All Aboard Commuter Rail

For many people, workdays begin and end with a train ride. Introduced in the 1950s, bi-level commuter cars provide increased ridership at a lower operating cost versus single-level cars. With climate-controlled interiors, two levels of seating and center doors for quick loading and unloading, these cars make commuting by rail comfortable and fast.

For added efficiency, some bi-level cars are equipped with a control cab to facilitate push/pull operation. Gallery design cars offer even more savings. The upper level has balconies or mezzanines running along each side of the car overlooking a center aisle. This configuration allows the conductor to walk through the car validating tickets from passengers on both levels at the same time.

These detailed models feature the unique gallery interior configuration, prototypically accurate window tinting, factory-installed grab irons, sprung operating diaphragms, car number decals, correct 33" turned metal wheelsets and Proto MAX™ metal knuckle couplers. They are available with or without factory-installed DC/DCC LED lighting. Lighted cab cars include operational headlight.

A Note on Availability

At Walthers, we strive to provide you with the widest variety of product possible. In order to achieve this goal, we maintain significant inventory on site. Despite our best efforts to have every item you could possibly need in house at all times, it is not realistically possible to do so. For your convenience, we do our best to promote items that are in stock and to clearly label other items—those that are new and available for Advance Reservations or items that are low in stock and have Limited Quantities Available when the Flyer goes to press. At times, we experience a quick sell out on a particular item or unexpected demand for an item that we believed to have sufficient stock in house. In many cases, items can be back ordered for future delivery. In other cases, we are unable to secure more of a particular item. For the most up to date availability information, we encourage you to check walthers.com, email us at custserv@walthers.com or call our Customer Service Team at 1-800-4-TRAINS. The 'Find It' feature on our website will help you find a Dealer in your area that may still have stock available for the item you desire.

Please know that we appreciate your support of both Walthers and your Local Hobby Shop. We are committed to making this Flyer a valuable part of your model railroading.

Vehicle Deals

Railroads aren't the only form of transportation you'll want on your layout. Whether it's picking up passengers at the station or rolling down Main Street, buses, boats, cars and trucks amp up the activity and make your scenes more realistic. Remember your first car or the first time you saw a bulldozer in action? Vehicles also make great collectibles to bring back those happy memories. With the wide variety of vehicles available here and at walthers.com, you're sure to find just what you want.

Tank Cars For Every Commodity

Heating oil, corn syrup, molten sulfur – if it's liquid and needs transporting a tank car is the answer. These cars carry all kinds of liquids and slurries (mixtures of water and other materials). Some have internal heating coils to keep the contents hot during transport or reheat them for unloading. Tank cars service many industries: chemical plants, food processors, fuel facilities and more, so you'll want a variety of cars for your railroad.

MAKING RAILROAD HISTORY
WALTHERS MAINLINE™

Round the Clock Workhorse

Despite wartime restrictions, the American Locomotive Company received permission to construct its dual-purpose DL109. With 2,000 horsepower and an Otto Kuhler design, these knife-nosed locos were powerful enough for heavy freight and attractive enough for passenger service. Worn out from heavy wartime service, most DL109s were scrapped by the late 1950s. None were preserved.

NEW HO WalthersMainline™ Alco DL109
