Dig Those Black Diamonds

In the mid 20th Century small coal tipples like this could be found across the continent. Loading only a few cars per day, these small operations like Diamond Coal Corporation made big contributions to the bottom lines of railroads that served them. Whether located deep in a valley squeezed between a hillside and a river, or out on the great plains amid farm fields, these small complexes loaded cars on a couple of loading tracks. On your layout, Diamond Coal is a great kit for adding one or more of these smaller businesses to your railroad without taking up a lot of space.

A Note on Availability

At Walthers, we strive to provide you with the widest variety of product possible. In order to achieve this goal, we maintain significant inventory on site. Despite our best efforts to have every item you could possibly need in house at all times, it is not realistically possible to do so. For your convenience, we do our best to promote items that are in stock and to clearly label other items—those that are new and available for Advance Reservations or items that are low in stock and have Limited Quantities Available when the Flyer goes to press. At times, we experience a quick sell out on a particular item or unexpected demand for an item that we believed to have sufficient stock in house. In many cases, items can be back ordered for future delivery. In other cases, we are unable to secure more of a particular item. For the most up to date availability information, we encourage you to check walthers.com, email us at custserv@walthers.com or call our Customer Service Team at 1-800-4-TRAINS. The 'Find It' feature on our website will help you find a Dealer in your area that may still have stock available for the item you desire.

Please know that we appreciate your support of both Walthers and your Local Hobby Shop. We are committed to making this Flyer a valuable part of your model railroading.
