# TRACK SETS - EASILY EXPAND YOUR RAILROAD EMPIRE

MAKE A GREAT START WITH PIKO!

This flyer shows a selection of American-style starter sets, locomotives and cars. See the full product line in the 172-page full-color 2014 PIKO G-Scale Catalog, item 99704, at retailers or \$9 post-paid direct.

Don't miss out on nearly 200 G-Scale buildings, the complete PIKO G-Track system, as well as hundreds of European and American trains and accessories!

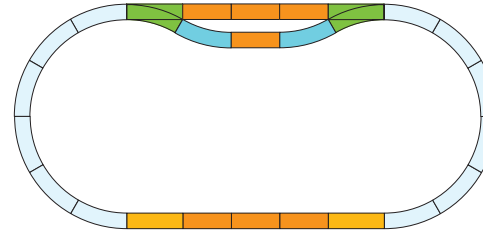

Whether you're a long-time garden railroad hobbyist or just starting out with your first G-Scale train, we think you'll find the affordable German-made quality of PIKO G-Scale products to be a sound investment. You're on the right track with PIKO!

## ON THE COVER

**NEW**

Your G-Scale passengers will travel in style on the legendary Blue Comet.

See pages 4 & 5 for details.

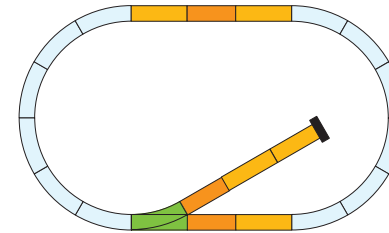

### 35300 Station Track Set

- 1 x 35220 WLR1 (Switch left)
- 1 x 35221 WRR1 (Switch right)
- 2 x 35211 R1 (Curved track R1 600 mm)
- 2 x 35200 G320 (Straight track 320 mm)
- 7 x 35201 G280 (Straight track 280 mm)

**Floor area:** 278 x 130 cm

**Minimum area for assembly:** 300 x 150 cm

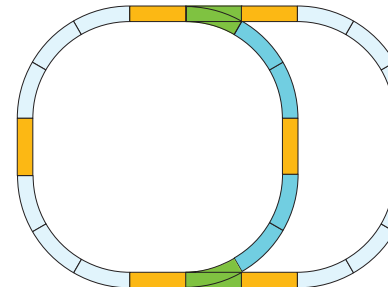

### 35301 Siding Track Set

- 1 x 35280 Buffer stop
- 1 x 35220 WLR1 (Switch left)
- 5 x 35200 G320 (Straight track 320 mm)
- 3 x 35201 G280 (Straight track 280 mm)

**Floor area:** 225 x 130 cm

**Minimum area for assembly:** 245 x 150 cm

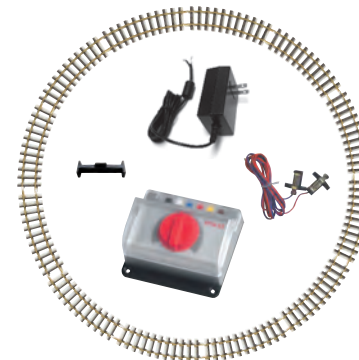

### 35302 Double Oval Set

- 1 x 35220 WLR1 (Switch left)
- 1 x 35221 WRR1 (Switch right)
- 4 x 35211 R1 (Curved track R1 600 mm)
- 7 x 35200 G320 (Straight track 320 mm)

**Floor area:** 232 x 160 cm

**Minimum area for assembly:** 252 x 180 cm

Each of the three track sets above adds the pieces shown in brighter colors to the basic starter set circle pieces shown in off-white.

### 35310 Track and Power Set

- 12 x 35211 R1  
(Curved Track R1 600 mm / 23.62")
- 14 x Track Clips
- 1 x Power Clamp w/Wires
- 1 x Basic Analog Throttle
- 1 x UL/CSA-Listed Transformer, 120 V

**Floor area:** 120 x 120 cm ( 3.94' x 3.94')

**Minimum area for assembly:**

140 x 140 cm (4.59' x 4.59')

# STARTER SETS

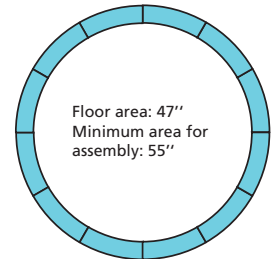

38103 Pennsylvania Freight Starter Set

PIKO G Starter Sets include everything needed to start a railroad empire:

- Locomotive and 2 Cars
- Circle of R1 Curve Track (12x 35211, R. = 600 mm)
- Track Power Clamp (35270)
- Track Clips, 14 Pcs (35285)
- Throttle
- UL/CSA Listed Transformer

38104 Santa Fe Freight Starter Set

38106 White Pass & Yukon Starter Set with Analog Sound and Smoke

## DIGITAL STARTER SET NEW

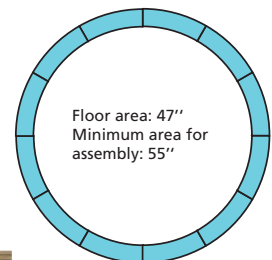

- Locomotive and 2 Cars
- Circle of R1 Curve Track (12x 35211, R. = 600 mm)
- Track Power Clamp (35270)
- Track Clips, 14 Pcs (35285)
- UL/CSA Listed Transformer
- Digital Central Station
- Navigator Remote + Cable
- Uncoupling Wand

38141 B&O Digital Steam Freight Starter Set with Sound and Smoke

See 38201 loco on page 7 for detailed description of loco features.

# THE LEGENDARY BLUE COMET

SPECIAL TRAINS

**NEW**

Early in the twentieth century, the Central Railroad of New Jersey set out to create a train offering a new level of luxury and comfort, whisking travelers rapidly to and from the resorts of Atlantic City. The result of these efforts was named The Blue Comet.

To make this one-of-a-kind train completely unmistakable, all the cars and even the locomotive were decorated in an elaborate blue paint scheme. The normally assigned locomotive for the train was number 592, a Camelback-type loco, with the cab astride the boiler. The cars were lavishly appointed and offered personal service at each seat. And now your G-Scale passengers can travel the high iron in style with The Blue Comet train from PIKO!

The locomotive is of the 2-6-0 wheel arrangement. Both loco and tender are clad in a two-tone blue paint scheme, with highlights of red and real gold-plated trim. The loco offers not only smoke and directional "golden glow" LED headlights, but also spectacular digital steam sound. And all features are fully functional on either Analog DC or Digital DCC power. See the 36220 American Steam Sound Kit on page 16 for further technical details.

The cars also wear the famed two-tone blue, with a cream window band. As with the loco and tender, the metal car wheels are decorated in matching red. Clerestory and transom windows include a "stained glass" pattern. Each car is lettered accurately after a different car name and number from the real Blue Comet train.

All the cars are ready for easy installation of a PIKO 36135 Interior Light Kit (one kit per car), featuring multiple LED lamps along the car ceiling for nice, evenly bright lighting.

Let the legendary Blue Comet roll once again...on your very own G-Scale railroad!

**38241 Blue Comet Camelback 2-6-0 Loco w/Sound**

## 38105 Christmas Starter Set

The PIKO Christmas train is a great way to get started building a Christmas Village...under the tree, around the living room or in your garden! See the description of items 38103 and 38104 on page 3 for set contents. See the full PIKO G-Scale catalog for Christmas Built-Up buildings and kits to complete the scene.

# NON-SOUND STEAM LOCOS

## LOCOMOTIVES

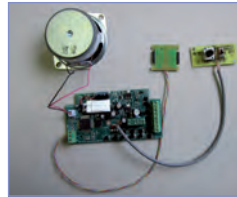

### POWERFUL, RELIABLE, ECONOMICAL LOCOS FOR YOUR RAILROAD

The locomotives on this page come without sound, but all are easily upgradeable at any time. All of them include well-proven and smooth-running PIKO gear drives with precision can-type motors and 8-point electrical pickup. All include directional "golden glow" LED headlights and nicely detailed valve gear.

38202 is ready for installation of a 36221 Analog Steam Sound Kit, as well as a 36142 5-Volt Smoke Unit and 36143 5-Volt Regulator. Alternately, the 36220 Digital Steam Sound Kit can be adapted.

38203 is ready for installation of a 36220 Digital Steam Sound Kit (see p.16) and a 36142 5-Volt Smoke Unit, offering full-feature operation on either Analog DC or Digital DCC power. Plastic tender wheels can be easily replaced with 2 packs of 36164 Metal Wheelsets if desired.

38210, 38220 and 38221 include 5-Volt smoke units and have ball-bearings on the geared loco driver axles. These locos are ready for installation of a 36220 Digital Steam Sound Kit (see p.16), offering full-feature operation on either Analog DC or Digital DCC power. Plastic tender wheels can be easily replaced with 2 packs of 36164 Metal Wheelsets if desired.

### 36221 American Steam Sound Kit, Analog

Economically add sound to PIKO 0-6-0T locos. Kit includes steam "chuff", varying with loco speed, plus sensor to trigger bell and whistle signals via track magnets (PIKO 35268, sold separately). Kit can be adapted to other steam locos. For working smoke, add 36142 5-Volt Smoke Unit and 36143 5-Volt Regulator.

# 0-6-0 STEAM LOCOS WITH SMOKE & DIGITAL SOUND

**38201 B&O 0-6-0T Saddle Tank Loco with Sound and Smoke**

- The sound-equipped steam locos on this page include:
- Full-Feature Operation on Either DC or Digital/DCC
  - Bright, Directional LED Lights and 5-Volt Smoke System
  - High-Volume 3-Watt Digital Steam Sound System, with:
    - ⇒ Synchronized Steam Exhaust Chuff
    - ⇒ Correct Bell and Whistle Signals
    - ⇒ Dynamo, Blower, Air Pump and Steam Release
    - ⇒ Brake Squeal and Brake Release
    - ⇒ Coal Shoveling (on coal-fired locos)

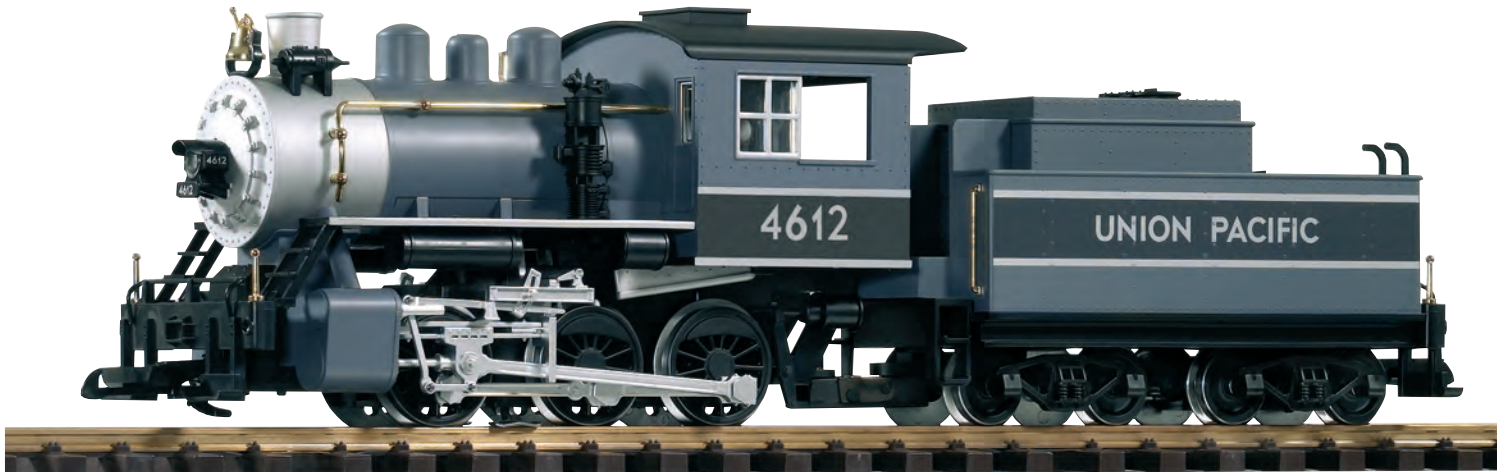

See 36220 American Steam Sound Kit on page 16 for further technical details

**38216 UP 0-6-0 Steam Loco & Oil Tender with Sound and Smoke**

**NEW**

### The Famous Camelback

In the steam era, railroads generally used locally available fuel for their locomotives. In some regions of America, the local coal was a hard, clean-burning type called anthracite. Compared to soft bituminous coal, much more anthracite had to be burned to make the same amount of heat. This required a larger firebox - so large, in fact, that it blocked the engineer's view of the tracks ahead. The creative solution was to place the cab ahead of the firebox, astride the boiler. The fireman was left to shovel coal out in the weather on the rear deck, with only a small roof for shelter. The unique appearance of this type of loco reminded some people of a camel's humped back and others of the hunched back of old Mother Hubbard from nursery rhyme fame. But the Camelback nickname was more common and hundreds were built in various wheel arrangements for railroads across America. New safety regulations banned further construction in the late 1920s, but many served until the end of the steam era in the 1950s.

#### The Model

This PIKO model combines attention to detail with sturdy construction and exceptional pulling power. The use of special weather-resistant materials makes this model suitable for both indoors and outdoors. Additionally, this model is equipped with a state-of-the-art high-quality onboard digital steam sound system developed exclusively for PIKO by SoundTraxx®. This sound system is actually a sound decoder, enabling enjoyment of the model's numerous sophisticated features automatically, on either Analog DC or Digital DCC operation.

# MOGUL STEAM LOCOS

From the late 1800s to the end of steam in the 1950s, 2-6-0 "Mogul" locos served faithfully, whether as smaller power on the mainlines or as the big power on branchlines. Take your choice, knowing each will serve just as faithfully as the original.

The sound-equipped steam locos on these pages include:

- Full-Feature Operation on Either DC or Digital/DCC
- Bright, Directional LED Lights and 5-Volt Smoke System
- High-Volume 3-Watt Digital Steam Sound System

See 36220 American Steam Sound Kit on page 16 for further technical details

37210 DB BR 64 Steam Loco

**36220 American Steam Sound Kit DC / DCC**

This kit is ideal for the non-sound PIKO Mogul Steam Loco. It can also be adapted to many other steam locos. Simple screw-terminals for all connections ease installation. The heart of the kit is a state-of-the-art high-quality digital steam sound decoder developed exclusively for PIKO by SoundTraxx®.

The kit offers:

- Full-feature operation on either Analog DC or Digital/DCC power
- 3-amp capacity motor control with load compensation
- Regulated 5-volt supply for smoke generator and directional lights
- 3-watt audio amplifier with volume control
- High-fidelity 2.5" speaker with moisture-resistant cone
- Reed-switch assembly for triggering additional bell and whistle signals via track magnets, such as PIKO #35268.

The kit reproduces the real sounds of a steam locomotive with digital clarity and includes numerous sound effects, which can all operate at the same time with no loss of sound quality or volume. Sounds include:

- Speed-Step Synchronized Steam Exhaust Chuff
- Whistle - Proper forward, reverse, stop and grade crossing whistle signals
- Bell - Proper bell signal as loco starts to move
- Dynamo, Blower, Air Pump and Steam Release
- Brake Squeal and Brake Release
- Coal Shoveling (can be switched off for models of locos that don't burn coal)
