### ON THE COVER

Moving everything from iron ore to general freight, the EMD SD70ACe offers railroads a perfect combination of power and modern features for today's heavy traffic. Drawing its inspiration from the prototypes, our all-new WalthersMainline SD70ACe delivers the same kind of performance and features to HO Scale modelers, all at a price that keeps the fun affordable. Coming this June, these all-new models combine a WalthersProto drive, a precision-tooled and detailed body, superb paint and lettering, and your choice of SoundTraxx® sound for DCC and DC, or standard DC electronics into the perfect loco to serve your railroad for years to come. Read more about the newest member of the WalthersMainline fleet on page 4 inside.

## WELCOME

Watch your layout grow with all the great project ideas, new releases and special prices on must-have products in this issue of Walthers Flyer!

Ready for a change of scenery? You'll find all kinds of project ideas from new trees to grass and much more in our annual Landscape Sale. Turn to pages 11-15 for the complete selection.

Modernize HO operations quickly, easily and affordably with a fleet of the all-new WalthersMainline SD70ACe locos. Complete information can be found on page 4 in this issue.

Protect your SP freights in style with a fleet of C-30-1 cabooses on the job. Read more on the latest WalthersProto models on page 5.

Expand an HO fleet in minutes with new four-packs of WalthersMainline Taconite Ore Cars. Turn to page 5 for the complete list of roadnames and features.

Add the color and variety of today's intermodal operations to HO or N Scale layouts with the latest Walthers SceneMaster™ Containers, listed on pages 6 and 7.

Get more details on these new models at [walthers.com](http://walthers.com), by calling us at 1-800-487-2467, or visit your participating hobby shop to reserve any new product in this issue.

Happy Modeling!

# INTERMODAL MODELING MADE EASY

For speed, power, color and variety, nothing beats today's intermodal traffic. But before those mile-a-minute priority freights hit the high iron, there's plenty of work to be done behind the scenes at terminals big and small. While #1965 has a different owner, and no longer rules the main line, the durable GP60 still plays a vital role in keeping the trains rolling. From terminal scenes to bridge traffic, Walthers delivers everything you need to add intermodal to your modeling, including these great products:

**HO Cornerstone Kalmar Crane Kit**

#### A Note on Availability

At Walthers, we strive to provide you with the widest variety of product possible. In order to achieve this goal, we maintain significant inventory on site. Despite our best efforts to have every item you could possibly need in house at all times, it is not realistically possible to do so. For your convenience, we do our best to promote items that are in stock and to clearly label other items—those that are new and available for Advance Reservations or items that are low in stock and have Limited Quantities Available when the Flyer goes to press. At times, we experience a quick sell out on a particular item or unexpected demand for an item that we believed to have sufficient stock in house. In many cases, items can be back ordered for future delivery. In other cases, we are unable to secure more of a particular item. For the most up to date availability information, we encourage you to check [walthers.com](http://walthers.com), email us at [custserv@walthers.com](mailto:custserv@walthers.com) or call our Customer Service Team at 1-800-4-TRAINS. The 'Find It' feature on our website will help you find a Dealer in your area that may still have stock available for the item you desire.

Please know that we appreciate your support of both Walthers and your Local Hobby Shop. We are committed to making this Flyer a valuable part of your model railroading.

**Did You Know?**

Real railroads use a wide range of rail sizes to handle light or heavy traffic as needed. Branches and sidings receive lighter rail, while main lines and passing sidings get the biggest. Rail is measured in pounds per yard, such as 80-pound rail, and the bigger the number, the heavier the rail.
