Dear Friends,

During this special time of the year, the magic of the season comes to us in many ways. There's the excitement of picking up friends at the Amtrak station. A Saturday spent with club members setting up a holiday display layout. A busy evening at home making sure the tree and the train are just right. The fun of visiting the hobby shop to find the perfect set for a new modeler. A quiet afternoon spent remembering that special Christmas when Santa brought your first train.

This year, we're inviting you to pass on those traditions, or start a new one for your family and friends. Our Holiday Gift Guide in this issue includes a huge selection of Christmas-themed starter sets, festive decorations, layout accessories, toys and much more — you'll find something here for every train lover on your list — or something special just for you!

If you're just discovering the fun of model trains for the first time this season, be sure to visit us online at walthers.com/getting_started. There you'll find helpful hints on everything from choosing the perfect train set to building your first railroad.

We are truly honored to have been included in your family's hobby fun throughout the years, and look forward to serving you in the future as well. On behalf of everyone at Walthers, warmest wishes for a Merry Christmas and a healthy, happy 2014!

Phil Walther

ON THE FRONT COVER

Last night's storm turned downtown into a scene right out of a Christmas card — and just in time for the big parade tonight! It's easy to set the scene along your city streets with Cornerstone kits like the new Merchant's Row IV (933-4040) and the Art Deco Highway Underpass (933-3190).

ON THE INSIDE COVER

The North Pole isn't the only magical place this time of year! Santa knows his helpers here in Milwaukee have great gifts from complete starter sets to toys to superdetailed models for train fans from three to 103! Look for more ideas in the special Holiday Gift Guide in this month's Walthers Flyer.

A Note on Availability

At Walthers, we strive to provide you with the widest variety of product possible. In order to achieve this goal, we maintain significant inventory on site. Despite our best efforts to have every item you could possibly need in house at all times, it is not realistically possible to do so. For your convenience, we do our best to promote items that are in stock and to clearly label other items—those that are new and available for Advance Reservations or items that are low in stock and have Limited Quantities Available when the Flyer goes to press. At times, we experience a quick sell out on a particular item or unexpected demand for an item that we believed to have sufficient stock in house. In many cases, items can be back ordered for future delivery. In other cases, we are unable to secure more of a particular item. For the most up to date availability information, we encourage you to check walthers.com, email us at custserv@walthers.com or call our Customer Service Team at 1-800-4-TRAINS. The 'Find It' feature on our website will help you find a Dealer in your area that may still have stock available for the item you desire. Please know that we appreciate your support of both Walthers and your Local Hobby Shop. We are committed to making this Flyer a valuable part of your model railroading.

Model Today's Sand Traffic from Start to Finish

One of the newest industries along the rails involves some of the oldest material on earth — sand! While it's been used for centuries to make building materials, glass and metal castings, you'll also find it in paint, fertilizer and plastics. Recently, "fracturing sand" (or "frac sand") has become a hot commodity, used to break rock and improve the flow at new oil and gas fields. But you can't use just any kind of sand for any kind of product, which means it's got to be hauled long distances from producer to end user — a big job tailor-made for today's railroads!

Sand is produced in a variety of ways, and many mines and quarries have added new equipment to speed loading operations while increasing safety and reducing environmental hazards. The new Glacier Industrial Sands kit captures the look and feel of these operations, and makes a great stand-alone facility, or a busy part of larger operations. Packed with detail, the kit is complete with a railcar loading area with safety harness beam, two conveyors, truck fuel tank, main office and guard shack, along with mixing bin, piping, double loading silos and printed company and safety signs.

Wherever sand is offloaded, you'll find facilities like the new Rail-to-Road Aggregate Transfer. These contemporary trackside operations can be found at a wide range of industries, where they handle road salt, fertilizer and other granular materials. This complete kit features twin storage silos with pull-through loading for trucks, main office and guard shack, plus printed company and safety signs.
