

The biggest
little thing that ever
happened to Model Railroading

Revell/Rapido
N Gauge MicroTRAINS

**Small, tough,
compact Railroad realism!
Hit the Rails with
Revell/Rapido N Gauge MicroTRAINS!**

The biggest news in fifty years of model railroading! Tiny, precise replicas of America's most famous trains, miniaturized by Revell/Rapido in the astounding space-saving N Gauge MicroTRAINS! And the railroad cars you can hold in the palm of your hand are as incredibly engineered as the real thing! They've been tooled and detailed with a diamond cutter's precision, and they are diamond tough, durable miniatures for railroaders of every age!

Powerful MicroTRAINS break-through the space barrier! The size puts highly detailed railroad realism within the reach of your hand. You can set up your MicroTRAIN in a space as small as you, the "engineer" can spare. Get off the floor — set it up on a table — set it up wherever or whenever you want it! There's new fun, new fascination, new convenience waiting for you... get the railroads rolling again with Revell/Rapido N Gauge MicroTRAINS!

Realistic Appearance!

Only MicroTRACK is so uniquely designed and forged in corrosion proof, realistic railroad tempered steel with black nickel plate. Regardless of where you set it up, the track contour

sheds dirt and dust. Your MicroTRAIN rolls along smoothly. Additionally, the special and exclusive staggered "fish plates" which join each track section give MicroTRACKS exceptional structural strength.
