### A Note on Availability

At Walthers, we strive to provide you with the widest variety of product possible. In order to achieve this goal, we maintain significant inventory on site. Despite our best efforts to have every item you could possibly need in house at all times, it is not realistically possible to do so. For your convenience, we do our best to promote items that are in stock and to clearly label other items—those that are new and available for Advance Reservations or items that are low in stock and have Limited Quantities Available when the Flyer goes to press. At times, we experience a quick sell out on a particular item or unexpected demand for an item that we believed to have sufficient stock in house. In many cases, items can be back ordered for future delivery. In other cases, we are unable to secure more of a particular item. For the most up to date availability information, we encourage you to check [walthers.com](http://walthers.com), email us at [custserv@walthers.com](mailto:custserv@walthers.com) or call our Customer Service Team at 1-800-4-TRAINS. The 'Find It' feature on our website will help you find a Dealer in your area that may still have stock available for the item you desire.

Please know that we appreciate your support of both Walthers and your Local Hobby Shop. We are committed to making this Flyer a valuable part of your model railroading.

### WalthersN FastFacts™

**In Service:** 1972 - Present; 88" short hood used 1977-on.

**Primary Assignment:** Freight and switching service.

In the 1960s, EMD identified a demand for a medium-horsepower roadswitcher with no turbocharger for improved reliability. With the rack settings on its 16-cylinder 645 prime mover set at a very conservative 2,000 horsepower, tried-and-true traction motors and other proven components, the GP38 sold well, but the addition of easy-to-maintain modular electronics made its successor, the GP38-2, the runaway favorite. "Dash 2s" could be found on mainline freights and locals, handling yard and heavy industrial switching, even moving commuter and long-distance passenger trains! In recent years, they fetch a pretty penny on the used locomotive market – if their original Class I owners ever get rid of them! Many have been rebuilt and still serve their original owners, while others have gone on to shortlines and regional roads.

- Based on Units in Service 1977 to the Present
- DCC-Ready Mechanism with Insulated Motor
- Clip-Fit PC Board
- Heavy Die Cast Split Frame for Pulling Power
- Five Pole Motor with Flywheel
- Directional LED Headlights
- All-Wheel Drive and Electrical Pick Up
- RP-25 Metal Wheels
- Micro-Trains® Knuckle Couplers
