decorations for the frontages are included. Can be illuminated using the micro-bulb art. 180671.

**Epoch III** • 53 × 18 × 38 mm (2 x)

# Children's merry-go-round

old are gladly reminded of, even today.

The model can be retrofitted with the FALLER motor (art. 180629, 12-16 V, AC voltage). With roundabout horses and carriages. Can be illuminated with 1 micro-bulb (art. 180671).

A colourful and dazzling roundabout which young and

**Epoch III** • Movable model • ø 68 × 65 mm

#### 242315

# Chairoplane

A brightly coloured model having 12 chairs, gaily decorated panels on the roof and colourful paintings around the central support. The model comes complete with motor (12-16 V, AC voltage). The chairoplane can be illuminated to great effect, using the FALLER grain-of-wheat bulb (art. 180671).

**Epoch II** • incl. motor • ø 68 × 68 mm

# 180629 (HO, TT, N)

# Synchronous hobby motor

12-16 V, AC voltage, 60 mA. Choice of 15 or 4 rpm. Reversible for clockwise- and counter-clockwise rotation. This robust, long-lasting motor can be used for various purposes, e.g. wave swinger, conveyor, gantry crane, railway gate, wind-, water or saw mills, feed pump, etc. Detailed instructions are included.

#### 180641

# Transformer

for high output. Especially applicable for the operation of fair rides, electrical appliances, lighting, power supply for Car System controls and other model making accessories.

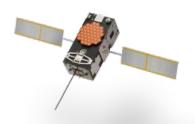

With overload protection.

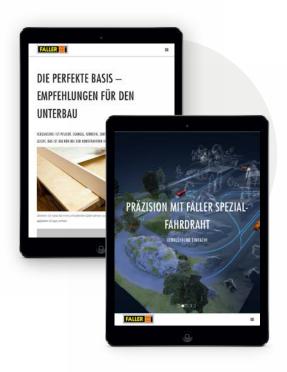

CAR SYSTEM DIGITAL

# CAR SYSTEM DIGITAL — PURE INNOVATION

Road show! Cars are an element of our culture and as such simply exciting. Integrated in your installation as miniature road traffic in motion, they provide an extraordinary overall impression embracing your building models and your landscape arrangement. With »Car System Digital« you are going to exhaust all the benefits offered by modern information and communication technology to scale modelling, and will be able to focus on what really counts here: your creativity.

Cruising! Each individual Car System Digital vehicle fascinates alone through an entire spectrum of realistic details that nearly make you forget the scale of 1:87. The adjustment of driving behaviour to the traffic flow and the observance of the applicable traffic regulations are fully automatic. You thus get noticeably more functionality for conventional miniaturization: it's safer, more exciting, and fully interconnected! You will find in-depth information relating to Car System Digital vehicles on **page 384.** 

Cockpit! The »Car System Digital« software is able to handle all traffic scenarios, autonomously and in accordance with the situation, regardless of the density of traffic, circuit layout, and installation size. It offers outstanding ease of operation when designing and controlling model layout construction, and allows you to keep a complete global view of the process at any time. You will find a general view of the »Car System Digital« software **from page 386.** 

Circuit! »Car System Digital« always conforms to the layout you have designed, to the existing building arrangement and railway circuit, and thus reduces your construction work to embedding the guide wire, building the component »Turnout« into the road, and fastening the ultrasonic satellites above the model installation. Do you feel like a test drive now? All you need for perfectly designed and fitted streets and roads can be found **from page 408.** 

Products protected through: European patent no. 13 152 513.1-1658 US patent no. 8,781,648

# PERFECTION, PRECISION, PASSION

Car System Digital vehicles can be personalized down to the smallest details and set new standards through their faithful reproduction of the real originals. Combined with the »Car System Digital« software they meet the most stringent requirements regarding their driving characteristics and functions - It will be guaranteed ecstasy and definitely the distinguishing mark of your model layout.

# Processor-controlled charging unit

The latest generation of microprocessor controlled charging stations reliably charges all analog or digital Car System vehicles equipped with Li-ion or NiMH batteries. The digital vehicles' basic light and sound functions can be switched on and off using the charging station's control keys. You don't need a separate command station for adjusting basic functions. The charging station operates with 16 V AC voltage. The boost charge function reduces charging time for digital vehicles to about 1 hour. If you use the complete Car System Digital system, you only need the station for charging your digital vehicles.

# Analogue-digital conversion kit

Printed circuit board allowing to retrofit various analog Car System vehicle models for digital operation with ultrasonic locating, fully automatic distance control and modifications of the driving speed while playing. Moreover all soldering pads required for additional lighting and equipment with sound functions are provided on the board. Experienced modellers will thus be able to convert any analog Car System vehicle to an integrally Car System Digital model. Compatible with Car System H0 bus and truck models.

New Item 2016

# Analogue-digital conversion kit — Upgrade to the future

Simply lift up your existing Car System installation to a fully new

With the "Analogue-digital conversion kit", art. 163701 you will clear the way for the location and control of your conventional miniature vehicle in Car System Digital operation. The programmable conversion PCB also features soldering pads allowing the optional equipment of the vehicle with light and sound functions. While simply continuing to use your existing road net.

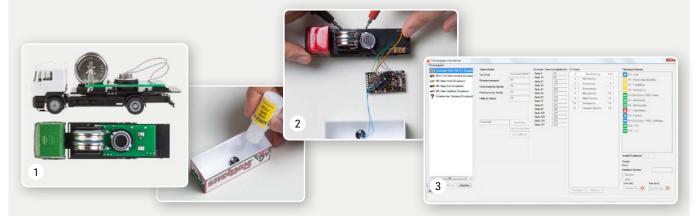

#### General view of product

Besides the conversion PCB the parts supplied with the conversion kit also include **the ultrasonic capsule allowing the location of the vehicle.** That capsule sends to the satellites, beyond the

audible range of frequencies, regular signals that are used by the system to determine the position of the vehicle. A suitable positioning ring ensures the accurate fixing of the capsule to the roof. To make the emission and reception of **information by radio** possible the conversion PCB features an aerial.

#### Know-how

Some basic knowledge of electronics and soldering is required to convert the vehicle. In the comprehensive instructions for use we have thus compiled for you all soldering recommendations that we consider to be useful, we also give plenty of tips and recommend the suitable materials and tools allowing the optimum equipment of your workplace environment.

#### Conversion in three simple steps

- 1 Empty the interior of the vehicle, prepare it and install the ultrasonic capsule in the roof
- 2 Connect to the conversion PCB the vehicle's components »Charging socket«, »On/Off switch«, »Dry-reed sensor«, »Motor«, »Batteries«, the »Temperature sensor« supplied to monitor the battery charging process as well as the ultrasonic capsule
- 3 Programme the vehicle using the »Car System Digital« software

#### Putting the digital vehicle into operation

After the conversion all functions in the vehicle can be activated and modified by radio while driving, either by clicking on the relevant symbol in the software menu, or by means of a command sent by an automation, or via the integrated voice actuation. Whenever the converted digital vehicle is not within the radio control area of a Car System Digital master, it will behave like any other analogue vehicle and can also be used on analogue Car System installations without any difficulty.

#### lote

Please observe that car and sprinter van models are not scheduled for conversion to Car System Digital operation at the moment and that, after mounting the PCB, you will immediately require the Car System Digital software and hardware to set up and operate your new digital vehicle.

Car System Digital > Software

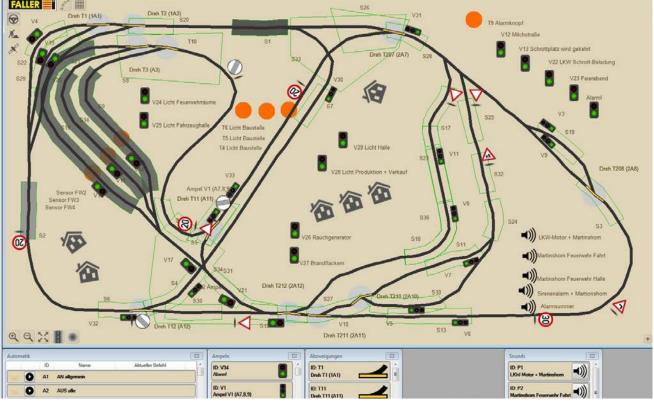

# HIGHEST DEMANDS — MET AMAZINGLY SIMPLY

The »Car System Digital« software provides central control of your miniature road traffic and a permanent survey on your computer, independently of the size of your installation, density of traffic, or complexity of our traffic scenarios. Thanks to the nearly cableless structure and virtual recording of circuit, realization will only require minimal technical means. Highest priority is given to the pleasure of driving with fascinating vehicles.

Your individual installation Your road net is recorded, drawn und stored, geometrically correct, in the software through a simple drive of a digital vehicle covering each possible itinerary only once. After you have subse-GPS for the hobby room quently indicated the existing turnouts, you are able to set up on Determination of the position accurate your circuit layout, using the mouse, as many monobloc sections to the last millimetre using ultrasound as you want for the most varied traffic scenarios. The software interface offers you the possibility to survey the traffic flow with all scenarios, and to control them centrally. **SATELLITES** Vehicle Ultrasonic position signal min. MS Windows XP SP2 Real time control of all vehicle functions Feedback **DIGITAL VEHICLE INSTALLATION AND CAR SYSTEM** charging level **CONTROL SOFTWARE DIGITAL MASTER** Charging **EXPANSION MODULE** PROCESSOR-CONTROLLED **CHARGING UNIT LIGHT SIGNALS AND** 

**CONTROL COMPONENTS** 

# **Modules**

#### Location by ultrasounds:

each digital vehicle features an **ultrasonic transmitter** in the roof and constantly transmits its position via the **satellites.** Processing its XYZ coordinates allows to display the position and movement of the digital vehicle in real time on the software interface. By combining measurements and calculations the position is correctly displayed at all times, even during the passage through a tunnel.

#### Communication by radio:

each digital vehicle features an integrated **DCC decoder** and radio transmitter/receiver. After being switched on, the digital vehicle is identified by the **digital master** and visualized with all its features on the user interface. The vehicle is controlled by radio. Distance control between digital vehicles is fully automatic.

#### Virtual sections

Exact location makes any insertion of sensors into the road unnecessary. After they have been installed, virtual sections or point signals can be hidden, if desired, or only displayed when activated to ensure a better survey. A digital vehicle that approaches virtual traffic lights will slow its speed depending on its distance to the point signal. Braking distances will thus be of varying length, but braking never is abrupt.

#### Automations and traffic signs

It's your choice whether you want to drive manually or have the entire installation monitored by automations: this includes, among other things, all traffic regulations, traffic light sequences, direction signals at turnouts, speed changes, loudspeaker sounds or light functions of your digital vehicle such as headlights, flashlight turn signals or warning signal flashers. Simply realize each of your visions, and change it again as often as you like. The easiest setting variant is placing traffic signs by drag and drop.

#### YouTube

Rather watch motion pictures than read? On FALLER's YouTube channel you will find a great number of explanation and demonstration videos on all areas of Car System Digital. Simply visit

youtube.com/user/GebrFaller

### 161355

# Car System Digital Beginner's Set

The beginner's set, without the vehicle, provides all components that are necessary for getting started with fully automated operation of the Car System Digital. In addition to the 3 satellites, the Car System Digital Master, as well as the software necessary for the controls, are included in the set. The software is Windows compatible from Version XP SP2. In addition to a totally realistic road load, a fully comprehensible distance control of the vehicles is also possible! Playful fun is guaranteed.

The »Standard« software license type included covers the operation of up to 10 digital vehicles.

161352 (HO, N)

# Expansion module

The expansion module is connected to the basic module (interface) per LocoNet, to have more inputs and outputs for stop sections, branch-off junctions, traffic lights, lighting, sensors and parking spaces for more complex model layouts. Several expansion modules can be connected in series. 11 inputs for sensors, 12 outputs for operational elements.

# Car System Digital Single satellite

The satellites serve to locate the vehicle. The duration of the vehicle ultrasound signal is transmitted to all the satellites and therefore, the position of the vehicle can be precisely determined with an accuracy of 10 mm. Depending on the size of the system, 3 satellites are necessary for the fully automated digital operation of the Car System Digital.

181 × 302 × 108 mm

#### 161354

# Car System Digital Master

The Car System Digital Master (wireless base station) controls the communication between the necessary components and controls all functions. The communication between the satellites and the respectively vehicles is ensured by means of a wireless transmission through the respective reception module.

The Car System Digital Master possesses the following interfaces:

- USB interface for connection to a PC
- LocoNet Master connection for expansion with any LocoNet Components desired, e.g. connection of PC expansion module
- parallel power supply for satellites
- interface for any random DCC digital centre
- independent power supply with 16 V alternating voltage
- high-performance wireless antenna

The »Basic Version« software license type included covers the operation of 2 digital vehicles.

#### 161356

# Car System Digital Software

The full version of the software »Car System Digital « may be utilised in connection with the »Car System Digital Master« on any Windows PC from Version XP SP 2. The software, delivered on USB flash drive (incl. possibility of saving), is an integral part of the complete system. Using it, all components can be controlled and are accessible; it allows for fully automated control of complex Car System equipment. In addition to the complete functionality, the software is brilliant due to its simple and intuitive operability and modern interface. This makes particularly realistic traffic possible, the fully automatic distance control being ready to operate immediately. It's play fun guarantee.

The »Premium« software license supplied includes operation with an unlimited number of digital vehicles and also represents the only license type that allows pure virtual operation of Car System Digital without having to connect any Digital Master.

161677 (HO, N)

# Branch-off junction

The steering magnet is diverted by the active magnetic field.

161773 (HO, N)

# 3 Sensors

For Car System Digital operation you only need sensors if you want to perform functional changes in areas that are not covered by the satellites, for instance in tunnels, underground garages or other shadow areas on your model layout. Of course you also always have the possibility to control consuming devices through checkback signals sent by sensors.

# 161841 (HO) 162061 (N)

# 2 LED Traffic lights

Two traffic lights with LED signals in the colours green, yellow and red. Equally suitable for Car System and Car System Digital. By connecting them to the control unit »Traffic Light Control« Art. 161654 they help represent the international signal sequence with three states (green/yellow/red). By connecting them to an »Extension module« Art. 161352 they help represent the international signal sequences with three states (green/yellow/red), four states (green/yellow/red/yellow-red) or five states (green/green blinking/yellow/red/red-yellow).

New Item 2016

Car System Digital ■ HO ■ CAR SYSTEM DIGITAL

All you need

# THE BASICS AT A GLANCE

Car System and Car System Digital are founded on the same simple basic principle: a guide wire made of steel secured on a flat support and a vehicle placed onto that support that is switched-on and follows the run of the guide wire. With roads designed true to reality and various elements ensuring traffic control, you realize miniature road traffic full of life without major technical means.

With both Car System and Car System Digital, combining a few products already allows to achieve the whole range of possible functions. These basics will allow you to achieve the fastest and easiest integral driving experiences on your model layout.

Automations are a major component of the »Car System Digital« software. By using automations you personally stipulate which sequences take place in the sections of your road circuit you have stated: operational commands regarding the behaviour of your vehicles, the functions of vehicles, turnouts and traffic lights and many others more. You will find in the Magazine of the site • <a href="https://www.car-system-digital.de">www.car-system-digital.de</a> plenty of illustrated examples of automations with step-by-step explanations.

# CAR SYSTEM — THE CLASSIC INSTALLATION

For over 25 years now, Car System has been the eye-catcher on all installations of car fans among model-makers. The prerequisites to livening up any model landscape with turbulent street traffic in a fascinating way are conceivably simple.

All you need for this purpose is a Car System vehicle, a road made of wood and FALLER's speciality guide wire embedded in it.

It's guaranteed amazement and ecstasy!

Operated by a built-in motor and fitted with a magnet fastened to a small steering glider rotating the front axle to and fro, every Car System vehicle neatly follows the run of the guide wire. This will allow you already to let a vehicle drive very simple rounds with minimum technical means. There certainly are exciting routes everywhere on your installation, and you will find Car System vehicles suitable for the most varied themes **from page 394.** 

Should you want a vehicle to stop briefly, in front of a zebra crossing for instance, simply use the component »Stop point«. For the option allowing to take different routes, use the component »Turnout«. All control components are installed under the board, thus the third one called a »Parking space« too, which is used for the permanent stopping of vehicles. To actuate these control components it is usually easiest to use some push buttons. You will find a general view of all control modules **from page 402.** 

Should the traffic flow without any action on your part, it is sufficient to build a small »sensor« into the course of the road. Whenever a Car System vehicle drives over that sensor, a component will receive the pulse for switching. In such a case automatic control is obtained by connecting sensors and components to the »Traffic Control« unit that features several inputs and outputs to this end. That »Traffic Control« also allows to handle simultaneously several traffic scenarios connected to it. Pulses can be transmitted to the »Traffic Control« not only via sensors, but also via any keys, switches or switching tracks.

Traffic gets particularly realistic when using various light signals such as traffic lights, road blocks in front of street building sites, or radar speed checks, which can be regulated, if desired, through the "Traffic Light Control" unit. All products suitable for road construction and the complete equipment of a circuit with light signals can be found **from page 404.** 

# CAR SYSTEM VEHICLES

Your model layout is full of little stories that can fascinatingly come to life using road traffic in motion. Whether town, country or industry, you will certainly find in FALLER's Car System product range your dream model for the thematic world of your choice.

# Storage battery charger (230 V)

Suitable for charging all accumulators built into Car System vehicles.

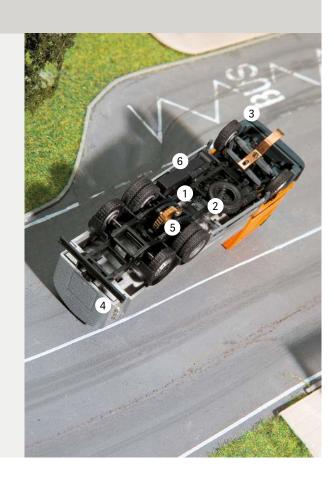

161349 (HO, N)

# Processor-controlled charging unit

The microprocessor controlled charging stations reliably charges all analog or digital Car System vehicles equipped with Li-ion or NiMH batteries.

# The Car System vehicle

- "They drive by themselves! How does that work?" This is a question we hear quite often, because after all, this is characteristic of the fascination of the FALLER Car System. As if driven by a ghost hand, the cars and trucks drive along and stop at red lights and railway crossings. Of course, it is no secret how it works! We simply need to take a closer look at the vehicle:
- 1 Powerfull bell-type armature motor with up to 800 charging cycles and more than 2,000 continuous-duty hours
- 2 ON/OFF slide switch for starting and stopping the vehicle
- 3 Extra powerful permanent magnet mounted on the three-pointbearing front axle for exact track holding even in sharp bends
- 4 Exhausted storage batteries can be revived through the charging socket
- 5 Rear-axle drive units (shaft, worm gear and drive worm)
- 6 The vehicles can be stopped via a reed contact at stops (such as bus stops, traffic lights, level crossings)

# CAR SYSTEM START-SETS

With the countless possibilities that FALLER Car System has to offer it is best to select one of the numerous starting sets to begin with. There are a number of starting sets available for a quick start into the Car System world, which differ almost only by the vehicle.

Each of these starting sets contains everything you need to get the FALLER Car System running on your layout. Simply select the start set with your favourite vehicle and you can get started! First steps could not be easier.

# House boat

Car System ahoy! Car System moves from land to water and is now also available for rivers, channels, and large lakes. It offers all the comfort for building and controlling that you already know from our vehicle fleet. Welcome on board of our new house boat!

**Epoch IV** • 164 × 53 × 46 mm

Package contents:

- Motorised house boat
- Special guide wire 10 m
- Roadway knifing filler
- 1 x Parking space, electrical (art. 161674)
- Push-button switch
- Detailed assembly instructions

Use storage battery chargers (art. 161349 or art. 161690)

# MOBILE ON TRACK N

Roads are also coming alive for fans of the N track. Kept on track magnetically and energised by a rechargeable battery, the Car System vehicles drive across the model landscape on their own.

Already a miracle of precision in H0, the components and functional elements are even smaller, more compact and more sensitive here.

# **CONTROL**

All FALLER Instructions for Use are available for download as PDF files. Simply use the Product search menu at ▶ <u>www.faller.de</u>

161651 (HO, N)

# Traffic-Control

The new Traffic Control! Modified and improved. Nearly every traffic situation can be simulated. Whether you want to plan a bus stop, diagonal parking lot, work zone, right-hand or left-hand traffic. The vehicle will stop by itself. Along with 8 inputs and 8 outputs, a total of 15 control programs can be selected via microswitches. Rotary control knobs allow to adjust different periods of time. Comprehensive instructions for use with plenty of examples of connections and control sequences are supplied. 16 V alternating voltage; an ideal complement is transformer art. 180641!

# **COMPONENTS**

161675 (HO, N)

# Stop section

The accumulator voltage is interrupted via a reed switch in the vehicle by means of the magnetic field of the electric coil. Connection: 22 V, DC voltage, 160 mA

# Branch-off junction

The steering magnet is diverted by the active magnetic field.

161674 (HO, N)

# Parking space

for the permanent stopping of vehicles in car parks. The vehicle is reactivated by means of the magnetic field of the electric coil. Connection: 16 V, AC voltage. Current draw 330 mA.

161773 (HO, N)

#### 3 Sensors

Designed for the control of stop points, branch-off junctions, etc. They are activated by additional magnets fitted to the bottom of vehicles. Connection to Traffic-Control (art. 161651).

Max. switching power 5 W Max. switched current 200 mA

161622 (HO, N)

# Car System Basic set »Components«

The extremely economical beginner's package with the major functional elements allowing to build Car System installations. Package contains: 1 Traffic-Control (art. 161651), 3 Sensors (art. 1 × 161773), 2 Stop sections (art. 161675), 1 Branch-off junction (art. 161677), 2 additional magnets To the traffic control unit can be connected the functional elements branch-off junction, stop point, electrical parking place, bus and petrol station stop, and distance control, all these elements being designed to regulate traffic flow. The control sensors allow to trigger various procedures of the functional elements. The electric branch-off junction is to be used to have vehicles turn off in the specified direction, the stop point being required to have the vehicles halt and drive again in diverse traffic situations.

#### 161653 (HO) 162067 (N)

# Car System Bus stop set

This set contains all parts for building an operational bus stop: control section »Traffic-Control« (16 V, AC), 1 turnoff, 1 stop section, 2 control sensors for the installation in the roadway, 1 additional magnet for fitting the car, special contact wire, shelter kit with decorational elements, install template and detailed assembly and control instructions.

#### **Always Punctual**

This set allows vehicles to swerve out, stop and reinsert themselves into the traffic flow without any problem. The package contains all parts allowing you to build an operational bus stop.

The set allows you not only to build a bus stop, but also to pull into a petrol station. Basically, you can reproduce all situations in which a particular vehicle has to be pulled out of the traffic flow (e.g. a camper towards a campsite, a passenger car towards a branch road, a truck towards a factory site). The sensors are switched via the steering magnets in the vehicles and via additional magnets coding the particular vehicles.

403

# LIGHT SIGNALS

161654 (HO, N)

# Traffic Light Control

This Traffic Light Control allows you to pilot every kind of traffic light installed on Car System layouts. Power supply through FALLER Transformer (art. 180641). With detailed instructions for use.

Functions:

- up to 4 traffic lights can be connected (12 LEDs)
- the length of time of the different lights can partly be programmed at will
- up to 16 different LEDs (of 20 mA each) can be connected without having to use a surge protector
- running lights possible with up to 8 lamps

#### Play of light

Traffic lights are now part of every installation. But their cycle time has to be correct. This control unit allows to regulate complex crossroads. On doing so the Traffic Light Control ensures the right light is switched on. All signal patterns required can be represented at the traffic lights. The unit will meet the most varied requirements.

#### 161841 (HO) 162061 (N)

# 2 LED Traffic lights

Two traffic lights with LED signals in the colours green, yellow and red. Equally suitable for Car System and Car System Digital. By connecting them to the control unit "Traffic Light Control" Art. 161654 they help represent the international signal sequence with three states (green/yellow/red). By connecting them to an "Extension module" Art. 161352 they help represent the international signal sequences with three states (green/yellow/red), four states (green/yellow/red/yellow-red) or five states (green/green blinking/yellow/red-yellow).

New Item 2016

#### 161840 (HO) 162060 (N)

# 2 LED Traffic lights with electronics

Two traffic lights with LED signals in the colours green, yellow and red with a control box. Equally suitable for Car System, Car System Digital or independent operation. The most current international signal sequences can be triggered via the inputs of the box: one regulator each for country setting and duration. Possible signal lights:

- -green/yellow/red
- -green/yellow/red/red-yellow
- -green/green blinking/yellow/red/red-yellow.

New Item 2016

#### **■** H0 **■** N

#### 161656 (HO) 162056 (N)

# 2 Traffic lights with Stop sections

Designed for use in conjunction with the Traffic-Light-Control (art. 161654).

#### 161652 (HO)

# Car System Construction site set

This package contains all parts allowing to build and equip an operational road construction site: 1 Traffic Light Control, 16 V alternating current (Item no. 161654), 2 Stops, 2 Traffic lights, Warning beacons and pylons, some with flashing lights, Barrier with flashing lights and traffic sings

#### Well protected

A road building site is always something out of the common on an installation. That set allows to equip a construction site without any problem. The printed circuit board makes sure that oncoming cars can safely pass through a bottleneck. The traffic lights alternatively switch to green and the control unit unlocks the connected stop points accordingly. The control of flash lights or strings of lights can also be used independently.

#### 161830 (HO)

# 2 LED Warning lights

Two warning lights with three yellow LEDs each. By connecting them to the control unit »Traffic-Light-Control« Art. 161654 they help build a 6-lamp running light or two 3 lamp running lights. Permanent lighting possible by supplying a fixed voltage.

#### 161666 (HO, N)

# Radar speed check

That radar speed check is fitted with a bright LED that lights up via a supplied sensor. The sensor is built into the roadway, or into a rail track wherever the Car System is not used. One flashlight box to be built for H0 or N, respectively. Current supply via 16 V.

405

# **USEFUL HELPERS**

180641

## **Transformer**

for high output. Especially applicable for the operation of fair rides, electrical appliances, lighting, power supply for Car System controls and other model making accessories. With overload protection.

180633 (HO, N)

## Rectifier

to transform 16 V alternating current into direct current. Especially applicable for LED lighting in order to avoid a slight flickering of the small bulbs (art. 180647, 180648, 180649 as well as the lights 180630 + 180633).

161351 (HO, N)

## PC-standard module

The standard module (PC-interface) allows controlling the Car System via a PC.

With the assistance of the software, actions can be controlled, the modules configured and activated accordingly.

Also ideal for upgrading an existing system and its controller. The basic unit is delivered with a version specifically adapted to the Car System of Win-Digipet (Demo Version).

11 inlets for sensors, 12 outlets for functional elements.

161352 (HO, N)

# Expansion module

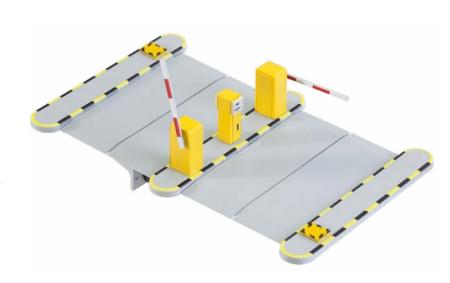

The expansion module is connected to the basic module (interface) per LocoNet, to have more inputs and outputs for stop sections, branch-off junctions, traffic lights, lighting, sensors and parking spaces for more complex model layouts. Several expansion modules can be connected in series. 11 inputs for sensors, 12 outputs for operational elements.

# Automated parking barriers

Model of an automated barrier unit with two vertical columns and self-supporting boom arms for monitoring access to parking spaces, parking garages or corporate facilities.

The kit includes drive parts for both movable barriers so that you can easily attach servos.

190847

# Model-making made easy »Car System«

The modelling brochure has been expanded by 20 pages, its content was comprehensively revised to impart further expert skills, entirely new topics have been dealt with perfection, and control/electronic elements that have been launched in the meantime are also introduced.

#### 161657 (HO)

## Level crossing

To easily cross over model railway tracks. Suitable for the most track systems. **Epoch III** 

#### Safely on the other side

You have to cross a railway line? Then art. 161657 is the right one. However, if you want to approach and drive over a protected level crossing with Car System vehicles, we recommend art. 120171. Both articles are suitable for all types of rails. Even for three-conductor rails!

#### 120243 (H0)

# Unprotected level crossing

Set intended for the design of the area between the tracks. Covering flush with the road using a plank, a concrete filler block or a rhomboid metal insert, all supplied. Suitable for all kinds of H0 tracks (also C-M-K) and Car System.

**Epoch III** • New Item 2016 • 113 × 14 mm (3 x)

# MAKING ROADWAY DESIGN A CERTAIN SUCCESS

Roads are every city's nerve cords just as a design will only truly come alive with animated streets. The right basic knowledge and the extensive FALLER accessories make roadway designs a breeze. There are different techniques and accessories depending on what you wish to accomplish.

#### **FALLER Laser-Street**

FALLER Laser-Street features prefabricated street elements which simply connect together and already have a groove for the contact wire. Custom roadway routeings and integrating curves, passing points, branches, bridges and slip roads can also be implemented just as easily. Roadways are particularly simple and accurate to design with FALLER Laser-Street, without foregoing the familiar variety in the design.

#### Customisation

The groove cutter also allows roadway designs to be customised to your ideas. We merely recommend a minimal curve radius of 150 mm to ensure a smooth flow of oncoming traffic for all Car System vehicles. The unmatched routeing allows you to include unique design features in detail. See **page 413** for additional customisations.

#### **Galleries**

Our galleries will guide you without a lot of words, illustrating key process steps. You will then know how roadways are installed and how to plan the installation of various components. FALLER Laser-Street roadway elements can be used temporarily or as a complete roadway system. "Finishing and decorating" will provide you with everything you need to know about decorating your new roadway.

#### **Materials**

We recommend using rigid foam sheets and a wooden frame for creating model designs. Your design will be lighter and easier to work with. For streets we recommend using 3 mm thick three-layered poplar plywood, which is also what we use for FALLER Laser-Street elements.

# Laser-Street – Streets in quick build

#### Street layout:

First, the street layout is arranged by simply placing the roadway segments where desired. This is child's play, with the help of the connecting segments. All roadway segments have a laser-cut groove in which the contact wire is later placed. Important: Glue the subsurface of the segments!

#### Bends:

Just like in real traffic vehicles swing out. This means that the guide wire is directed towards the exterior whenever the course of the road features a bend. Bend segments can be used on both sides, so that the same segment allows to build left-hand and right-hand turns.

#### Variable circuit layout:

Variants in the course of the road are very easy to design using the element of flexible roadway. That part is of a most versatile use and allows a suitable circuit layout in extremely reduced space. Without much effort, you have brought your personal touch in the roadway.

#### **Combined method:**

Whoever wants to individualize it even more, will be able to design their own roadway sections using 3 mm thick plywood. Simply separate the connection points of the roadway elements and modify them to obtain the required length. Then integrate the 3 mm thick plywood.

#### Mounting aids:

All roadway segments have been prepared to allow building-in functional elements. Whether it be a branch-off junction (art. 161677), a stop point (art. 161675), a parking place (art. 161674) or a sensor (art. 161773). For each possible element we have provided a mounting aid.

#### **Drilled holes:**

For the branch-off junction the opening and the shoulder have been cut already for the course of the guide wire, so that the junction merely has to be inserted and fixed. At all appropriate points in the course of the guide wire, holes have been drilled, in which sensors can be inserted.

#### Applying filler:

To obtain a smooth roadway and eliminate any further inequalities, seal the surface using some knifing filler (art. 180500).

#### Road coating:

Whoever wants to obtain a very smooth surface, will be able to eliminate small inequalities using fine emery paper after the knifing filler has set. The important point is that the guide wire must still show through everywhere. Now, you can finish the work using roadway paint (art. 180506).

#### Transitions of terrain:

Roadway segments consist of 3 mm thick three-layer plywood and are easy to bend, yet they are still very sturdy. Small rigid-foamed blocks rapidly allow you to build in differences of level into the road and to design transitions in the relief accordingly.

#### **Groove cutter:**

Then draw the desired course for the lane and cut the groove intended for the guide wire using the groove cutter (art. 161669). It could hardly be easier and quicker to implement one's own ideas. You have every possibility to build individually, while simultaneously exploiting the advantages offered by the roadway elements.

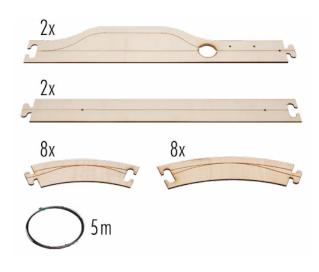

#### Mounting:

The various mounting aids allow you a bus stop within a few minutes, for instance. Moreover, these parts allow you to understand the general building system ruling the structure of functional articles, which considerably simplifies the implementation of your own ideas.

#### **Decoration:**

Depending on your own ideas, you may want to decorate the road with roadway markings, marker posts, crash barriers, traffic signs and traffic boards. It is not necessary to conceal the road verge in a complicated way. Usually applying some knifing filler or shapeing it with scatter material will do. It's a very simple way to obtain an appropriate road verge.

#### Possible setup

# Laser-Street Basic-Set »Street elements«

With these parts which are easily to processed by interlinking street parts that already contain the groove for the guide wire, different single and double lane streets can be built. Guide wire included.

# Custom roadway design

To integrate FALLER Car System into your existing design the so-called sunken method may be right for you. Use the Groove Cutter (Art. 161669) to customise the routeing of the contact wire and adapt the flow of traffic to local factors.

#### Preparation

Our recommendation: Use rigid foam sheets with a wooden frame for the base frame and use 3 mm thick poplar plywood for streets and other constructions. This is the maximum distance a stopping section coil may be from the top of the roadway. All functional elements can now be installed directly below the roadway. This will also reduce the overall weight of your design.

Make the surface of the roadway as smooth as possible and consider the turning radius of the vehicle to be used in the width. Longer vehicles require a wider road, especially for curves, than cars. The minimum curve radius should therefore not be less than 150 mm.

#### Roadway widths (single-/two-lane)

	Н0	N
Straight areas	50 mm/100 mm	30 mm/60 mm
Curves at least	70 mm/140 mm	45 mm/90 mm

#### Upward and downward hills

When constructing upward or downward hills or crests it's important to round the roadway at the respective transitions for vehicle control. Upward hills should not be steeper than 12 % (120 mm over 1000 mm roadway).

Once you know how the roadways should be routed you can start.

**■**H0 **■** N

#### Planning:

Mark the roadway by outlining it on the plywood and perform a test run to ensure the roadway is uniform. To do so lay out the wire, affix it with an adhesive strip and test the route with a

#### **Cutting:**

The Groove Cutter (Art. 161669) is ideal for installing the special contact wire. This small machine features a slitting cutter which is guided along the marked path. Cutting the right groove height and width allows for optimal contact wire installation.

#### Installing contact wire:

Press the contact wire into the groove with a flat head screwdriver or joiner, ensuring it is correctly seated in the groove.

# Precision with FALLER speciality contact wire

Use only FALLER speciality contact wire (art. 161670) to build roadways, as using magnetic tape or soft iron wire may result in unwanted functional problems. To ensure traffic flows smoothly without incidents neither the individual magnetic fields of vehicles or functional elements nor the overall magnetic field of your model set should be impaired. Using the FALLER speciality contact wire will prevent potential malfunction sources in traffic caused by weaker, stronger or permanent local magnetic fields.

#### The right scale

The ideal tool for the individual street layout. The machine is equipped with a slotting cutter. The adjustment slider on both sides of the cutter guarantees the best possible result. In this way, it is possible to cut the exact depth the contact wire requires into the roadway. It doesn't get better and more precise than this. The groove cutter can be run straight off our transformer (art. 180641)!

# Groove cutter

This groove cutter was developed and made especially for laying the contact wire in the FALLER Car System. Detailed instructions enclosed. Connection: 12 V, DC voltage. Adapter cable and comprehensive instructions are included.

161670 (HO, N)

# Special contact wire

10 m. Diameter and alloy adapted for use with steering magnet.

# SPARE PARTS

Car System vehicles consist of various wear and tear parts that need to be replaced after a certain amount of usage like tires. Batteries also can only be recharged a limited number of times.

If you like working on your Car System vehicles yourself just follow your feeling for quality. Order your wear and tear parts or spare parts directly from FALLER. We offer the matching parts for nearly every Car System vehicle. Just browse our completely revised parts programme and you will find everything from steering parts or tires for different vehicle types to Reed switches or different motors. Please visit our website > <a href="https://www.faller.de">www.faller.de</a> for the full range of Car System spare parts including pictures and brief descriptions.

#### Please note:

- We cannot guarantee spare part supply for vintage cars among Car System vehicles if the needed spare part is not in stock or impossible to procure.
- Using the previous article numbers, you will get spare parts while stocks last.

# Front axles

#### Front axlesprinters (with wheels)

163001 completely assembled for sprinters (with wheels)

# WORKSHOP CAR SYSTEM

This is how you become a mobility expert. Who doesn't dream of making their set even livelier with vehicles driving by, lorries or busses? We will show you how simple it is.

In a mere three days we will turn you into mobility experts – specially tailored to our Car System. The workshop presents all tips and tricks, is oriented to the level of knowledge of the participants and shows the practical applications.

This way the technology in the interior of the vehicle and its fields of applications are explained just as the planning and development of complex street layouts. The workshop participants install functional elements accurately and technically correct in their street and get to know the special features of the different components.

#### Workshop Car System Digital

In this seminar you will learn all about hard- and software of the innovative, digital Car System, the innovative features with their almost endless variations and possible applications

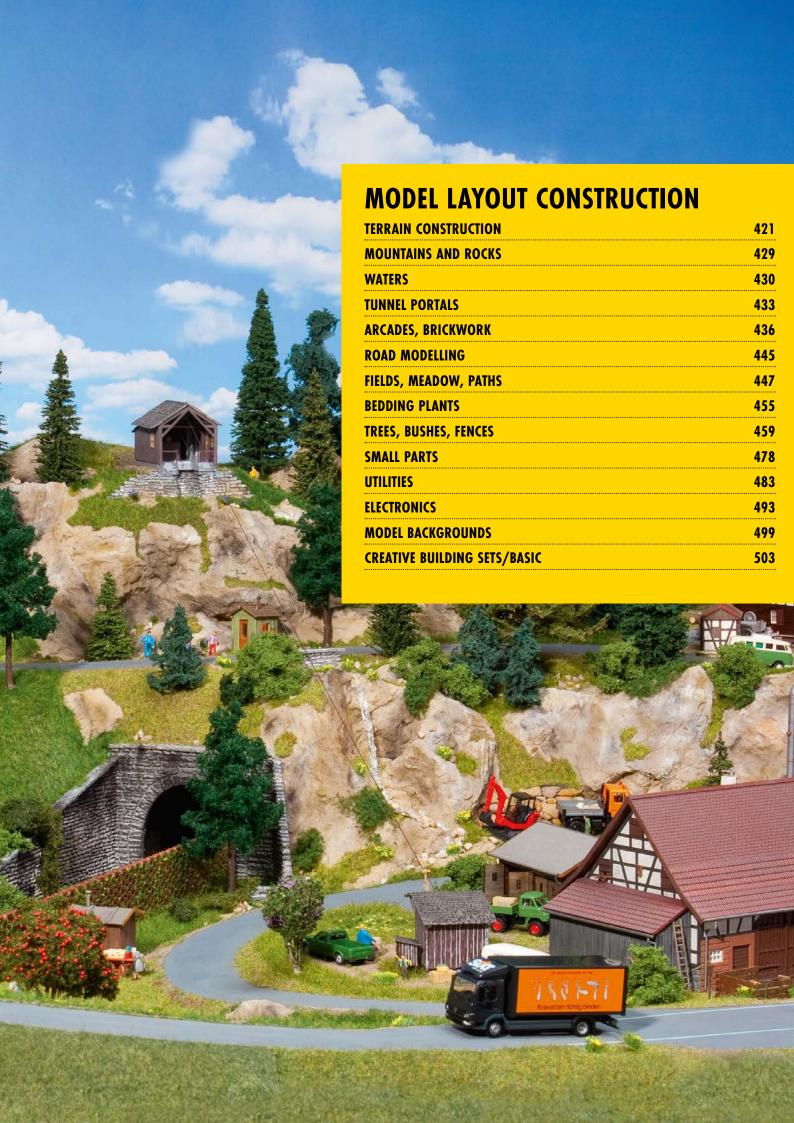

Knowledge about the analogue Car Systems are advantageous, about not necessarily required.

You can find out more about the workshops at www.faller.de

**ANLAGENBAU** 

#### 170665

### Aluminium wire mesh

For terrain construction as base carrier material for landscaping work.

1000 x 800 mm

#### 170677

# Modelling fiber

FALLER modelling fibre is excellently suitable for the construction of dimensionally stable types of terrain in diorama and railway modelling due to its high quality fabric structure and hard plaster coating. Due to the quick and particularly firm hardening of the ready to immerse material, you achieve self-supporting terrain shells in no time at all, which also ensure accessibility underneath the surface.

Content: 2000 g/4.41 lbs

170663 - 2000 x 100 mm 170664 - 2000 x 200 mm

## Plaster fabric for terrain construction

For mountain and landscaping work.

#### 180765 (HO)

# Cork trackbed

6 flexible cork double strips each 500 mm = 3000 mm track bed. Can be used for all track radiuses. FALLER cork track beds are the ideal base layer for model railroad tracks. They absorb driving noise, have a realistic format, are extremely easy to ballast and are easy to install due to the double strip version.

6 x 500 mm = 3000 mm

#### 222555 (N)

# Cork trackbeds

4 flexible cork double strips, 500 mm each.

4 x 500 mm = 2000 mm

# Terrain knifing filler

Terrain construction dark-grey, self-adhesive modelling material. It is particularly suitable for terrain and rock modelling and for road construction in the FALLER Car System.

Content: 500 g

#### 180500

# Roadway and terrain knifing filler

Used for road and terrain construction. Self-adhesive modelling material to be handled with no problem whatsoever. It is suitable for road construction in the FALLER Car System.

Content: 500 g

#### 180503

# **Putty Compound**

Scenic modelling knifing filler, light-weight material for the design of rock structures, transparent. 120 g filler powder for 780 cm<sup>3</sup> knifing filler.

# Hydrozell is the perfect material to create your terrain and landscapes

Hydrozell is a product to create terrain and landscapes such as mountains, rocks, lake beds and lakesides and the like. Contrary to plaster, which often results in surfaces which are too smooth and not always realistic looking, Hydrozell makes it possible for you to create a more precise, detailed terrain in line with your ideas. For this purpose, use a putty knife, screwdriver, household knife or comparable tools. The material is well suited to concealing tears and gaps or smoothing transitions to different terrain.

The advantage of Hydrozell is the longer period of time it can be re-worked during the design phase, which allows you to be creative without having to rush. Another advantage is that after it dries, it keeps the shape you modelled to a large extent and, compared to other materials, has a perfect balance between break strength and flexibility, as well as being insusceptible to cracking.

Above all, the main advantages include the lightweight nature of the material, given that the more plaster you use, the heavier your layout will be. On the other hand, if terrain and landscape elevations are created using rigid foam boards, the material properties of Hydrozell allow a direct application of such a plastic material.

Paint can also be applied to Hydrozell. If you apply paint later on, please wait until the material has completely hardened (24 hours to several days depending on the thickness of the application).

# Colofix-Flex

This new glue allows difficult rigid polystyrene, expanded polystyrene and decorflex plates to bond together without difficulty as well as with rigid foamed structured plasticplates. Remains crystal-clear when drying up, while still being supple, also adheres to smooth surfaces and bonds scatter materials to plastic parts without deforming the latter.

Content: 220 g

#### 170660

## Colofix-Color

Brown glue for applying scatter materials.

Content: 250 g

#### 170662

# Glue

Ballast-grey. Especially suitable as a compound for making a ballast foundation for railway tracks.

Content: 250 ml

#### 170661

# Colofix-Color

Green glue for gluing plant surfaces.

Content: 250 g

#### 180501

# Colofix

A white wood cement. Dries transparent. Especially suitable for gluing scenery material.

Content: 250 g

# Construction of railways lines

»The tracks make the route! The clean construction of a railway track is the basis for smooth operation later on. This begins already with the foundation: It should be even and smooth, because every deviation is transferred to the track, its location and the run of the trains.

There are two options for the raw construction of the landscape. For one, the construction with conventional materials, like plywood, plaster, etc., or on the other hand construction with Styrodur panels. The latter have the advantage that they are very easy to work and provide certain weight advantages towards conventional materials.

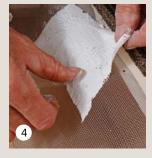

#### Rib construction:

The landscaping ribs adapted to the landscape are mounted on the base plate. At the same time, they form the surface for the embankment bed.

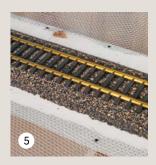

#### Wire mesh:

The aluminium wire mesh is used to form the later landscape. Using a pair of scissors, it is cut into strips and fixed onto the ribs. It can either be nailed, tacked, or glued using a glue gun.

#### **Processing:**

Using your fingers, press the plaster cloth onto the wire mesh, and spread the excess plaster. Don't worry! You can wash your hands when you are done!

#### Cork tracks:

The FALLER cork track bedding consists of two parts and is therefore able to adapt to the course of the tracks. The edges are slanted at an angle of 45°.

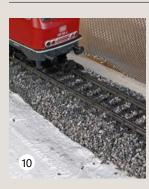

#### Track construction:

The model track is pressed into the moist glue, and aligned to position.

#### Placing the ballast:

After which you spread the desired FALLER railway ballast onto the tracks...

#### Test drive:

After spreading the gravel, a test drive proves that we did everything right!

#### Finishing:

Now you can create the forest floor using different landscaping materials from the FALLER-assortment. The landscape looks even more realistic with proper planting with trees and shrubs.

# The state of the s

#### Plaster:

A layer landscaping plaster is applied to the aluminium wire mesh. FALLER offers the plaster cloth in two widths. It is cut into small pieces with a pair of scissors, dipped into water, and applied to the wire mesh.

#### Glue:

A thin layer of FALLER glue is applied to the cork, and spread evenly with a brush.

#### Finishing:

...and spread it between the railroad ties and on the bed using a brush. Railroad ties and small iron parts must then be free of stones. Then spray again with strongly diluted Colofix. Let dry. Finished!

#### Easier

Railway embankment construction the fast way: The landscaping shell and the track bedding is made of Styrodur panels cut to size, instead of the conventional method. Next to the weight advantage, the finishing of the landscape is correspondingly easy.

# SCATTER MATERIAL TRACK BALLAST

171695 (HO)

# PREMIUM Ballast darkgrey

Especially suitable for ballasting Märklin's C track.

Grain size: 0,5 - 1 mm - 650 g

170721 (HO, TT, N)

**Track ballast stone grey** dust-free, grained granulate in a realistic stone grey colour.

Grain size: 0,8 - 1,3 mm • 150 g

170722

Track ballast dark brown dust-free, grained granulate in a realistic dark brown colour. Graining finer than art. 170721.

Grain size: 0,4 - 0,8 mm • 100 g

170751 (HO, TT, N)

Track ballast beige-brown dust-free, grained granulate in a realistic colour and graining.

Grain size: 0,8 - 1,3 mm • 650 g

# »Gravel-Fix«

#### »Warning, freshly gravelled!«

Applying ballast or gravel is even easier with »Schotter-Fix«. It is ready-for-use and consists of ballast and glue powder. Scatter »Schotter-Fix« on the tracks and distribute it properly between the sleepers using a paint brush. Then spray the finished track bed with water, let it dry for a couple of hours – and the whole application process is done in no time!

171699 (HO, TT, N)

# PREMIUM spread »Gravel-Fix«

Natural material medium grey • Grain size: 0,5 - 1,0 mm • 600 g

# SCATTER MATERIAL

171691 (H0, N) Stone grains Natural material, beige Grain size: 2,0 - 5,0 mm • 300 g

# WORKSHOP LANDSCAPING

This is how the professionals do it. Landscaping is an art in itself which requires manual dexterity and imagination. Our professionals are true experts of their subject area. The build sensationally beautiful scenes and know all tips on how to make a model perfect.

Profit know from the Know-how of the specialists, learn the best tricks first-hand in our workshop and how to master complex challenges yourself without profuse sweating. The course is oriented towards beginners as well as those at an advanced level.

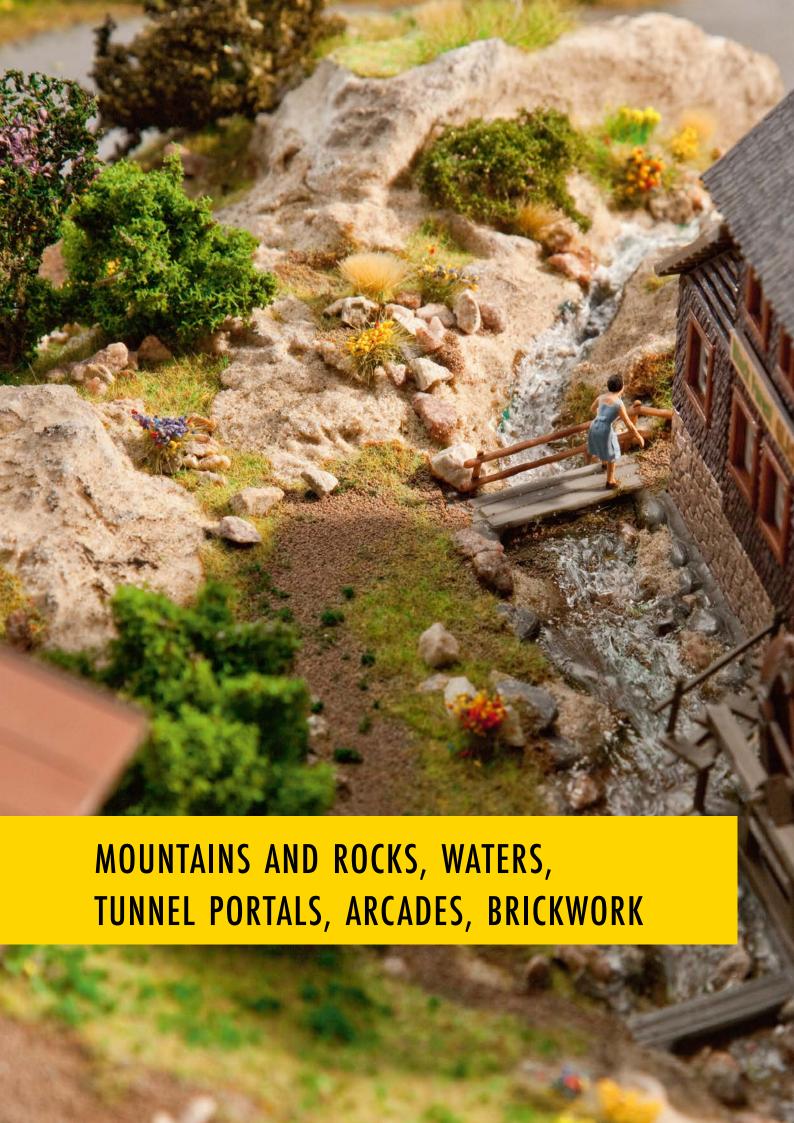

We will show you, how you too can build and arrange a brilliant model display. From the foundation to landscape design, right through to the rock and water design, you will learn everything that you need to make the building of your display enjoyable and successful in this seminar. During the seminar each participant will create a show-piece, which will serve as a reminder and incentive for the design of displays at home.

Appointments and details can be found at • www.faller.de

# MOUNTAINS AND ROCKS

Seek the heights with the PREMIUM newcomer set »Rock building«. With forms, casting material, colours, and wood spatula. That set allows to cast, colour and individually shape as many rocks as you want.

171670

# PREMIUM Starter Set — »Rock building«

Package contents: rock form, knifing filler, plaster fabric and three earth-coloured paints, plus detailed instructions.

# Mountain and rock modelling

Aside from FALLER natural stone we also offer other great products for designing your rocks. One option is a tunnel portal and pieces of rock made of foamed PU material. They are already naturally shaped as a finished product by the manufacturer and painted with lifelike colouring. A rock construction kit is offered as another product. Its contents include rock forms, knifing filler, paints and wooden spatula. With this »Starter Set« a number of rocks can be created, painted and individually designed.

The making of casting compound and casts can be learned quickly thanks to the included instructions. The adjustment of castings from one to another to create larger rocks can become necessary in some cases.

Prior to casting, the mould must be levelled on all sides by underlaying, so that the casting material will be prevented from flowing out.

The filled-in mould must be set for approx. 30 minutes before the casting can be removed.

Unpainted casting already dyed in the basic colours.

Rock parts already integrated in the hill with plaster fabrics.

Landscape piece after knife-filling, greening and planting.

Finally, the rock edges will be painted over with a little white paint and a flat brush using the graining technique (creation of light effects).

# **BODY OF WATER LAYOUTS**

Water is always a highlight on a model system. Design your own lake, pond, river,... - creativity has no limits.

#### 171660

# PREMIUM Modelling water

To make realistic model water surfaces, rivers and lakes. Contents are sufficient to cover an area of approx.  $0.5~\text{m}^2$ , depending on the depth. With detailed instructions.

Content: 385 ml

# **Working with cast resin**

Water is always a highlight on model installations. Our PREMIUM modelling water was specially developed to shape realistic water surfaces, brooks and rivers on model railway installations or dioramas of any scale. Processing is mere child's play thanks to the dosing aids supplied, right handling yielding beautiful results that are extremely natural in the first place.

#### Underwater surface:

The ground is pre-formed with a filling composition. Due to the massive depth effect of the model water, the water bed should be kept rather flat.

#### Underwater world:

The desired water colour is created with various spreading materials of the assortment and toning colours. Imagination has no boundaries.

#### Witches kitchen:

The two components must be mixed in the correct ratio. By using the pipette and the mixing bowel with scaling, mixing the two components is so easy.

#### Casting resin:

After thorough mixing of the two components, the casting resin is poured into the prepared water bed. Water depths over 5 mm should be poured in in several layers.

#### Shallow water zone:

To make the model water also surround the shore area and the plants there, use a paintbrush and carefully spread the mass into the desired areas.

#### Lawn:

The adjoining areas can be designed using bushes, trees, landscaping segments or spreading materials. The result is something to be proud of!

### 171661

### PREMIUM Natural water

For true and realistic reproduction of water bodies of all kind. Ease of handling, negligible measuring and mixing. 24-hour curing, without cracking. This is the ideal »water« for model-making.

Content: 470 ml

### 171662

### PREMIUM Water effect

This has a stimulating effect on the styling of water bodies.

Content: 230 ml

### 170791

### Lake sheet

Suitable for the styling of rivers, rivulets and lakes as well as small water bodies. Since we shall not have recourse to any liquids that have to be mixed or heated, the use of this product is extremely easy.

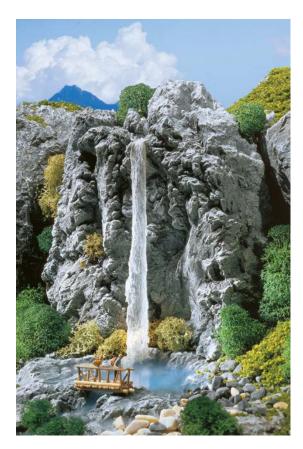

530 × 260 mm

170716 (HO, TT, N)

### Reeds

20 bundles of natural bristles (39 mm long) for the realistic modelling of reeds for lakeshore and riverbank areas.

### 171814 (HO, TT)

### Waterfall

consisting of a hand-coloured rock wall, eroded water gutter and »waterfall«. The rock wall can also be used in a different manner, without the waterfall.

162 × 59 × 200 mm

# Realistic water scenes

With the lake foil (item 170791) optimally seperated water structures can be designed. Here is an example of a pond.

First, make a coarse sketch of the contour of the water body you want to set up on your support. On doing so, it does not matter whether you are building onto a wooden supporting structure, a rigid foamed plastic board or any other type of support.

The next step consists in "digging a hole" for the water body. You may want to use a recessing and shaping machine, a cutter or, if you are building on a wooden supporting structure, a piercing saw. As a rule an embankment higher than 10 mm will produce an unreal effect.

Now, the contour can be transferred on the lake sheet.

In the next stage you have to give the embankment a slope. Its angle should be at least 45°. In any case, a lower angle produces a much more natural result.

Now, you can start designing the bottom of the water body. The simplest way is probably to use the colour sheet supplied with the kit. Choose the side with the colour that most appeals to you, and cut the paper to the size of the lake sheet. You can simultaneously cut out the colour sheet and the lake sheet if you have previously fixed both sheets to each other (e.g. using adhesive tape).

Of course, you may alternatively want to style the bottom of the water body yourself. To do this, you may »dig« another 5 mm to obtain some more water depth. However, leave a narrow edge to serve as a bearing area for the lake sheet on the entire contour. Now, you may style the bottom of the water body using colours, tiny stones or even rubbish (bathtub, bike, car tyres, etc.).

Always bear in mind that too deep a water body as well as glaring colours quickly produce an unnatural effect. Only a swimming pool is bright blue!

Now, you may model the embankment or some small islands using FALLER knifing filler (art. 180500) and thus best adjust the transition to the Lake sheet.

The last step consists in working out the small details. By placing some swimmers, animals or similar figures onto the water surface for instance (to do this, swimmers can be halved with a modeller's knife). You will obtain the perfect water surface through the graining technique. To do this, pass over the surface with a nearly dry brush to apply a delicate white colour layer. Make sure you use this technique merely on a few carefully chosen places since graining a surface all over tends in its turn to produce an unnatural effect.

Style the bank area according to the environment you want to represent on your diorama or model installation. This can best be done by using brown dyed landscaping glue Colofix-Color (art. 170660). Then scatter the desired materials while the glue is still wet, e.g. FALLER PREMIUM cover material (art. 170728). You may also want to detach some parts from our landscape segments (e.g. art. 180474) and to spread them over the embankment. You will obtain the most appealing result by adding various grass fibres using the grassing tool »Gras-Fix« (art. 180691) in the end, while the glue is still wet.

# The Decorflex decor sheets

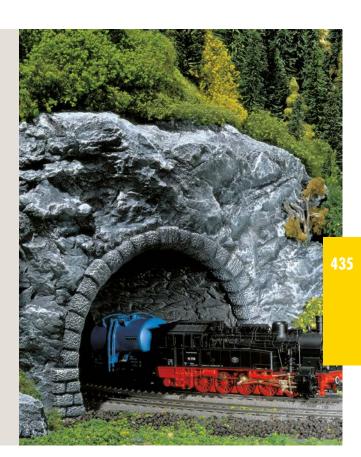

### Of professional design

This is an assortment of products made from foamed polystyrene plates with different kinds of subtly embossed surface structures, painted elaborately and realistically.

The decorative sheets are thin, flexible and can be cut easily and precisely with FALLER modeller's knife 170687 or with a pair of scissors. The sheets are sensitive to solvents and therefore cannot be treated with solvent-containing adhesives or paints. For adhesive bonding please use FALLER Colofix adhesive 180501 or water-based emulsion paint for painting.

- even more realistic in their appearance
- ultra-fine structures
- · optimal plastic effect
- · organic coating

Decorflex – easy to work with, with a professional appearance. The right assortment for the professional model-maker.

# **ARCADES**

Create realistic portals, arcades and other stonework on your model set with foamed FALLER decorative sheets.

# **FALLER** decorative sheets

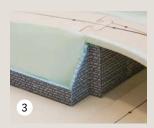

Create realistic portals, arcades and other stonework on your model set with foamed FALLER decorative sheets. All you need is a crafting knife, solvent-free glue and, if desired a brush and paint. The sheets can even be used to create curved walls. For these you would simply use thinner decorative sheets or cut thicker sheets to size using a band saw. FALLER decorative sheets already have natural lighting in mind. Please note the colour graduation of the stone from lighter (top) to darker hues (bottom).

With a crafting knife cut the decorative sheet to the desired size. Our tip: Preferably use a sharp blade to prevent the edge of the material fraying.

Mitre cut or smooth walls with corners. Any joints or minor damages from cutting the material can easily be concealed with a little paint.

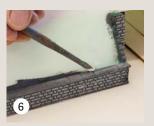

Carve out individual stones at the edge of your decorative sheet with a crafting knife to add slants to the wall.

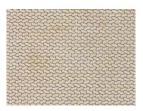

You will surely find the right product in our line to create a ledge to finish the top of your wall (art. 170834).

Use a pencil with a blunt tip to design the joints on the face of the wall ledge.

Finally add lights to the stonework with an almost dry brush and dark, water soluble paint (e.g. FALLER »Roadway paint«, art. 180506). The roughening technique will accentuate the plasticity of the stonework.

# Decorative sheets serve the most various purposes in model layout construction:

For the design of differences in height in floor building, for fencing and paving and for the decoration of house walls.

The printed cardboard sheets are 250  $\times$  125 mm in size and approx. 0.5 mm thick.

The decor sheets are printed in such a way that the bricks lay horizontally on the wall for tunnel building.

# LANDSCAPE SEGMENTS

Flora and fauna on the layout can be created even more realistically with these landscape segments.

180458 (H0, TT, N) **Grain-field with poppies**New Item 2016 • 210 × 148 × 3 mm

180459 (H0, TT, N) **Pumpkin field**New Item 2016 • 210 × 148 × 3 mm

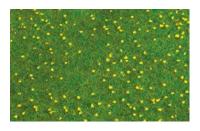

180469 (H0, TT, N) Field strip 210 × 148 × 9 mm

180479 (H0,  $\Pi$ , N) Field of wild herbs 210 × 148 × 9 mm

180460 (H0, TT, N) Flowering meadow 210 × 148 × 9 mm

180462 (H0, TT, N) **Dandelion meadow**210 × 148 × 3 mm

The landscape elements are usually constructed in a manner so that they can be used as a whole or in part, i.e. patched in small pieces when modelling. The size of all the supplied segments, with the exception of the country lane and the brooklet course, is  $210\times148~\rm mm$  and corresponds to DIN A5. The products are in part repeatedly flocked base layers of different colours and consistencies and delivered flocked with foil. Deviating from this are the country lane and the brookside.

Self-adhesive strips are supplied for the modelling of paths which the modeller has to cut apart, fit together and fit into the terrain.

180463 (H0, ∏, N) Rape field 210 × 148 × 6 mm

180465 (H0, TT, N) **Wild grass meadow** 210 × 148 × 6 mm

170730 Lichen 5 different colours 80 g

171671

# PREMIUM Starter set »Landscaping«

This starter set gives you the basic skills for realistic styling of a model landscape.

Package contents (for approx.  $600 \times 600$  mm): one small bottle of earth-coloured paint, four bags of (very fine) grass in a variety of tints, one bag of (coarse) grass and one bag of clump foliage, one bottle of landscaping glue with dispenser, plus detailed instructions.

180691

# »Gras-Fix« grass-spreader

This device provides the grass fibres with an electrostatic charge so that the fibres stand upright on the meadow surface.

This product consists of:

Grass-spray device »Gras-Fix« with ergonomic handle, with uncovered opening at the top for easy-refill during application, large sifter opening for wide application, additional clip-in and rotatable fine dosing funnel sifter, a 9 Volt block battery and counterpole cable with rail contact clamp.

### 170680

# Exchangeable Cap »Gras-Fix«

Sealable storage can for strew fibers. The cap matches our »Gras-Fix« (art. 180691). The two sealing caps make for easy and quick switching between fibers of different height or color while filling the grassing device.

### 171700

## Small storage can, empty

Transparent can with write-on label for storing all kinds of strew materials for layout construction.

Two hinged openings are integrated in the screw cap and make for comfortable and exact dosing.

# »Gras-Fix«

### The following steps will yield a perfect result:

- Apply FALLER Colofix (art. 180501) to the area you wish to cover with grass.
- Fill the grass-fix device with scatter fibre, in solid or blended colours.
- Insert a small nail in the arrangement near the area to be covered and secure the counterpole to it using the rail contact clamp.
- Switch on the device, hold about 10 15 cm above the area to be covered in grass and shake lightly.
- Using this method the fibre will stand neatly and upright in the glue bedding.

# PREMIUM GROUND COVER FIBRES

For realistic creation of meadows and wild, green spaces. Especially well-suited for electrostatic greening with our »Gras-Fix« (art. 180691).

181272 (H0)
18 Hibiscuses
New Item 2016 - Total height: approx. 16 mm

181273 (H0)
28 Rhubarb plants
New Item 2016 - Total height: approx. 10 mm

181274 (H0)
12 Ferns
New Item 2016 - Total height: approx. 11 mm

181275 (HO)

# 14 Tobacco plants

New Item 2016 - Total height: approx. 19 mm

### Easy to carry out

Support must be clean and dry. Apply Color-Fix Color and then place some grass (from long to short), strew various fibres or cover the ground with some brown clump foliage. After that set the plants at pleasure in some places using little glue. You will thus obtain pretty realistic effects.

181264 (HO)

# 28 Giant ornamental onions

Total height: approx. 12 mm

181265 (HO)

## 32 Grape hyacinths

Total height: approx. 10 mm

181266 (HO)

### 6 Watermelons

Total height: approx. 8 mm

181267 (HO)

# 32 Orchid primroses

Total height: approx. 12 mm

181268 (HO)

### 6 Climbing roses

Total height: approx. 45 mm

181269 (HO)

### 14 Flowering bushes

Total height: approx. 13 mm

181256 (H0) 16 Sunflowers Total height: approx. 20 mm

181262 (H0) 36 Tulips Total height: approx. 7 mm

181258 (H0)
6 Squashs
Total height: approx. 6 mm

181259 (H0) 18 Tomato plants Total height: approx. 15 mm

181260 (H0)
12 Water lilys
Total height: approx. 5 mm

181261 (H0)
24 Cattails/reeds
Total height: approx. 28 mm

181257 (HO)
10 Heads of green cabbage and
10 heads of cauliflower

Total height: approx. 5 mm

181263 (HO) 10 Heads of cabbage and 10 heads of red cabbage

Total height: approx. 5 mm

# DO-IT-YOURSELF PREMIUM TREES

181104 (HO, TT, N)

Do-it-yourself PREMIUM Birch tree

181105 (HO, TT, N)

Do-it-yourself PREMIUM Plane

# **Know-how**

Produce exclusive individual items using the simplest of methods. Trunks and branches, flock terrarin in a natural shade and foliage as a base are the components of the Do-it-yourself trees by FALLER. We will show you how to design your very own individual PREMIUM tree. Just as inexpensive, how brilliant is that!

Firstly, design the shape of the crown by bending the branches in the desired directions.

**Fixation**Prepare the fixing of the foliage with a little adhesive spray (art. 170497).

Preparation of the crown
In the next step, prepare the structure
of the crown and pull the foliage over
the branches of your tree.

Mounting the foliage Pull the foliage apart carefully until its size spans the branching.

Plant the tree by putting the terrain flock over the entire foliage whilst rotating the trunk. Use a leaf base if you wish to repeat this process.

171839 (HO, TT)

### PREMIUM Climbers green

Ideally suited as climbing plants on the sides of houses or walls, or bundled as bushes.

20 pieces

#### The FALLER PREMIUM hedges

blossom green and red available in two growth sizes. They have rated break points and can therefore be adapted to the requirements of the terrain. Another possibility for the individual processing exists in the separation of the plants according to length each consisting of two joined plastic blanks. For example, fences can be planted on both sides or again be cut, and blossoms can be integrated into the garden.

181398 (HO, TT, N)

### 3 Hedges light green

100 × 10 × 10 mm

### **ADHESIVES**

They hold the world of models together: adhesives. The FALLER adhesives have specially developed needle applicators because in the process, it is important that the correct dose can be applied exactly where it is needed.

#### 170492

#### **EXPERT**

This adhesive is manufactured according to a new formula which provides ideal adhesive results. The special needle applicator enables the most precise dosage of adhesive. The adhesive can be applied on the parts which are to be glued in the smallest drops and also in places which are difficult to access.

Content: 25 g

#### 170490

#### SUPER-EXPERT

This adhesive for pros reacts quicker, adheres quicker and more permanently. With a special needle applicator and protective cap for the needle.

Content: 25 g

#### 170500

### EXPERT RAPID

for super quick adhesive work. This instant adhesive (cyanoacrylate) has improved adhesive properties, flows into the smallest of cracks and has a lower tendency of creeping. With it, nearly all adhesive bonds can be created. Store in a cool, dark place.

Content: 10 g

#### 170486

### Cleaner distillate

Especially suitable for the cleaning of dirt on buildings, tracks, funfair attractions, Car System vehicles, etc.

Content: 25 ml

### 170489

170494

**EXPERT LASERCUT** 

This glue joins wood, card-

board, styrofoam, and deco-

Lasercut-Models.

Content: 25 g

rating parts. Ideal for building

### Special oiler

for small motors and gear mechanisms. With a special needle applicator for a precise dosage and clean oiling in places which are difficult to access. The oil is acid-free and does not gum.

Content: 25 ml

#### 170497

### **EXPERT Spray** adhesive

Colourless, elastic spray adhesive for durable and fixed gluing. Ph neutral, non-carcinogenic.

Content: 400 ml

#### 170488

### Teflon® lubricant — needle applicator

This synthetic lubricant provides permanent lubrication for many areas of application in model making. It is colourless, does not stain, cleans and protects against corrosion. It is acid-free and does not gum. Can be used for everything that needs being lubricated, particularly funfair models and mechanical parts.

Content: 25 ml

### **PATINAR**

Ageing can also be something beautiful - the traces of decades or even centuries tell a building's tales of the past and give it authenticity.

#### 170695

### »Pigments« Patina-set

Depending on the manufacture, plastic construction kit parts have minimal sheen, and are typically spray-painted in a solid colour. The patina set allows for lifelike and selective signs of weathering and aging to be applied. Industrial facilities or ones located at steam engine depots are always significantly more soiled than a family home in the countryside or a well-kept townhouse.

The set contains 6 small bottles (each 10 g) of matte pigments (black, white, rust, moss, sand, verdigris) which can be applied directly or mixed in countless shades using the enclosed speciality brushes.

Ideal for patinating building models, bridge and steel constructions, railway material, as well as ship and military kits.

#### 170465

### Texture paste

Fine-grain mat white acrylic structure paste. Best suited to the design of plaster structure of plastic models, snow landscapes, and any other decorative objects. Very easy to process and model on the most varied materials such as e.g. plastic, wood, cardboard and styrodur. The best way to do this is to use a spatula or a bristle brush. That paste can be dyed and remains flexible. Drying time can be 2 to 24 hours depending on the thickness of the layer applied.

Content: 200 g

# Know-how

The word »patinating« stands for the artificial »ageing« of various materials and surfaces, which gives them a marked plastic character and makes objects look more natural.

#### **Untreated:**

To make a lasercut model perfect, or apply rust to gravel, we recommend using the dry-application powder pigments.

Treatment:

Apply paper-thin layers using the included paintbrush.

Result:

They achieve a very natural, matte result without attacking or penetrating the surfaces to be coloured.

#### 190499 (HO)

#### Winter set

Model winter atmosphere! Ensemble of a two-storey alpine house with a wooden well, bench for relaxing in the evening and balcony, as well as a half-round village church with a roofed portal and bell-tower. The kit also includes wintry, bare trees, icicles and a material composition for manufacturing glittering masses of snow, as well as a spatula and detailed information for designing your winter landscape.

House: 99 × 89 × 72 mm • Chapel: 98 × 64 × 120 mm

### **Know-how**

#### **Designing winter scenery**

#### **Untreated:**

The winter set creates your winter wonderland in a jiffy. First, glue icicles to roofs or protrusions, where nature would have created them, using plastic glue.

#### Treatment:

Mix the »snow filler« to a modelling mass using diluted Colofix. Adhesion can be improved with a little Colofix-Flex and spread sand. Large areas are spread with a spatula, filigree landscapes or branches on trees are worked with a fine paintbrush.

#### Result.

To simulate the glistening of the sun on the snow, simply spread the included granulate onto the still wet mass. Using a little white paint, you can create a layer of snow along the edge of a street or other design elements. Using the patina, you can also create other special effects.

#### 170467

### Snow powder kit

Powdery snow! Create beautiful winter scenes! Easy-to-use set consisting of snow powder in handy dispenser, glue, mixing cup and dabbing sponge. Simply apply or dab some glue onto roofs, trees, fences or any other small parts, and strew some effect powder onto it. Also best suited to the styling of roadsides.

New Item 2016 - Content: 100 g/105 g

#### 170466

### Snow paste

Winter effects! Very fine lightweight snow paste that is directly applied, spread and modelled with a paint-brush or a spatula onto the desired support. Shows good stability after processing. On grounds of its lightweight, nearly fluffy nature that paste is particularly suitable for light snow decoration, e.g. on trees, on buildings or to model heaps of snow.

Drying time: approx. 2 to 3 hours.

Content: 150 ml

196

### **BRUSHES**

Give your models and figures a pleasant finish. FALLER brushes are best suited to paint and patinate all models in building and plastic modelling.

# **N** vallejo

### **COLOURS**

## Vallejo is one of the best-known and most popular brands in model-making.

Vallejo offers first-class products for model-makers to give unique colours to the most varied objects. A wide range of varied products awaits hobbyists for all applications in model-making.

The product range includes everything you need when working with varied colours. From A to Z!

#### **Model Air**

The water-based model air acrylic paints have been developed specially for air brush use. Waterproof, contaminant-free, non-fade and quick drying, they are suitable for all surfaces.

#### **Model Color**

Model Color was the first water-based acrylic paint for model construction. Model Color is water-proof and dilutable with water, solvent-free, non-fade, easy to apply, suitable for all surfaces and available in over 220 shades.

#### **Model Washes**

Model washes are special paints for a realistic representation of surfaces, that have been exposed to sun, rain, wind, dust or snow and have thus lost the intensity of their colour.

#### Train Color

Train Color paints are specially suited to use in the model train industry. With these paints, available individually or as part of a set, you can achieve great effects on model railways.

#### **Metal Color**

With metal paints from Vallejo you can create the perfect metal look for your models. Water-based and specially developed for airbrush use, these colours have great effects..

#### **Pigmente**

The pigment powder made from earth and iron oxide serves for the detailed representation of wear and tear and any form of fading, but also of rust, mud, dust or dirt.

#### **Panzer Aces**

Panzer Aces is a water-based acrylic paint, which is made specially for painting tanks and their crew. The features of this brush paint correspond to those of the Model Color paints.

#### Base

Vallejo's water-based polyutherane base creates a self-levelling, particularly hard and resistant, smooth surface and thus provides the perfect base for plastic, copper, resin and lots more materials.

#### **RC Color**

Water-based, contaminant-free, waterproof, highly resistant and petrol-proof up to 35% nitro. RC Color paints are predestined for the RC area but also for helmets and motorbike tanks. Specially suited to airbrush work.

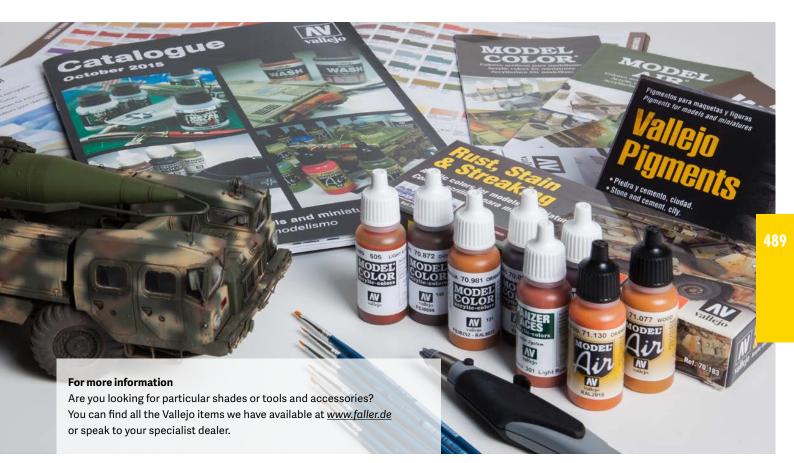

#### **Effects**

Water-based, contaminant-free material for the design of structures of any kind such as desert sand, asphalt, foam, snow, lakes or canals.

#### **Utilities and accessories**

Vallejo offers all of the tools that you need before, during and after painting: Acrylic varnishes, polyutherane glazing, crackle paints, covering liquid, pigment binder, varnishes, thinners, brush cleaners and so on.

# TOOLS

Small helpers in any situation. No matter whether you want to cut, drill or glue.
Various aids make work on models easier.

170687

### Modeller's knife

Complete with 3 spare blades.

170682 3 Spare Blades

#### 170688

### Special side cutter

For cutting off ultra-fine moulded parts without burrs. Only suitable for polystyrene and copper wires.

170523

### Drill kit

Miniature sizes! Set of 20 metal drills in the range 0.3 to 1.6 mm.

#### 170528

### Mosquito clamp, lockable

A firm and easy hold! Rigid mosquito clamp made of stainless steel with slightly curved point, bits with transverse striae, and lock-in position. Ideal to catch and hold small parts for delicate hobby work. Length: 150 mm.

#### 170527

### Zakloep met etui

Precision folding magnifier with dedicated leather case for rich colours and high contrasts when observing the details of small objects, gives sharp representation up to the rim area.

Diameter of lens: 18 mm. Magnification: 10-fold.

Cutting mat

Clever working pad! Protects the surface of tables and simultaneously avoids affecting the sharpness of your modeller's knife. That high-quality long-lasting mat is provided with an horizontal and vertical grid in cm and the printed FALLER logo. The sandwich structure of the material closes by itself after cuts. Format:  $300 \times 220 \times 3$  mm (A4).

#### 170526

### Set of tweezers

Precision work! Four-piece set of tweezers made of stainless steel of different types: pointed/straight, spade/flat, crossed, blunt/cranked. Ideally suited e.g. to the fixing of figures, placing of plants, repairs, and many others more. Length: approx. 110 mm each.

#### 170529

### Nail setter

Nailing without hammer! That nail setter with sturdy wooden grip is the perfect mounting tool for nails, wire nails and pins that are too small to hold with the fingers. The adjustable bit stop also ensures that all fixing devices are sunk in to the same depth. Possible use e.g. to fix tracks or wire meshes. Length: 155 mm.

#### 170522

### Pin vice

Useful helper! Tool holder with screwing head allowing to drill or file by hand. Ideally suited to receiving small drills or needle-point files.

### Model making adhesive tape

Clean colour edges! Two reels of masking tape of different width for accurate painting and sticking work on tiny parts. Allows sharp separating lines even on curved contours and surfaces, and reliably prevents the infiltration of colours, paints and fluid varnishes. Easy to remove without any residue.

Widths: 6 mm and 10 mm. Length: 18 m.

#### 170689

### Abrasive files for modellers

5 abrasive files of the common grain sizes 80 + 120. For putting the finishing touch to your model.

#### 170520

### Glass-fibre rubber

Better cleaning! Rotary pencil made of plastic, fitted with capillary glass fibres. Ideally suited to the finest cleaning and smoothing tasks, e.g. on printed circuit boards and other objects or metals. Perfect to dull small shiny plastic parts very easily. Diameter: 4 mm.

#### 170525

### Set of needle files

Smoothing! Set of ten high-quality files. Ideally suited to the finest, most varied manual metal cutting tasks.

Length of files: 140 mm.

Different shapes: flat, round, half round, triangular, square.

### Replacement fibres for glass-fibre rubber

10 replacement fibre brushes for the glass fibre eraser art. 170520. Diameter: 4 mm.

### »Rite-Way« Angle set

Technology makes it possible! With this ultimate tool, you have a »third hand« when gluing. The small magnetic helpers make mounting simpler. Ideally used for building plastic, wood and laser-cut modelling kits.

### **AIRBRUSH**

A fantastic possibility to embellish your models. To get started you only need an Airbrush gun, a compressed air can, and the suitable Vallejo colours (p. 488). The other material required, from newcomer to professional models, can be found in our product range!

342201

### FALLER Hobby Airbrush

Small - inexpensive - easy. The ideal set for beginners with stained glass, air hose and compressed air can adapter.

170982 400 ml 170983 750 ml

### Compressed air can

Compressed-air can, ideal for occasional quick airbrush work.

#### 170994

### Airbrush Professional Set

The ideal set for the professional, with a light airbrush-gun with stable plastic casing, patented valve system, various accessories and connecting options for the most common compressors, e.g. FALLER Air-Boss 170993 or pressurized air cans 170992 and 170983.

The set contains:

- Airbrush-gun with Single Action Function and internal colour air mixture
- Connection tube with pressurized air can adapter
- 1 valve with 0.40 mm diameter
- -1 siphon glass 20 ccm / 33 mm
- 1 colour cup 7.5 ccm
- -1 colour cup 12 ccm
- 1 compressor-adapter 1/4"
- 5 airbrush-colours, each 14.7 ml (white, red, blue, yellow, black) + 1 empty glass to mix
- detailed construction instructions

#### 170993

### Compressor AIR BOSS

FALLER AirBoss: 17 litre/min flow rate, 4 litre air tank, 6.00 bars pressure!
Noise generation is 30dB/1m. 19.50 kg weight. With piston compressor, adjustable pressure gauge and water separator.

410 × 180 × 430 mm

#### 170991

### Transportable compressor

Small but fine! 75 Watt output and 12 litre/minute Output. 3.80 bar pressure with a noise level of 45 DB/1M. Pressure is adjustable. Ideal for all normal sized airbrush jobs since it weighs just 3.40 Kg.

220 × 135 × 250 mm

#### **FALLER compressors**

The compressors are made for FALLER by one of the biggest manufacturers of the world to detailed performance criteria and exacting quality requirements. These compressors can be ideally used for the operation of AZTEK air brushes and also for other air-brush devices in the model-making sector and for similar applications.

Item no.	CONNECTION	Performance	OUTPUT	CAPACTIY	PRESSURE	SOUND	WEIGHT
	[V/HZ]	w	[L/MIN]	L	[bar]	[DB/1M]	kg
170991	230/50	75	12	-	3,8	45	3,4
170993	230/50	135	17	4,0	6	30	18,2

### LIGHT AND ELECTRONICS

All possible light sources, the matching transformer, the right control unit, the suitable motor, and diverse additional articles are presented on the following pages.

#### MINIATURE LIGHT EFFECTS

#### 180710 (HO, TT, N)

### Disco lights

Fast, rhythmic change of colour encompassing the entire colour spectrum. With indirect use, the effect imitates both conventional lighting consoles, as well as modern light installations. The optimal addition to county fair rides or festivals of any kind.

#### 180711 (HO, TT, N)

### Stroboscope

Short, bright, pure-white flashes of light in rhythmic, yet irregular intervals. Ideal for lighting of disco, circus or county fair scenes.

#### 180712 (HO, TT, N)

### **Ambiance**

This light effect creates soft transitions and especially atmospheric light moods through slowly changing colours. It is suitable for both illumination of a building (e.g. a castle or a facade), as well as for the effective lighting of a complete diorama.

#### 180695 (HO, TT, N)

### Flickering fire

Flickering fire: the name says it all: a variety of red, orange and yellow hues alternating with quick, soft transitions in a rapid sequence.

#### 180696 (HO, TT, N)

### Flashing light

Flash: simple photo flash. Maximum brightness. Cold light (0.1 sec).

#### 180694 (HO, TT, N)

### Neon flicker

Neon flicker: cold light with different, seemingly random and very brief cut-outs (less than 0.1 sec).

#### 180698 (HO, TT, N)

### Welding light

Welding light: very cold, bluish light. Maximum brightness. Short sequences of flashes of different intensities followed by pauses of varying lengths, e.g. 5 flashes with different brightnesses within 1 sec, then 5 sec pause, then similar flash sequence and 8 sec pause, etc.

#### 180697 (HO, TT, N)

### TV flicker

TV flicker: various sudden colour changes at different intervals, e.g. an extended green sequence simulating a football game (2 - 10 sec).

#### Mini lighting effects

It's all in the details! Use the special effects to create incredibly beautiful pieces on your set. An area of only  $7\times11$  mm houses a very powerful processor, an RGB LED and a controlled power supply. This allows the desired effect to be placed in any building. Use the processor to control any effects. The RGB LED is able to render 256 different colours. Connect to 6–16 V direct or alternating current.

#### 180646 (HO, TT, N)

### Flash LED

One LED, red, flash frequency 1.5 Hz, voltage 12 V, DC voltage. Ideally suited for high buildings for use as an air-traffic control signal.

493

### Platform lighting »LED«

180 mm, for lighting purposes, universal usage. Ready for connection, 12-16 V, AC/DC voltage. Suitable for many platform halls (e.g. art. 120180) and platforms (e.g. art. 120187, 120188, 120191). For flicker-free operation with alternating voltage, you will need the rectifier (art. 180633).

#### 180652

### 5 LEDs, in different colours

with enamelled copper wires. Ready for connection to 12-16 V, AC/DC voltage. Pressure-sensitive. To illuminate buildings, rooms, means of advertising, outdoor installations,

In AC voltage mode you need rectifier (art. 180633) for flicker-free operation.

#### 180653

### 5 LEDs, warm white

with enamelled copper wires. Ready for connection to 12-16 V, AC/DC voltage. Pressure-sensitive. To illuminate buildings, rooms, means of advertising, outdoor installations,

In AC voltage mode you need rectifier (art. 180633) for flicker-free operation.

#### 180647

### 5 LEDs, white

with enamelled copper wires. Ready for connection to 12-16 V, AC/DC voltage. Pressure-sensitive. To illuminate buildings, rooms, means of advertising, outdoor installations,

In AC voltage mode you need rectifier (art. 180633) for flicker-free operation.

#### 180654

### 2 LED bar spotlights, warm white

with 5 LEDs each. Ready for connection to 12-16 V, AC/DC voltage. The connections using enamelled copper wires on both sides allow to divide or shorten the bars one time. In AC voltage mode you need rectifier (art. 180633) for flicker-free operation.

### 2 LED bar spotlights, white

with 5 LEDs each. Ready for connection to 12-16 V, AC/DC voltage. The connections using enamelled copper wires on both sides allow to divide or shorten the bars one time. In AC voltage mode you need rectifier (art. 180633) for flicker-

free operation.

#### 180649

### LED light festoon

30 LEDs, in different colours. Ready for connection to 12-16 V, AC/DC. Length: approx. 250 mm. The connections using enamelled copper wires on both sides allow to divide or shorten the festoon one time. Perfect to illuminate funfair stands, ships, beer gardens, etc. In AC voltage mode you need rectifier (art. 180633) for flickerfree operation.

#### 180660

# Lighting fixture LED, warm white

Large beam angle for realistic illumination of residential buildings. 12-16 V AC/DC voltage.

#### 180661

# Lighting fixture LED, cold white

Large beam angle for realistic illumination of modern buildings and factories. 12-16 V AC/DC voltage.

#### Not all LEDs are alike

 $\blacksquare HO \blacksquare T \blacksquare N \blacksquare Z$ 

Not every LED keeps its promises. Luminous colour, light efficiency and the directional characteristic can deviate greatly with lack of quality control. Uneven lighting, rapid aging and uneven colour temperature are exactly what you get when buying cheap LEDs. FALLER relies on high quality standards, forming the prerequisite for optimal building lighting.

The comparison photo illustrates what makes a good LED: on the left the conventional FALLER light bulb, to the right of it an LED with particularly uneven lighting, as offered in stores.

The two FALLER LEDs on the right are quite different with their perfectly even light distribution, a wide angle of reflected beam and long life. FALLER LEDs are available in warm white and cool white, allowing for era- and type-appropriate building illumination.

#### (HO, N)

180671 white 180674 green

180672 red 180676 blue

180673 yellow

### Micro-cable bulb

The FALLER micro cable bulbs (12-16 V, AC/DC, 35 mA) are suitable for the ideal lighting of all fairground booths and rides.

180670 (HO, TT)

### Building light

complete with quality bulb, 12-16 V, DC/AC voltage, 55 mA, cable, E 5.5 mm, Ø 8 mm base.

180677 (HO, TT, N)

### 3 Micro-cable bulb, white

12-16 V, AC/DC, 35 mA.

#### 180630 (HO) 222175 (N)

# 2 Andrews crosses with warning lights

for unprotected level crossings, 12-16 V, AC/DC voltage. Switching printed circuit included.

Epoch III

### DRIVING MECHANISMS, CONTROLS

#### 180641

### Transformer

for high output. Especially applicable for the operation of fair rides, electrical appliances, lighting, power supply for Car System controls and other model making accessories.

With overload protection.

#### 180633 (HO, N)

### Rectifier

to transform 16 V alternating current into direct current. Especially applicable for LED lighting in order to avoid a slight flickering of the small bulbs (art. 180647, 180648, 180649 as well as the lights 180630 + 180633).

#### 180686

### Plug strip

for the distribution of low current. 10 pairs of sockets for 2.5 mm plugs.

#### 180629 (HO, TT, N)

### Synchronous hobby motor

12-16 V, AC voltage, 60 mA. Choice of 15 or 4 rpm. Reversible for clockwise- and counter-clockwise rotation. This robust, long-lasting motor can be used for various purposes, e.g. wave swinger, conveyor, gantry crane, railway gate, wind-, water or saw mills, feed pump, etc.

Detailed instructions are included.

#### 180624 (HO)

#### Gate motor unit

Retrofit kit of an electromechanical drive unit allowing to open and close the doors of Art. 120217, Electric engine shed, and when using Car System vehicles on Art. 130520, Stables. Manual operation through push button (supplied). For 12-16 V AC/DC voltage.

#### 180725 (HO, TT, N)

### Servo control

This equipment controls and also programs four connectable servos. The same as our new controls, these can also be controlled completely analogue or digital via a corresponding control. Connects via 16 V, AC voltage.

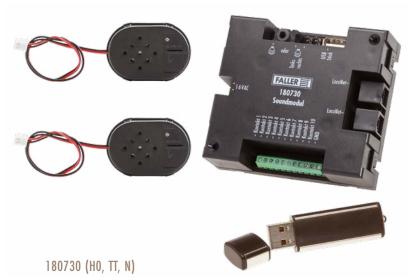

#### 180726 (HO, TT, N)

### Servo

Complex control made easy! In addition to the great power they develop for such a compact size, servos have the great advantage of travel range and turnout speed being adjustable in both directions.

### EFFECIS

### Sound module

Aside from lighting effects noises are the best way to emotionalise a model scene or diorama.

FALLER now offers a control covering all sound options imaginable. From barking dogs to a vehicle's horn or even complex chime of bells, anything's possible.

The best part: You're the conductor! Simply transfer the desired sound files in a common mp3 format onto the USB stick included and play them on your model.

The control has 10 inputs to play the different sounds. They can be activated by switch, sensor or a track switch and emitted on the speakers included or other action boxes. If you have LocoNet you can also activate many more sounds via your digital centre.

The software included enables you to easily organise your sound library with more than 100 sounds.

Operating system: Microsoft Windows XP or later.

#### 180690 (HO, TT, N)

### Smoke Generator Kit

Consisting of smoke oil container with built in 16 V AC electric smoke generator and bottle of smoke oil (50 ml).

50 × 30 × 34 mm

#### 180688

### Smoke Oil

Bottle of smoke oil for refilling the smoke generator. Sufficient for 4 hours of operation.

#### 180627

### Pump set

consisting of an electric pump (12-16 V, AC voltage, 220 mA), 900 mm flexible PVC hose and 2 connecting pieces. The pressure output is 400–500 mm capillary rise.

This pump is particularly suitable for building waterfalls, running streams, lakes, trick fountains, fountains and for operating water mills. Detailed instructions with a lot of tips and installation information included.

198

■HO ■ TT ■ N

### PHOTO BACKGROUNDS

The view is great - with the realistic FALLER photo backgrounds the model landscape reaches all the way to the horizon. The motifs are just as exciting as in nature itself because they portray original landscapes.

180800 (HO, TT, N)

### »Sauschwänzlebahn« Model background

The ideal landscape scene for the installation! This model background consists of three components. Simple processing and printed on appropriately stable material. 2700 × 500 mm

180504 (HO, TT, N)

### »Ostholstein« Model background

The ideal landscape scene for the installation! This model background consists of three components. Simple processing and printed on appropriately stable material. 2700 × 500 mm

180505 (HO, TT, N)

### »Summer in the Highlands« Model background

The ideal landscape scene for the installation! This model background consists of three components. Simple processing and printed on appropriately stable material. 2700 × 500 mm

### Model background »Saartal«

This model background shows a section of the Saarland region and consists of 3 parts. 2700 × 500 mm

180509 (HO, TT, N)

### Model background »Small town«

This model background shows a section of a small town and consists of 3 parts. 2700 × 500 mm

180510 (HO, TT, N)

### Model background »Industrial area«

This model background of an industrial setting consists of 3 parts. 2700 × 500 mm

180515 (HO, TT, N)

### »Löwenstein/Württemberg« Model background

Consists of 3 sections. The scenery which was reproduced according to an original photograph shows the recreational area of the Löwenstein Mountains with a view of the town of Löwenstein. 2900 × 450 mm

### »Black Forest/Baar« Model background

This background, which was created from an original photograph, consists of 4 parts each 970 mm. A background consisting merely of clouds can be obtained by cutting off the printed landscape. This background can be extended in combination with art. 180511. Can also be repeatedly alternated.  $3880 \times 650 \text{ mm}$ 

#### 180511 (HO, TT, N)

### »Black Forest/Baar« Model background extension

This 4-piece background permits the model background »Black Forest/Baar« (art. 180514) to be extended to right or left, as desired.

3880 × 650 mm

#### 180512 (HO, TT, N)

### »Neuschwanstein« Model background

2-piece backdrop, manufactured according to an original photograph. The motif shows the scenery around the »Neuschwanstein« castle.  $3200\times970\ mm$ 

### »Oberstdorf« Model background

Here, the backdrop also consists of 3 sections. This Alpine scenery with holiday resort Oberstdorf is an attractive border for any model layout.  $2900 \times 450 \text{ mm}$ 

#### 180517 (HO, TT, N)

### »Oberstdorf« Model background extension

Background »Oberstdorf« (art. 180516) can be extended to the left or the right with this three-part expansion set. One art. 180516 and one art. 180517 jointly measure 5800 mm. Further extensions are possible.  $2900 \times 450 \text{ mm}$ 

#### 180513 (HO, TT, N)

### »Karwendelgebirge« Model background

2 section model backdrop. The original shows a section of the scenery in the area of the Karwendel Mountains. Combinations of extension to the right and left are possible with unlimited expansion.  $3200 \times 970 \text{ mm}$ 

# CREATIVE BUILDING SETS

The ideal start for diorama modelling. In addition to the base plate, a single-family house, a few fir trees, figures and a car, diversified furnishing materials are included in the set. Creativity has no limits when modelling.

## 195998

»One-family dwelling house« Creative Building Set I

**Epoch V** • 240 × 175 × 3 mm • 101 × 117 × 83 mm

#### 19599

»One-family dwelling house« Creative Building Set II

**Epoch V** • 240 × 175 × 3 mm • 93 × 84 × 115 mm

# **FALLER BASIC**

# Design, fold, snap together - done!

Today a train station, tomorrow an apartment building, the day after tomorrow – maybe a princess castle. Even the youngest children can let their imagination run wild with FALLER BASIC.

Anyone can build their dream house here: Roofs, bases and side walls of the FALLER BASIC models are not only interchangeable; there is also an alternative version for each detailed finished side wall, which you can paint, apply stickers to and design yourself. The ideal addition to the MÄRKLIN my world products.
