

New! Kobo Custom Special Run!

KATO
PRECISION RAILROAD MODELS

First delivery - February 28th, 2013
Pre-order due date for first delivery: January 4th, 2013

As part of its Kobo custom line, Kato USA is now offering special exclusive production runs of special paint schemes and super detailed cars! These items are custom built and modified by a master modeler in Japan and will be produced on a per-order basis; if you miss the deadline for the first order - don't fret! Kato USA will continue to take orders for future deliveries, possible thanks to the "built to order" nature of these items!

GG1 #4872 "Congressional Silver"

During the 50's, the Pennsylvania's "Congressional" trains which operated between New York and Washington D.C. were pulled by six different GG1 locomotives - three of which were painted into a special variation on the single stripe livery in 1955, sporting a silver coat and broad stripe.

137-2022-KB N GG1 Pennsylvania "Congressional Silver" #4872 \$195USD

Budd Business Car BNSF #1 "Gerald Grinstein"

Originally built in 1952 for the then-president of the CB&Q Harry Murphy, BNSF #1 has had many names, including CB&Q "Burlington" and BN's "Mississippi River" - today it has been refitted and relabeled with BNSF's new "Swoosh" logo and the name of former BN CEO Gerald Grinstein who was part of the merging of the BN and ATSF into the BNSF. This model will replicate many of the specific details of this particular car, including a custom built rear porch, dome antennas on the roof, and the new name plates that are mounted with the BNSF lettering atop the car's corrugated ribbing.
